This industry is extremely important to our national security and must not be allowed to wither and die. These subsidized imports must not be permitted to undermine this vital industry. Amazingly, the United States is even importing ferroalloys from the Soviet Union.

Is there anyone that can give us some assurance that we are going to address the problems of the ferroalloy industry in the near future?

Mr. ROSTENKOWSKI. Is the gentleman addressing a question to someone over here?

Mr. MILLER of Ohio. The question is, will hearings be held? What assistance can be given by the Ways and Means Committee?

The gentleman is the chairman of the committee that would need to handle the issue of subsidized ferroalloy imports that are flowing into this country. I am interested in having some commitment from the gentleman that at least we will have hearings, that we will look into the problem and do what we can to resolve that problem.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. FRENZEL. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio.

Mr. MILLER of Ohio. Mr. Speaker, I thank the gentleman.

Mr. ROSTENKOWSKI. Well, Mr. Speaker, if the gentleman will yield.

Mr. MILLER of Ohio. I will yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. speaker, I will be glad to consult with my subcommittee chairman to see just what he has provided for in his scheduling with respect to this problem that the gentleman points out, and if there are some steps he wants to take legislatively, I am sure that he will be in touch with us.

Mr. MILLER of Ohio. Well, that is hardly good enough as far as I am concerned.

Mr. ROSTENKOWSKI. Well, that is as much as the gentleman is going to get.

Mr. MILLER of Ohio. It probably is as much as I am going to get, but I attended the conference committee meeting last Thursday evening about 9:30, and the Senator from Kansas made a motion to bring up the ferroalloy issue again for consideration. I regret that there was an objection to doing this.

I am just looking for some assistance. We have only the gentleman from Illinois to turn to and we are looking for something that will be beneficial to keep those hundreds and hundreds of ferroalloy workers working.

The SPEAKER pro tempore. The time of the gentleman from Ohio has again expired.

□ 1720

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. BONKER].

Mr. BONKER. I thank the distinguished chairman and want to congratulate him and the gentleman from Florida [Mr. GIBBONS] and others who were responsible for negotiating this very difficult bill and bringing the conference report to the House floor.

This Nation is facing a very serious trade deficit that is now pegged at a staggering $130 billion for this year. This puts a lot of pressure on Congress to do something about the trade deficit.

We can do either one of two things. We can go for export promotion—and I might add that we are now engaged in intense negotiations in conference on the Export Administration Act to remove obstacles and expedite licensing procedures so that our industry can compete more effectively in what has become a fiercely competitive world market—or we can go down the path of protectionism.

This legislation was very tempting for many people who want protectionist measures to keep out imports. I think what has happened instead is that the conferees have brought us a report that is responsible, it is restrained, and it certainly advances the best trade interests of this country.

So for those who are concerned about free trade or fair trade, you can have both by adopting this conference report.

Mr. Speaker, going into the conference this bill had a lot of excess baggage; most of which, I am happy to say, originated in the other body. In almost all cases, the conferees acted responsibly by cutting blunt, import-restricting measures out of the bill:

First, a Senate proposal to impose prohibitive tariffs of ferroalloy imports was dropped by the conference;

Second, Senate-passed amendments to section 201 of the Trade Act of 1974, which would have dramatically relaxed injury standards, were deleted;

Third, another Senate amendment requiring the President to enter into negotiations to restrict world copper production was wisely defeated;

Fourth, a Senate proposal establishing an unreasonable pricing standard for imports from nonmarket economies for purposes of countervailing and antidumping investigations was excised;

Fifth, the House-passed sense of the Congress setting a fair import level for steel at 17 percent of domestic consumption was responsibly amended to give the President greater flexibility; and

Sixth, a 2-year limitation was placed on a provision in the Wine Equity Act, passed by both houses, allowing grape growers to bring unfair trade petitions against foreign wine producers.

At the same time the conference retained several important reforms that will make the trading system fairer and help expand U.S. exports:

First, the conference approved a responsible extension of the Generalized System of Preferences and gave the President authority to negotiate a free trade area with Israel;

Second, the conference endorsed a reciprocity bill that will increase the President's retaliatory powers under section 301 of the Trade Act of 1974, as a means of increasing his leverage in negotiations to lift unfair foreign barriers to U.S. investors and exporters of goods and services;

Third, conferees agreed to establish a new program in the Department of Commerce to promote exports of U.S. services;

Fourth, a House-passed provision requiring the steel industry to invest virtually all of its profits in the modernization of its steelmaking capabilities, in return for import protection was wisely approved;

Fifth, the establishment of an office in the International Trade Commission to help small businesses decipher the trade remedy process was endorsed by the conference; and

Sixth, new language expressly incorporating upstream subsidies within the definition of an unfair trade practice was approved by the conferees.

In sum, the conferees transformed what could have been a very damaging bill into one that this Congress can be proud of. It is both responsible and fair, and it deserves our support. The conference has demonstrated that we in Congress can act wisely and responsibly, even under the intense pressure of an imminent election.

I applaud the work of the conference and urge my colleagues to support the conference report.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the conference agreement and a provision in that agreement that will bring more jobs, more trade and less bureaucracy to the Pacific Northwest.

This legislation accomplishes these ends by creating a new customs district—called the Columbia-Snake Customs District—in the Pacific Northwest. I first proposed this action in a separate bill last April—and I believe it is critical if the Pacific Northwest is to realize its potential as an international trading hub.

Let me explain. To continue to grow as a trading center, the Pacific Northwest needs to offer our shippers, customs brokers, freight forwarders, and others the opportunity to work through just one customs office.

Right now, however, we cannot do so. Our region has literally been balkanized into three customs district and two customs regions, completely ignoring the natural geographic boundaries and commercial cargo routes of the Columbia-Snake System.

In fact, to look at the current customs district map, you would think that the ports of the Columbia-Snake System have no more connection with each other than New York City has with Portland, OR. For example, the Port of Lewiston, just over the eastern Washington border in Idaho is part of the Great Falls District and the Chicago region. The Port of Clarkston, which is directly opposite Lewiston on the Washington side of the Snake River, is part of the Seattle district and Los Angeles region.

Mr. Speaker, this problem is not purely academic. It is causing delays for shippers and Pacific Northwest businesses, creating extra work for customs officials, and cost the Government and the private sector money.

Let me provide a specific example. A shipment of grain is imported from Canada. It is loaded on barges at the Port of Lewiston in Idaho and then shipped down river, where it will be inspected and cleared in Portland. But there is one problem. The Port of Lewiston is in the Great Falls District and the Chicago region. So Portland customs officials must spend time coordinating the shipment's documentation with the Great Falls customs officials.

Such bureaucracy is illogical and unnecessary. But by modifying the existing boundaries, the Columbia-Snake River system will be identified by the Customs Service for what it truly is—a

unique, natural trading, and transportation system.

Mr. Speaker, the Columbia-Snake system needs and deserves a customs district that cuts needless paper shuffling, that can serve as a new marketing tool for exporters throughout the West seeking to tap Pacific rim markets, and that will recognize the area as a unique trade zone and transportation system. This provision achieves those goals.

Because it achieves these important goals, this provision has widespread and bipartisan support in the Northwest among my Northwest colleagues. All the Members representing the new district—Congressmen AuCoin, Foley, Robert Smith, Bonker, Morrison, Craig, and Hansen cosponsored the original measure I introduced. In addition, the six Senators from Oregon, Washington, and Idaho have expressed support for the measure.

Moreover, the Northwest maritime and trade communities are solidly behind the legislation. The Columbia-Snake Customs District is supported by the Pacific Northwest International Trade Association [PNITA], the Columbia River Customs Brokers and Freight Forwarders Association, the Pacific Northwest Waterways Association, and the Columbia-Snake Marketing Group.

Gary Conkling, president of the Pacific Northwest International Trade Association, testified in support of a Columbia-Snake Customs District before the Ways and Means Trade Subcommittee this past June. At that time, Mr. Conkling noted that "trade emanating from Boise is not linked to Chicago. It is linked to the Columbia-Snake corridor."

Mr. Conkling also emphasized the important point that the Columbia-Snake River system shows tremendous growth potential for the future, which justifies expansion of customs services in our region that will support that growth and foster more growth.

In short, this provision enjoys strong support among the Northwest congressional delegation and among the shippers and traders of the Northwest.

I commend and thank my colleagues on the Ways and Means Committee, particularly Chairman Rostenkowski, Chairman Gibbons, and the gentleman from Minnesota, Mr. Frenzel, who worked long and hard to reach an accord on this conference agreement and for including the Columbia-Snake Customs District as part of this agreement. I also wish to thank Senator Packwood of my home State of Oregon for his support of this important legislation in the conference.

I yield back the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Ohio [Mr. Regula].

Mr. REGULA. Mr. Speaker, first of all I want to congratulate the conferees on dealing with a very difficult topic. I recognize that putting together a bill such as this represents a compromise among many different groups and certainly it is a tribute to the conferees and their leadership that we are getting a bill at all.

In my opinion the bill will bring about trade expansion in the free world. This is essential if we are to have economic growth for all countries. As each country in the Free world experiences economic growth, the others will likewise have greater opportunities for expansion of their trade.

I also think the feature of the bill dealing with the remedies on countervailing duties and dumping are important because they strengthen the ability to ensure that there is fairness as well as freeness in our trade policy. There is a growing concern on the part of the American people that we are not getting a fair shake in the world of trade, that while we have for a long period of time been dedicated to free trade, that we have not done enough to ensure that it is fair.

I think that this bill takes a substantial step in that direction.

I am especially pleased to see much of the Steel Stabilization Act incorporated in this bill. I especially want to congratulate the chairman of the Ways and Means Committee, the gentleman from Illinois [Mr. Rostenkowski], for his leadership in getting a bill at all because without that effort we would not have the necessary enforcement tools that the President needs to achieve the goals of his decision on the International Trade Commission remedies. Thanks again to his leadership most of the provisions of the Steel Stabilization Act have been incorporated, which include modernization of the industry as the quid pro quo for getting some degree of restraint on imports.

Second, it provides for the retraining of workers, and this is important for those that are going to be faced with structural unemployment.

I think in the overall that the features of this conference as it relates to steel will result in an increase in jobs in the steel industry, will bring greater fairness to this industry, and will provide the necessary breathing room for the steel industry to modernize, to gain the ability to compete in the world marketplace in the future.

This, of course, is important for the continuation of the steel jobs, for the economic base of our Nation, and particularly for national security, because as we provide for the modernization of our steel industry we enhance the national security position of the United States.

I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. Coelho].

Mr. COELHO. Mr. Speaker I want to compliment the chairman of the full committee, the gentleman from Illinois [Mr. Rostenkowski], and the chairman of the subcommittee, the gentleman from Florida [Mr. Gibbons], for their outstanding work in regards to the Wine Equity Act. We all appreciate the work of all of the conferees but these two gentleman in particular understood what was trying to be done here, and that was that we not only wanted free trade, but we also wanted some fair trade, and that they were able to get this bill not only through the conferees but through the Senate process was a big victory for grape producers all over this country. California does benefit from it, but what I think most people do not realize is that there are a great number of grape producers in practically every State of the Union, now in 38 States. And this is a victory for all of them.

We are very indebted and appreciative of the chairman of the full committee and the chairman of the subcommittee.

I yield back the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from California [Mr. Thomas] a member of the Committee on Ways and Means.

Mr. THOMAS of California. I thank my colleague for yielding.

First of all, all of us understand that trade is cooperation. But I think it is also true that the area of trade legislation more so than any other area, is a little like trying to tapdance in a crowd. No matter where you go you are going to step on someone's toes.

Therefore I want to compliment both the chairman of the full committee and the chairman of the Subcommittee on Trade and the Members on my side of the aisle, with whom we had more than one disagreement, and the Members of the other body and the administration. I thought everyone carried on as though they really wanted a trade bill. And without that kind of an attitude it is very difficult to have a trade bill.

I want to reassure my colleagues that when this legislation deals with agriculture, whether it is written large or whether it is written small in terms of specialty agriculture, that in these trade bills we have a better understanding of agriculture in the United States than we have ever had before.

In the generalized system of preferences reauthorization, in the free trade area with Israel, and with its own separate recognition in the Wine Equity Act, specialty agriculture in the United States and agriculture in general concerns were noted and there was response.

I want to thank all my colleagues who participated in crafting this prod-

uct, the peoples' representatives served well and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Speaker, this is a good conference report that very much merits the support of the Members of the House. It represents a great deal of hard work by the conferees in the House and in the other body.

Like other Members, I would like to particularly express appreciation to Chairman ROSTENKOWSKI for his usual masterful job in trying to bring about the necessary compromises in the conference committee to bring back a report to the full Chamber. I am especially pleased as this conference report comes to the floor of the House to be a member of the Trade Subcommittee and to have the privilege of working under the chairman of that subcommittee, the gentleman from Florida [Mr. GIBBONS], without whom we would not have this product before us today.

In addition I would like to single out the gentleman from Minnesota [Mr. FRENZEL] who has been instrumental in the provisions of this bill. But far beyond that, he is a genuine resource, a national treasure, if you will, in the area of trade policy as the most influential member of our subcommittee on the minority side.

The gentleman from New York [Mr. DOWNEY] has taken a particular interest in several provisions of this bill, including GSP and the Israel free trade area, and it has been a pleasure for me to work with him.

In fact, I think all of the members of this subcommittee deserve some commendation for the work that they have done.

□ 1730

The work of the Trade Subcommittee is extraordinarily important to the Congress and to the country. We have many, many difficult, contentious issues which come before us. We are constantly striving to walk the fine line between free trade and protectionism, constantly striving to define what free trade is and what fair trade is.

That is a very difficult assignment.

I think the subcommittee discharges that responsibility well.

Mr. Speaker, I would not want to conclude without offering my special thanks and admiration to the staff of the Subcommittee on Trade and the full Committee on Ways and Means.

Whenever we are in a situation, as we were last week, where we are trying to put together a conference report on difficult, complex issues in a very short period of time, I come once again to admire the very, very admirable talents and dedication of the members of the staffs.

So I think they deserve special praise.

As I said, this is a good conference report.

Mr. Speaker, this represents a compromise in the best sense of the word among the competing interests in the commerce of the United States, the competing interests here in the House and certainly competing provisions in the House bill and the bill before the other body.

Mr. Speaker, it is hard for me to imagine how through the process of compromise, in a democratic, deliberative body like ours, we could have come up with a better product than we did. For that reason I heartily urge its support among all of my colleagues.

And so, Mr. Speaker, it gives me great pleasure to rise in support of the conference report before us today. For many of us on the Ways and Means Subcommittee on Trade, this omnibus trade package represents a hard-won compromise on a number of critical trade issues and springs from almost 2 years of solid work by our subcommittee and our dedicated chairman, Mr. GIBBONS.

For example, the subcommittee held 9 full days of hearings on the problems facing our domestic steel industry. H.R 6301, Steel Import Stabilization Act, is the outcome. It authorizes the President to implement and enforce those import restrictions announced in his September 18 steel program. More importantly, however, the Congress has taken historic steps to fill in the irresponsible omissions contained in the President's program that threaten the very long-term stability and revitalization of the steel industry that the President claimed was his goal in promising import restraints.

The Trade Subcommittee hearings documented critical problems emanating from worldwide excess steelmaking capacity, dilapidated domestic steel plants, critical underfunding of research and development of world-class steel making technology, surges in steel imports, and inadequate funding of worker retraining programs. The Congressional Budget Office estimates that reducing the share of the U.S. market held by steel imports over a 5-year period will raise the price in domestic manufactured steel and generate approximately $25 billion in funds to the industry. The President chose to advocate negotiated restraints on steel imports, yet he failed to tie the $25 billion to any kind of performance standards. With no linkage to modernization, no requirement for research and development and a total absence of any specific program to assist jobless workers in acquiring new and marketable skills, the President proposed to hand the taxpayer the check for $25 billion in assistance to the industry without requiring any assurances that at the end of the 5 years our steel industry will be any more competitive or our jobless workers graduated from government assistance program to the production line.

H.R. 6301 and the inclusion of its essential provisions in the conference report before us today represent an historic linkage of import relief to requirements that the industry reinvest substantially all of its cash in plant modernization and worker retraining. With respect to the future vitality of the steel industry and its workers in my area, the President's program ignored modernization and its direct effect on long-term job security for those workers fortunate to still have a job, and it ignored retraining for the jobless. I feel confident that the Congress, under the leadership of Chairman ROSTENKOWSKI, takes with this bill major steps to breathe new life and a brighter future into both the industry and its workers in my district in Ohio and nationwide. I also would like to note for the record that this landmark legislation closely parallels former Vice President Mondale's proposal to assist the steel industry and reflects his longstanding commitment to the meaningful revitalization of it.

My colleagues on the Trade Subcommittee have blazed new territory in another bill of enormous important to developing countries and to American industries and workers, the generalized system of preferences.

First, the GSP Renewal Act of 1984 breaks new ground in the advancement of international human rights through its linkage of trade preferences to respect for labor rights. If a developing country wants duty-free access to the American marketplace for its products, that country from now on will have to demonstrate that it is taking positive steps to respect the right of association and the right to organize and bargain collectively, to prohibit forced labor, and to establish acceptable conditions of work regarding minimum wages, working hours, and occupational safety and health as well as a minimum age for the employment of children. Each year groups and individuals concerned with international labor rights will be able to formally challenge before the USTR the designation of any particular country or some of its articles for duty-free treatment on the grounds that that country does not respect basic labor rights and treats its workers with contempt.

Second, H.R. 6023 makes progress toward establishing a systematic framework for graduating from the GSP Program those developing countries that are increasingly adept at exporting manufactured products that compete with our products. It provides for phasing out duty-free status after a developing country's per capita reaches the equivalent of $8,500 and it

caps the President's authority to waive competitive need limits.

A third important section of the conference report, authorization for the President to negotiate a free agreement with Israel, also ploughs new ground in bilateral trade negotiations. It is my intention in supporting the Israeli free trade agreement that it will enhance rather than supplant our current multilateral trading agreements. I strongly support the bill's provisions to address the problems of transshipment by other countries of their goods through Israel to the United States.

Among the miscellaneous trade and tariff provisions included in the conference committee are sections to amplify the public disclosure of information on imports reflected on manifests and a continuation of duty-free treatment for flat knitting machines and parts through December 31, 1988. In sponsoring these bills, I was pleased to note that the former bill will enable American companies to compete more effectively with imports and that the latter will be helpful in providing our domestic knitting industry with the machines it requires to modernize. It is my understanding that there is no domestic manufacturer of the flat knitting machine covered in this bill. With respect to the manifest information issue, both the House and Senate bills contained identical language requiring the U.S. Customs Service to provide greater press access to information concerning cargos imported into U.S. ports, and requiring that the name of the foreign shipper of the merchandise be included in the manifest.

The scope of access to manifest information was also the subject of litigation in *Twin Coast Newspapers, Inc.* v. *U.S. Department of the Treasury,* Civil Action No. 83-1113 (D.D.C.). Two consent orders and implementing regulations (49 Fed. Reg. 19952 (May 10, 1984) and 49 Fed. Reg. 23339 (June 6, 1984)) were issued in that case by the Customs Service subsequent to House passage of H.R. 3398 and consideration of the bill by the Senate Committee on Finance. Clarification of the relationship between Section 203 and the consent orders and implementing regulations is therefore necessary

As an original sponsor of section 203, I want to make clear what the original intent of this provision was and how it should therefore affect the consent orders and implementing regulations.

First, unlike the consent orders, section 203 of H.R. 3398 does not require that the importer or consignee in its biennial certification state reasons for requesting confidentiality for the importer's name and address and/or the identity of the shipper of merchandise to that importer. Second, section 203 requires the submission of the name of the foreign shipper which is not required by the consent orders. Section 203 does not, however, and was not intended to alter other requirements imposed by consent orders which, inter alia, permit greater access to manifest information than is affirmatively required by this provision.

Mr. Speaker, I believe the Members of the House can be pleased at the final result we have produced during a particularly difficult time. I urge expeditious approval of this conference report.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The gentleman [Mr. PEASE] yields back 1 minute.

Mr. FRENZEL. Mr. Speaker, I yield myself 1 minute.

To sum up, this omnibus trade bill conference report is calculated to be tilted more toward trade expansion than to trade-contracting protectionism. Even so, there is enough protectionism in it to remind all of us where the balance of power in the Congress is. The conferees avoided the worst of the protectionism pitfalls, and both legislation bodies showed courage in rejecting those pitfalls which were the subject of floor votes.

We have skated close to the open water of blatant protectionism which is the stuff of which trade wars are made. I hope we will be as lucky or as smart, in the future years in resisting our basest urges.

Mr. Speaker, I would like to echo the sentiments of the Members who have praised everyone who had anything to do with this bill.

If we are dishing out too many kudos, if we lavish too many congratulations on one another, I hope the House will realize that the conferees are presenting 2 years' worth of work of an important subcommittee in a single 1-hour shot. In fact, there is more legislation in this package than the Trade Subcommittee has otherwise processed since it was created in 1975.

The conference report is, in my judgment, an outstanding contribution which is worthy just this one time, of what would usually be extravagant praise.

Mr. Speaker, I yield back the remainder of my time.

● Mr. FLORIO. Mr. Speaker, I rise in support of the conference report on the trade bill.

Anyone who has any familiarity with the subject knows that the process of amending U.S. trade laws is slow and gradual. The bill before us today represents the first major revision of our trade laws in 5 years.

Thus, we should all recognize that the changes this conference report will make in current law have been thoroughly and carefully considered. This bill is not a reaction to concerns of the moment. Instead, it reflects more than 2 years of work on how best to deal with a growing number of very serious trade problems.

I am particularly happy that, for the first time, this conference report deals in a meaningful way with trade problems of U.S. service industries. The subcommittee I chair has been investigating these problems for more than 2 years.

World trade in services such as tourism, transportation, insurance, communications, data processing, and fiancial services has grown at an annual rate of 17 percent over the last decade—more than three times as fast as trade in goods. During this period, the United States has remained the world's largest service exporter.

Today, the majority of all new jobs created in the U.S. economy are in the service sector. The Commerce Department estimates that about 60 percent of the U.S. GNP is attributable to the services sector and that about 70 percent of the nonfarm work force in the United States is employed in the services sector.

All the news on services, however, is not good. Although the United States continues to dominate world trade in services, its position is being eroded more and more by other countries. In 1972, the United States accounted for 20 percent of all world trade in services; yet, by 1980 the U.S. share fell to only 15 percent.

Like U.S. merchandise exports, American service exports have also begun to decline seriously. Only a few years ago, America's surplus in services trade was large enough to offset our merchandise trade deficit. Experts now say that in just a few years the United States will have a deficit in services trade nearly as large as our deficit in merchandise trade.

There are two important reasons U.S. leadership in service industry trade is now being challenged. First, the governments of our major foreign competitors generals have done a better job than we have in providing business with information on world market opportunities and conditions. Second, in the absence of an international trade agreement on services, many countries are arbitrarily establishing protectionist barriers that discriminate against U.S. service firms.

To address these problems, the nations of the world need to negotiate an agreement on trade in services. U.S. efforts to initiate the negotiating process at the GATT level have had very limited sucess so far. Even after negotiations begin, it will be a long time before a services agreement can be implemented.

Thus, the bill before us will be needed in order to permit the United States to limit foreign access to the domestic service market, if appropriate, in order to promote fair services trade relations between the United

States and other countries. Finally, much better data is needed in order to understand more accurately the nature and problems of the service sector and to develop an effective trade policy.

U.S. service industries have sought trade in services legislation for several years. The conference report we are considering today has the strong support of the Committee on Energy and Commerce and the Committee on Ways and Means, both of which reported services legislation more than a year ago.

The conference report has two major parts dealing with trade in services. The first part would establish a service industries development program within the Commerce Department which would be responsible for advising U.S. service firms concerning world market opportunities and trends. It would also have responsibility for improving the Government's data gathering and analysis functions on services so that effective trade policy can be developed.

The administration has recognized the inadequacy of official data for a long time. The Work Program on Trade in Services approved by the administration's Cabinet-level Trade Policy Committee in April 1981, states that the lack of adequate service trade data is a major obstacle to U.S. efforts to develop service sector trade policy.

At our hearing on this matter witnesses from the Commerce Department and the Office of the U.S. Trade Representative [USTR] acknowledged that data currently available to the Government does not accurately measure the competitiveness of U.S. service firms in world markets—overall or by specific service industry. For example. The Commerce Department concluded over a year ago that data on the foreign operations of U.S. insurance firms was inadequate to permit the Government to develop a sound policy on international insurance issues.

The second part of the conference provision on services would amend section 301 of the Trade Act of 1974 to make it clear that the President has the same authority to deal with unfair trade practices in the services sector that he currently has in the good sector.

Under the conference report, the President is given authority to deny the issuance of what the bill calls "service sector access authorizations" to foreign service firms in retaliation for discrimination against U.S. firms. Service sector access authorizations are defined as being "licenses, permits," and so forth, issued under the authority of Federal law. Thus, under this new authority, the President could deny the issuance of licenses, for example, to Canadian or Mexican truckers in retaliation for discrimination against U.S. truckers.

Industry, the administration and most of Congress agree that this type of authority provides the best incentive for our trading partners to negotiate a meaningful international treaty concerning services and to protect our firms against unfair competition.

Mr. Speaker, we need these provisions to begin to re-establish fair trade in services for American firms. With almost three quarters of our workers and nearly two-thirds of our GNP attributable to the service sector, our economic future is greatly dependent on the health of our service industries. I, therefore, urge my colleagues to vote for this conference report.

Thank you.●

● Mr. CONABLE. Mr. Speaker, I support the conference report on H.R. 3398, but I do so more with relief than enthusiasm.

I am relieved because the legislation contains some very much needed amendments, notably an extension of the Generalized System of Preferences, or GSP. This extremely important program is scheduled to expire January 3, 1985—before the next Congress would have a chance to deal with it. So I am glad this conference report assures its continuation.

As I have indicated earlier, I would have preferred an extension longer than 8½ years, and I fear that some details of the program, under terms of the extension, may be flawed. But the leading negotiators for the House on this matter, the gentlemen from Minnesota and Ohio, Messrs. FRENZEL and PEASE, did an effective job of turning what could have been a disaster into an acceptable proposition.

There are a couple of provisions, however, that bridle slightly my enthusiasm about the conference report. For example, I am concerned about the language on steel. I understand the political necessity of dealing with the issue in this context; it would be expecting too much of the Congress to leave alone the President's new policy, announced September 18, 1984. I also understand the industry's vulnerability here; it has not been in the forefront of modernization and innovation efforts within our economy. Nevertheless, I do not believe the requirements relating to reinvestment and retraining are necessary or appropriate. I always am wary, in fundamental principle, of Government intrusion into operations and decisionmaking of business—even if, as sometimes happens, they ask for it. And I have more practical and specific concerns about the ability of Government to make sound assessments as to whether a company has committed substantially all of its net cash flow from carbon and alloy production to effective modernization. Additionally, the retraining requirements of the legislation are fuzzily worded, leaving too much to the discretion of Federal monitors, and not enough instruction, definition, or guidelines to the companies.

The conference report also contains changes in the definition of "industry" under our countervailing duty and dumping laws solely for wine producers and grape growers. I remain concerned about the GATT implications of this change, but the conference did succeed in narrowing the definition of grape growers to give greater emphasis to the connection with wine production, and the whole provision sunsets after 2 years. Thus, over the long term, the integrity of the industry definition in our trade laws should be preserved.

All of this is not to damn the conference report with faint praise. I do support it. It encompasses a wide range of improvements in our trade and tariff laws, including authority for a new free trade arrangement with Israel and provisions for a possible accommodation of a similar nature with Canada. It provides improvements in our countervailing and antidumping laws, and authorization of appropriations for the International Trade Commission, the Customs Service, and the office of our Special Trade Representative, as well as a host of noncontroversial adjustments in the tariff schedules.

In many respects, Mr. Speaker, this conference report represents a classic congressional compromise, in which virtually every interested party loses a little in order that all interested parties gain much of mutual value. In my 20 years of service in this body, I have participated in scores of conferences, all of which have struggled to reach compromise, or failed. This particular conference fits the mold perfectly. If I were completely happy with it, others would be too discontented, and the result would be failure for all. It is fitting, therefore, that such a conference should be my last.

Mr. Speaker, In a personal vein I would like to comment further, but briefly, on the work of my colleague, Mr. FRENZEL. As I leave the Congress, I want to express my thanks and gratitude to this member of the Committee on Ways and Means. He not only has pulled a strong oar but has steered a straight course in matters of international trade. He has been a prodigious worker and an articulate spokesman, and more than any of us, he has put forth a constantly strong effort in behalf of trade outreach. His realistic and enlightened work has, in my view, enhanced our national interests. I have depended on him and I am proud of the understanding and the detail which has characterized his labors.

I urge my colleagues to join me in supporting this legislation.●

● Mr. LONG of Louisiana. Mr. Speaker, I am disappointed in the results of the conference on the trade bill and I

will vote against the conference report.

For over 2 years now I have been warning that foreign governments in the energy-rich countries are subsidizing the inputs in the production of petrochemicals. The Reagan administration refuses to acknowledge this practice as a subsidy and will provide no remedy to U.S. producers who are hurt by these subsidies. The legislation that the House sent to conference contained what is called the "natural resource subsidy" provision, which is based on a bill I introduced last August. This provision was endorsed by a 26 to 2 vote in the Ways and Means Committee, but due to opposition from the Senate Republican conferees it was deleted from the bill in conference.

It is ironic that the reason why this provision did not survive conference was that the U.S. petrochemical industry has not as yet felt the full brunt of the unfair subsidies being provided to their foreign competitors. The energy-rich countries are just beginning to build petrochemical facilities and, only when many more of these facilities have been built, will U.S. companies feel the competitive pressure. At that time many more companies will have woken up to the threat caused by these subsidies and they will undoubtedly join in calling for relief. Unfortunately, by then much of the damage will have been done and it will be much harder to take effective action. The foreign plants have not as yet been built; once they are built it will be much harder to demand a change in the economic premises—for example, subsidies—relied upon in building them.

What we really are talking about here is the second wave of the "energy crisis." We have been subjected to cartel pricing of energy. Next we will see our petrochemical industry destroyed as the energy-rich countries utilize subsidized feedstocks to produce bulk, and later specialty, petrochemicals. First they'll cut prices and then, when they control the market, they'll revert to cartel prices.

This next crisis will be slow to come for many sectors of the petrochemical industry. Now the principal impact is felt by the U.S. producers of ammonia and carbon black. Which other petrochemicals will feel the impact next depends solely on which petrochemicals the energy-rich countries choose to produce. If the energy-rich countries are permitted to provide natural gas and petroleum feedstocks to these new petrochemical firms at a fraction of the market price, there are no limits to the share of the world petrochemical market that these energy-rich countries can capture. No U.S. company, no matter how efficient, can compete when his foreign competitor receives the key production inputs—which with petrochemicals comprise 50 to 70 percent of the total production costs—at subsidized prices.

When the full impact of this threat sinks in, we'll get action by the Congress on the natural resource subsidy issue. My only fear is that it will be too late to prevent enormous damage, perhaps irreversible damage, from being done to this vital industry. If you think there has been harm done by the decline of the U.S. steel industry, consider the fact that the U.S. petrochemical industry is substantially larger. This issue is far too important to Louisiana and other sectors of our country where petrochemicals are produced to stop now. I will continue to raise this issue until we adopt a strategy to meet this threat. In failing to adopt the natural resource provision in this bill, the Congress in no way has ratified the administration's skewed interpretation of the countervailing duty law; when Congress finally understands the issue it will speak loud and clear to reverse the administration's position.●

● Mr. ALBOSTA. Mr. Speaker, I would like to take a moment to express my sincere appreciation to the members of the House-Senate conference committee on the work they have done on the bill, H.R. 3398, that amends the trade laws and changes the tariff treatment with respect to certain articles.

I commend the conferees and their staffs—in particular, Mr. ROSTENKOWSKI and Mr. GIBBONS—for their assistance in reaching an agreement and securing passage of this legislation during the last remaining hours of the 98th Congress. Thank you.●

● Mr. SHUMWAY. Mr. Speaker, today the House will consider the conference report on H.R. 3398, the Trade and Tariff Act of 1984. While I plan to support this package as a whole—because it includes many important trade reforms—I remain strongly opposed to a provision that will provide for a permanent reduction in the duty on imported fresh asparagus air freighted to the United States and entered between the period September 15 to November 15.

The domestic asparagus industry is already being ravaged by foreign competitors which enjoy special Government treatment and employ dirt-cheap labor. This tariff reduction adds insult to injury. The following letter, authorized by the executive manager of the California Asparagus Growers' Association, details the legitimate concerns of the domestic asparagus industry:

CALIFORNIA ASPARAGUS
GROWERS' ASSOCIATION, INC.,
Stockton, CA, September 28, 1984.

Re: Conference Committee—Bills Proposing A Reduction In Duty On Certain Fresh Asparagus H.R. 6064, H.R. 3398, S. 2896.

DEAR CONGRESSMAN: California is the leading producer of domestic asparagus and the Association's membership includes a majority of the California producers of asparagus. The Association is confronted with a matter of dire importance. We sincerely hope you can provide some assistance to the domestic asparagus industry before it is too late.

The Honorable Congressman Frenzel of Minnesota introduced H.R. 4255 on October 31, 1983, calling for a reduction in the tariff on fresh asparagus entered by air from September 15 to November 15, from 25% to 5%. The Association immediately voiced its strong opposition to the bill, for reasons I will set forth below. It appeared to us that the H.R. 4255 was not moving, but we have now found that the asparagus tariff reduction provided for in H.R. 4255 has been amended into H.R. 6064, with a good number of other amendments, and has just passed the House. At the present time, we understand that there is no Senate counterpart or the bill does not contain the fall tariff reduction for fresh asparagus, and it therefore appears that a conference committee will immediately be considering the matter. S. 2896, however, is apparently the counterpart to H.R. 3398, and we suspect that an attempt will be made to therein inject the H.R. 6064 provisions.

To give you some idea of the seriousness of this problem, commencing in about 1965, the domestic production of asparagus began to decline due to loss of export markets to foreign competition. Having captured the foreign markets, the foreign producers have directed their attention to the U.S. market. Foreign producers enjoy cheap labor costs and since the cultivation of asparagus is labor intensive, they are virtually driving the domestic producers out of asparagus production, thereby resulting in significant losses of domestic employment. The situation is made even worse by incentives and other benefits provided by foreign governments to the foreign producers.

The present tariff rates to some extent, albeit small, offset the meager labor costs of the foreign producers. The present rates, however, do not provide adequate protection and should be increased.

We understand that it has been erroneously said that the reduced duty period of September 15 to November 15 would be at a time when domestic producers are not marketing fresh asparagus. To the contrary, growers in the Sacramento-San Joaquin Delta and the Imperial Valley areas of California produce, harvest, and sell asparagus during the September 15 through November 15 period. In fact, the very reason for production and marketing by the Delta growers during the subject period is in an attempt to alleviate the problem of Spring oversupply resulting from increased Spring imports from foreign producers. It is the intention of Delta growers to increase the fall production and marketing of asparagus in an attempt to save the industry. Thus, it is simply untrue that a reduction in duty during Fall has no impact on domestic producers. Reducing the Fall duty will, in effect, deprive domestic producers of any opportunity to alleviate or mitigate the damaging effect of Spring imports. Even in the absence of any domestic production during the pertinent period, canned and frozen domestic asparagus is being marketed during the September 15–November 15, 1984 period. Clearly, the proposed air shipments would directly compete with domestic frozen and canned products.

It has also been said that since the proposed tariff on fresh asparagus would apply only for costly air shipments, the amount of asparagus imported in such manner would

somehow be insubstantial. That is a proposition unsupportable by fact. First of all it should be recognized that it would be foolhardy to even attempt to ship fresh asparagus from many foreign producers, other than perhaps Mexico, to the United States by any method other than air since asparagus decays very rapidly. In fact, even domestic producers use air shipping. Thus, the limitation of the proposed tariff to shipments by air is in reality no limitation at all. In fact, we can safely predict that in order to take full advantage of the proposed tariff revision, virtually all asparagus from foreign producers other than Mexico will be shipped in large lots to reduce air shipping costs. Moreover, it would behoove even Mexican producers to take advantage of short distance air shipping costs to obtain the duty savings while at the same time increasing the length of time to market the product before it decays. Mexican imports continue to increase, thus exacerbating the problems of domestic growers. We can only surmise that the ultimate design of the instant bill will be to guarantee the final demise of domestic asparagus production.

The Association seriously questions the bona fides of any claim that the duty reduction would guarantee affordable supplies of fresh asparagus when domestic supply is unable to meet consumer demands. We are aware of no facts to support any claim that domestic producers cannot meet consumer demand.

It should further be noted that the proposed reduction is clearly a special interest measure which can and will lead to further special requests for reduction in duties, both on asparagus and other items as well. The thirst of foreign producers for reduction in duties, and their concomitant increase in profits, will not be quenched by the proposed reduction. In fact, passage of the subject revision will encourage further requests. In a sense, passage of the instant bill would be tantamount to opening "Pandora's Box". Furthermore, passage of the instant bill would reduce federal revenues which are already stretched to the limit.

Finally, and perhaps most importantly, some consideration should be given to the employees in the domestic asparagus industry who suffer the loss of jobs when domestic producers are driven to the cultivation of other crops. Additionally, the cultivation of asparagus provides work during periods of the year when other agricultural employment is simply unavailable.

The California Asparagus Growers' Association is strongly opposed to the proposed reduction and respectfully requests that the above be given careful consideration. One of the things that alarms us the most, however, is that we understand that the fresh asparagus tariff reduction was erroneously reported as a non-controversial item. To the contrary the measure has always been controversial. The manner in which the measure was, without any shape or form of due process, slipped from H.R. 4255 where we have gone on record in opposition, into H.R. 6064, unequivocally displays the controversial nature of the bill. With this in mind, it is greatly apparent that the domestic asparagus producer is not being treated fairly, either procedurally or substantively. The Association therefore would greatly appreciate anything you can do to rectify this grave injustice and see that the serious problems already confronting the American asparagus grower are not made so great as to cause the demise of the domestic industry.

Yours very truly,

WILLIAM P. DEPAOLI,
Executive Manager.●

● Mr. ROBERT F. SMITH. Mr. Speaker, I rise in support of this conference agreement. A provision included in this measure would create the Columbia-Snake River Customs District. Such a reorganization would facilitate consolidation and streamlining of U.S. Customs operations in the Northwest, bringing less bureaucracy, more trade and more jobs.

Currently, the Columbia-Snake System endures a patchwork of customs districts and regions that multiply the workload of both importers and exporters. By failing to account for the natural geographic and transportation conditions of this region, the U.S. Government is wasting not only the taxpayer's money on inefficient operations, but private enterprise funds as well. I believe it makes sense for traders to have only one customs office to deal with in the conduct of their everyday business.

When this illogical and unnecessary situation is corrected, traders in the Northwest will be much better prepared to increase their participation in Pacific rim markets. Expanded entry into these markets has been long recognized as fundamental to the economic recovery and growth of Oregon, Idaho, and Washington. Without a doubt, this change will bring more jobs and greater prosperity to the entire region.

This provision enjoys nearly unanimous support of the delegations from all three States. They have joined with many private and public interests in the region in calling for this improvement. Such widespread support serves to underscore the tremendous need for the legislation improving the ability of the Northwest to act as the international trading hub I know it will be.●

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 386, nays 1, not voting 45, as follows:

[Roll No. 454]

□ 1750

Mr. LUJAN changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CORRECTING ENROLLMENT OF H.R. 3398

Mr. ROSTENKOWSKI. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 372) to correct the enrollment of H.R. 3398, and ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 372

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 3398) to amend the trade laws, authorize the negotiation of trade agreements, extend trade preferences, change the tariff treatment with respect to certain articles and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(1) At the end of subtitle C of title II of the bill, insert the following:

SEC. 250. HOGS AND PORK PRODUCTS FROM CANADA.

The pork industry contributes $9,000,000,000 annually to the United States economy;

Over four hundred fifty thousand United States farmers produce pork for domestic and foreign markets;

United States imports of live hogs from Canada averaged one hundred thousand animals each year between 1970 and 1974, yet since 1981, such imports have increased yearly from one hundred forty-six thousand head to an estimated more than one million head in 1984;

The adverse economic effect of the recent surge in imports of Canadian hogs and pork products on United States pork producers has been estimated to be in excess of $500,000,000 in 1982 and 1983, and approximately $300,000,000 during the first five months of 1984;

The Canadian Government provides price support for hogs at a level equal to 90 per centum of the previous five-year average market price, indexed for changes in cash costs of production of hogs, which represented a payment of $6.54 per head to Canadian pork producers last year, and all but one provincial government of Canada also provide direct production assistance to support Canadian pork producers; and

It is essential that the administration act immediately to address the threat to the United States pork production industry caused by the dramatic increase in imports of hogs and pork products from Canada.

It is the sense of the Senate that the President should direct appropriate members of the administration, including the United States Trade Representative, the Secretary of Agriculture, and the Secretary of Commerce, to aggressively pursue discussions with the Canadian Government directed toward resolving this situation and use all available authorities in an effort to protect the economic viability of the United States pork industry and to promote free and fair trade.

(2) Amend the table of contents of the bill to reflect the amendment made under paragraph (1).

(3) Paragraphs (1) and (2) of section 126 of the bill are amended to read as follows:

(1) on or after April 1, 1985—

(A) item 606.93 is amended by striking out "8.3% ad val. + additional duties (see headnote 4)" and inserting in lieu thereof "2% ad val.",

(B) such item 606.93 is further amended by striking out "6% ad val. + additional duties (see headnote 4)" in the LDDC column, and

(C) item 911.29 of the Appendix is repealed; and

(2) on or after April 1, 1986, item 606.93 is amended by striking out "2% ad val." and inserting in lieu thereof "Free".

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the concurrent resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The concurrent resoltuion was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FRENZEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on H.R. 3398 just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill.

S. 540. An act to amend the Public Health Service Act to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes.

A message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill.

S. 2616. An act to extend the Adolescent Family Life Demonstration program.

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the concrrent resoltuion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

The message also announced that the Senate agrees to the amendments of the House to the amendment of the Senate to the bill (H.R. 5688) "An act to amend title 38, United States Code, to provide a cost-of-living increase for fiscal year 1985 in the rates of compensation paid to veterans with service-connected disabilities and the rates of dependency and indemnity compensation paid to survivors of such veterans, and for other purposes."

The message also announced that the Senate agrees to the amendment of the House with an amendment to a bill of the Senate of the following title:

S. 2301. An act to revise and extend programs for the provision of health services

and preventive health services, and for other purposes.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3942. An act to facilitate commercial space launches, and for other purposes.

The message also announced that pursuant to the provisions of Public Law 98-361, the Vice President appoints Mr. GORTON and Mr. GLENN as advisory members of the National Commission on Space.

CORRECTING TECHNICAL ERROR IN ENROLLMENT OF H.R. 6257, MOTOR VEHICLE THEFT LAW ENFORCEMENT ACT OF 1984

Mr. EDWARDS of California. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 373) to correct a technical error in the enrollment of the bill H.R. 6257, and ask unanimous consent for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 373

Resolved by the House of Representatives (the Senate concurring), That, in the enrollment of the bill (H.R. 6257) to amend the Motor Vehicle and Information Cost Savings Act to impede those motor vehicle thefts which occur for purposes of dismantling the vehicles and reselling the major parts by requiring passenger motor vehicles and major replacement parts to have identifying numbers or symbols, and for other purposes, the Clerk of the House of Representatives shall make a correction in section 512(a)(3) of title 18, United States Code (as added by section 201(a) of the bill), by striking out "not" and inserting in lieu thereof "carried out as".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. GEKAS. Mr. Speaker, reserving the right to object, I simply want to ask the gentleman from California if he would put into the RECORD how it was discovered that this technicality existed and to explain what it is, briefly.

Mr. EDWARDS of California. If the gentleman will yield, Mr. Speaker, last week both Houses passed a bill, H.R. 6257, to deter motor vehicle thefts. A part of the bill called for the forfeiture of motor vehicles and motor parts that had identification numbers that were altered or obliterted.

It was intended to exempt from forfeiture vehicles or parts whose identification numbers were obliterated by collision or fire or by legitimate activities of motor vehicle scrap processors and motor vehicle demolishers. Unfortunately, a "not" crept into the bill where it did not belong, and the language in the bill approved by both Houses has exactly the opposite effect of what was intended.

The concurrent resolution simply authorizes the enrolling clerk to correct this typographical error by striking out the offending word.

Mr. GEKAS. I thank the gentleman for his explanation.

Mr. Speaker, we concur in the discovery of this error, and we concur also in the way it is being resolved.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has been concluded on all motions to suspend the rules.

CONFERENCE REPORT ON S. 2616, EXTENDING THE ADOLESCENT FAMILY LIFE DEMONSTRATION PROGRAM

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and agree to the conference report on the Senate bill (S. 2616) extending the Adolescent Family Life Demonstration Program.

The Clerk read the title of the conference report.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROYHILL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

(For conference report and statement, see Proceedings of the House of October 5, 1984.)

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes and the gentleman from North Carolina [Mr. BROYHILL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report on S. 2616 contains a reauthorization of the Federal Family Planning Programs and of the Federal Adolescent Family Life Programs—titles X and XX of the Public Health Service Act. The report extends these authorities for 1 year only and at the funding levels from the House bill, which passed the House on suspension earlier this year.

The bill is a simple reauthorization of the Federal Family Planning Program. No changes in present law are made.

The bill also contains a minor change in the adolescent family life authority that was requested by the Senate. The change clarifies the program's unemployment services and makes a change in paperwork requirements. The change comes from the Senate bill and at the request of the author of the program—Senator DENTON. It is noncontroversial.

Mr. Speaker, the Federal Family Planning Programs have served the Nation well. They are effective health services in human and economic terms. This conference report does not authorize any changes in the program as it now exists.

The Adolescent Life Program—A new demonstration program—is reauthorized to allow the gathering of data on the program goals. Although a great deal of controversy surrounds this program, the conferees agreed to continue the authority for 1 year while oversight investigations go on.

The conference agreement is a practical compromise. I urge Members to support it.

Mr. BROYHILL. Mr. Speaker I yield 5 minutes to the gentleman from Illinois [Mr. MADIGAN].

Mr. MADIGAN. Mr. Speaker, I urge my colleagues to join me in supporting the conference agreement to reauthorize for 1 year titles X and XX of the Public Health Service Act, the Family Planning and Adolescent Family Life Programs.

The conferees agreed to a simple reauthorization of these two programs for 1 year only, with the understanding that hearings will be conducted in this House and in the other body during the next year before any substantial changes are made in either program.

I strongly believe that both these programs are important in addressing the problems of adolescent and post-adolescent pregnancy.

I urge my colleagues to support this legislation.

□ 1800

Mr. BROYHILL. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I rise to support the conference agreement to reauthorize the Family Planning Program and the adolescent family life demonstration projects for fiscal year 1985.

The Family Planning Program authorizes grants for voluntary family planning services designed primarily for persons with low incomes and for teenagers. Statutory language in the title that authorizes family planning specifically prohibits funding of programs that use abortion as a method of family planning.

The adolescent family life demonstration projects are designed to address the problems associated with adolescent sexual activity and pregnancy. Among the objectives of the projects are to encourage the prevention of premarital sexual activity and to support research projects in the areas of adolescent sexual activity, pregnancy and child rearing.

I urge my colleagues to join me in supporting the reauthorization of these programs for 1 year.

● Mr. LELAND. Mr. Speaker, I rise in strong support of the conference report accompanying S. 2616, reauthorizing title X and title XX of the Public Health Service Act and I commend the conferees for reaching a compromise on this vital legislation. A simple, 1-year extension of authority for these programs will allow services to proceed, while discussion of the scope and mandate of the programs continues.

Title X—the Family Planning Program and title XX—the Adolescent Family Life Demonstation projects are programs of particular interest and concern to me. Both of these programs are critical to the health and welfare of our Nation, and have been demonstrated to be effective and cost efficient. Further, I believe that both programs need the authority to proceed in an unrestricted, straightforward manner. I am looking forward, once again, to participating in the dialog surrounding these programs.

Mr. Speaker, titles X and XX are cornerstones of this country's public health policy and deserve our full support. Both of these programs enhance the quality of life, save lives and are our future. I strongly urge favorable consideration of this conference report.●

Mr. WAXMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BROYHILL. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and agree to the conference report.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the conference was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 540, NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL AND SKIN DISEASES ACT OF 1984

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and agree to the conference report on the Senate bill (S. 540) to amend the Public Health Service Act to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes.

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

(For conference report and statement see proceedings of the House of October 5, 1984, at page 30378.)

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to announce to my colleagues that the conferees on S. 540, the Health Research Extension Act of 1984 have resolved their differences and have reported a conference report to extend the research authorities of the National Institutes of Health for 2 fiscal years.

Our Nation's biomedical research effort is second to none in its scope and accomplishments. NIH has done more to expand human knowledge about the cause, treatment, and prevention of disease than any other research institution in the world.

The discoveries resulting from NIH activities have enabled dramatic improvements in the quality and effectiveness of health care services. The benefits of these activities in reducing human suffering and prolonging life are clear.

With the Congress' continued support, America's investment in health research will continue to produce generous dividends. The opportunities for major breakthroughs have never been better.

The conference agreement represents a necessary and forceful statement of support for the biomedical research programs of the NIH. It was the result of extensive subcommittee and committee consideration during the 97th and 98th Congresses. The legislation has broad support within the Congress and the scientific community. Without objection, I include a copy of a November 23, 1983, letter from James B. Wyngaarden, Director of the National Institutes of Health, in the RECORD at this point:

NATIONAL INSTITUTES OF HEALTH,
DEPARTMENT OF HEALTH & HUMAN SERVICES,
Bethesda, MD, November 23, 1983.

Hon. HENRY A. WAXMAN,
House of Representatives,
Washington, DC.

DEAR MR. WAXMAN: On behalf of the National Institutes of Health (NIH), I want to thank you for your efforts in achieving compromise legislation to reauthorize expiring NIH programs. The passage of appropriate reauthorization legislation is extremely important for us not only because it provides for continuation of critical biomedical research, but also because it reflects a reaffirmation of congressional confidence in us. I know that you have provided critical leadership in this process, and I am grateful for your support.

Sincerely yours,
JAMES B. WYNGAARDEN, M.D.,
Director.

Mr. Speaker, S. 540 contains a number of important provisions which I would like to describe for the benefit of our colleagues.

The statutory responsibilities of NIH under title IV of the Public Health Service Act have not been revised since 1944. These provisions have been in need of revision for many years in order to provide a consistent, comprehensive and coordinated authority for the National Institutes of Health and each of the individual national research institutes. The conference agreement adequately defines the responsibilities of the NIH and streamlines redundant or inconsistent authorities.

In addition, the legislation extends for 2 fiscal years the authorization of appropriations for expiring research authorities. These authorities include: first, the National Cancer Institute; second, the National Health, Lung and Blood Institute; third, the National Library of Medicine's Medical Library Assistance Act; and fourth, the National Research Service Awards Program.

The legislation also makes a number of important changes to promote the more effective and efficient management of the NIH. These changes include procedures for peer review of intramural research and research contracts, as well as establishment of a system for investigating reports of scientific misconduct.

Mr. Speaker, a major concern of the House has been NIH resistance to placing serious emphasis upon the support of research related to the prevention of disease. Yet research on prevention holds the greatest promise of one day reducing the incidence of a wide range of illnesses and warrants high priority within this Nation's research agenda.

As a preliminary step toward encouraging the national research institutes to place greater emphasis on this

aspect of the research spectrum, the conferees have established new positions of Associate Director for Prevention Research within the National Cancer Institute, the National Institute of Child Health and Human Development and the Office of the NIH Director. A similar position is already in existence within the National Heart, Lung and Blood Institute.

The new Associate Directors for Prevention should be selected from among the Nation's most outstanding prevention and public health professionals. They should not be appointed from current NIH officials who have little or no background in the prevention field. Each Associate Director should devote full time to prevention related activities and not have significant responsibilities for other nonprevention activities. The principal responsibility of the Associate Directors should be to insure that research regarding the prevention of disease is a high priority of their respective institutes. With respect to the Associate Director for Prevention within the Office of the NIH Director, this responsibility includes the activities of the entire NIH.

The Associate Directors are to assure that the research plans of each institute include sections dealing with such prevention-related research as investigations into the epidemiology of disease, studies of the etiology of diseases—including the effect of diet and other personal habits on the development of disease, and the effect of environmental factors, including air, water, radiation, and toxic substances, on the development of disease—research into immunizations against disease, studies of the means to preclude the development of disease through changes in personal habits and environmental factors, and studies of methods for, and the cost effectiveness of, population screening programs. Each Associate Director should submit recommendations annually to the Director for the specific activities and resources required to carry out the institute's prevention-related activities.

Mr. Speaker, one of the most important provisions of S. 540 is the establishment of a new research institute, the National Institute of Arthritis and Musculoskeletal and Skin Diseases. Creation of an arthritis institute has been a special interest of the distinguished chairman of the House Rules Committee, Mr. PEPPER. Over many years of public service Congressman PEPPER has carefully studied the progress of arthritis research in this country and at his urging the Energy and Commerce Committee voted last year to expand the Federal commitment to arthritis research through establishment of a separate national research institute.

The conference agreement also includes provisions to define the circumstances under which research involving living human fetuses may be conducted. The agreement has been worked out with Senator HATCH and Senator DENTON. It provides clarification that fetuses outside the womb may be exposed to no added risk and that fetuses that are to be aborted may be exposed to only the same type of risk to which fetuses that would be carried to term may be exposed. That has been the standard for almost 10 years at NIH, and the bill clarifies what some groups have maintained is unclear in the regulations. The legislation also provides for a 3-year moratorium on the Secretary's ability to grant a waiver of risk standards and for a study of such waivers.

This issue has been a controversial one for a number of years in the Congress. Some groups have alleged that NIH has misused its funds and is conducting unethical research. Others have suggested that unscrupulous doctors urge abortions on unwilling patients just to have more research subjects. Still others have said fetal research is unnecessary.

There is no evidence to support any of these allegations.

In 1974 the Congress adopted a moratorium on research involving fetuses and commissioned a panel of ethicists and scientists to study the same issue. That study resulted in the present regulations on protection of human subjects, under which NIH has been operating for almost 10 years.

During that time, NIH has done much to improve the lives and chances for life of fetuses and low-birth-weight babies, and much of that improvement has been the direct result of fetal research. During the same period, those who oppose fetal research have been unable to document any charges of abuse or misuse of funds. The reports of strange experiments or objectionable practices have been of research conducted without Government support or outside of the United States or of research that was never conducted at all.

The research that has gone on has brought hope of life and health to millions who might never have lived or breathed without the medical advances that have resulted from research on pregnancy and fetal growth. Prematurity, fetal lung distress, Rh factors—all have killed infants in years past, and all are under investigation by scientists whose only tool to save lives is research involving fetuses.

I would like to insert at this point, the statement of policy on fetal research from the American Academy of Pediatrics, as illustrative of the importance of the issue.

[From Pediatrics, Vol. 74, No. 3, September 1984]

FETAL RESEARCH

In the past several decades, we have witnessed astounding improvements in the health of infants and children as a result of successes in translating knowledge derived from laboratory and clinical research into effective therapies for the fetus and newborn. Improvements in the survival and reduction in newborn suffering would not have been possible without direct evaluation of the safety and efficacy of these therapies in the pregnant woman and fetus. For example, work done with pregnant women and their fetuses has led directly to the current Rh screening programs and the use of Rhogam, and has resulted in a marked decrease in pregnancy wastage and newborn morbidity due to erythroblastosis.

The outcome of thousands of pregnancies has been improved as a result of the evaluation of fetal lung maturity by lecithin-sphingomyelin ratio (L/S ratio) and the administration of glucocorticosteroids to enhance lung maturity in infants at risk for hyaline membrane disease. Again, in these studies validation of normal developmental profiles and evaluation of safety and efficacy were required.

Our current success in monitoring pregnancy outcome is based on the safe evaluation of normal growth and our ability to detect adverse genetic and environmental influences in the developing fetus. We now can recognize fetal hypoxia during pregnancy and at delivery by knowledge of fetal heart rate profiles obtained by fetal research. Even the effects of noninvasive measures such as maternal bed rest and improved nutrition on fetal outcome in the pregnancy complicated by maternal hypertension must be assessed by continued fetal research.

Modern ultrasound has brought another dimension to the early diagnosis of major malformations. Defects such as diaphragmatic hernia can now be diagnosed prenatally to prepare physicians for early postnatal intervention. There is the promise that ultrasound will permit definition of defects amenable to surgical correction or therapy in utero. Fetuses with heart failure and hydrops secondary to congenital heart block have been treated with maternal digoxin administration. Progress likely will be made in the intrauterine correction of anatomic defects such as genitourinary obstruction and hydrocephalus.

Advances in genetics made possible by fetal research permit the early diagnosis of a wide range of genetic disorders and the more fundamental promise of treatment and even cure of genetic diseases that currently result in death and disability. The diagnosis of sickle cell disease and thalassemia by DNA hybridization techniques is routine. α-Feto-protein is available for prenatal diagnosis of anencephaly and spinal bifida. Fetal research, however, is essential if further advances are to occur in diagnosis, early detection, and treatment.

Although we have seen significant progress, major problems remain. Low birth weight remains a leading cause of mortality and long-term morbidity in infants and children. Affected families may suffer great financial expenses and long-term emotional burdens. The development of safe methods to evaluate and prevent low birth weight requires the investigation of safe and effective interventions during pregnancy. Although we endorse the use of every available means of testing these therapies in the laboratory and in experimental animals, safety and efficacy in the human must ultimately be defined in the human.

Obstetrics and pediatrics are on the brink of a therapeutic and technologic explosion—

new technologies such as nuclear magnetic resonance (NMR) and refinements in ultrasound will permit the noninvasive study of fetal metabolism and anatomy in health and disease. Gene therapy will offer the possibility of cure of disorders such as the hemoglobinopathies and phenylketonuria. The ultimate beneficiaries of fetal research will be the mothers, fetuses, and infants of the future.

The American Academy of Pediatrics emphasizes the need for continued improvements in maternal and infant health through the safe and effective introduction of new therapies and methods of assessing risk. We endorse the recommendations in Research on the Fetus, a report by the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research.[1] These recommendations amplify and supplement the original 1975 Code of Ethics for the Use of Fetuses and Fetal Material for Research.[2]

Research may be defined as the careful, systematic, patient study and investigation to discover or establish facts or principles. Nowhere in medicine will the discovery of new facts of principles have more relevance to the prevention of disability and disease than in fetal and newborn medicine. The American Academy of Pediatrics supports the need for research to increase knowledge and improve care of the fetus and newborn infant.

Committee on Research, 1983-1984:
MOSES GROSSMAN, MD, *Chairman.*
ROBERT L. BRENT, MD.
ROBERT A. HOEKELMAN, MD.
ROBERT C. NEERHOUT, MD.
ROBERT W. MILLER, MD.
ROBERT H. PARROTT, MD.
JAMES M. SUTHERLAND, MD.

Liaison Representatives:
LAWRENCE M. GARTNER, MD.
ROBERT P. KELCH, MD.
PAUL MCCARTHY, MD.
JOSEPH B. WARSHAW, MD.

I believe that the regulations under which NIH has been operating since the 1974-75 study have been appropriate and effective. If anything, the regulations have been too proscriptive, have limited research too severely, and have driven valuable scientists out of the NIH.

The legislation before us does not create new barriers to research: Indeed, in large part, the legislation places in statute the practices of the NIH and the regulations that have guided those practices. I do not believe that any of the language adopted here will have an effect on research that is ongoing at the NIH; nor do I believe that researchers need fear that the NIH will be forced by political considerations to turn away from valuable research programs.

In one particular area, however, this language does make a substantive—if temporary—change in the status quo. Under present regulations, the Secretary is allowed to waive restrictions if the applicant's Institutional Review Board, the Advisory Council of the appropriate NIH institute, and a specially convened Ethics Advisory Board deem it necessary to do so. Under this legislation, the Secretary will be unable to grant such waivers for a period of 3 years. During that time the IRB review and the Advisory Council review, and the Ethics Advisory Review may certainly go on, but the Secretary may not actually grant a waiver before October 31, 1987.

This moratorium comes at the request of the Senate. It was not contained in the House-passed bill, and I do not believe that it is necessary. The Senate, however, did insist on the provision and, given the time-limited nature of the moratorium, I believe that it is a restriction that can be endured while tempers cool and rhetoric dies down. It is clear from the statutory language and the statement of the managers that the Secretary will be able to exercise her authority to waive the regulations again in 1986 without further Congressional action.

I am concerned, however, by the policy behind this restriction. The 1974-75 study considered the issues of waivers in detail, and I find its examples compelling. Let me quote from one part of the study:

In the case of congenital rubella syndrome, descriptions of the condition (which comprises congenital heart disease, cataracts, deafness, and mental retardation) and its etiology (maternal rubella infection during pregnancy) were drawn from research on the living child and material from dead fetuses. Attenuation of the rubella virus for vaccine purposes was accomplished in tissue culture using nonhuman cells. Vaccine trials were conducted on adults and children. The vaccine was found safe and effective and it was licensed in 1969, 28 years after the congenital rubella syndrome was first described.

No research on the living human fetus was required to develop the vaccine. A question remained, however, as to the safety of administering the vaccine during pregnancy or to women in child-bearing years. Should a pregnant woman, without immunity to rubella, be vaccinated to prevent the risk to the fetus that would ensue if she contracted natural rubella? Some experimental animal models for the rubella condition had been developed, the rhesus monkey being the closest one to the human. Accordingly, pregnant monkeys were inoculated with either rubella virus or the vaccine virus. Subsequent studies showed that five of six monkey fetuses whose mothers received slightly attenuated rubella virus were infected, but none of the six monkey fetuses whose mothers received vaccine virus was infected. Thus, the animal model suggested that the vaccine virus did not cross the placenta and was safe to administer during pregnancy, although other vaccine viruses were known to cross the human placenta.

Human studies were then undertaken. Because of the potential risk to the fetus, women requesting therapeutic abortion were employed as subjects. These volunteers received the vaccine and underwent the abortion 11 to 30 days later. Examination of tissues from the dead aborted fetuses showed that, *in contrast to the results in monkeys, the vaccine virus did cross the human placenta and infect the fetus. On the basis of this research* involving the fetus in anticipation of abortion, as well as subsequent reports of damage to the fetus following accidental rubella vaccination during pregnancy, *administration of rubella vaccine to pregnant women or women who might become pregnant within 60 days of vaccination is proscribed.* [Emphasis added.]

This research was carried on in 1969, before the present regulations were in place. If this research were now to come to the NIH for funding, I believe it would require a secretarial waiver of risk standards, since the risk to the fetus is unknown. If this research were to come to the NIH for funding during the proposed moratorium on the Secretary's authority to grant waivers, it could not be approved.

Such restrictions are dangerous. Without the 1969 study, we might have had an epidemic of blind, deaf, and retarded rubella-syndrome babies, babies whose well-intentioned mothers were only going by the best—if mistaken—advice of their doctors on how to protect their pregnancy.

During the next 3 years there will be a multitude of new drugs and therapies introduced in American medicine, many of them to be used by pregnant women. Without secretarial waiver authority, NIH will be unable to fund research on the effects of such drugs and therapies on fetuses or pregnant women. I trust that the medical community will be cautious in its approaches during the time when we must remain ignorant of new products' effects on pregnancy, I hope that no new epidemics of birth defects will come to haunt those who insist that we halt testing.

Moreover, a number of new therapies—for diabetes, for spinal cord damage, for prematurity, for Alzheimer's disease and for retarding conditions—are on the horizon. During the 3 years of the moratorium, many of them may be left unfunded and unresearched as we explore a subject already studied and resolved by a government panel on ethics.

Such restrictions are also unnecessary. The waiver authority that is now in place has been used only once—to produce the diagnostic device for sickle cell anemia that is now the leading method for detecting the disease and other in-born genetic defects. Such detection leads not just to the ability for parents to elect to end a pregnancy that might result in pain, suffering, and death for the child. Such detection also leads to further

[2] AAP Task Force on Pediatric Research, Informed Consent, and Medical Ethics: AAP Code of Ethics for the Use of Fetuses and Fetal Material for Research. Pediatrics 1975; 56:304.

research on the disease, its treatment, and its eventual prevention.

During the 3-year moratorium on the Secretary's waiver authority, the newly devised Biomedical Ethics Advisory Committee of the Biomedical Ethics Board is to study the nature, advisability, and biomedical and ethical implications of the waiver of risk standards. I would emphasize that the charge to this committee is not to redo the entirety of the 1974–75 study. The question before this committee is not fetal research at large, but the very specific issues of research that involve unknown or greater-than-minimal risk to the fetus.

This subject was considered extensively by the previous study. I trust that the committee will not consider this congressional request for a second look to be the equivalent of a remand in search of a different result. The legislation before us does not imply dissatisfaction with the 1974–75 study or the regulations that have grown out of it. (Indeed, the waiver regulations are intended to be automatically reinstated in 3 years, whether the committee has completed its review and made recommendations or not.) I believe that the regulations have functioned well and that the primary failing of the Secretary's administration of them has been an unwillingness to appoint an Ethics Advisory Board to implement them fully. In 3 years' time, after full and evenhanded review, perhaps the Secretary will be willing to proceed with the responsibilities to pursue research ethically and without regard to purely political pressures.

Finally, let me add that, although this moratorium is temporary, I believe that the Congress' heavyhanded intrusion into this area is not just dangerous and unnecessary, but also a precedent that we should carefully avoid in all future legislation to fund research. We as politicians, are not medical doctors or ethicists. Few of us have disabled children or life-threatening diseases. To tell scientists to turn away from their studies in this instance is not far removed from censorship, from intrusions into academic freedom, from burning a book. It is sometimes politically dangerous to be in favor of free investigation. It is always scientifically dangerous to be opposed to it.

Mr. Speaker, support of S. 540 will establish health research as among the highest priorities of the 98th Congress. An effective biomedical research program will lead to a healthier, more productive population.

I urge each Member's support for this important legislation.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today, Members of both the House and Senate have the opportunity to support legislation which provides for the continuation and improvements to the legislative authority for the foundation of our Nation's biomedical research activities. The conference report on S. 540 provides for the reauthorization of the National Cancer Institute and the National Heart, Lung, and Blood Institute and makes several very important changes to the research activities at the National Institutes of Health.

S. 540 maintains the provision of the House-passed bill which provides for the establishment of a National Institute of Nursing. As the author of the original amendment establishing the institute, I want to compliment the conferees on S. 540 for the inclusion of this provision within the conference report. The National Institute of Nursing will bring nursing research into the mainstream of scientific investigation, allowing for closer interaction with research in other health care disciplines.

S. 540 also provides for a National Institute of Arthritis and Nusculoskeletal Disease. This proposal has been a part of NIH reauthorizing legislation for the past 4 years and will result in the enhancement of research for this very debilitating disease.

The conferees have tried very hard to meet the needs of all individuals in drafting language on fetal research. The conferees agreed to a moratorium on the granting of waivers under the NIH fetal research regulations for 3 years and required the newly established Biomedical Ethics Advisory Committee to study the biomedical and ethical implications of granting fetal research waivers. The legislation also assures that the determination of minimal risk for the fetus to be aborted is the same for the fetus going to term. I believe this language satisfactorily addresses the fetal research issue, while providing a continuing forum for continued discussion of this difficult issue.

In addition, the conferees on S. 540 have minimized management directives and line-item authorization levels within the bill. The conference report on S. 540 also very clearly maintains the Secretary of HHS's authority under section 301 of the Public Health Service Act to conduct and fund biomedical research. This authority has been the basis of the success of the Federal Government's biomedical research endeavors, and I believe this legislation strengthens this authority.

In summary, I urge my colleagues to join me in supporting the conference report on S. 540. This legislation will provide for the continued stabilitiy of federally funded biomedical research.

Mr. WAXMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Alabama [Mr. SHELBY].

Mr. SHELBY. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of the conference report to S. 540, a bill to reauthorize the expiring authorities of the National Institutes of Health for 2 years. The bill sets a high priority on research related to the most common disorders and diseases affecting our citizens. The bill establishes a new Institute in NIH on arthritis and musculoskeletal and skin diseases. Also, a new Institute of Nursing is created.

Mr. Speaker, this conference report maintains the strong congressional commitment to the internationally acclaimed research activities of NIH. The ongoing biomedical research community at NIH has operated with integrity and distinction, and relatively free to respond appropriately to scientific needs as they develop. The professionals at NIH deserve the vote of confidence and the recognition of their expertise this bill accords.

Significant agreements were made in several areas, and I am pleased that compromises were reached on the issues of establishing a Biomedical Ethics Advisory Committee, and placing a moratorium of fetal experimentation. The work at NIH is simply too important to the vitality of our national biomedical research activities not to be reauthorized this year.

Some of my colleagues will recall my endorsement, particularly, of a component of the House-passed bill which authorized the creation of 25 centers of disease prevention and health promotion. In an era of increasing awareness of good health combined with the rising costs of illness, disease prevention efforts will serve a natural and cost-efficient purpose. While this conference report deletes the centers' provision, I am assured that similar Senate-passed legislation on this issue will be brought before the House for approval soon.

The conference report does retain a strong financial commitment to the cause of cancer research and prevention and the legislation reauthorizes the National Cancer Institute at funding levels of $1.2 billion in fiscal year 1985 and $1.3 billion in fiscal year 1986. These levels provide a justified budget increase to demonstrate our national commitment to fighting the public's No. 1 dreaded disease. As the disease Americans fear most, any progress toward finding a cure for these dreaded diseases is positive progress.

Mr. Speaker, this conference report is a good compromise—and a good product. It gives the scientific and medical community at NIH an encouraging and approving sign with which to carry on the outstanding biomedical work under way. I urge my colleagues' approval.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the

distinguished ranking member of the Energy and Commerce Committee [Mr. BROYHILL].

Mr. BROYHILL. I thank the gentleman for yielding to me.

Mr. Speaker, I urge my colleagues to join me in supporting the conference report on S. 540. This legislation represents a bipartisan agreement between the House and Senate conferees which provides for an extension of the research authorities of the National Cancer Institute and National Heart, Lung and Blood Institute and the establishment of the National Institute of Arthritis and Musculoskeletal Disease and the National Institute of Nursing.

The conference report on S. 540 represents the first time in the past two Congresses that the House and Senate have been able to reach an agreement on the reauthorization of this important agency. Funding levels in S. 540 in most cases represent a reduction in the authorizations in the House-passed bill. In several cases, the funding levels in S. 540 are actually lower than the appropriation levels in the House and Senate-passed fiscal year 1985 appropriation bills.

The language in S. 540 concerning fetal research has been drafted to meet the concerns voiced by many Members of this body. The legislation provides for a prohibition of fetal research on living nonviable human fetuses exutero and only allows fetal research that improves the chances of survival of the fetus if viability is in question. The legislation includes a statement which assures that the determination of minimal risk is the same for the fetus going to term as it is for the fetus to be aborted. The statute also includes a 3-year moratorium on the regulation, which provides for a waiver of fetal research regulations dealing with risk, while the newly established Bioethics Advisory Committee studies the waiver issue and provides recommendations.

For these and many reasons, I urge my colleagues to join me in supporting this legislation. Your vote will ensure the continued success of our Nation's biomedical research efforts.

Mr. Speaker, at this point in the RECORD, I include a summary of the NIH conference report:

SUMMARY OF NIH CONFERENCE REPORT

The conferees agreed that the rewrite in the House-passed bill of the authorities of the National Institutes of Health under title IV of the Public Health Service [PHS] Act largely be maintained. Included in several places of the redraft of the law are statements that refer to Section 301 of the Public Health Service Act which provides the Secretary with the authority to fund and carry out biomedical research. The authority in Section 301 is in no way limited by the new authority in title IV.

The rewrite of title IV of the PHS Act provides specific authority for the NIH Institutes and their directors, the Director of NIH, the report of the Director, and the Institutes' directors. Unlike the House-passed bill, the NIH Advisory Board is not created in statute. The composition of the Institutes' Advisory Council have been revised so that two-thirds of the members be representatives of health and scientific disciplines which may include public health, behavioral of social scientists.

Other major revisions to the House-passed bill include:

(1) *Authorization Levels.*—See chart below:

(2) *Fetal Research.*—The House-passed bill contained language which would restrict fetal research on fetuses to be aborted unless the fetus would be subjected to minimal risk and the research is the only way to obtain important biomedical knowledge. The House bill also provided for a waiver of the fetal research restriction when the risk is unknown and the research is the only way to obtain important biomedical knowledge.

The conferees have agreed to not codify the NIH fetal research regulations, therefore, not bringing in question their validity. The legislation provides for a prohibition of fetal research on living non-viable human fetuses ex-utero and only allows fetal research that improves the chances of survival of the fetus if viability is in question. Research that poses no risk to the fetus is permitted for both of these groups if it is the only way to obtain important knowledge. The legislation includes a statement which assures that the determination of minimal risk is the same for the fetus going to term as it is for the fetus to be aborted. The statute also includes a 3-year moratorium on the regulation, which provides for the waiver, while the newly established Biomedical Ethics Advisory Committee described in (#10) on the next page studies the waiver issue and provides recommendations.

(3) *Nursing Institute.*—A National Institute of Nursing as in the House-passed bill is established.

(4) *Prevention.*—The provisions in the NIH bill dealing with prevention have been revised or eliminated, with the agreement that the House consider S. 771, which provides for 13 prevention centers funded by the Public Health Service. Therefore, the prevention centers in the NIH bill have been dropped and Assistant Directors for prevention are established at only three Institutes [NCI, NHLBI, NCHHD]. An Associate Director for Prevention at the NIH level as established in the Senate bill has been incorporated into the NIH bill.

(5) *Cancer Centers.*—The stipulation that 55 Cancer Centers be funded is eliminated.

(6) *Disease Centers, Data Systems, Clearinghouses.*—The conferees have agreed that the authorization of appropriations for disease centers, data systems and clearinghouses in current law be removed in an effort to delete all line-item authorization level from the NIH bill. Authority for these activities remains in the legislation.

(7) *Arthritis Institute.*—The Senate language establishing a new Arthritis Institute is included in the bill.

(8) *Secretary of HHS Authority.*—The authority of the Secretary to reorganize or abolish Institutes is reinstated in the bill.

(9) *Interagency Committees.*—The interagency committees established in both the House and Senate bills (on spinal cord injury, learning disabilities, and lupus erythematous) are included but all are time-limited and not established as permanent authority.

(10) *Biomedical Ethics Advisory Committee.*—The House bill established a Presidential Commission on Genetic Engineering, while the Senate bill provided for the Congressional Office of Technology Assessment (OTA) to establish a bioethics advisory board. The conferees have proposed that an independent body similar to the OTA be established to address these issues. The Board of this body made up of 3 members of the House and 3 from the Senate would appoint a bioethics commission to study issues including genetic engineering and fetal research. An authorization of appropriations is provided for FY 1985–87 at $2 million, $2.5 million and $3 million respectively.

(11) *National Research Service Award.*—The conferees have proposed that 1% of these awards be granted by the National Center for Health Services Research and be devoted to health services research and primary care.

(12) *Health Effects of Nuclear Energy.*—The legislation contains a provision for the establishment of a research center to study the health effects of nuclear energy. Funding is authorized at $2 million. The legislation also includes a provision that establishes a cancer screening center for individuals exposed to nuclear fallout in Nevada.

SUMMARY OF NIH CONFERENCE

[Authorization levels in millions]

	House	Senate	Conference
National Cancer Institute:			
1985	$1,400	$1,057	$1,248
1986	1,504	1,110	1,345
National Heart, Lung and Blood Institute:			
1985	818	655	820
1986	936	688	870
National Research Services Awards:			
1985	220	205	220

Mr. O'BRIEN. Mr. Speaker, I rise in support of the conference report on S. 540, the Health Research Extension Act, and in particular, that section of the bill creating the National Institute of Nursing.

The conferees are to be congratulated for their forward-thinking in providing for the long overdue upgrade of the nursing profession which the creation of the NIN accomplishes.

I specifically want to commend the chairman of the Subcommittee on Health and the Environment of the Energy and Commerce Committee, Mr. WAXMAN of California, and the ranking Republican of the subcommittee, Mr. MADIGAN of Illinois, for their perserverance over the past year which has resulted in the new Institute.

In my view, Mr. Speaker, the new Institute nicely dovetails with the National Institutes of Health family of professionals who are dedicated to research on ways and means to improve the quality of health care. The NIN, as part of that family, will focus its research on the care part of that system.

Care research is a necessary part of the totality of research funded by the American taxpayer for the benefit of all Americans.

I expect nursing research will concentrate on prevention of diseases, promotion of health care, insuring the proper application of health care, teaching patients to cope with disease, and on patient recovery.

There may have been in the past an assumption that such goals were acquired from on the job training. Our late 20th century medical care system is too complex, too sophisticated, and too rapidly changing, to leave the care part of the health care system to chance. With the creation of NIN, there is congressional acknowledgement that nursing care and research into nursing care has been overlooked. That has now been changed.

The institute will be charged with the responsibility for undertaking research that takes into account the fact that nurses require an ever-increasing knowledge, understanding, and overall sophistication to achieve the professional standards of competence and excellence which we have come to expect from the total medical system in the United States. The Institute will provide a forum wherein medicine will be translated into English. In other words, cure research will be transmitted to the patient and public in terms of what it means to them—personally.

Mr. Speaker, the National Institute of Nursing is a forward step in bringing quality health care to the people. It is another in a long series of actions that will, over the long term, mean a more professional, more competent, more up-to-date system of health care in the most cost-effective means available.

I am pleased to report, Mr. Speaker, that the conference committee on the Labor, Health and Human Services, and Education appropriation bill for fiscal year 1985 has provided $5 million for the new National Institute of Nursing.

● Mr. DINGELL. Mr. Speaker, there is a single provision of this conference report that is worthy of special attention. It restricts administrative expenditures at the National Institutes of Health to 5.5 percent of total expenditures.

I introduced this provision during committee consideration because of the persuasive evidence that creation of new institutes has the perverse effect of reducing the funds available for research itself. New funds are consumed by the overhead and administration of the new institutes and in a period of constrained budgets the effect is reduce the amount available to fund research.

I intend to ask the General Accounting Office to audit expenditures for the fiscal year just completed so that the Institutes may be held to the tight 5.5 percent administrative cost limit in succeeding years.●

● Mr. GORE. Mr. Speaker, it is with great pleasure that I join my colleagues in both the House and the Senate in supporting the conference report on S. 540, the Health Research Extension Act. The legislation is the product of extensive work by Members on both sides of the aisle and I commend them for their efforts.

The conference agreement contains many important provisions that I believe will unquestionably strengthen our Nation's program in biomedical research. I am particularly pleased to see as part of the final agreement provisions that would: First, establish a Biomedical Ethics Board; second, address fraud within biomedical research; and third, continue the interest of Congress in research into the role of diet in treating end stage renal disease.

As chairman of Science and Technology's Subcommittee on Investigations and Oversight, I held hearings on each of these important subjects, where many troubling questions were raised. I am pleased to note that this bill provides the opportunity to answer these questions. And I would like to personally thank the chairman of the Health Subcommittee, Mr. WAXMAN, whose willingness to work with my subcommittee provided the opportunity to address these questions in this timely fashion.

I specifically would like to note the importance of the Biomedical Ethics Board which expands upon the Commission on Human Application of Genetic Engineering that I had authored as part of the original House bill. The duties of the Board, which is to be patterned after OTA, includes a comprehensive examination of developments in human genetic engineering and the social, ethical, legal, and medical issues raised by them.

As this change suggests, a purpose of the Board will be to help prepare our country to address the many complex issues raised by the application of the new genetic technology to human beings. Necessary to the formulation of public policy on any issue, especially one of this magnitude, is the development of a national consensus on the issues. Resolution of the difficult issues raised by human genetic engineering will be crucial as our Nation moves toward a cohesive approach to biotechnology and its implications.

How will the Board help? First, the Board will monitor developments in genetic technology that have implications for human genetic engineering; second, the Board will provide a mechanism to educate the public about genetic engineering; and third, and most important, the Board will provide a forum for consideration of the tremendous ethical and societal issues that will be generated by human genetic engineering.

The new genetic technology has the potential for tremendous benefit to our society. At the same time, however, it could be adhorrently misused. Our present system of bioethics is based on medical treatments and ideas vastly different from those that will be brought about by the new technology, and their advent raises a number of moral and ethical questions that are not easily answered. A new body of bioethics—genethics—must be constructed to enable us to come to grips with the technology. The Board will facilitate that effort.

The need for answers to these questions was made very clear at a 3-day hearing on human genetic engineering, held in November 1982, by the Subcommittee on Investigations and Oversight. The need for a panel to look at these questions was emphasized last year when a number of clergymen signed a resolution calling for a prohibition on genetic engineering, fearing that the technology, once developed, could be severely misused.

It is a primary responsibility of Government not only to promote science but to attempt to foresee the future of technology and the problems it might present. This bill takes an important step in doing just that.

Mr. Speaker, I urge support for the legislation.●

Mr. MADIGAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and agree to the conference report.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference reports on the Senate bills, S. 540 and S. 2616, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection?

CONFERENCE REPORT ON S. 2574, NURSE EDUCATION AMENDMENTS OF 1984

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and agree to the conference report on the Senate bill (S. 2574) to amend the Public Health

Service Act, to revise and extend title VIII of the Public Health Service Act, relating to nurse education.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second is considered as ordered.

There was no objection.

(For conference report, see proceedings of the House of Thursday, October 4, 1984, part III, at page 30183.)

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

□ 1810

Mr. WAXMAN. Mr. Speaker, first of all, I yield 2 minutes to the distinguished gentleman from New Mexico [Mr. RICHARDSON], and I want to at this time commend him for the significant role he played in the development of this legislation.

Mr. RICHARDSON. Mr. Speaker, I wish to thank the chairman of the subcommittee [Mr. WAXMAN] for his leadership on this issue. I also want to commend the minority for their role in seeing that this legislation is passed. In this connection, I particularly wish to commend Mr. NIELSON of Utah.

I was the author of the provision that extends for 3 years the National Health Service Corps Program. This bill also would modify provisions related to the areas and the types of practice in which scholarship recipients may fulfill their service obligations.

These modifcations in this legislation are necessary to: First, assure that particular populations or institutions are not deprived of needed National Health Service Corps placements if the overall physicians supply in the shortage area increases; and second, it assures that physicians who are able to serve their payback time in a private practice setting are meeting this statutory obligation does serve all medicare and medicaid recipients and to serve others without regard to their ability to pay.

This bill will extend the life of the National Health Service Corps, which is critical to many rural communities around the country. It is critical to many minorities, especially Hispanics and native Americans who are critically dependent on these clinics for their health care.

This bill also authorizes another amendment of mine, $3 million for plague research. The plague has afflicted many communities in the Southwest causing many deaths, particularly in New Mexico, and for this reason I urge passage of the bill. Additionally, I commend the bipartisan spirit underscoring the need for this legislation.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge my colleagues to support the agreement reached by the conferees from this House and the other body to reauthorize several titles of the Public Health Service Act.

S. 2574 reauthorizes the following programs:

First, the Health Professions Training Assistance Program which provides grants to various health professions schools as well as guaranteeing education loans;

Second, the Nurse Training Program which provides special support for traineeships and the Advanced Education Programs of Professional Nurses, Nurse Anesthetists, and Nurse Practioners;

Third, the National Health Service Corps Field and Scholarship Program which provides financial assistance for the education of physicians who agree to serve in health manpower shortage areas upon graduation; and

Fourth, the community health centers and migrant health centers which serve as important providers of care to populations not adequately served by the private sector.

I want to thank the gentleman from California, the subcommittee chairman, for working with myself and my colleagues on this side of the aisle in reaching a conference agreement that contains authorization levels which are reasonable and fiscally responsible.

I urge my colleagues to join me in supporting the conference report on S. 2574.

Mr. Speaker, I reserve the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I might consume.

Mr. Speaker, I, too, want to indicate to the Members that what we have before us are a series of bills in the health field and are compromises, accommodations brought together by the diligent work of the majority and the minority, both in the House and in the other body.

I think they represent a great deal of progress in answering the very real health needs of the American people. This particular item of legislation would reauthorize and revise the health professions educational programs in titles VII and VIII of the Public Health Service Act, and reauthorize and revise the community health centers and migrant health centers programs, as well as the National Health Service Corps and the Health Maintenance Organization Programs also under the Public Health Service Act.

Title I of the bill reauthorizes programs in title VII of the Public Health Service Act that assist disadvantaged, low-income, and other students who can no longer afford the high costs of education to become doctors, dentists, public health workers, and other health professionals. These programs also create opportunities for physicians to become primary care practitioners instead of subspecialists and address severe national shortages in public health, preventive medicine, and health administration. The programs in title I of the bill include:

First, HEAL insurance for market-rate student loans;

Second, HPSL low-interest student loans;

Third, scholarships for students of exceptional financial need;

Fourth, capitation assistance to schools of public health;

Fifth, support for departments of family medicine;

Sixth, the area health education centers;

Seventh, support for programs to train physician assistants;

Eighth, programs and traineeships in general internal medicine, general pediatrics, family medicine, and general dentistry;

Ninth, assistance for students from disadvantaged backgrounds;

Tenth, project grant authorities for health professions schools;

Eleventh, support for schools with advanced financial distress; and

Twelfth, support for programs and traineeships in health administration, public health, and preventive medicine.

Title I would also:

For the first time, set aside 50 percent of new Federal HPSL loan funds for students from disadvantaged backgrounds; and,

Provide for the improvement of health professional training in geriatrics.

Title II would extend nursing education programs for 3 years. This title principally supports education in the advanced nursing fields of education, research, and clinical specialities. The programs affected include:

First, special project grants and contracts;

Second, support for educational programs in advanced nursing, and for training nurse practitioners and nurse midwives;

Third, traineeships for advanced nursing and nurse anesthetists.

Title III of the bill would extend for 3 years the National Health Service Corps Program. The bill also would modify provisions related to the areas and the types of practice in which scholarship recipients may fulfill their service obligations. These modifications are necessary to:

Assure that particular populations or institutions are not deprived of needed National Health Service Corps

placements if the overall physician supply in a shortage area increases; and

Assure that physicians who are able to serve their payback time in a private practice setting are meeting their statutory obligation to serve all medicare and medicaid recipients and to serve others without regard to their ability to pay.

Title IV would extend for 4 years the programs of support for health maintenance organizations and migrant and community health centers. The effect of the community health center extension is not to extend the primary care block grant option. This is done because no State has actually put that block grant into operation and the Department of Health and Human Services has been enjoined from proceeding with implementation because it had failed to administer the program in accordance with the statute. Instead, a new Primary Care Block Grant Program is authorized in title V.

Title V creates a new program of grants to States for primary care research, demonstration, and services.

Title VI creates a new requirement that the Secretary study criteria and methods for collecting and disseminating health care consumer information. This title also provides for grants for control of plague, requires a study of health care for the homeless, and designates a laboratory for experimental medicine as a regional primate research center.

Mr. Speaker, these programs address important national goals at modest cost. They deserve our continued support.

Mr. Speaker, I urge my colleagues to adopt this legislation.

Mr. MADIGAN. Would the gentleman yield?

Mr. WAXMAN. I would be pleased to yield to my colleague.

Mr. MADIGAN. Mr. Speaker, I wonder if the gentleman could explain in some more detail the provision here dealing with nurse anesthetists.

Mr. WAXMAN. I am glad the gentleman asked that question, and if my colleague will yield, I will try to explain it in detail.

Mr. Speaker, nurse anesthetist students are in need of special traineeship funds, and this bill would authorize traineeship funds for those students.

There is also a set-aside for the faculty in order to encourage the availability of more trained personnel to extend to nurse anesthetists the information they will need in their course of study.

Mr. MADIGAN. I thank the gentleman.

Mr. WAXMAN. If the gentleman will yield to me further, I think all of these activities will be enhanced by the creation of a new Institute of Nursing at NIH, which is now part of the legislation on its way to the President, for which the gentleman is to be highly commended.

I think this Institute at the National Institutes of Health will fill a gap that has long existed in research in nursing. I am pleased by the creation of that institute as well as the Institute on Arthritis and the continuation of funding for what I think is a gem in terms of the activities of the Federal Government, something that we are all proud of, both parties, the administration as well as the Congress, and that is the basic biomedical research which we hope will lead to the prevention and cure and control of diseases that are prevalent today which we hope will be nonexistent tomorrow because of the expenditure of Federal dollars in this area.

□ 1820

Mr. MADIGAN. If the gentleman will yield further, would the gentleman agree that the creation of the National Institute of Nursing within the National Institutes of Health will probably bring about a greater focus of the attention of the researchers on the activities of nurse anesthetists?

Mr. WAXMAN. I have no doubt about it, and I think that was certainly the intent behind the gentleman's proposal and the reason why we all support it.

Mr. MADIGAN. I thank the gentleman for elaborating on his statement.

Mr. Speaker, I yield 2 minutes to the gentleman from Utah [Mr. NIELSON] a member of the subcommittee.

Mr. NIELSON of Utah. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would first like to commend the chairman of the Subcommittee on Health and the Environment of the Committee on Energy and Commerce, the gentleman from California [Mr. WAXMAN], and the ranking member of that subcommittee, the gentleman from Illinois [Mr. MADIGAN], and also my colleague, the gentleman from New Mexico [Mr. RICHARDSON], for his help on the health, manpower, and related programs conference report.

When the gentleman from New Mexico [Mr. RICHARDSON] came forward with his proposal for rural health care, it was aimed mainly at the low-cost and low-income people on the Indian reservations. Since I have a number of Indians in my district, I was very happy to help him on that. I think it has been a very useful bit of legislation.

This is the second of seven bills from our subcommittee, and of all the bills, this is the one I like best of all. I think it does the best job. There are some I am not enthusiastic about and will oppose, in fact, but this is a very good bill. I think it does take care of the health care needs we have, particularly in the low-income areas, and particularly the public health areas, which are often neglected.

I think the work in the physician-assistant and nurse-anesthetist programs are very useful additions to our present programs, and I again commend these individuals and also the Members from the Senate on the conference committee for coming back with a good bill that we can all support.

Mr. MADIGAN. Mr. Speaker, I yield 5 minutes to another member of our subcommittee, the distinguished gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. I thank the distinguished ranking minority member of the Health Subcommittee for yielding this time to me.

Mr. Speaker, we are in the closing days of this, the 2d year of the 98th Congress, and I suspect the sentiment on the part of the membership is to approve these conference reports and return to our districts and get on with the campaign season, but I would like to bring to the attention of my colleagues something about this bill, and my remarks should not be misconstrued.

I do not oppose the concept of the elements that are contained in this bill. I think they are a valid use of the Federal tax dollar for promoting the purpose that were outlined. But if we wonder how Federal spending just creeps up and up and up and reaches the point today that a lot of us say is out of control, this bill is a classic example for that illustration.

In 1984, the fiscal year that closed just at the end of last month, we appropriated for all purposes for this bill $605 million. When this bill was heard in the subcommittee earlier this year, I offered an amendment to permit it to rise to $678 million. I like to bring to the attention of my colleagues that what this conference report suggests for 1985 is some $969 million. In other words, a growth from $605 million in 1984 to $969 million in 1985.

This is what this House and the Senate, by a conference agreement, are suggesting will fill this need, so I am not surprised that my colleague, the gentleman from California [Mr. WAXMAN], who is a brilliant exponent of promoting the health care of American citizens, would be glad to support this conference because it is based on the premise that the more money we spend on these programs, the more we are going to improve the health of our American citizens.

I am not sure that this principle of the liberal welfare state is valid in the category of health care; perhaps it is, perhaps it is not. One thing is for sure: We are going to expand the bureaucracy and is the infrastructure that is

dealing with the distribution of health care services markedly with this bill. That is for sure, and those people should take comfort because their jobs are secure in the infrastructure of the health care delivery system, of the Federal, State, and local governments, and they should take comfort because their ability to expand that bureaucracy is going to be significantly increased with this legislation. I am not so sure it is going to mean any added delivery of health care to the people who need it, but perhaps time will tell.

When we analyze what this bill does with respect to what the administration requested, we again see how Presidents propose and Congresses dispose. There is almost no relationship between what the administration has asked for and what this conference agreement talks about.

For example, in health manpower, the administration asked for $84.9 million; the conference committee is $158.4 million.

Nurses' training: The administration asked for $12.3 million; the conference report is $69.75 million.

National Health Service Corps: The administration asked for $67 million; the conference agreement is $75 million.

Community Health Centers: The administration, starting a program in 1981, suggested that this was something that could be placed in a block grant program; provision was made for it, and we have been engaged in a tussle ever since. Who is going to control these activities, the bureaucrats in Washington, DC, or the bureaucrats at the State and local level? The administration opted to have the bureaucrats at the State and local level control them and that, of course, is not consistent with the proponents of the liberal welfare state. They want that control to be right here on the Potomac by the Bay, Washington, DC.

There are lots of reasons why I think this conference report should be rejected. The fiscal side that I have tried to bring to the attention of my colleagues shows that the spending that we are authorizing by this program is totally out of relation to what the administration asked for, it is totally out of relation to what was spent in 1984. It is necessary to promote the health of the American people, but it is also appropriate to ask by what authority do those of us who are living today have the moral authority to spend and consume and transfer to future generations the duty of paying for what we consume.

The growth from $605 to $969 million in 1 year is an irresponsible use of our resources.

Mr. WAXMAN. Mr. Speaker, as I indicated, this is a good bill.

I have no further requests for time. I urge my colleagues to accept the legislation, and I yield back the balance of my time.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and agree to the conference report on the Senate bill, S. 2574.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn in light of that ruling.

PREVENTIVE HEALTH AMENDMENTS OF 1984

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and take from the Speaker's table the Senate bill (S. 2301) to revise and extend programs for the provision of health services and preventive health services, and for other purposes with a House amendment and a Senate amendment to the House amendment thereto, and concur in the Senate amendment to the House amendment.

The Clerk read the title of the Senate bill.

The Clerk read the House amendment and the Senate amendment to the House amendment, as follows:

Strike out all after the enacting clause, and insert:

SECTION 1. (a) This Act may be cited as the "Preventive Health Amendments of 1984."

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SEC. 2. (a) Section 317(j)(1) (42 U.S.C. 247b(j)(1)) is amended—

(1) by striking out "immunize children against immunizable diseases" and inserting in lieu thereof "immunize against vaccine-preventable diseases", and

(2) by striking out "and" after "1983," and by inserting before the period a comma and the following: "$52,000,000 for the fiscal year ending September 30, 1985, $59,000,000 for the fiscal year ending September 30, 1986, and $65,000,000 for the fiscal year ending September 30, 1987".

(b) Section 317(j)(2) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$8,000,000 for the fiscal year ending September 30, 1985, $9,000,000 for the fiscal year ending September 30, 1986, and $10,000,000 for the fiscal year ending September 30, 1987".

SEC. 3. (a) The first sentence of section 318(d)(1) (42 U.S.C. 247c(d)(1)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$60,000,000 for the fiscal year ending September 30, 1985, $67,500,000 for the fiscal year ending September 30, 1986, and $75,000,000 for the fiscal year ending September 30, 1987".

(b)(1) Subsection (a) of section 318 is amended by striking out "research" and all that follows in such section and inserting in lieu thereof the following: "research in, and training and public health programs for, the prevention and control of sexually transmitted diseases.".

(2) Subsection (b) of section 318 is amended to read as follows:

"(b) The Secretary may make grants to States, political subdivisions of States, and any other public and non-profit private entity for—

"(1) research into the prevention and control of sexually transmitted diseases;

"(2) demonstration projects for the prevention and control of sexually transmitted diseases;

"(3) public information and education programs for the prevention and control of such diseases, and

"(4) professional (including appropriate allied health personnel) education, training, and clinical skills improvement activities in the prevention and control of such diseases.".

(3) Subsection (c) of section 318 is amended by inserting "and" at the end of paragraph (3), by striking out paragraph (4), and by redesignating paragraph (5) as paragraph (4).

Subsection (d)(1) of section 318 is amended by striking out "5 per centum" and inserting in lieu thereof "10 per centum".

(5)(A) Section 318 is amended by redesignating subsections (d) through (f) as subsections (e) through (g) and by adding after subsection (c) the following new subsection:

"(d) The Secretary, acting through the Director of the Centers for Disease Control, may make grants to public and non-profit private entities for information and education programs on, and for the diagnosis, prevention, and control of, acquired immune deficiency syndrome. The authority to make grants under this section for acquired immune deficiency syndrome is not the exclusive authority to make grants under this Act for acquired immune deficiency syndrome.".

(B) Subsection (e)(1) of section 318 (as so redesignated) is amended—

(i) by striking out "(b) and (c)" and inserting in lieu thereof "(b), (c), and (d)",

(ii) by striking out "(b) or (c)" and inserting in lieu thereof "(b), (c), or (d)", and

(iii) by adding at the end the following: "If the appropriations under the first sentence for fiscal year 1985 exceed $50,000,000, one-half of the amount in excess of $50,000,000 shall be made available for grants under subsection (d); if the appropriations under the first sentence for fiscal year 1986 exceed $52,500,000, one-half of the amount in excess of $52,500,000 shall be made available for such grants; and if the appropriations under the first sentence for fiscal year 1985 exceed $55,000,000, one-half of the amount in excess of $55,000,000 shall be made available for such grants.".

(6)(A) Section 318 is amended by striking out "venereal disease" each place it occurs and inserting in lieu thereof "sexually transmitted diseases".

(B) The heading for such section 318 is amended by striking out "VENEREAL DISEASE" and inserting in lieu thereof "SEXUALLY TRANSMITTED DISEASES AND ACQUIRED IMMUNE DEFICIENCY SYNDROME".

(C) Section 318 is amended by striking out the subsection (g) which was in effect on the day before the date of enactment of the Act.

SEC. 4. (a) Section 1901(a) (42 U.S.C. 300w(a)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$98,500,000 for the fiscal year ending September 30, 1985, $98,500,000 for the fiscal year ending September 30, 1986, and $98,500,000 for the fiscal year ending September 30, 1987".

(b) Section 1901(b) is amended by striking out "$3,000,000" and inserting in lieu thereof "$3,500,000".

(c) Section 1905(c)(4) (42 U.S.C 300w-4(c)(4)) is amended to read as follows:

"(4) agrees to make grants for preventive health service programs for hypertension in amounts equal to 65 percent of the total amount provided by the Secretary in fiscal year 1981 to the State and entities in the State under section 317 for such programs;".

SEC. 5. (a) Section 1905(c) is amended by striking out "and" at the end of paragraph (7), by striking out the period at the end of paragraph (8) and inserting in lieu thereof "; and", and by inserting after paragraph (8) the following:

"(9) will, not later than October 1, 1984, as prescribed by the Secretary by regulation collect data, using a uniform system prescribed in such regulation, on preventive health and preventive health services programs in the State assisted by funds from allotments under this part, including a summary of the services which were provided, the providers of such services, and the individuals who received such services.".

(b) The last sentence of section 1905(c) is amended by inserting before the period the following: "(other than the requirements of paragraph (9))".

(c) Section 1906(a)(2) (42 U.S.C. 300w-5(a)(2)) is amended by striking out "burdensome" and inserting in lieu thereof "unnecessarily burdensome".

Senate amendment to House amendment: In lieu of the matter proposed to be inserted by the amendment of the House, insert:

That this Act may be cited as the "Preventive Health Amendments of 1984".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provisions, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SEC. 2. (a) Section 317(j)(1) (42 U.S.C. 247b(j)(1)) is amended—

(1) by striking out "immunize children against immunizable diseases" and inserting in lieu thereof "immunize individuals against vaccine-preventable diseases", and

(2) by striking out "and" after "1983," and by inserting before the period a comma and the following: "$52,000,000 for the fiscal year ending September 30, 1985, $59,000,000 for the fiscal year ending September 30, 1986, and $65,000,000 for the fiscal year ending September 30, 1987".

(b) Section 317(j)(2) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$8,000,000 for the fiscal year ending September 30, 1985, $9,000,000 for the fiscal year ending September 30, 1986, and $10,000,000 for the fiscal year ending September 30, 1987".

SEC. 3. (a) The first sentence of section 318(d)(1) (42 U.S.C. 247c(d)(1)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$57,000,000 for the fiscal year ending September 30, 1985, $62,500,000 for the fiscal year ending September 30, 1986, and $68,000,000 for the fiscal year ending September 30, 1987".

(b)(1) Subsection (a) of section 318 is amended by striking out "research" and all that follows in such section and inserting in lieu thereof the following: "research in, and training and public health programs for, the prevention and control of sexually transmitted diseases.".

(2) Subsection (b) of section 318 is amended to read as follows:

"(b) The Secretary may make grants to States, political subdivisions of States, and any other public and non-profit private entity for—

"(1) research into the prevention and control of sexually transmitted diseases;

"(2) demonstration projects for the prevention and control of sexually transmitted diseases;

"(3) public information and education programs for the prevention and control of such diseases, and

"(4) education, training, and clinical skills improvement activities in the prevention and control of such diseases for health professionals (including allied health personnel).".

(3) Subsection (c) of section 318 is amended by inserting "and" at the end of paragraph (3), by striking out paragraph (4), and by redesignating paragraph (5) as paragraph (4).

(4) The second sentence of section 318(d)(1) is amended by striking ot "5 per centum" and inserting in lieu thereof "10 per centum".

(5)(A) Section 318 is amended by redesignating subsections (d) through (f) as subsections (e) through (g) and by adding after subsection (c) the following new subsection:

"(d) The Secretary, acting through the Director of the Centers for Disease Control, may make grants to public and non-profit private entities for information and education programs on, and for the diagnosis, prevention, and control of, acquired immune deficiency syndrome. The authority to make grants under this section for acquired immune deficiency syndrome is not the exclusive authority to make grants under this Act for acquired immune deficiency syndrome.".

(B) Subsection (e)(1) of section 318 (as so redesignated) is amended—

(i) by striking out "(b) and (c)" in the first sentence and inserting in lieu thereof "(b), (c), and (d)",

(ii) by striking out "(b) or (c)" in the second sentence and inserting in lieu thereof "(b), (c), or (d)", and

(iii) by adding at the end the following: "If the appropriations under the first sentence for fiscal year 1985 exceed $50,000,000, one-half of the amount in excess of $50,000,000 shall be made available for grants under subsection (d); if the appropriations under the first sentence for fiscal year 1986 exceed $52,500,000, one-half of the amount in excess of $52,500,000 shall be made available for such grants; and if the appropriations under the first sentence for fiscal year 1987 exceed $55,000,000, one-half of the amount in excess of $55,000,000 shall be made available for such grants.".

(6)(A) Section 318 is amended by striking out "venereal disease" each place it occurs and inserting in lieu thereof "sexually transmitted diseases".

(B) The heading for such section 318 is amended by striking out "venereal disease" and inserting in lieu thereof "sexually transmitted diseases and acquired immune deficiency syndrome".

(C) Section 318 is amended by striking out the subsection (g) which was in effect on the day before the date of enactment of this Act.

SEC. 4. (a) Section 1901(a) (42 U.S.C. 300w(a)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$98,500,000 for the fiscal year ending September 30, 1985, $98,500,000 for the fiscal year ending September 30, 1986, and $98,500,000 for the fiscal year ending September 30, 1987".

(b) Section 1901(b) is amended by striking out "$3,000,000" and inserting in lieu thereof "$3,500,000".

SEC. 5. (a) Section 1905(c) (42 U.S.C. 300w-4) is amended by striking out paragraphs (2) and (4) and redesignating paragraphs (3) and (5) through (8) as paragraphs (2) through (6), respectively.

(b) Section 1906(a)(1)(B) (42 U.S.C. 300w-5) is amended by striking out "activities of the State under this part" and inserting in lieu thereof "preventive health and preventive health services programs in the State assisted by funds from allotments under this part, including a summary of the services which were provided, the providers of such services, and the individuals who received such services".

(c) Section 1906 is amended by adding at the end the following:

"(d) The Secretary, in consultation with appropriate national organizations, shall develop model criteria and forms for the collection of data and information with respect to services provided under this part to enable States to share uniform data and information with respect to the provision of such services.".

(d) Subsection (e) of Section 1905 is repealed.

SEC. 6. (a) Section 339(a)(5) (42 U.S.C. 255(a)(5)) is amended by striking out "and" after "1983" and by inserting before the period a comma and "September 30, 1985, September 30, 1986, and September 30, 1987".

(b) Section 339(b)(5) is amended by striking out "and" after "1983," and by inserting before the period a comma and "September 30, 1985, September 30, 1986, and September 30, 1987".

SEC. 7. Part A of title XIX is amended by inserting after section 1909 (42 U.S.C. 300w-8) the following new section:

"EMERGENCY MEDICAL SERVICES FOR CHILDREN

"SEC. 1910. (a) For activities in addition to the activities which may be carried out by States under section 1904(a)(1)(F), the Secretary may make grants to not more than four States in any fiscal year to support a program of demonstration projects in such States for the expansion and improvement of emergency medical services for children who need treatment for trauma or critical care. Any grant made under this subsection shall be for a one-year period.

"(b) The Secretary may renew a grant made under subsection (a) for one additional one-year period only if the Secretary determines that renewal of such grant will provide significant benefits through the collection, analysis, and dissemination of information or data which will be useful to other States.

"(c) To carry out this section, there are authorized to be appropriated $2,000,000 for

fiscal year 1985 and for each of the two succeeding fiscal years.".

SEC. 8. Part A of title XIX (as amended by section 7 of this Act) is amended by adding at the end the following new section:

"STATE PLANNING GRANTS

"SEC. 1910A. (a) The Secretary may make grants to assist States to—

"(1) develop long range plans to achieve the goals, objectives, and priorities established by the Secretary pursuant to title XVII;

"(2) identify particular needs within States for services and activities that may be conducted with payments made under allotments under section 1902; and

"(3) determine the progress of States in achieving the goals, objectives, and priorities described in paragraph (1) and, to the extent feasible, use scientifically valid measures to make such determinations.

"(b) To carry out this section, there are authorized to be appropriated $5,000,000 for fiscal year 1985 and for each of the two succeeding fiscal years.".

SEC. 9. Section 1001 (42 U.S.C. 300) is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) The Secretary, at the request of a recipient of a grant under subsection (a), may reduce the amount of such grant by the fair market value of any supplies or equipment furnished the grant recipient by the Secretary. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment on which the reduction of such grant is based. Such amount shall be deemed as part of the grant and shall be deemed to have been paid to the grant recipient.".

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair first recognizes the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill reauthorizes the most effective preventive health programs in the Public Health Service—childhood immunizations, and tuberculosis and venereal disease control.

The bill also provides authority for the Centers for Disease Control to make grants for AIDS information, education, diagnosis, treatment, and control. With 12 to 13 cases of the disease being reported to CDC each day, these project grants are especially urgent.

In awarding these project grants, HHS should give priority to those cities and areas with the highest incidence of AIDS. For education and information program grants, priority clearly should be given to those groups at risk of contracting the disease. Such groups have shown themselves capable of establishing communications that have effectively reached millions of people and they deserve Federal support to continue such public health activity.

The bill passed the House earlier this week by a vote of 368 to 18.

The Senate amendment to the bill reauthorizes two small home health programs and also adds funds for emergency medical services for children and for preventive health planning grants to States.

The amendment also gives the Secretary the authority to provide family planning supplies in lieu of cash to family planning grantees. This provision comes at the request of the administration and is to allow the more economical bulk purchase of supplies for family planning clinics. I would emphasize to Members that this authority is to be exercised only at the discretion of the grantees and that it does not in any way require grantees to accept the substitution if they deem it not to meet their needs. I also would encourage the Secretary in any exercise of this authority to make a broad array of contraceptives available: There is ample evidence that all women should not use the same contraceptive. For health reasons and personal reasons, different women may request or need different contraceptives. If this authority is to be helpful to the grantees and to recipients of services, the Secretary should use it broadly.

The Senate amendment is noncontroversial and is supported by both the ranking minority members of the House Energy and Commerce Committee and the Health and Environment Subcommittee.

I urge Members to concur in the amendment and pass the bill.

□ 1830

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of S. 2301, the Preventive Health Amendments of 1984. This bill is almost identical to H.R. 5538, which passed the House earlier this week by a vote of 368 to 18.

S. 2301 reauthorizes the preventive health and health services block grant for 3 years, at a flat level of $98.5 million per year. This vital block program, established by the 1981 budget reconciliation, funds such activities as rape prevention, hypertension, fluoridation, and urban rat control. The General Accounting Office has reported that States prefer funding these programs through the block rather than categorical approach, and that the added flexibility assists States in setting priorities.

This bill also provides funding for three existing categorical programs which are not contained in block grants. The vital childhood immunization program would be authorized at $52 million for fiscal year 1985, $59 million in 1986, and $65 million in 1987. Immunization of children is one of the most successful preventive health measures available. Through the appropriate use of vaccine, several childhood diseases, such as smallpox, diptheria, and tetanus, have been eliminated in this country. It is important to note that the cost of many vaccines has risen markedly just this year. The cost of the DPT—diptheria, pertussis, tetanus—vaccine has risen 400 percent in 1984 alone, primarily due to the withdrawal of several domestic companies from the vaccine market because of increased liability exposure. Therefore, I believe the level of funding in this bill is necessary.

The bill also provides $8 million in fiscal year 1985—$9 million in 1986, $10 million in 1987—to continue the tuberculosis control categorical. TB is still the leading cause of death among communicable diseases reported nationally. These funds would be used to continue community outreach activities and surveillance needed to ensure treatment of noncompliant tuberculosis patients, as well as examination and appropriate treatment for exposed persons.

This legislation would also reauthorize the existing venereal disease program—renamed "sexually transmitted diseases"—and include within it specific funding for prevention of acquired immune deficiency syndrome, termed the Nation's No. 1 public health concern by the Department of Health and Human Services. The overall fatality rate among AIDS victims is 45 percent, with over 85 percent of those diagnosed with the disease for 2 years or longer having died. There is no known cure for this disease. The authorization levels for this categorical program are $15 million less—over 3 years—than in the House bill passed on Monday.

S. 2301 provides $5 million per year to assist States in developing long-range plans to achieve the goals established by HHS for the prevention programs, and $2 million for a limited demonstration project on emergency medical services for children. Finally, two existing home health programs which were originally created under the orphan drug bill are reauthorized under this legislation.

The bill before us represents a fair approach to funding for these important preventive health measures, and it in no way retracts from the commitment made by this body in 1981 to fund most of our health programs through the block grant mechanism. I

wish to congratulate Mr. WAXMAN for his willingness to listen to all sides in developing this legislation, and I urge my colleagues to support this measure.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MADIGAN. Mr. Speaker, I yield 3 minutes to my distinguished colleague on the Health and Environment Subcommittee, the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Speaker, I thank my colleague for yielding me this time.

This Member does not intend to ask for a rollcall vote on this measure because the House expressed its sentiments with respect to the issue last week, as my colleague, the gentleman from California [Mr. WAXMAN] pointed out, but I just want to point out again to my colleagues just what we are doing here.

The administration asked for funding for preventive health, a block grant of $89 million. This conference committee authorizes $98.5 million; that is $89 million to $98.5 million.

The administration asked for $34 million in immunizations. The conference committee report authorizes $52 million.

For tuberculosis control, the administration requested zero. This conference report contains $8 million.

In venereal disease, the administration asked for $45.5 million. This conference report contains $57 million.

Here again it is just amply demonstrated that Presidents propose and Congress disposes. Congress determines the level of spending and when you compare the level of authorizations in this bill with what was appropriated in 1984, you even have more startling rises; for instance, immunizations, $30.5 million in 1984, rises to $52 million under this bill.

If we ever are to get a handle on the runaway spending in this House, every agency of the Federal Government activity must come under a freeze or a modest adjustment upward for the impact of inflation. Apparently we cannot even do that.

I recognize that when you talk about health care, there is a tendency on the part of a lot of Members to run from the necessity of suggesting that even health care has to come under a scrutiny that all other programs come under, but I would hope that my colleagues some day will come to the realization that we cannot go on with this process of increasing spending for programs, no matter how meritorious, 15 or 20 percent every year. It just cannot go on; otherwise it will further exacerbate the deficit that we are attempting to deal with today.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and concur in the Senate amendment to the House amendment to the Senate bill, S. 2301.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendment to the House amendment was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on S. 2574 and on the Senate bill, S. 2301.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HEALTH PROMOTION AND DISEASE PREVENTION AMENDMENTS OF 1984

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 771) to revise and extend provisions of the Public Health Service Act relating to health promotion and disease prevention, to provide for the establishment of centers for research and demonstrations concerning health promotion and disease prevention, and for other purposes, as amended.

The Clerk read as follows:

S. 771

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Health Promotion and Disease Prevention Amendments of 1984".

SEC. 2. (a)(1) Section 1701(a) of the Public Health Service Act (42 U.S.C. 300u(a)) is amended—

(A) by striking out "and" after the semicolon in paragraph (8);

(B) by striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and "and";

(C) by inserting after paragraph (9) the following new paragraph:

"(10) establish in the Office of the Assistant Secretary for Health an Office of Disease Prevention and Health Promotion, which shall—

"(A) coordinate all activities within the Department which relate to disease prevention, health promotion, preventive health services, and health information and education with respect to the appropriate use of health care;

"(B) coordinate such activities with similar activities in the private sector;

"(C) establish a national information clearinghouse to facilitate the exchange of information concerning matters relating to health information and health promotion, preventive health services, and education in the appropriate use of health care, to facilitate access to such information, and to assist in the analysis of issues and problems relating to such matters; and

"(D) support projects, conduct research, and disseminate information relating to preventive medicine, health promotion, and physical fitness and sports medicine.";

(D) by striking out "and with health planning and resource development activities undertaken under titles XV and XVI" in the last sentence; and

(E) by adding at the end thereof the following: "The Secretary shall appoint a Director for the Office of Disease Prevention and Health Promotion established pursuant to paragraph (10) of this subsection. The Secretary shall administer this title in cooperation with health care providers, educators, voluntary organizations, businesses, and State and local health agencies in order to encourage the dissemination of health information and health promotion activities.".

(2) Section 1701(b) of such Act is amended to read as follows:

"(b) To carry out this title, there are authorized to be appropriated $9,000,000 for the fiscal year ending September 30, 1985, $9,500,000 for the fiscal year ending September 30, 1986, and $10,000,000 for the fiscal year ending September 30, 1987.".

(b) Paragraph (6) of section 1704 of such Act (42 U.S.C. 300u-3(6)) is repealed.

(c) Sections 1706, 1707, 1708, 1709, and 1710 of such Act (42 U.S.C. 300u-5, 300u-6, 300u-7, 300u-8, and 300u-9) are repealed.

(d) Title XVII of such Act is amended by adding at the end thereof the following new sections:

"CENTERS FOR RESEARCH AND DEMONSTRATION OF HEALTH PROMOTION AND DISEASE PREVENTION

"SEC. 1706. (a) The Secretary shall make grants or enter into contracts with academic health centers for the establishment, maintenance, and operation of centers for research and demonstration with respect to health promotion and disease prevention. Centers established, maintained, or operated under this section shall undertake research and demonstration projects in health promotion, disease prevention, and improved methods of appraising health hazards and risk factors, and shall serve as demonstration sites for the use of new and innovative research in public health techniques to prevent chronic diseases.

"(b) Each center established, maintained, or operated under this section shall—

"(1) be located in an academic health center with—

"(A) a multidisciplinary faculty with expertise in public health and which has working relationships with relevant groups in such fields as medicine, psychology, nursing, social work, education and business;

"(B) graduate training programs relevant to disease prevention;

"(C) a core faculty in epidemiology, biostatistics, social sciences, behavioral and environmental health sciences, and health administration;

"(D) a demonstrated curriculm in disease prevention;

"(E) a capability for residency training in public health or preventive medicine; and

"(F) such other reasonable qualifications as the Secretary may prescribe;

"(2) conduct—

"(A) health promotion and disease prevention research, including retrospective studies and longitudinal propective studies in population groups and communities;

"(B) demonstration projects for the delivery of services relating to health promotion and disease prevention to defined population groups using, as appropriate, community outreach and organization techniques and other methods of educating and motivating communities; and

"(C) evaluation studies on the efficacy of demonstration projects conducted under subparagraph (B) of this paragraph.

The design of any evaluation study conducted under subparagraph (C) shall be established prior to the commencement of the demonstration project under subparagraph (B) for which the evaluation will be conducted.

"(C)(1) During fiscal year 1985, the Secretary shall make grants or enter into contracts for the establishment of three centers under this section. During fiscal year 1986, the Secretary shall make grants or enter into contracts for the establishment of five centers under this section and the maintenance and operation of the three centers established under this section in fiscal year 1985. During fiscal year 1987, the Secretary shall make grants or enter into contracts for the establishment of five centers under this section and the operation and maintenance of the eight centers. established under this section in fiscal years 1985 and 1986.

"(2)(A) In making grants and entering into contracts under this section, the Secretary shall provide for an equitable geographical distribution of centers established, maintained, and operated under this section and for the distribution of such centers among areas containing a wide range of population groups which exhibit incidences of diseases which are most amenable to preventive intervention.

"(B) The Secretary, through the Director of the Centers for Disease Control and in consultation with the Director of the National Institutes of Health, shall establish procedures for the appropriate peer review of applications for grants and contracts under this section by peer review groups composed principally of non-Federal experts.

"(d) For purposes of this section, the term 'academic health center' means a school of medicine, a school of osteopathy, or a school of public health, as such terms are defined in section 701(4).

"(e) To carry out this section, there are authorized to be appropriated $3,000,000 for the fiscal year ending September 30, 1985, $8,000,000 for the fiscal year ending September 30, 1985, and $13,000,000 for the fiscal year ending September 30, 1987.".

SEC. 3. Subsection (a) of section 338G of the Public Health Service Act (42 U.S.C. 254r(a)) is amended by inserting "clinical psychologists," after "pharmacists,".

SEC. 4. (a) Section 526(a)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bb(a)(2)) is amended by striking out "which occurs so infrequently in the United States that" and inserting in lieu thereof "which (A) affects less than 200,000 persons in the United States, or (B) affects more than 200,000 in the United States and for which".

(b) Section 5(b)(2) of the Orphan Drug Act (21 U.S.C. 360ee(b)(2)) is amended by striking out "which occurs so infrequently in the United States that" and inserting in lieu thereof "which (A) affects less than 200,000 persons in the United States, or (B) affects more than 200,000 in the United States and for which".

SEC. 5. (a) section 305 of the Public Health Service Act (42 U.S.C. 242c) is amended—

(1) by striking out "National Center for Health Services Research" and inserting in lieu thereof "National Center for Health Services Research and Health Care Technology Assessment";

(2) in subsection (b), by striking out "and" at the end of paragraph (3), by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and", and by adding after paragraph (4) the following:

"(5) the safety, efficacy, effectiveness, cost effectiveness, economic, and social impacts of health care technologies."; and

(3) by redesignating subsection (e) as subsection (i) and by adding after subsection (d) the following:

"(e)(1) The Center shall advise the Secretary respecting health care technology issues and make recommendations with respect to whether specific health care technologies should be reimbursable under federally financed health programs.

"(3) In making recommendations respecting health care technologies, the Center shall consider the safety, efficacy, and effectiveness, and, as appropriate, the cost-effectiveness and appropriate uses of the technology.

"(3) In carrying out its responsibilities under this section respecting health care technologies, the Center shall cooperate and consult with the National Institutes of Health, the Food and Drug Administration, and any other interested Federal departments or agencies.

"(f)(1) The Secretary, acting through the Center, shall undertake and support (by grant or contract) research regarding technology diffusion, methods to assess health care technology, and specific health care technologies.

"(2) Any grant or contract under paragraph (1), the direct cost of which will exceed $50,000, may be made or entered into only after consultation with National Advisory Council on Health Care Technology Assessment.

"(g)(1) There is established the National Advisory Council on Health Care Technology Assessment (hereinafter in this section referred to as the 'Council'). The Council shall advise the Secretary and the Director of the Center with respect to the performance of the health care technology assessment functions prescribed by this section. The Council shall assist the Director in developing criteria and methods to be used by the Center in making health care technology coverage recommendations.

"(2) The Council shall consist of—

"(A) the Director of the National Institutes of Health, the Chief Medical Director of the Veterans' Administration, the Assistant Secretary of Health and Environment of the Department of Defense, the head of the Centers for Disease Control, the head of the Health Care Financing Administration, and such other Federal officials as the Secretary may specify, who shall be ex officio members, and

"(B) twelve voting members appointed by the Secretary.

"(3) The Secretary shall make appointments to the Council as follows:

"(A) The Secretary shall appoint six members of the Council from individuals who are distinguished in the fields of medicine, engineering, and science (including social science) and shall appoint four members from individuals who are distinguished in the fields of law, ethics, economics, and management. Of the members appointed under this subparagraph—

"(i) at least two shall be physicians,

"(ii) two shall be selected from individuals who represent business entities engaged in development or production of medical technology,

"(iii) one shall be selected from individuals who represent hospital administrators, and

"(iv) one shall be selected from individuals who represent health insurance companies or self-insured employers.

"(B) The Secretary shall appoint two members from members of the general public who represent the interest of consumers of health care.

"(4)(A) Each appointed member of the Council shall be appointed for a term of three years, except that—

"(i) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(ii) of the members first appointed after the date of the enactment of this subsection, four shall be appointed for a term of three years, four shall be appointed for a term of two years, and four shall be appointed for a term of one year, as designated by the Secretary at the time of appointment.

Appointed members may be appointed for additional terms and may serve after the expiration of their terms until their successors have taken office.

"(B) Members of the Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the functions of the Council compensation at rates not to excess the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule, including traveltime; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

"(5) The Council shall annually elect one of its appointed members to serve as Chairman until the next election.

"(6) The Council shall meet at the call of the Chairman, but not less often than three times a year.

"(7) The Director of the Center shall (A) designate a member of the staff of the Center to act as Executive Secretary of the Council, and (B) make available to the Council such staff, information, and other assistance as it may require to carry out its functions.

"(h) In each fiscal year, seven and one-half percent of the amount made available under section 2113 for such fiscal year for evaluations shall be made available to the Assistant Secretary for Health to conduct or support (by both grants and contracts) through the Center, evaluations of health services and health care technology which evaluations are not being conducted or supported under this section or section 304.".

(b) Subsection (i) of such section (as so redesignated) is amended by striking out "subsections (b), (c), and (d) of".

(c)(1) Section 304 of such Act (42 U.S.C. 242b) is amended by striking out "National Center for Health Services Research" each place it occurs and inserting in lieu thereof "National Center for Health Services Research and Health Care Technology Assessment".

(2) Such section is amended by striking out ", the National Center for Health Statistics, and the National Center for Health Care Technology" each place it occurs and inserting in lieu thereof "and the National Center for Health Statistics".

(3) Such section is amended by striking out ", the National Center for Health Statistics, or the National Center for Health Care Technology" and inserting in lieu thereof "or the National Center for Health Statistics".

(4) The heading for such section is amended by striking out "and Health Care Technology" and inserting in lieu thereof ", and Health Care Technology Assessment".

SEC. 6. Section 305(c) is amended—

(1) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively;

(2) by inserting "(1)" before "The"; and

(3) by adding at the end thereof the following new paragraph:

"(2) In carrying out this section, the Secretary shall assist State and local health agencies through a user liaison program and a technical assistance program.".

SEC. 7. (a)(1) The first sentence of paragraph (1) of section 308(i) of such Act (42 U.S.C. 242m(i)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$20,500,000 for the fiscal year ending September 30, 1985, $22,750,000 for the fiscal year ending September 30, 1986, and $24,750,000 for the fiscal year ending September 30, 1987".

(2) The second sentence of such paragraph is amended (A) by inserting after "Research" the following: "and Health Care Technology Assessment", and (B) by striking out "and at least 5 per centum of such amount or $1,000,000, whichever is less, shall be available only for dissemination activities directly undertaken through such Center" and inserting in lieu thereof "and at least 10 per centum of such amount or $1,500,000, whichever is less, shall be available only for the user liaison program and the technical assistance program referred to in section 305(c)(2) and for dissemination activities directly undertaken through such Center".

(3) Such paragraph is amended by adding after the second sentence the following: "For health care technology assessment activities undertaken under subsections (b)(5), (e), (f), and (g) of section 305 the Secretary shall obligate from funds appropriated under this paragraph not less than $3,000,000 for the fiscal year ending September 30, 1985, $3,500,000 for the fiscal year ending September 30, 1986, and $4,000,000 for the fiscal year ending September 30, 1987. For grants under section 309 the Secretary shall obligate from funds appropriated under this paragraph not less than $500,000 for the fiscal year ending September 30, 1985, $750,000 for the fiscal year ending September 30, 1986, and $750,000 for the fiscal year ending September 30, 1987.".

(4) The last sentence of such paragraph is amended by striking out "for each" through "1984," and inserting in lieu thereof "for any fiscal year".

(b) Paragraph (2) of such section is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$47,000,000 for the fiscal year ending September 30, 1985, $49,000,000 for the fiscal year ending September 30, 1986, and $52,000,000 for the fiscal year ending September 30, 1987".

SEC. 8. Section 309 of the Public Health Service Act (42 U.S.C. 242n) is amended to read as follows:

"COUNCIL ON HEALTH CARE TECHNOLOGY

"SEC. 309. (a)(1) In accordance with this section, the Secretary shall make grants for the planning, development, establishment, and operation of a Council on Health Care Technology. The Council shall comply with the provisions of this section.

"(2)(A) The Secretary shall make an initial grant under paragraph (1) to the National Academy of Sciences for the planning, development, and establishment of the Council with the membership prescribed by subsection (d)(1). The amount of such grant may not exceed $500,000 and may be made for not more than two-thirds of the cost of the planning, development, and establishment of the Council.

"(B) The Secretary may not make a grant for the operation of the Council unless the application submitted to the Secretary for the grant contains written assurances from the applicant that the applicant will expend from non-Federal sources for the operation of the Council an amount equal to at least twice the amount of the grant applied for.

"(b) The purposes of the Council shall include—

"(1) promoting the development and application of appropriate health care technology assessments; and

"(2) the review of existing health care technologies in order to identify obsolete or inappropriately used health care technologies.

"(c)(1) The Council shall—

"(A) serve as a clearinghouse for information on health care technologies and health care technology assessment;

"(B) collect and analyze data concerning specific health care technologies;

"(C) identify needs in the assessment of specific health care technologies and research on assessment methodologies;

"(D) develop and evaluate criteria and methodologies for health care technology assessment;

"(E) promote education, training, and technical assistance in the use of health care technology assessment methodologies and results; and

"(F) stimulate, coordinate, and commission assessments of health care technologies.

"(2) No funds from any grant made by the Secretary under this section for the planning, development, and establishment of the Council may be used to conduct any assessment of a health care technology.

"(d)(1) For purposes of a grant for the planning, development, and establishment of the Council, the Council shall be composed of:

"(A) At least ten members appointed by the National Academy of Sciences from individuals who have education, training, experience, or expertise relating to the quality and cost-effectiveness of health care technologies and who are representatives of organizations of health professionals, hospitals, and other health care providers, health care insurers, employers, consumers, and manufacturers of products for health care.

"(B) Three members appointed by the Secretary of Health and Human Services.

"(C) The Director of the Office of Technology Assessment, who shall be an ex officio member.

"(2) Any vacancy in the Council shall not affect its power and, for purposes of a grant for the planning, development, and establishment of the Council, shall be filled in the manner prescribed by paragraph (1).

"(f) The President of the National Academy of Science shall designate one of the members appointed to the initial Council under subsection (d)(1)(A) as Chairman of the Council for a one-year term. Thereafter, the members of the Council shall elect one of its members as Chairman for such terms as may be determined by the Council.

"(g) The recipient of a grant under subsection (a) shall submit an annual report to the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate on the Council's activities.

"(h) No grant may be made under this section unless an application is submitted to the Secretary in such form and containing such information as the Secretary shall prescribe.".

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 771 provides for a revision and extension of the Office of Health Promotion and Disease Prevention of the Public Health Service. The authority for these programs has been condensed and revised—a proposal that comes at the request of the administration. The Office of Health Promotion is extended for 3 fiscal years.

The bill also creates a network of centers for health promotion and disease prevention, much like those that were created in H.R. 2350, which passed the House late last year. This proposal was originally authored by my colleagues from the Energy and Commerce Committee—Congressman SHELBY, Congresswoman MIKULSKI, and Congressman SCHEUER. These centers are to perform basic and applied research in preventive health, an area of research that has received too little emphasis in the traditional fields of academic medicine.

In addition, the legislation would change the statutory definition of rare disease or condition in the Orphan Drug Act to clarify when a drug can be designated by FDA as an orphan drug. Under the amendment a drug for a disease which affects less than 200,000 people in the United States would be an orphan drug.

This bill is sponsored by Senator ORRIN HATCH. The proposal enjoys broad bipartisan support. There is

wide agreement that we should not be paying the high costs to treat diseases that we know are preventable.

The major differences between the centers created under this bill and the similar provisions of H.R. 2350 are the placement of the centers within the Department of Health and Human Services and the funding levels proposed. Under the original House bill, the centers would have been administered by the Director of the National Institutes of Health. Under the Senate bill, the centers are to be created within the Public Health Service, with the full expectation that the Secretary and the Assistant Secretary will place the centers within the Centers for Disease Control.

I believe that this change is a constructive one: The mission of the Centers for Disease Control is more closely parallel to such a program of research and demonstration. The CDC has over the years demonstrated a capacity to bridge the gaps between academic health care and the daily workings of State and local public health agencies. I support the Senate provision that permits the Secretary to administer this important activity through the CDC.

The purpose of these centers is to conduct research into the prevention of illness and the promotion of good health. One of the reasons this program is so necessary is that high quality research in the prevention field has been extremely limited. The legislation would require that proposals to receive center grants must be rigorously peer reviewed to assure the scientific validity of the research proposed to be undertaken. In providing for peer review of grant proposals the Secretary should consider the appropriateness of utilizing the peer review procedures and expertise in place through the NIH's division of research grants.

The legislation also requires that demonstration projects conducted by the centers incorporate prospectively designed evaluation components. Such prospective evaluations are necessary to assure that demonstration projects will yield valid new knowledge about health promotion and disease prevention strategies.

In approving grants for centers under this authority, it is intended that the principal activities funded by the award will be the actual conduct of research and demonstration projects which have been described in the center grant application which underwent peer review. The centers program is not intended merely to provide core support of researchers and related support staff.

The funding levels in this bill for the centers are lower than those in the original House-passed bill. While I believe that higher funding could be usefully spent on these programs, I am willing to support these lower levels in order to bring a bill forward at this time. The legislation authorizes $3 million in fiscal year 1985, $8 million in fiscal year 1986, and $13 million in fiscal year 1987. These authorizations will permit support of 13 center grants over a 3-year period.

Mr. Speaker, S. 771 also authorizes appropriations for health care technology assessment, health services research, and health statistics.

These provisions retain the essential features of the House bill H.R. 5496 passed in June, and incorporates compatible features passed by the Senate as part of its health manpower legislation. In particular, the amendment agrees with the provision of the House bill which:

Enhance the authority and stature of the technology assessment unit in the Department of Health and Human Services;

Earmark specific levels of funding for the Department's technology assessment functions; and

Reinstitute an Advisory Council of outside experts to provide guidance to the Department on technology assessment.

In addition, the Senate has agreed to blend the provision, which appeared in both the House and Senate versions, authorizing Federal funding, on a matching bases, for a private sector consortium. This consortium would undertake technology assessment functions in addition to those conducted in the Department, including serving as a clearinghouse, developing and evaluating assessment criteria and methods, and promoting both research on technology assessment and greater use of technology assessments.

The amendment authorizes an initial grant, to be made to the National Academy of Sciences, to plan, develop, and establish a Council on Health Care Technology. Other third-party payors, health care providers, consumer groups, manufacturers, and others interested in technology assessment would be expected to contribute resources and to participate in the Council. The amendment includes various requirements regarding the initial composition and activities of the Council, designed to assure that the Council is established on a strong foundation. It also prohibits the Council from using any of the initial Federal grants funds for conducting assessments. The purpose of this prohibition is to make sure the Council gives priority during the first year to becoming firmly established and to carrying out its other functions.

It is our expectation that, once the Council is established. It will become autonomous and that Federal grants will be made directly to the Council, rather than to the Academy. It is also our intent that once established, the Council itself would determine such issues as its composition, its priorities, and how it carries out its functions. Since our purpose in supporting this function in the private sector is to maximize the Council's resources and credibility, and to allow it to take advantage of whatever opportunities are presented to contribute to a better understanding and better use of technology assessment, neither the Congress nor the Department should encumber the Council with directives and requirements. We believe that continued representation on the Council by persons designated by the Secretary, such as the Director of the National Institutes of Health and the Director of the National Center for Health Services Research, will assure adequate consideration of departmental views and interests.

Mr. Speaker, this bill provides us with an excellent opportunity to make a sound investment in high quality and cost-effective health care. Much concern is being expressed these days about the high rate of inflation in health care costs and the pending bankruptcy of the medicare trust funds. However, we should not merely be trying to slash out at the costs of health care; we should be trying to avoid spending money on useless or ineffective care, so that we can spend it wisely on the most appropriate and effective care. This bill would increase our ability to do that.

I wish to thank the ranking member of our subcommittee, Mr. MADIGAN, for his valuable contributions to this bill. I also wish to acknowledge the contributions made by Senator HATCH, Senator KENNEDY and, especially, Senator QUAYLE, in putting these provisions together.

Mr. Speaker, I urge support for the legislation.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to urge the support of my colleagues for S. 771 which provides for the reauthorization of the Office of Disease Prevention and Health Promotion and establishes 13 centers to undertake research and demonstration projects in health promotion and disease prevention.

S. 771 was passed by the Senate on September 21, 1983. The House amendment to S. 771 being considered today reauthorizes the prevention activities by the Department of Health and Human Services at the levels in the Senate-passed bill. The legislation also establishes 13 prevention centers over a 3-year period. Similar prevention centers established in S. 540, legislation reauthorizing the National Institutes of Health, have been deleted.

Although the Secretary of Health and Human Services is afforded the flexibility to establish and fund these prevention centers through any agency within the Department, consideration should be given to placing

31-059 O-87-24 (Pt. 22)

these centers within the Centers of Disease Control. CDC has worked very well with States and localities to bridge the gap between research and treatment services and would be most effective in administering the 13 prevention centers established in this legislation.

I believe this legislation is noncontroversial and should be supported by the Members of this House.

Mr. WAXMAN. Mr. Speaker, before yielding further to our colleagues, I do want to point out that this bill, as amended, also incorporates the Senate amendment to H.R. 5496, Health Care Technology. It also makes a technical correction dealing with a recent problem on orphan drugs.

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Alabama [Mr. SHELBY], who is one of the original authors of this legislation, who has worked very long and hard in shepherding this program into reality. It has been a difficult road, but I am pleased that we are now at this point in the legislation where, with an act of this House, we will send the bill to the Senate for further action and then on to the President.

□ 1840

Mr. SHELBY. Mr. Speaker, I rise in support of S. 771, to establish centers for research and demonstration projects concerning disease prevention and health promotion at selected schools of public health and academic health centers.

I am pleased that in the closing hours of the Congress, we can make this significant move toward containing health care costs, and reducing the level of personal suffering associated with illness. This legislation represents a new course in Federal health policy—one which will bring us closer to the time when most major causes of death and disability can be effectively eliminated.

Mr. Speaker, this bill will place major importance on research in health promotion and disease prevention—an often underestimated area of our national health policy. The bill will establish nationwide centers for research into the causes of illness and disease and for the promotion of healthier lifestyes among all Americans. The center created in the bill will have defined, sick and well populations under observation. They will dispense information and conduct activities relating to biostatistics, nutrition, environmental health and behavorial science, as examples. Existing public health knowledge can now be disseminated to our communities in an effective, cost-efficient manner.

We need to balance the scales of disease-oriented research—which has yielded remarkable advances in health care—with yet another approach to health care, the prevention of disease before it leads to enormous costs. We need to educate more health professionals in ways to encourage patients to avoid risk and enhance their health. We need to devote a greater share of our health care dollar toward measures not only to treat illness, but to reduce its occurrence, and toward measures which will not merely set a higher quality of life as a policy goal, but will actually achieve such a goal.

I would mention that the legislation before us today gives the Secretary of HHS discretion in determining the most appropriate agency of Government to establish and maintain such centers across the country. While we refrained from explicit statutory language directing the Secretary to select one agency over the other, it should be stated for the Record that congressional preference is that administration of the centers rest with the Center for Disease Control. The CDC has demonstrated that it is accustomed to directing public health projects which translate research findings into actual community and group practice.

This bill will place health promotion and disease prevention on a higher plane of public awareness. It will place a higher priority on prevention efforts in the broad health care arena and provide real promise in addressing rapidly escalating health care costs.

I strongly urge my colleagues' favorable consideration of S. 771.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Oregon, [Mr. WYDEN].

Mr. WYDEN. I want to commend the chairman for the tremendous job that he has done on this package of bills.

Mr. Speaker, I rise to speak in favor of title VI of this bill, which bring consumers one step closer to being able to get the information they need to help make the health care market work.

Mr. Speaker, Members of Congress talk all the time about the need to bring down the high cost of health care, which has grown to a staggering $360 billion a year. We talk about the need to pay hospitals prospectively and ways to encourage physicians to take assignment of medicare claims. We also have talked at length about the responsibility of consumers in the health care arena to compare health care services and make sure that they are getting the best quality care for the best price.

Although half a loaf from its original construction, title VI will bring us one step closer to a health care system where competition really works and consumers really can shop for the care they need. In looking for ways to curtail the health care cost dilemma, we can either choose competition, regulation, or some combination of the two. Title VI in its original form would have helped swing the scales toward real competition in the health care marketplace.

Title VI, in its present form, will mean that purchasers like business groups, labor unions, and senior groups will have to wait a little longer before they can obtain state-of-the-art information on how they can use health care data to get the most value for their health care dollars.

As originally written, this title would have required the Secretary of Health and Human Services to study how private consumer groups could collect and interpret their own data on health care services and prices, prepare a plan to get information from the study—the tools to data collection—into the hands of consumers, and then actually go forward and assist purchaser groups trying to gather health care data on the local level.

In its present form, this title will ask the Secretary to study the issue, and recommend ways to get the results of the study into consumers' hands, but stop short of actually giving consumers the tools to collect health care data.

Businesses, labor groups, and consumers of all kinds are bombarded with information on the price and quality of nearly every goods they buy, from cars to shampoos. But when it comes to buying health care, one of the most important and most costly purchases most people ever make, they are asked to pay the bills with their eyes closed.

Businesses have been trying for a decade to rein in their health care costs. Some are doing so by decreasing benefits or encouraging use of prevention plans. Others want to do so by finding out what they are paying all their dollars for and looking for ways to get it for less.

Although title VI won't give consumers and physicians this information, it can eventually be used to help them learn how to get it and how to interpret it responsibly. And most of all, it does send right now the very valuable signal that the Congress is serious about getting health care costs under control and encouraging consumers, including businesses, labor groups, and senior citizen groups, to get involved in looking at prices.

Although the title doesn't go as far as we had hoped it would, it is a valuable first step.

Title VI is a testament to the hard work and support of many groups, from the U.S. Chamber of Commerce, the National Association of Manufacturers, the Washington Business Group on Health, to the AFL-CIO, the Gray Panthers, and the American Association of Retired Persons, and the hard work of many of my col-

leagues on both sides of the aisle and both Houses of the Congress, especially Mr. WAXMAN, the distinguished chairman of the Health and Environment Subcommittee, Mr. TAUKE, and Senator GRASSLEY.

I appreciate the hard work and good effort of my colleagues and of so many groups that went to the line on this moderate, bipartisan provision. I look forward to continuing work with them in this area in the future and I urge my colleagues to support this important provision in the bill.

I also rise to speak in favor of the provisions in this bill which will give chiropractic students access to funds in two specific areas—the Health Professions Student Loan Program and Educational Assistance for Individuals from Disadvantaged Backgrounds.

With health care costs taking up more than 10 percent of our gross national product, we need to look for ways to increase competition in health care. Including other quality providers in the system is one way of doing it.

The health manpower hearings that were held on this bill left us with two clear messages—that the cost of health care education is extremely burdensome and contributes to rising health care costs and that students from disadvantaged backgrounds are finding it extremely difficult to meet that burden.

This bill recognizes these needs by including alternate health care provider groups. The chiropractic profession requires 4 years of training after the usual undergraduate requirements. Recent statistics from the Bureau of Health Professions indicate that chiropractic students are the third largest users of the Health Education Assistance Loans Program.

I am very pleased with our recognition of this fact and of the potential for making the health care market more competitive by encouraging greater use of less expensive, high-quality health care providers. I encourage my colleagues to support this important intent of the bill and the chiropractic provisions which will help us achieve this goal.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and pass the Senate bill, S. 771, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COAST GUARD AUTHORIZATIONS FOR FISCAL YEARS 1985 AND 1986

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2526), to authorize appropriations for the Coast Guard for fiscal years 1985 and 1986, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. CARNEY. Mr. Speaker, reserving the right to object, and I do not plan to object, I just wish to explain to my colleagues that this bill is virtually identical to the Coast Guard Authorization Act which the House passed last Thursday.

The only significant difference between the two bills is that this bill would essentially maintain the status quo with respect to the number of operational high- and medium-endurance Coast Guard cutters on the Atlantic and gulf coasts. The bill we passed last Thursday would have permitted a reduction in the number of those cutters. I think that maintaining the present number of Coast Guard cutters in those areas makes good sense, especially given the increasing demands of our Nation's drug interdiction efforts.

I urge my colleagues to support Chairman JONES' unanimous consent request.

Mr. JONES of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. CARNEY. I now yield to the chairman of the committee for a further explanation.

Mr. JONES of North Carolina. I appreciate the gentleman yielding, but I think he read my script, I am not sure. So there is no need to repeat the language which the gentleman has just used. He made a very good explanation.

Actually this action today will be the final action the Congress must take to clear this bill for the signature of the President. That is how important the Coast Guard authorization is.

I thank the gentleman for yielding.

● Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of the Coast Guard authorization bill, S. 2526. This bill gives the Coast Guard funding for fiscal years 1985 and 1986 and is virtually identical to S. 1689 as it passed the House last week. The bill provides $2.4 billion and $2.6 billion for each of those years respectively so that the Coast Guard has the people and equipment to perform its important at-sea operations, including search and rescue, law enforcement, icebreaking, marine safety, and military readiness.

As in the House-passed version, there are specific items that are important for my State of Alaska and for the rest of the Nation in this legislation. These provisions include:

The sum of $30 million for the design and construction of a search and rescue facility in the Aleutian Islands to permit prompt response to all fishing vessels in the Bering Sea;

Planning for icebreakers to replace the existing wornout cutters;

Establishment of a C-130 fleet of aircraft (27 planes) to insure a continued level of service throughout the Nation;

Development of an electronic surveillance system for C-130's to improve search and rescue capabilities as well as maximize fisheries law enforcement and prosecution;

Authorization for the Coast Guard to pay travel expenses from remote areas such as Alaska for an orientation visit for potential candidates for appointment to the Coast Guard Academy;

Clarification of pilot requirements, including when a pilot is required on board vessels in Prince William Sound; and

Technical clarifications needed in the Commercial Fishing Industry Vessel Act.

In addition, the bill contains provisions that would provide for legal equity for women in the Coast Guard by eliminating gender-specific terms, for coastal and inland navigation safety by reauthorizing two valuable safety advisory committees and making a certain inland rule change, and for improvements in the management and efficiency of Coast Guard programs, including the administration of health care for Coast Guard personnel. These three general areas were the subject of legislation I introduced earlier this Congress and are among the provisions in the bill requested by the administration. Finally, the bill provides for better mobilization planning by allowing the Commandant to appoint the number of Reserve flag officers required.

All Coast Guard duties need to be fully funded and this bill should be a step to achieve that goal. Therefore, I urge adoption of this important bill.●

● Mr. DAVIS. Mr. Speaker, I rise in support of the Coast Guard authorization bill of 1984 which provides $2.4 billion for 1985, and $2.6 billion for 1986 and direction for Coast Guard

capital improvements with regard to maintaining both vessel and aircraft fleets. In addition, the bill contains the military and civilian manning levels for the Coast Guard in each of these years. Beyond money and manpower, the bill contains other important measures concerning Coast Guard programs or laws administered by the Coast Guard. Finally, there are many items included in the legislation that were supported or requested by the administration.

I was particularly pleased that certain provisions that concern the Great Lakes were included. Specifically, these provisions include:

Amendments to the Coastwise Load Line Act which exempts certain barges operating close to shore on the Great Lakes from load line requirements but establishes special operating regulations to ensure safety; and

Clarification of the logbook requirements in the shipping laws so that vessels traveling to Canada are exempt from this requirement as they had been prior to the enactment of subtitle II of title 46, United States Code.

Mr. Speaker, the Coast Guard is recognized throughout the Nation as a highly professional and cost-effective service. Those of us who represent maritime areas, such as the Great Lakes, can assure you that these services are essential. This bill not only provides for adequate funding of the Coast Guard and its important programs, but also fulfills our oversight responsibilities to review the programs and laws of the Coast Guard and make improvements where required.●

Mr. CARNEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2526

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Coast Guard Authorization Act of 1984".

AUTHORIZATION OF FUNDS

SEC. 2. Funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal years 1985 and 1986 as follows:

(1) For the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction, $1,800,000,000 for fiscal year 1985 and $1,950,000,000 for fiscal year 1986; and for increases in salary, pay, and other employee benefits authorized by law, and for the full amount of fixed costs associated with operation of five Coast Guard polar icebreaking vessels manned Coast Guard military personnel, such sums as may be necessary for each such fiscal year.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $580,000,000 for fiscal year 1985 (of which $30,000,000 shall be for design, survey, acquisition and construction of a search and rescue facility in Western Alaska to serve the Aleutian Islands) and $680,000,000 for fiscal year 1986 (of which $30,000,000 shall be for construction of such facility).

(3) For research, development, test, and evaluation, $35,000,000 for fiscal year 1985 and $38,000,000 for fiscal year 1986.

(4) For the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation, $8,700,000 for fiscal year 1985, and such sums as may be necessary for expenses of the Coast Guard for such purposes for fiscal year 1986.

(5) For retired pay including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents' Medical Care Act, such sums as may be necessary for fiscal years 1985 and 1986.

PERSONNEL LEVELS

SEC. 3. Notwithstanding any other provision of law, the Coast Guard's full-time equivalent strength levels for fiscal years 1985 and 1986 shall be maintained as follows:

(1) For active duty military personnel, not less than 39,150 for fiscal years 1985 and 1986, which shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code, or Public Health Service officers on active duty with the Coast Guard.

(2) For civilian employees of the Coast Guard, not less than 5,484 for fiscal years 1985 and 1986.

MILITARY TRAINING

SEC. 4. For fiscal years 1985 and 1986, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,500 student-years.

(2) For flight training, 118 student-years.

(3) For professional training in military and civilian institutions, 556 student-years.

(4) For officer acquisition, 1,038 student-years.

TRANSFER OF FUNDS

SEC. 5. (a) Whenever the Secretary of the department in which the Coast Guard is operating determines it to be in the national interest, the Secretary may transfer not to exceed 5 percent of the funds appropriated for the purposes described in paragraph (1) or (2) of section 2 of this Act for use for any purpose described in any paragraph of section 2, except that the total available for the purposes for which the funds are transferred shall not be increased by more than 10 percent as a result of the transfer.

(b) No transfer of funds may occur under subsection (a) of this section until 15 days after the Secretary has provided written notification to the Chairman of the Committee on Commerce, Science, and Transportation of the Senate and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representatives stating reasons for the determination and a description of the purposes for which the funds proposed to be transferred will be used.

POLAR ICEBREAKING

SEC. 6. (a) It is the sense of the Congress that the United States has important security, economic, and environmental interests in developing and maintaining a fleet of icebreaking vessels capable of operating effectively and independently in the heavy ice regions of the Arctic and Antarctic.

(b) The Secretary of the department in which the Coast Guard is operating shall prepare design and construction plans for the purchase of at least 2 new polar icebreaking vessels to be operational by the conclusion of fiscal year 1990, and shall provide detailed reports to the Congress describing the status of those plans in January 1985 and January 1986. In preparing such plans, the Secretary shall consult with other interested Federal agencies for the purpose of ensuring that all appropriate military, scientific, economic and environmental interests are taken into account.

ALCOHOL USE BY BOATERS

SEC. 7. (a) Section 2302 of title 46, United States Code, is amended by redesignating subsection (c) as subsection (d) and inserting immediately after subsection (b) the following:

"(c) An individual who is intoxicated when operating a vessel, as determined under standards prescribed by the Secretary by regulation, shall be—

"(1) liable to the United States Government for a civil penalty of not more than $1,000; or

"(2) fined not more than $5,000, imprisoned for not more than one year, or both.".

(b)(1) Section 6101(b) of title 46, United States Code, is amended by adding at the end thereof the following: "Each report filed under this section shall include information as to whether the use of alcohol contributed to the casualty.".

(2) Section 6102(a) of title 46, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", including information and statistics concerning the number of casualties in which the use of alcohol contributed to the casualty".

(3) Section 13102(c)(4) of title 46, United States Code, is amended by inserting immediately after "program" the following: ", that includes the dissemination of formation concerning the hazards of operating a vessel when under the influence of alcohol".

RECREATIONAL BOATING SAFETY AMENDMENTS

SEC. 8. (a) Section 4307(a)(1)(A) of title 46, United States Code, is amended—

(1) by inserting "(i)" immediately after "(A)";

(2) by striking "or" at the end of clause (i), as so redesignated by paragraph (1) of this subsection, and inserting in lieu thereof "and"; and

(3) by adding at the end thereof the following:

"(ii) it does not contain a defect which has been identified, in any communication to such person by the Secretary or the manufacturer of that vessel, equipment or component, as creating a substantial risk of personal injury to the public; or".

(b) Section 4311(b)(1) of title 46, United States Code, is amended by inserting "defect or the" immediately before "nonconformity".

(c) Section 4311(f)(1) of title 46, United States Code, is amended by inserting "or the manurfacturer of that vessel, equipment or component a defect which creates a substantial risk of personal injury to the public" immediately before the semi-colon.

RESCUE SWIMMING PROGRAM

SEC. 9. The Secretary of the department in which the Coast Guard is operating shall use such sums as are necessary, from amounts appropriated for the operation and maintenance of the Coast Guard, to establish a helicopter rescue swimming program for the purpose of training selected Coast Guard personnel in rescue swimming skills.

LIFESAVING EQUIPMENT ON PASSENGER FERRIES

SEC. 10. The Secretary of the department in which the Coast Guard is operating shall proceed vigorously with efforts to develop improved lifesaving equipment for use on passenger ferries.

SAN FRANCISCO VTS

SEC. 11. (a) Of the funds authorized to be appropriated by paragraph (1) of section 2 of this Act, such sums as are necessary shall be used to maintain in full operation the vessel traffic service (VTS) system in San Francisco, California, throughout fiscal years 1985 and 1986.

(b) None of the funds authorized to be appropriated by this Act may be used to develop or issue a request for proposals to contract any function or activity involved in operating the vessel traffic service (VTS) system in San Francisco, California, which is, on the date of enactment of this Act, performed by Coast Guard personnel.

(c) None of the funds authorized to be appropriated by this act may be used to hire, train, or otherwise utilize civilian personnel to replace Coast Guard military personnel involved in operating the vessel traffic service (VTS) system in San Franscisco, California, until the Coast Guard has conducted a study in accordance with this subsection and has submitted the results of such study to the Congress. Such study shall identify the costs, efficiencies, and benefits, if any, that would accrue to the Federal Government, the Coast Guard, the ports, the Navy, and other users of the vessel traffic service (VTS) system in San Francisco, California, from the use of civilian personnel in that system.

LONG RANGE SEARCH AND SURVEILLANCE AIRCRAFT

SEC. 12. (a) Of the amounts authorized to be appropriated by paragraphs (1) and (2) of section 2 of this Act, such sums as are necessary shall be used to procure, maintain, and operate a fleet of not less than twenty-seven long range search and surveillance aircraft for use by the Coast Guard.

(b) The Secretary of the department in which the Coast Guard is operating is encouraged to conduct the research, development, test and evaluation necessary for an electronic surveillance system, capable of producing and documenting images for search and rescue or law enforcement purposes, for the long range search and surveillance aircraft of the Coast Guard.

PROTECTION OF SEAMEN

SEC. 13. (a) Chapter 2 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 2114. Protection of seamen against discrimination

"(a) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel may not discharge or in any manner discriminate against a seaman because the seaman in good faith has reported or is about to report to the Coast Guard that the seaman believes that a violation of this subtitle, or a regulation issued under this subtitle, has occurred.

"(b) A seaman discharged or otherwise discriminated against in violation of this section may bring an action in an appropriate district court of the United States. In that action, the court may order any appropriate relief, including—

"(1) restraining violations of this section; and

"(2) reinstatement to the seaman's former position with back pay.".

(b) The analysis of chapter 21 of title 46, United States Code, is amended by adding at the end thereof the following:

"2114. Protection of seamen against discrimination.".

CONTRACTING FOR SERVICES PERFORMED BY THE COAST GUARD

SEC. 14. (a) The Secretary of the department in which the Coast Guard is operating is encouraged to identify those functions and services presently performed by Coast Guard personnel which are not inherently governmental in nature, and which may be performed with equal effectiveness and at lower cost under contract to the private sector.

(b) None of the funds authorized to be appropriated by this Act may be used—

(1) to issue any contract that would have the effect, either by itself or in combination with other contracting proposals, of causing a deterioration in the overall ability of the Coast Guard to carry out its missions in behalf of the security, safety, and economic and environmental well-being of the United States; or

(2) to issue a request for proposals to contract out any function or activity which is, on the date of enactment of this Act, performed by civilian employees or members of the Coast Guard, unless a period of 30 days in which either the Senate or House of Representatives is in session has expired after the Secretary has submitted in writing to the President of the Senate, the Speaker of the House of Representatives, the Chairman of the Committee on Commerce, Science, and Transportation of the Senate, and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representatives a full and complete statement (including relevant supporting studies) concerning the proposed contracting and the reasons therefor.

(c) Prior to the beginning of fiscal years 1985 and 1986, the Secretary shall submit to the Congress a list of functions or activities for which the Secretary expects to submit notifications required by subsection (b)(2) of this section during that fiscal year.

(d) The requirements of subsection (b)(2) of this section do not apply to contracts for functions or activities which are performed by three or fewer Coast Guard personnel.

LEGAL EQUITY FOR WOMEN

SEC. 15. (a)(1) Section 371 of title 14, United States Code, is amended—

(A) by striking "male" both places it appears in the second sentence of subsection (a);

(B) in subsection (c)(1)—

(i) by striking "he agrees in writing that, upon his" and inserting in lieu thereof "the person agrees in writing that, upon"; and

(ii) by striking "he will" and inserting in lieu thereof "the person will"; and

(C) by striking "he has the consent of his parent or guardian to his agreement" in subsection (c)(2) and inserting in lieu thereof "the person has the consent of the person's parent or guardian to the agreement".

(2) The first sentence of section 487 of such title is amended by striking "widows" and inserting in lieu thereof "surviving spouses".

(3)(A) The following sections of such title are amended by striking "enlisted man" each place it appears and inserting in lieu thereof "enlisted member": 353, 354, 355, 357, 359, 360, 361, 362, 365, 366, 367, 370, 421, 423 and 424.

(B) The following sections of such title are amended by striking "enlisted men" each place it appears and inserting in lieu thereof "enlisted menbers": 41, 211(a)(2), 212(a)(2), 213(a)(1), 214, 357, 432(c), 478(d) and 480.

(C) The following sections of such title are amended by striking "Enlisted men" each place it appears and inserting in lieu thereof "Enlisted members": 41, 352, 367, 478(a), 481 and 482.

(D) The following sections of such title are amended by striking "officers and enlisted men" each place it appears and inserting in lieu thereof "members": 92(b), 144(a), 145(a)(2), 148, 149, 487 and 832.

(E) Section 149 of such title is amended by striking "Officers and enlisted men" and inserting in lieu thereof "Members".

(F) Section 351(a) of such title is amended by striking "men" and inserting in lieu thereof "persons".

(G) Section 361 of such title is amended by striking "the man" and inserting in lieu thereof "the member".

(H) Sections 192 and 483 of such title is amended by striking "commissioned officer, warrant officer, or enlisted man" each place it appears and inserting in lieu thereof "member".

(I) Section 488 of such title is amended by striking "officers and men" and inserting in lieu thereof "members".

(4)(A)(i) The heading of section 149 of such title is amended to read as follows:

"§ 149. Detail of members to assist foreign governments".

(ii) The item relating to such section in the analysis of chapter 7 of such title is amended to read as follows:

"149. Detail of members to assist foreign governments.".

(B)(i) The heading of section 360 of such title is amended to read as follows:

"§ 360. Recall to active duty with consent of member".

(ii) The item relating to such section in the analysis of chapter 11 of such title is amended to read as follows:

"360. Recall to active duty with consent of member.".

(C)(i) The heading of section 361 of such title is amended to read as follows:

"§ 361. Relief of retired enlisted member promoted while on active duty".

(ii) The item relating to such section in the analysis of chapter 11 of such title is amended to read as follows:

"361. Relief of retired enlisted member promoted while on active duty.".

(D)(i) The heading of section 487 of such title is amended to read as follows:

"487. Procurement and sale of stores to members and civilian employees".

(ii) The item relating to such section in the analysis of chapter 13 of such title is amended to read as follows:

"487. Procurement and sale of stores to members and civilian employees.".

(E)(i) The heading preceding section 350 in such title is amended to read as follows:

"ENLISTED MEMBERS"

(ii) The heading preceding the item relating to section 350 in the analysis of chapter 11 of such title is amended to read as follows:

"ENLISTED MEMBERS"

(b)(1) The first section of the Act of August 19, 1950 (33 U.S.C. 771) is amended—

(A) by striking "he" in clause (1) and inserting in lieu thereof "that employee";

(B) by amending clause (2) to read as follows:

"(2) the surviving spouse of the former employee was married to the former employee prior to the retirement of the former employee from the Lighthouse Service and has not remarried—"; and

(C) by striking "such widow, so long as she" in the material after clause (2) and inserting in lieu thereof "the surviving spouse, so long as the surviving spouse".

(2) Section 2 of such Act (33 U.S.C. 772) is amended—

(A) by amending clause (2) to read as follows:

"(2) the surviving spouse of the employee has not since remarried,"; and

(B) by striking "such widow, so long as she" in the material after clause (2) and inserting in lieu thereof "the surviving spouse, so long as the surviving spouse".

COASTAL AND INLAND NAVIGATION SAFETY

SEC. 16. (a) Subsection (e) of Public Law 96-380 (33 U.S.C. 1231a(e)) is amended by striking "five years from the date of enactment of this Act" and inserting in lieu thereof "on September 30, 1990".

(b)(1) Rule 24(i) of the Inland Navigational Rules, enacted by section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2024(i)), is amended by inserting "(except below the Huey P. Long Bridge on the Mississippi River)" immediately after "Western Rivers".

(2) Section 5 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2073) is amended—

(A) by amending the second sentence in subsection (c) to read as follows: "Members of the Council, while away from their home or regular place of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code."; and

(B) by striking "5 years from the date of enactment of this Act" in subsection (d) and inserting in lieu thereof "on September 30, 1990".

(c) Rule 14 of the Inland Navigational Rules, enacted by section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2014), is amended—

(1) in subsection (a), by striking "When" and inserting in lieu thereof "Unless otherwise agreed, when"; and

(2) by adding at the end thereof the following:

"(d) Notwithstanding paragraph (a) of this Rule, a power-driven vessel operating on the Great Lakes, Western Rivers, or waters specified by the Secretary, and proceeding downbound with a following current shall have the right-of-way over an upbound vessel, shall propose the manner of passage, and shall initiate the maneuvering signals prescribed by Rule 34(a)(i), as appropriate.".

COAST GUARD MANAGEMENT AND EFFICIENCY

SEC. 17. (a) Section 971(b) of title 10, United States Code, is amended—

(1) by striking "and" at the end of clause (1);

(2) by striking the period at the end of clause (2) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(3) no officer of the Coast Guard may be credited with service as a midshipman at the United States Naval Academy or as a cadet at the United States Military Academy, United States Air Force Academy, or United States Coast Guard Academy.".

(b)(1) Section 257 of title 14, United States Code, is amended by adding at the end thereof the following:

"(e) An officer whose involuntary retirement or separation is deferred under section 295 of this title is not eligible for consideration for promotion to the next higher grade during the period of that deferment.".

(2)(A) Chapter 11 of such title is amended by inserting immediately after section 294 the following:

"§ 295. Deferment of retirement or separation for medical reasons"

"(a) Subject to subsection (b), the Secretary may defer the retirement or separation of a commissioned officer, other than a commissioned warrant officer, if the evaluation of the physical condition of the officer and determination of the officer's entitlement to retirement or separation for physical disability require hospitalization, medical observation, or other physical disability processing that cannot be completed before the date on which the officer would otherwise be retired or separated.

"(b) A deferment under subsection (a)—

"(1) may only be made with the consent of the officer involved; and

"(2) if the Secretary receives written notice from the officer withdrawing that consent, shall end not later than the end of the 60-day period beginning on the date the Secretary receives that notice.".

(B) The analysis of such chapter is amended by inserting immediately after the item relating to section 294 the following:

"295. Deferment of retirement or separation for medical reasons.".

(3)(A) Section 647 of such title is amended by striking "$25,000" and inserting in lieu thereof "$100,000".

(B) The amendment made by subparagraph (A) of this paragraph shall apply to all claims considered, ascertained, adjusted, determined, compromised or settled on or after the date of enactment of this Act.

(4) Section 367 of such title is amended—

(A) by striking "(a)" before "Under regulations";

(B) by striking "person detained" and inserting in lieu thereof "member detained"; and

(C) by striking "(1) of this subsection" and inserting in lieu thereof "clause (1)".

(c) Section 1114 of title 18, United States Code, is amended by striking "any officer or enlisted man of the Coast Guard," and inserting in lieu thereof "any member of the Coast Guard, any employee of the Coast Guard assigned to perform investigative, inspection or law enforcement functions,".

(d) Section 402(d) of title 37, United States Code, is amended by inserting "and the Secretary of Transportation with respect of the Coast Guard when it is not operating as a service in the Navy" immediately after "Secretary of Defense".

(e)(1) Subsection (a) of section 3732 of the Revised Statutes of the United States (41 U.S.C. 11) is amended—

(A) by striking "except in the War and Navy Departments" and inserting in lieu thereof "except in the Department of Defense and in the Department of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy" and

(B) by striking "or transportation" and inserting in lieu thereof ", transportation, or medical and hospital supplies".

(2) Subsection (b) of such section is amended by inserting "and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy" immediately after "The Secretary of Defense".

(3) The first proviso under the heading "MEDICAL DEPARTMENT" in the Act entitled "An Act making appropriations for the support of the Army for the fiscal year ending June thirteenth, nineteen hundred and seven", approved June 12, 1906 (34 Stat. 255), is repealed.

(f)(1) Section 911 of the Military Construction Authorization Act, 1982 (42 U.S.C. 248c) is amended—

(A) by striking "and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(B) by inserting "the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy," immediately before "and the appropriate officials".

(2) Section 1252 of the Department of Defense Authorization Act, 1984 (42 U.S.C. 248d) is amended—

(A) by striking "and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(B) by inserting "and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy" immediately after "with the Secretary of Health and Human Services" each place it appears.

(g)(1) The first section of the Act of March 23, 1906 (33 U.S.C. 491), popularly known as the "Bridge Act of 1906", is amended—

(A) by striking "and Chief of Engineers for their approval, nor until they" and inserting in lieu thereof "for the Secretary's approval, nor until the Secretary";

(B) by striking "by the Chief of Engineers and";

(C) by striking "of the Chief of Engineers and"; and

(D) by striking "of Transportation" the second and third place it appears.

(2) Section 502(b) of the General Bridge Act of 1946 (33 U.S.C. 525(b)) is amended—

(A) by striking "the Chief of Engineers and"; and

(B) by striking "they" both places it appears and inserting in lieu thereof "the Secretary".

REPEAL OF DUPLICATE TANKERMAN MANNING REQUIREMENT

SEC. 18. Section 8703(b) of title 46, United States Code, relating to tankerman manning requirements, is repealed.

INCLUSION OF SECRETARY OF TRANSPORTATION IN CERTAIN MEDICAL MATTERS

SEC. 19. Chapter 55 of title 10, United States Code is amended—

(1) in section 1072—

(A) by striking all after "by" through "may be," in paragraph (2)(D)(iii) and inserting in lieu thereof "the administering Secretary"; and

(B) by adding at the end thereof the following:

"(3) 'Administering Secretaries' means the Secretaries of executive departments specified in section 1073 of this title as having responsiblity for administering this chapter.";

(2) in section 1073, by striking all after "jurisdiction," through "Navy, and" and inserting in lieu thereof "the Secretary of Transportation shall administer this chapter for the Coast Guard when the Coast Guard is not operating as a service in the Navy, and the Secretary of Health and Human Services shall administer this chapter";

(3) in section 1074, by striking "Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "administering Secretaries";

(4) in section 1074a(a), by striking "Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof administering Secretaries";

(5) in section 1076(b) and (d), by striking "Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof "the administering Secretaries";

(6) in section 1078(a) and (b), by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(7) in section 1079—

(A) by striking "the Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "the administering Secretaries"; and

(B) by striking "with the Secretary of Health and Human Services" in subsections (a), (h)(2) and (k) and inserting in lieu thereof "with the other administering Secretaries";

(8) in section 1080, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(9) in section 1081, by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "the appropriate administering Secretaries";

(10) in section 1083, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(11) in section 1084—

(A) by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "an administering Secretary"; and

(B) by striking "he" and inserting in lieu thereof "the administering Secretary";

(12) by amending the text of section 1085 to read as follows:

"If a member or former member of a uniformed service under the jurisdiction of one executive department (or a dependent of such a member or former member) receives inpatient medical or dental care in a facility under the jurisdiction of another executive department, the appropriation for maintaining and operating the facility furnishing the care shall be reimbursed at rates established by the President to reflect the average cost of providing the care.";

(13) in section 1086—

(A) by striking "the Secretary of Health and Human Services" in subsection (a) and inserting in lieu thereof "the other administering Secretaries"; and

(B) by striking "the Secretary of Defense and the Secretary of Health and Human Services" in subsection (e) and inserting in lieu thereof "the administering Secretaries"; and

(14) in section 1092(a)(1), by striking "Secretary of Health and Human Services" and inserting in lieu thereof "other administering Secretaries".

CUTTER AVAILABILITY

SEC. 20. Throughout fiscal years 1985 and 1986, there shall be available for service at all times on the Atlantic and Gulf Coasts of the United States not less than, in the aggregate, thirty high and medium endurance Coast Guard cutters.

COAST GUARD REPRESENTATION ON RESERVE FORCES POLICY BOARD

SEC. 21. Section 175(b) of title 10, United States Code, is amended to read as follows:

"(b) Whenever the Coast Guard is not operating as a service in the Navy, the Secretary of Transportation may designate two officers of the Coast Guard, Regular or Reserve, to serve as voting members of the Board.".

EXPOSURE SUITS

SEC. 22. (a)(1) Chapter 31 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 3102. Exposure suits

"(a) The Secretary shall by regulation require exposure suits on vessels designated by the Secretary that operate in the Atlantic Ocean north of 32 degrees North latitude or south of 32 degrees South latitude and in all other waters north of 35 degrees North latitude or south of 35 degrees South latitude. The Secretary may not exclude a vessel from designation under this section only because that vessel carries other lifesaving equipment.

"(b) The Secretary shall establish standards for an exposure suit required by this section, including standards to guarantee adequate thermal protection, buoyance, and flotation stability.

"(c)(1) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $5,000. The vessel also is liable *in rem* for the penalty.

"(2) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section may be fined not more than $25,000, imprisoned for not more than 5 years, or both.".

(2) The analysis of chapter 31 of title 46, United States Code, is amended by inserting immediately after the item relating to section 3101 the following:

"3102. Exposure suits.".

(b) Section 3102 of title 46, United States Code (as added by subsection (a) of this section), does not limit the authority of the Secretary of the department in which the Coast Guard is operating to prescribe regulations requiring exposure suits on vessels not required by section 3102 to have exposure suits.

(c) The regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section), shall be effective not later than 60 days after the date of enactment of this Act.

(d) Not later than 6 months after the date enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall submit a report to the Congress evaluating the benefits and disadvantages of extending the regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section) to require exposure suits on designated vessels operating in all waters north of 31 degrees North latitude or south of 31 degrees South latitude.

VESSEL FIRE RESPONSE CAPABILITY

SEC. 23. (a) The Secretary of the department in which the Coast Guard is operating shall make a grant to the Maritime Fire and Safety Association, a non-profit organization incorporated in the State of Oregon. Such grant shall be used for a demonstration project to develop a fire response capability for vessels through the acquisition of equipment and supplies and through training of fire response personnel. The Secretary shall ensure that funds made available by such grant are used for such purposes.

(b) For purposes of subsection (a) of this section, there are authorized to be appropriated not to exceed $349,000 for fiscal year 1985, not to exceed $160,000 for fiscal year 1986, and not to exceed $103,000 for fiscal year 1987.

CADET PREAPPOINTMENT TRAVEL EXPENSES

SEC. 24. (a) Chapter 9 of title 14, United States Code, is amended by inserting immediately after section 181 the following:

"§ 181a. Cadet applicants; preappointment travel to Academy

"The Secretary is authorized to expend appropriated funds for selective preappointment travel to the Academy for orientation visits of cadet applicants.".

(b) The table of sections at the beginning of such chapter is amended by inserting immediately after the item relating to section 181 the following:

"181a. Cadet applicants; preappointment travel to Academy.".

COMMODORE AND REAR ADMIRAL RESERVE POSITIONS

SEC. 25. (a)(1) Section 42(b) of title 14, United States Code, is amended by striking ".375" both places it appears and inserting in lieu thereof "0.375".

(2) Section 290 of such title is amended by striking "Board" in the fourth sentence and inserting in lieu thereof "Boards".

(3) The table of sections at the beginning of chapter 13 of such title is amended by striking the item relating to section 462a.

(4) Section 724 of such title is amended—

(A) by striking "(1)" immediately after "(b)";

(B) by striking the last sentence; and

(C) by adding at the end thereof the following:

"(2) The authorized number of Reserve officers in an active status not on active duty in the grades of commodore and rear admiral is a total of two. However, the Secretary of the department in which the Coast Guard is operating may authorize an additional number of Reserve officers not on active duty in the grades of commodore and rear admiral as necessary in order to meet planned mobilization requirements.".

(b)(1) The matter in the table in section 201(a) of title 37, United States Code, under the heading "Navy, Coast Guard, and National Oceanic and Atmospheric Administration" and in the columns for 0–8 and 0–7 is amended to read as follows:

"Rear admiral

"Commodore".

(2)(A) The heading of section 202 of such title is amended to read as follows:

"§ 202. Pay grade: retired Coast Guard commodores".

(B) The item relating to section 202 in the table of sections at the beginning of chapter 3 of such title is amended to read as follows:

"202. Pay grade: retired Coast Guard commodores.".

(c) The matter in the table in section 741(a) of title 10, United States Code, under the heading "Navy and Coast Guard" is amended—

(1) by striking "Rear admiral (Navy) and Rear admiral (upper half) (Coast Guard)" and inserting in lieu thereof "Rear admiral"; and

(2) by striking "Commodore (Navy) and Rear admiral (lower Half) (Coast Guard)" and inserting in lieu thereof "Commodore".

ASSOCIATE DEPUTY SECRETARY OF TRANSPORTATION

SEC. 26. (a) Section 102 of title 49, United States Code, is amended by redesignating subsection (d) as subsection (e) and inserting immediately after subsection (c) the following:

"(d) The Department has an associate Deputy Secretary appointed by the President, by and with the advice and consent of the Senate. The Associate Deputy Secretary shall carry out powers and duties prescribed by the Secretary.".

(b) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following: "Associated Deputy Secretary, Department of Transportation.".

(c) Notwithstanding any other provision of law, until April 15, 1985, the position created by subsection (a) of this section may be held by a person named by the President alone from among qualified individuals.

FLAT RATE PER DIEM TEST

SEC. 28. (a) Before October 1, 1986, the Secretary of the department in which the Coast Guard is operating may test a flat rate per diem allowances system for military travel allowances.

(b) Such flat rate per diem allowances shall be an amount determined by the Secretary to be sufficient to meet normal and necessary expenses in the area in which travel is performed, but such allowances may not be more than $75 for each day in the continental United States.

(c) The test authorized by this section may not begin before the Committees on Commerce, Science, and Transportation and Armed Services of the Senate and the Committees on Merchant Marine and Fisheries and Armed Services of the House of Representatives are notified of the test.

IMPROVEMENTS IN SHIPPING LAWS ADMINISTERED BY THE COAST GUARD

SEC. 29. (a) Section 7101(e)(3) of title 46, United States Code, is amended to read as follows:

"(3) has a thorough physical examination each year while holding the license, except that this requirement does not apply to an individual who will serve as a pilot only on a vesssel of less than 1600 gross tons;".

(b) Section 8101(g) of title 46, United States Code, is amended by striking "or part B of this subtitle applies" and inserting in lieu thereof "applies or which is subject to inspection under chapter 33 of this title".

(c) Section 8301(a) of title 46, United States Code, is amended—

(1) by inserting "(except the Great Lakes)" immediately after "lakes"; and

(2) by striking "to which part B of this subtitle applies" and inserting in lieu thereof "subject to inspection under chapter 33 of this title".

(d) Section 8301(a)(1) of title 46, United States Code, is amended by inserting "propelled by machinery or carrying passengers" immediately after "vessels".

(e) Section 8501(a) of title 46, United States Code, is amended by striking "part" and inserting in lieu thereof "subtitle".

(f)(1) Section 8502(a) of title 46, United States Code, is amended to read as follows:

"(a) Except as provided in subsection (g) of this section, a coastwise seagoing vessel shall be under the direction and control of a pilot licensed under section 7101 of this title if the vessel is—

"(1) not sailing on register;

"(2) underway;

"(3) not on the high seas; and

"(4)(A) propelled by machinery and subject to inspection under part B of this subtitle; or

"(B) subject to inspection under chapter 37 of this title.".

(2) Section 8502 of title 46, United States Code, is amended by adding at the end thereof the following:

"(g) The Secretary shall designate by regulation the areas of the approaches to and waters of Prince William Sound, Alaska, on which a vessel subject to this section is not required to be under the direction and control of a pilot licensed under section 7101 of this title.".

(3)(A) Chapter 85 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 8503. Federal pilots authorized

"(a) The Secretary may require a pilot licensed under section 7101 of this title on a self-propelled vessel when a pilot is not required by State law and the vessel is—

"(1) engaged in foreign commerce; and

"(2) operating on the navigable waters of the United States.

"(b) A requirement prescribed under subsection (a) of this section is terminated when the State having jurisdiction over the area involved—

"(1) establishes a requirement for a State licensed pilot; and

"(2) notifies the Secretary of that fact.

"(c) For the Saint Lawrence Seaway, the Secretary may not delegate the authority under this section to an agency except the Saint Lawrence Seaway Development Corporation.

"(d) A person violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $25,000. Each day of a continuing violation is a separate violation. The vessel also is liable in rem for the penalty.

"(e) A person that knowingly violates this section or a regulation prescribed under this section shall be fined not more than $50,000, imprisoned for not more than five years, or both.".

(B) The analysis of chapter 85 of title 46, United States Code, is amended by inserting immediately after the item relating to section 8502 the following:

"8503. Federal pilots authorized.".

(g) Section 7 of the Ports and Waterways Safety Act (33 U.S.C. 1226) is repealed.

(h) Section 10 of the Ports and Waterways Safety Act (33 U.S.C. 1229) is amended by striking "6, and 7" and inserting in lieu thereof "and 6".

LOGBOOK REQUIREMENT

SEC. 30. Section 11301(a) of title 46, United States Code, is amended to read as follows:

"(a) Except a vessel on a voyage from a port in the United States to a port in Canada, a vessel of the United States shall have an official logbook if the vessel is—

"(1) on a voyage from a port in the United States to a foreign port; or

"(2) of at least 100 gross tons and is on a voyage between a port of the United States on the Atlantic Ocean and on the Pacific Ocean.".

TRENT RIVER RAILROAD BRIDGE

SEC. 31. Notwithstanding any other provision of law, the Trent River Railroad Bridge, mile 0.0, in New Bern, North Carolina, is deemed an unreasonable obstruction to navigation.

AMENDMENTS TO THE COASTWISE LOAD LINE ACT

SEC. 32. (a) Section 1(b) of the Act of August 27, 1935 (46 App. U.S.C. 88(b)), popularly known as the "Coastwise Load Line Act, 1935", is amended to read as follows:

"(b) This Act does not apply to—

"(1) a fish tender vessel of not more than 500 gross tons—

"(A) constructed, under construction, or contracted to be constructed as a vessel of this type before January 1, 1980; or

"(B) converted for use as a vessel of this type before January 1, 1983; and

"(2) a fish processing vessel of not more than 5,000 gross tons, except a vessel constructed after August 15, 1974, or converted for use as a vessel of this type after January 1, 1983.".

(b) Section 2 of such Act (46 App. U.S.C. 88a) is amended to read as follows:

"SEC. 2. (a) For vessels to which this Act applies, the Secretary of the department in which the Coast Guard is operating shall establish by regulation load lines and marks indicating the maximum depth to which these vessels may be loaded safely.

"(b) In prescribing regulations under this Act, the Secretary shall consider the age, condition, character, design, and construction of a vessel to which this Act applies, including subdivision and stability characteristics.

"(c) This act applies to the Great Lakes, except that the Secretary may establish special operating regulations for barges operating close to shore between Calument Harbor, Illinois, and Burns Harbor, Indiana, that exempt these barges from the load line and marking requirements of this section.

"(d) The Secretary may not establish on any vessel a load line that is above the actual line of safety.".

TECHNICAL AMENDMENTS REGARDING COMMERCIAL FISHING INDUSTRY VESSELS

SEC. 33. (a) Section 4502(b)(3) of title 46, United States Code, is amended by striking "the exemption" and inserting in lieu thereof "this chapter".

(b) Section 4503 of title 46, United States Code, is amended by striking "shall be deemed" and inserting in lieu thereof "is deemed".

(c) Section 8104(k) and (l) of title 46, United States Code, is amended by striking "may" and inserting in lieu thereof "shall".

(d) Section 402(130 of the Act of July 17, 1984 (Public Law 98-364) is amended by striking "Section 10101(a)" and inserting in lieu thereof "Section 10101".

SAILING SCHOOL VESSELS

SEC. 34. (a) Section 21101 of title 46, United States Code, is amended:

(1) in clause (21)(B), by inserting "or a sailing school vessel" immediately after "vessel" the first time it appears; and

(2) in clause (27), by striking all after "by sail" and inserting in lieu thereof "and may include—

"(A) any subject related to that operation and to the sea, including seamanship, navigation, oceanography, other nautical and marine sciences, and maritime history and literature; and

"(B) only when in conjunction with a subject referred to in subclause (A) of this clause, instruction in mathematics and language arts skills to sailing school students having learning disabilities.".

(b) Section 206 of the Sailing School Vessels Act of 1982 (46 App. U.S.C. 446(b) is amended by inserting "section 1101 (a)-(c) of title 46, United States Code," immediately before "and".

COMPENSATION OF COMMANDANT OF THE COAST GUARD

SEC. 35. (a) Footnote 2 of the table entitled "COMMISSIONED OFFICERS" in section 101(b)(1) of the Uniformed Services Pay Act of 1981 (Public Law 97-60; 95 Stat. 990) is amended—

(1) by striking "or"; and

(2) by inserting "or Commandant of the Coast Guard," immediately after "Corps,".

(b) The first sentence of footnote 4 of the table in section 1401 of title 10, United States Code, is amended—

(1) by striking "or"; and

(2) by inserting "or Commandant of the Coast Guard," immediately after "Corps,".

(c) The amendments made by this section shall become effective on October 1, 1984.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

RESOLUTION PROVIDING FOR PASSAGE OF H.R. 6027, LOCAL GOVERNMENT ANTITRUST ACT OF 1984

Mr. EDWARDS of California. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 613) providing for the passage of the bill (H.R. 6027) Local Government Antitrust Act of 1984.

The Clerk read as follows:

H. RES. 613

Resolved, That upon the adoption of this resolution the bill, H.R. 6027, together with the Senate amendment thereto, be and is hereby taken from the Speaker's table to the end that the Senate amendment be and is hereby agreed to with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment to the text of the bill, H.R. 6027, insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Local Government Antitrust Act of 1984."

DEFINITIONS

SEC. 2. For purposes of this Act—

(1) the term "local government" means—

(A) a city, county, parish, town, township, village, or any other general function governmental unit established by State law, or

(B) a school district, sanitary district, or any other special function governmental unit established by State law of one or more States,

(2) The term "person" has the meaning given it in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)), but does not include any local government, and

(3) the term "State" has the meaning given it in section 4G(2) of the Clayton Act (15 U.S.C. 15g(2)).

LOCAL GOVERNMENT DAMAGE LIMITATION

SEC. 3. (a) No damages, interest on damages, costs, or attorney's fees may be recovered under section 4, 4A, or 4C of the Clayton Act (15 U.S.C. 15, 15a, 15c) from any local government, or official or employee thereof acting in an official capacity.

(b) This section shall not apply to cases pending on the date of enactment of this Act unless the defendant establishes and the court determines, in light of all the circumstances, including but not limited to the stage of the litigation and the availability of alternative relief under the Clayton Act, that it would be inequitable not to apply this section. In taking into account the stage of litigation of a pending case, a court shall consider a jury verdict or district court judgment, or any stage of litigation subsequent thereto, as creating a strong presumption that it would be inequitable to apply this section to a pending case.

ANCILLARY DAMAGE LIMITATION

SEC. 4. (a) No damages, interest on damages, costs, or attorney's fees may be recovered under section 4, 4A, or 4C of the Clayton Act (15 U.S.C. 15, 15a, 15c) in any claim against a person based on any official action directed by a local government, or official or employee thereof acting in an official capacity.

(b) This section shall not apply to cases pending on the date of enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. SAWYER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. EDWARDS] will be recognized for 20 minutes and the gentleman from Michigan [Mr. SAWYER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. EDWARDS].

□ 1850

Mr. EDWARDS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to commend my chairman, Mr. RODINO, Mr. FISH, and Mr. HYDE and all the many involved Members of this body for their diligence and care in crafting this piece of legislation. It is a measured response to what can only be termed an antitrust paradox—a paradox in which for purposes of antitrust protection, the Supreme Court has found that States and local governments are on very different footings. While the Court has accepted two cases on certiorari for this coming term which may clarify some of the substantive confusion, our local government cannot wait for the case law to synthesize into a coherent theory. They must continue to act in this period of uncertainty, and act without fear of massive damage liability.

H.R. 6207 as amended, is a thoughtful bill that offers a measured response to both the problems of local government and the needs of private parties. It does this, I might add, without doing violence to the constitutional concerns of federalism and State sovereignty upon which the *City of Boulder* decision was based.

H.R. 6027, as amended, avoids the conceptual difficulties of the state action doctrine by providing local governments with immediate and certain remedial relief. Private parties suffering economic harm as a result of the official conduct of a local government will still retain a right of redress through injunctive relief. For those concerned that private parties may be denied a restitution remedy for economic harm suffered, I should note that nothing in H.R. 6207, as amended, precludes an injured plaintiff recovering on alternative claims such as due process or equal protection denial under 42 U.S.C. 1983.

Though late in the day for the 98th Congress, we finally have before us legislation that addresses what I consider to be one of the most important problems faced by this Congress in the past several years. That we have done so in a measured, bipartisan manner is a gratifying thought to me as we approach adjournment.

● Mr. RODINO. Mr. Speaker, last week, the other body passed, with an amendment, the bill H.R. 6027, the Local Government Antitrust Act of 1984.

Today, the Members have an opportunity to approve this bill with a further amendment that we believe will be acceptable to both bodies. The committee had an opportunity at the staff level to discuss changes with representatives of the other body to narrow greatly any differences on the substantive provisions of the bill.

With respect to the application of this legislation to pending cases, the amendment I am proposing would accept the other body's language that applies this bill to third party defendants only in claims filed after the date of enactment. The amendment also places the burden on a local govern-

ment to establish inequitable circumstances in order to have the bill apply to pending claims against the local government.

The amendment does change the wording, but not the meaning and intent, of the other body's provision in order to rectify a possible constitutional problem that could arise if jury verdicts were singled out for special treatment. There is an additional change to make clear that the listing of equitable factors to be considered by the court is not intended as an exclusive list—the court may consider nonlisted factors in determining the equities.

The amendment also does not include any provision to reauthorize the FTC to conduct administrative proceedings against local governments. Section 510 of Public Law 98-411, enacted earlier this year, prohibited the FTC from using any of the appropriated funds for fiscal year 1985 for any such proceedings.

I opposed this restriction on expenditure of FTC funds when it was offered. Its inclusion, however, was overwhelmingly approved by this House. If there is to be change in the position of the House, I believe it should be initiated by the committees with jurisdiction over the FTC's authorization and appropriations.

I urge my colleagues to approve this legislation that was overwhelmingly passed by the House on August 8. We have here a bill that is urgently sought by local governments all over the country. Its enactment will not immunize local governments from the antitrust laws—it will restrict the use of damage suits and free local governments from what many of us believe is the inappropriate threat of treble damage liability arising out of private suits.●

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California.

There was no objection.

Mr. SAWYER. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, because of the importance of the matter before us, and because sometimes I think we all feel that the antitrust laws are about as interesting as watching paint dry or grass grow, I think it important that I take just a minute to orient what the problem is here.

First of all, the House on August 8 passed a bill that was identical to this bill except for one section, and that bill was passed by the Committee on the Judiciary.

The question going back before that is a problem created by the so-called city of Boulder decision, Boulder, CO.

In 1943 in the Parker decision, the Supreme Court decided in Parker versus Brown that States were basically immune from the antitrust laws. In 1978, that doctrine had always been thought that that also applied to municipalities and counties under the umbrella of the State.

In 1978 in the so-called Lafayette decision the Supreme Court decided that that exemption did not apply to municipalities and States and since then lawsuits came raining down, one of them being the city of Boulder case.

That court there expressly decided, the city of Boulder, acting on an official matter within the official confines of the duties of the city commission and the officials, were liable for antitrust treble damages.

Since then the flood of litigation has been tremendous, the most egregious and horrendous of which involves the little town of Grayslake in Illinois and Lake County, IL.

There a jury brought in and this was strictly a question whether a city decided whether another municipality or another area could use their sewer plant which felt for whatever reason, either the capacity was insufficient or whatever, would not allow it; a jury brought in a verdict against the town of Grayslake of $28 million, which is 6,000 percent the total tax revenues of that city, and against Lake County in which it is situated, and it is 150 percent of the tax collections of Lake County, which will go from one of the most prosperous counties in the United States to bankruptcy if this type of thing is allowed to stand.

Now we all agree that this practice ought to stop and we ought to confine the remedy to injunctive relief, if in fact people are being hurt in violation of the antitrust laws in performance of official duties.

However, the question is there are 200 pending cases against cities and counties all over the United States, not just Grayslake and Lake County in Illinois, but 200 of them.

The question is now do we make that retroactive as it normally would be to allow injunctive relief and attorneys' fees and costs, which was in the House bill, but not damages or treble damages against the taxpayers? That is the sole question. That bill containing that relief passed the House 414 to 5 on August 8. A very similar bill, but with a different provision on retroactivity, passed the Senate and the Senate has appointed their conferees.

The chairman of the Committee on the Judiciary will not go to conference and instead they introduce a bill on suspension which takes out the House amendment dealing with retroacitivity and makes it, in effect, not retroactive, for all practical purposes, and leaves all of the 200 pending cases treated differently than in all history any other city or county has ever been treated or will in the future be treated.

It just singles them out. I think it is an evasion of our procedure to refuse to go to conference and then put in a bill on suspension that undoes what the House worked its will doing, the Judiciary Committee and the subcommittee worked their wills doing.

To my mind it is practice that ought not be allowed. I think this bill should be voted resoundingly down. Please do not minimize its importance; it may sound like a dull subject, but 200 cities and counties in the United States are presently subject to pending suits for treble damages.

If this bill is enacted and therefore evades the conference, those cities are going to be left as unique and different than all other cities before or after or in the future, and be subject to these absolutely destructive treble damage actions.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. EDWARDS of California. Mr. Speaker, I yield as much time as he may consume to the gentleman from Texas [Mr. BROOKS], a valued member of the subcommittee.

Mr. BROOKS. I thank the chairman of the subcommittee.

Mr. Speaker, I harbor reservations about this amendment in the nature of a substitute to H.R. 6027—the Local Government Antitrust Act—similar to those I expressed earlier on August 8, 1984, when this bill was considered by the House for the first time. I support the goal of H.R. 6027 to provide relief for local governments and their officials from the full application of the antitrust laws to their official activities, but as with the original bill, I am concerned about several aspects of this substitute amendment.

On August 8, I argued that the retroactive application provided for in H.R. 6027 was inappropriate. I am pleased to note that the substitute provides in the main only for the prospective application of this law. It should be clear that this substitute is intended to provide relief to local governments in future cases which may arise. Only in the most unusual circumstances is discretion afforded to judges to apply this law to cases which have already been brought. The language of the substitute allows retroactive application of this law by a court only if the defendants can prove that the circumstances of that case are so special that justice requires the unusual step of applying this new law to the old case. The substitute explicitly states that there will be an especially strong presumption against applying

this law to any pending suit in which a jury verdict or district court judgment has been rendered. I do not believe that Congress has ever undercut a jury verdict by passing a new retroactive law. This legislation should not provide the first instance.

It is clear, therefore, that this law will be applied retroactively, if at all, only in the most unusual of circumstances. Those who are currently pursuing law suits should feel confident that new rules will not be applied to them.

While the substitute goes a long way in alleviating my concern about the retroactive application of this law, there is not a significant change to the bill's provisions regarding the scope of the bill. As I indicated earlier, the scope of this legislation may be, if it is improperly interpreted, too broad. The substitute applies not only to local governments and their officials, but in some instances to private parties whose actions have been directed by local governments. This extension to private firms, as with the previous bill, is an attempt to express the existing court-developed State action doctrines and apply them at the local level.

The exemption for private firms should not extend beyond these existing court doctrines which afford protection only if the private activity has been so compelled by the Government as to make it tantamount to the Government's action. If this exemption is not construed narrowly to codify only the existing court doctrine, it will create a giant loophole by which private businesses can manipulate their relations with local governments to secure the antitrust immunities intended in this legislation for local governments.

Further, in my previous statement I cautioned that the term, "official conduct," should also be narrowly construed. This holds true for the term, "official action," as specified in the substitute. Conduct or action outside the clear authority of the local government is not to be protected under this bill.

To avoid these pitfalls, it is important that the proper interpretations of the bill's intended application and scope are made. I urge the courts in construing this bill to review the various committee reports and congressional statements on this legislation.

Mr. SAWYER. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. PHILIP M. CRANE].

Mr. PHILIP M. CRANE. I thank the distinguished gentleman from Michigan [Mr. SAWYER] for yielding this time to me. I commend the gentleman for the remarks he just made.

Mr. Speaker, as the House considers legislation on Federal antitrust laws, it should be noted that we have traveled this road before. On August 8 of this year, the house overwhelmingly passed antitrust legislation, H.R. 6027, by a vote of 414 to 5. It clarified the application of Federal antitrust laws and the impact they have on local governments. However, the Senate recently substitute its own language to H.R. 6027 which completely deletes retroactivity. It is absolutely essential that the original language, which included injunctive relief and retroactivity, is retained. The measure now being taken up under suspension of the rules is incomplete, and as such is seriously flawed.

Originally the House Judiciary Committee approved an amendment by Congressman HYDE limiting antitrust action against local government units to suits for injunctive relief rather than money suits. This amendment eliminated local governments from possible treble damage judgments brought under Federal court. They do not provide immunity from antitrust violations, but do relieve local taxpayers and local decision makers from the threat of treble damages. Without the type of amendment offered by Congressman HYDE, local taxpayers will be forced to foot the bill in antitrust cases.

A retroactivity provision that includes injunctive relief is necessary to address the approximately 300 lawsuits currently pending against cities and other units of local government that have been filed since the Supreme Court rulings which permitted such suites. It will provide new hope for Lake County and Grayslake in their fight to reverse a stunning damage award assessed against them earlier this year. In this case, a Federal court ruled that Grayslake and Lake County must pay $28.5 million in antitrust damages to a developer in a sewer hookup dispute. This judgment represents 6,000 percent of the property tax collected last year by the Village of Grayslake and 150 percent of the amount collected by all of Lake County. If Lake County were to increase its taxes to the maximum legal rate and still provide necessary services to its citizens, it would take the taxpayers 70 years to pay this judgment. Even if they used all of their cash reserves of $14.8 million, payment would still require 35 years.

Although this is only one case in which a treble damage judgment was brought, Federal antitrust lawsuits could destroy an entire community. It is of utmost importance that protection be afforded to localities and local officials retroactively as well as prospectively. It would be most unfair, a "manifest injustice", as the Supreme Court noted in Bradley versus Richmond School Board, to single out the one case in which a jury verdict has been rendered. It should also be noted that a jury verdict does not necessarily constitute final legal action. By providing for retroactivity, we are ensuring that this important piece of legislation does not include narrowly crafted, ill-conceived wording that will accomplish little but to provide one individual some sense of vengeance. We should not allow our legislative powers and responsibilities to be so manipulated.

Further, it should be noted that the Senate has no intention of accepting this bill. The matter of contention does not relate to the above noted problem, but the result will be the same—no legislation at all. The shame is that the House did not go to conference several days ago when the Senate changed H.R. 6027 as passed by the House. At the very least, a rule allowing for the consideration of Congressman HYDE's committee amendment should have been provided. A piece of legislation of this import should not be considered under Suspension of the Rules.

At this point in the RECORD, I should like to include two letters from my district which bear directly upon this matter. The first is representative of misinformation being distributed and the second letter comes from the chairman of the board of Lake County, IL, Mr. Glenn E. Miller. Mr. Miller's letter places into proper prospective the situation that exists and further illuminates the disappointing "tilt" given the legislation.

VILLAGE OF ROUND LAKE PARK,
Round Lake Park, IL, August 28, 1984.
To Whom It May Concern:

Recently there has been a great deal of publicity and ado concerning the Alter judgment against Lake County and Grayslake, wherein a jury found the municipalities along with certain of their officials guilty and assessed damages in the millions. Consider for a moment that the jury would not have returned a guilty verdict unless the evidence supported that verdict.

What about Round Lake Park and its residents. They were the Village that the guilty parties attempted without our consent to exert authority over our people, and to determine our future destiny. It is our constitutional right as residents of Round Lake Park through our duly elected officials to decide what occurs within our Village limits, and not the right of adjoining local governments to tell us what we can and cannot do, unless we voluntarily consent and agree.

Let's set the record straight on how all this came about and how our Village's future was controlled illegally by other than our duly elected Village officials.

The fact that Lake County in past years has tried to control growth in Western Lake County has been documented by developers and Crane Chicago Business publication. Many articles have been published in the Chicago newspapers quoting "Lake County has a No Growth Policy".

Today, the County of Lake has a stated policy called "Controlled Growth", with growth along the North Shore communities, and minimal growth in Western Lake County. Primarily those communities with a sphere of influence over the County sewer system dictate the growth and progress of other nonconsenting communities.

Some years back the Village of Round Lake Park entered into a written agreement with Lake County with respect to treatment of sewage. The County Board members who served on that committee assured the President and Trustees of the Round Lake Park Village Board that all Lake County sewer contracts were the same. Our Village officials entered into this contract in good faith based on the representations made by certain County Board members.

After the Alter property was annexed to our Village, Mr. Alter approached the Lake County Board requesting the right to tie into the Lake County interceptor sewage line, and proposing to pay at his cost for all improvements. It was then that he learned he would have to get approval from the Village of Grayslake, notwithstanding that the Alter property was within the corporate limits of Round Lake Park.

This was the first indication that the Village of Round Lake Park has, that the County had granted special concessions to other communities, including the Village of Grayslake, giving them a so-called sphere of influence or authority over a one and one-half mile radius outside their corporate boundaries to determine who and when anyone could tie into the County sewer system. A search of the records then revealed that the County sewer agreements were not all the same.

At the time that the sphere of influence was granted to the Village of Grayslake, the County Board Chairman was Norman Geary, who also at that time was Avon Township Supervisor and a resident of Grayslake. Our Village feels that this was a major factor in the special treatment and consideration given to the Village of Grayslake, enabling them to exercise authority over a non-consenting municipality.

We felt then as we do now that the agreement was unconstitutional and wrong. Our Mayor at that time based on opinion of the Village attorneys so advised County Board member Joseph Tobolik, and requested that he seek an opinion on behalf of the County Board from the State's Attorney of Lake County.

During the hearings on the annexation of the Heartland property to Round Lake Park, the Grayslake Village Board requested a meeting with the members of the Round Lake Park Village Board which was attended by our officials. At that time the Grayslake Village Board passed a resolution giving William Alter access to the County sewer system providing that the Round Lake Park Village Board would not annex Heartland without dividing a portion of the Heartland properties with Grayslake. Our Village Board felt it was in the best interests of the Villlage of Round Lake Park to annex the Heartland property, and pursuant to hearing and appropriate ordinance did annex said property as a result of which Grayslake rescinded the Alter sewer resolution.

It is documented fact that the Village of Hainesville has requested permission from Grayslake to hook up to the County Sewer system. The Mayor of Hainesville, George Benjamin, has stated that the Mayor of Grayslake informed that there would be no problem if the Village of Hainesville annexed to Grayslake. The people of Hainesville decided not to annex to Grayslake, and so were denied access to the County sewer system.

It is the position of Round Lake Park that one municipality cannot exert authority or dictate what another municipality can or cannot do unless they consent to such an arrangement. In effect, what they are doing is telling the residents of another community what their future destiny will be, and is clearly an abuse of power.

The jury in the Alter anti-trust suit against Grayslake and Lake County determined that those two local units of government did conspire to prevent William Alter from gaining access to the County Sewer system, as a result of which he was unable to develop and improve his land. The cost to the residents of the Village of Round Lake Park has been tremendous. With the Alter land remaining vacant and unimproved, we have lost real estate taxes, sales taxes, state income taxes, jobs for our people, etc.

The backbone of our judicial system is the right of trial by jury. It is interesting to note that the County officials and Grayslake officials involved in the Alter suit are not willing to accept the judgment of their peers. The are attempting to set aside the jury findings by contacting State and Federal officials for help outside the judicial system. Notwithstanding that the jury found them guilty of violating the anti-trust laws, with regard to their agreement as to exercising a sphere of influence to the damage of Alter and the Village of Round Lake Park.

Prior to the revision of the anti-trust laws, public officials were exempt from monetary penalties, as a result of which they have taken advantage of others including municipalities without fear or danger of punishment. If in fact there are over 200 to 300 anti-trust suits pending, a serious problem of abuse by state and local officials must exist. Many small communities are unable to pursue Court action for relief because of the time involved and high cost of litigation.

It is the position of the Round Lake Park Board that municipal officals who knowingly and wantonly abuse their powers of office at the expense of neighboring communities should be punished. Without the financial penalties there would be no deterrent to protect the rights of others from this abuse of authority and power. We cannot have a double standard, one for elected officials and one for ordinary citizens. The law must apply equally to all or we are in serious trouble.

COUNTY OF LAKE,
BOARD CHAIRMAN'S OFFICE,
Waukegan, IL, September 28, 1984.

Hon. PHILIP CRANE,
Longworth Office Building,
Washington, DC.

DEAR MR. CRANE: It has come to our attention that a "To Whom It May Concern" letter dealing with the *Unity Ventures* v. *Lake County* case is being widely circulated. The letter is on Round Lake Park stationary, but no one was willing to sign it. Like so much of the massive, carefully orchestrated lobbying effort recently mounted by William Alter, this anonymous letter is filled with distortion that demands honest response.

1. The letter says the jury would not have returned a guilty verdict unless the evidence supported it. That issue is the subject of a pending post-trial motion, which Mr. Alter has repeatedly delayed. He apparently prefers to have his verdict blessed by Congress before he lets the judge that presided at the trial give his views on whether the jury properly discharged its duty. The Illinois Attorney General is given primary responsibility for the enforcement of the antitrust laws throughout the State. He has filed a brief with the federal trial court urging that the *Unity Ventures* verdict be set aside as legally unsupportable.

2. The letter asserts that the "guilty parties" interfered with the internal affairs of Round Lake Park. The opposite is true. The disputed sewer was built and paid for by Lake County, Grayslake and several neighboring villages to serve those Villages. Round Lake Park refused to join in sharing the cost of the sewer; indeed, it demanded and got a written commitment from Lake County guaranteeing that it would not have to pay any of the sewer cost. If Grayslake bought a fire engine, would Round Lake Park claim its "internal control" over fire service was infringed if Grayslake refused to let Round Lake Park use the Grayslake fire engine?

Round Lake Park had a sewer of its own (built in combination with Lake County just like the Grayslake sewer); Mr. Alter had every right to use it, and Round Lake Park every right to let him use it. It had ample capacity. He didn't use it only because it would have cost about twice as much to build a connecting main to it as to the Grayslake sewer.

3. The letter says Lake County "deceived" Round Lake Park about the nature of the many sewer agreements. Recorded transcripts of its meetings with Lake County show that all the village cared about the sewer agreements was to be sure that: (1) that Round Lake Park would not have to pay any cost associated with the Grayslake sewer; and (2) that Mr. Alter would have the right to use the Round Lake Park sewer. The County agreed to both demands.

All of the sewer agreements were matters of readily accessible public record. Many communities—not just Grayslake—had agreements with "sphere of influence" provisions. That provision was designed to protect communities that had agreed to take existing village-owned sewer plants out of service and wanted some assurance of future capacity in the new regional system as a quid pro quo. Round Lake Park had no existing plant and thus the sphere of influence concept was irrelevant to its situation.

4. The letter refers to a meeting and proposed agreement between Round Lake Park and Grayslake. The letter totally misstates the facts. Sworn, uncontradicted testimony at the *Unity Ventures* trial established that both villages were invited to the meeting by the Regional Planning Commission, which was gravely concerned with the irresponsible annexation and zoning practices of Round Lake Park. The Commission asked if Grayslake would agree to let Round Lake Park use the Grayslake sewer if Round Lake Park would agree to enter into a joint planning study with the Commission and Grayslake before either Village annexed a large controversial parcel. Both villages agreed to the proposal; Grayslake took a formal vote to approve it and Round Lake Park agreed to convene a meeting within a week to take its formal vote. However, at that meeting, instead of honoring its agreement, Round Lake Park repudiated it by annexing the disputed parcel.

These are the major points which the Round Lake Park letter seeks to convey. It makes a host of less important claims and allegations, most of which contain demonstrable inaccuracies and none of which merit extending this letter to address.

Sincerely,

GLENN E. MILLER,
Chairman, Lake County Board.

□ 1900

Mr. SAWYER. Mr. Speaker, will the gentleman yield?

Mr. PHILIP M. CRANE. I yield to the gentleman from Michigan.

Mr. SAWYER. I thank the gentleman for yielding.

Is it not true that a municipality or anyone defending under the antitrust laws cannot use health or public welfare—which are the very things they are charged with defending—as a defense to the antitrust laws?

Mr. PHILIP M. CRANE. Absolutely. I thank the gentleman for making that observation.

Mr. EDWARDS of California. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. MATSUI].

Mr. MATSUI. Mr. Speaker, I would like to thank the chairman of the subcommittee and also the minority member managing this bill, the gentleman from Michigan.

Mr. Speaker, I would like to direct several inquiries to the bill's sponsor concerning its application to pending cases. Am I correct that, in addition to the factors stated in the bill, a court would be required to consider all of the circumstances of a particular case in deciding whether section 3(a) should apply?

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. MATSUI. I yield to the gentleman from California.

Mr. EDWARDS of California. I thank the gentleman for yielding.

The gentleman is correct. The intent of the bill is to have a trial court consider all pertinent factors needed to make the equitable determination of whether section 3(a) shall apply to pending cases.

Mr. MATSUI. I am interested in the other factors that a court would consider in determining whether section 3(a) would be applicable to pending cases. Would two of these factors include: First, the need to protect local units of government and their taxpayers from the considerable financial harm that could result from a damage award; and second, the degree to which the local government's action was directed by, or predicated on Federal law or direction?

Mr. EDWARDS of California. The answer is, yes. These factors, among others, might well be considered by a court in determining whether the bill is applicable to a particular pending case. However, it will, of course, be up to the court on a case-by-case basis.

Mr. MATSUI. The bill provides that a court, in taking into account the stage of litigation, shall consider a jury verdict or district court judgment as creating a strong presumption that it would be inequitable to apply section 3(a) to a pending case. Am I correct that, on the other hand, the fact that pretrial discovery has not been completed in a pending case might then support a determination that section 3(a) is applicable.

Mr. EDWARDS of California. The gentleman is correct. That is the essential difference between the first and second sentences of section 3(b) for purposes of retroactive application.

Mr. MATSUI. Likewise, in looking to the availability of alternative relief—another factor expressly mentioned in the bill—the court would determine whether an injunction would be sufficient to halt continuing injury caused by an ongoing antitrust violation. And the presence of this factor in a particular case might also support a determination that section 3(a) is applicable.

Mr. EDWARDS of California. The gentleman is correct, that it might be one of two relevant factors to be considered.

Mr. MATSUI. Finally, am I correct that, for the purposes of determining whether section 3(a) is applicable, the court would also determine whether the defendant acted in good faith while exercising its normal legislative, regulatory, executive, administrative, or judicial powers or providing traditional public services. And the presence of this factor in a particular case might support a determination that section 3(a) is applicable.

Mr. EDWARDS of California. The intent is that this factor, or any other relevant concern, may be brought to the court's attention for purpose of proving that retroactive application is or is not equitable in the circumstances.

Mr. MATSUI. I would like to thank the gentleman for his colloquy. I would also like to thank the gentleman from Michigan as well.

Mr. EDWARDS of California. Mr. Speaker, this is a good bill. This gives both sides something. If it is not passed our cities are going to be in considerable trouble. There are already more than 300 lawsuits. Before a bill could be passed in the next Congress, in the 99th Congress, there might well be 200 or 300 more lawsuits.

I urge approval of this very important bill.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SAWYER. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Speaker, I think it is well to note at the outset that it has been 2 years since the Boulder decision was handed down by the Supreme Court of the United States. During that time the Congress has done little to address a very, very serious problem. In that time, 200 lawsuits have been filed against various units of local government with billions and billions of dollars at stake under the Boulder decision, while the Congress has failed to come to grips with a serious threat to local government and to the viability of our federal system.

The sponsors of the motion here today would have us believe that if we did not adopt it, somehow this legislation would be lost. It is rather amazing to me to look at the record and see that we passed H.R. 6027 2 months ago and had a chance to go to conference last week. The Judiciary Committee spurned that offer.

If we defeat the motion today we should then immediately, as we should have earlier, go to conference to provide for legislation to address this very serious problem of local government antitrust liability in a proper way and not work in this unusual method to try to pass through a measure that has not received hearings before any committee, that seems to be snuck in, in part, to address a single problem of a single litigant in a single lawsuit.

□ 1910

I refer to the only lawsuit of the 300 that are pending across the country under the Boulder decision that has gone to jury verdict, one in a county in my district, Lake County, one brought by a company owned by a successful businessman, a constituent of mine, against that county, and one where a jury verdict was rendered in the amount of $28.5 million. This provision, the one that is being offered today, could, by possibility, be interpreted to virtually make that verdict into a judgment that had to be paid by the county regardless of whether the court thought that it ought to be paid or not. It could be interpreted to make a strong presumption that this Congress intended that the jury verdict become, in effect, a judgment. It could be said to do away with the chance for remitter; it could be said to do away, virtually, with the chance for posttrial motions; it could be said to do away, virtually, with any chance for appeal and to make one litigant $28.5 wealthier if we pass this motion today rather than send the bill to conference where it ought to be and where this ought to be worked out in a proper way. That seems to me to be wrong.

There is only one case—I repeat, only one case—in the United States that a portion of this bill applies to, one that has gone to jury verdict, and one that could, possibily, be made virtually sound and untamperable by a court by the strong presumption language that is contained in the bill, and let me read that strong presumption language:

In taking into account the stage of litigation of a pending case, a court shall consider a jury verdict or district court judgment or any stage of litigation subsequent thereto as creating a strong presumption that it would be equitable to apply this section to a pending case.

There is only one case it applies to, and that is the case against Lake County IL. As my able and distinguished colleague, the gentleman from Illinois [Mr. CRANE] said a moment ago, if the County of Lake or the village of Grayslake would have to come up with that kind of money, it would mean bankruptcy for those units of local government. It seems to me that is entirely wrong.

What has happened, of course, since the bill passed out of this House is that is there has been some very, very high-powered lobbying over in the other body. When the original bill passed out of this House, it contained a specific provision that no case pending would be given special treatment. But as the gentleman from Michigan [Mr. SAYWER] said just a moment ago, if this legislation passes in this form, if we agree to this motion, there will be nobody before the Boulder case that ever recovered against a municipality treble damages and there will be nobody after this bill whoever will recover treble damages; there will be only one case in the history of the country where such a recovery has occurred. That simply, I say to my colleagues, is not fair or equitable and should not be allowed to occur.

We should send this matter, this bill, to conference. It should be worked out equitably. There are important rights of litigants involved. I recognize that. It ought to be worked out and brought back before the House in the normal way and not be allowed to slip through and bankrupt the local county and the local municipality involved.

Mr. SAWYER. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Speaker, I think I may have this debate reproduced at some length, with explanatory notes, and send them to every political science teacher in the country, because they will learn something from this process. They think, foolishly and naively, that when the House passes a bill out of committee, out of subcommittee, over to the other body, and when the other body passes a bill over to this Chamber, that the procedure is you go to conference and you work out your differences. But how wrong they would be, because if this body, if the chairman of the committee and his affiliates and associates—I do not say coconspirators, I say affiliates and associates—if they do not like the bill that the House passed, they just sit on it, they do not appoint conferees. There will be no conference. What you do is you get the bill in the shape you want it in, not as it passed out of committee, not as it passed out of this Chamber, 414 to 5, something like that, but as you want it, and then you bring it up under suspension, where no amendments are possible, and you take it or leave it. That is politics, 1984 style, and I think it ought to be studied carefully by students of political science.

Now, this legislation is important. We need it. We have antitrust laws governing judgments of local government, which is really nonsense because they only look at the anticompetitive factors of an action, whereas local governments must consider environment, safety and health, and many other reasons for making their judgments. We need the legislation. But why, oh why, are you singling out one case to immunize from the action of this legislation? Why?

I will wait forever for an answer, although I think I know the answer. I would love to see it formulated from those who are undertaking this bizarre procedure which bypasses and undercuts and erodes the action of this body and of the Senate by refusing to go to conference.

Are there no rooms in which the conferees could meet? Can we not find people to appoint to the conference who understand the issues? Why? Why?

Interesting procedure.

I have worked for remedial legislation on this subject for nearly 2 years. But I cannot support this version, because it is uniquely contrived to protect one plaintiff in one lawsuit in Illinois.

It is a curious thing for lawyers to be associated with, for people whose commitment is equality before the law and fairness and due process. But I will not take very seriously anymore the importance of committee hearings and committee markups because they do not have a thing to do with the way the legislation ultimately comes out of this Chamber, do they?

Mr. Speaker, it now appears that one of the most unfortunate casualties of the last-minute theatrics of the 98th Congress may be the Local Government Antitrust Act of 1984.

The puzzling impasse over legislation which has passed both the Senate and the House of Representatives is a sad commentary on our inability as a national legislature to deal with what, undeniably, is a national problem. If this important legislation does not pass, it will be the victim of high powered special interests, bad judgment, and last minute petty, political manuevering.

The purpose of this legislation is to protect units of local government from the ominous threat of treble damages under the Federal antitrust laws. Because of two recent Supreme Court decisions, localities now find themselves subject to suits challenging the anticompetitive side effects of legitimate local decisions in such areas as zoning, licensing, franchising, mass transit, and waste disposal. Since these are suits under the antitrust laws, courts are unable to weigh factors other than competititive, marketplace factors. So, the very basis and legal authority of a local decision—protection of the public health, safety, welfare, or environment—cannot even be considered by the court or a jury.

On June 15, the Senate Judiciary Committee favorably reported legislation (S. 1578) to protect localities from such suits. On August 8, the House of Representatives passed our version of this legislation (H.R. 6027) by a 414 to 5 vote. Action on the Senate bill, however, was stalled because of parliamentary manuevering related to language that had been added to the Commerce, State, Justice, and Judiciary appropriations bill. This so-called taxicab rider was aimed at prohibiting the Federal Trade Commission from bringing enforcement actions; that is, suits for injunctive relief against cities, This rider was enacted as section 510 of Public Law 98-411 on August 30. Because many in the other body sought repeal of this rider almost from the minute it was enacted, the substantive antitrust bill was held up. In fact, subsequently, it was attached to the continuing resolution for fiscal year 1985 (H.J. Res. 648) as part of a defensive strategy to prevent repeal of the FTC rider.

Finally, last Thursday, this logjam was broken and the conferees on the continuing resolution removed both S. 1578 and a provision to repeal the FTC rider from House Joint Resolution 648. Almost immediately, the chairman of the Senate Judiciary Committee brought S. 1578, containing the repeal language, to the Senate floor—where it promptly passed. Senate conferees were named.

But now, the chairman of the House Judiciary Committee refuses to go to conference. Instead, we find ourselves voting on another version of this legislation that the Judiciary Committee has never considered. Why? Similar bills dealing with local government antitrust liability have passed both Houses. Furthermore, he originally opposed the FTC rider as bad public policy. (See remarks of Hon. PETER W. RODINO, JR., CONGRESSIONAL RECORD, Vol. 130, No. 72, May 31, 1984, at 14609. Only two issues need to be resolved by a conference committee. First, whether the protections of this bill should apply to local governments in pending cases and, second, whether the authority of the FTC to bring suits for injunctive relief shoud be restored.

As the author of the amendment contained in the House-passed bill, applying its provisions to pending cases, I am prepared to go to conference. In my view, we can work out reasonable and appropriate language on the pending case problem. The pending case issue is not the reason why we are not going to conference. There must be other, unknown factors that have now

come into play. Why, as we near the finish line, are we being prevented from reaching a solution to a national problem that cries out for prompt action? What are the reasons, Mr. Chairman? Local governments and taxpayers everywhere deserve to know why.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. SAWYER] has 3½ minutes remaining.

Mr. SAWYER. Mr. Speaker, I yield myself 1½ minutes.

Mr. Speaker, I would just like to say, in summary, that we are talking about cases where cities enact zoning laws, where they do the things they are charged with doing, and they cannot bring in the environmental aspect as a defense, they cannot bring in the esthetic aspect or the health aspect; they have to depend solely on a defense that the marketplace was not affected. And, of course, many of these actions by cities do affect marketplaces. Whether your property is zoned commercial or zoned residential has a tremendous impact on value, in many cases.

So also do things like franchises that cities historically do give out. These things are all anticompetitive in their nature. But the city cannot bring in the things that they are charged with determining, namely what is good for the residents of the city, what is good for the environment, what is good for health and general welfare. And those are not defenses under the antitrust law. That is what is happening with these verdicts.

I would say that the gentleman from Illinois [Mr. HYDE] pointed, and understandably, to the one case in his jurisdiction that has gone to an actual jury verdict but it is pending on appeal, there is no final judgment outstanding. But there are 200 other cases involving billions and billions of dollars against municipalities, cities, and counties all over this country, probably some in your own State. They will all be left subject to treble damages, attorneys fees, and costs and interest, maybe to the devastation—you know we are very quick to protect New York, we are quick to protect Chrysler, we are quick to protect Lockheed, but how about these cities with citizens, and so forth, from this unique—you are putting 200 of them in a unique, never-to-be-repeated category and never-to-have-come-before category.

This bill allows injunctive relief to prevent the cities from trespassing on legitimate economic rights, but only inhibits damages. In the original House bill, we even allowed reasonable attorneys' fees and costs. We just took away this horrendous idea of not only damages, but multiplying them by three, which only is in effect normally to serve the public interest to encourage the bringing of suits to protect the public interest in the antitrust laws, but certainly not by the citizens themselves whose interest it is.

Mr. Speaker, I yield back the balance of my time.

● Mr. FISH. Mr. Speaker, the urgent need to protect local governments against antitrust treble damage claims has not diminished since the House acted on this matter 2 months ago when it passed H.R. 6027. There are between 200 and 300 pending lawsuits against municipalities which have an incalculable potential for creating havoc with municipal budgets and taxation. The House acted wisely, therefore, when on August 8, it ratified the Judiciary Committee amendment barring damages in pending as well as future cases.

On October 4, the other body passed the House bill with an amendment and asked for a conference. Two important issues now divide the two Houses of Congress. The House bill is fully retroactive as to damages, while the Senate bill is not retroactive, unless the defendant municipality can carry the burden of demonstrating that it would be inequitable not to provide zero damages in its particular case. The House bill is silent on an issue which has preoccupied the other body: The repeal of the prohibition against the FTC bringing enforcement actions against local governments, the so-called taxicab rider. The Senate bill contains a repealer.

We could have gone to conference on these differences. There has been time to do so, and possibly there is yet time—witness the immigration bill conferees who are back in session this afternoon. But in lieu of that we are asked to pass an amendment to the Senate amendment which concedes everything to the other body on the retroactivity issue. And it is silent on the repeal of the taxicab rider, which, considering the time constraints, could doom the bill in the other body.

Mr. Speaker, had we gone to conference, we could have worked out our differences. The House would certainly not have yielded on the retroactivity issue to the degree it has in the proposed amendment. As reasonable men and women, I believe we could have achieved a fair compromise, as we did last month on the joint research and development bill, S. 1841. I continue to believe that more effective and enduring legislation—legislation which would have afforded more protection for our beleaguered local governments—could have and should have been worked out.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. EDWARDS], that the House suspend the rules and agree to the resolution, House Resolution 613.

The question was taken.

Mr. EDWARDS of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

□ 1920

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has now been concluded on all motions to suspend the rules.

Pursuant to clause 5 of rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order: S. 2574, de novo; and House Resolution 613, de novo.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

NURSE EDUCATION AMENDMENTS OF 1984

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the conference report on the Senate bill, S. 2574.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN], that the House suspend the rules and agree to the conference report on the Senate bill, S. 2574.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 363, nays 13, not voting 56, as follows:

□ 1940

Mr. HUNTER changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 5, rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on the additional motion to suspend the rules on which the Chair has postponed further proceedings.

RESOLUTION PROVIDING FOR PASSAGE OF H.R. 6027, LOCAL GOVERNMENT ANTITRUST ACT OF 1984

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the resolution, House Resolution 613.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. EDWARDS] that the House suspend the rules and agree to the resolution, House Resolution 613.

The question was taken.

Mr. PORTER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The Chair will remind Members that this is a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 220, nays 160, not voting 52, as follows:

[Roll No. 456]

□ 1950

Messrs. LEATH of Texas, FISH, STRATTON, JACOBS, ROSTENKOWSKI, and YATES, Mrs. COLLINS, and Messrs. HORTON, NELSON of Florida, and SOLOMON changed their votes from "yea" to "nay."

Messrs. ROEMER, VOLKMER, and HANCE changed their votes from "nay" to "yea."

So (two-thirds not having voted in favor thereof) the motion was rejected.

The result of the vote was announced as above recorded.

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to proceed out of order.)

Mr. WRIGHT. Mr. Speaker, Members will be interested to know that there will be presented very shortly, almost immediately after perhaps two unanimous-consent requests, a simple extension for 2 days of the existing continuing resolution. This does not indicate by any means whatever that we expect it to take until Thursday before we finish. Quite the contrary, we believe there is reason to expect that if we come in at noon tomorrow, we may have a continuing resolution to vote on at noon tomorrow, which will permit us to adjourn sine die.

That will be our purpose. I shall make two unanimous-consent requests, and I think two committee chairmen have unanimous-consent requests to make, and then the chairman of our Appropriations Committee, the gentleman from Mississippi [Mr. WHITTEN] will present a short continuing resolution which will permit the Government to stay in operation after midnight tonight. When that is done, there will be no reason why we should not adjourn for the evening and go over until noon tomorrow.

We expect that the conferees will continue to meet tonight and early tomorrow and have ready for us, if at all possible, a more permanent resolution on which we can vote when we come in at noon tomorrow.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course, I yield to the distinguished gentleman from Mississippi.

Mr. LOTT. Just a couple points before the gentleman asks the unanimous-consent requests.

Do we anticipate any other business to be before the House other than the continuing resolution tomorrow?

Mr. WRIGHT. I have no knowledge of any other business to come before the House. This continuing resolution, of course, has priority over any and all other business. After it is out of the way, there is no reason why we must stay here for other business. Other business could be attended to in the next session of Congress.

Mr. LOTT. What about the debt limit legislation, which we would not have to vote on, I presume, if the Senate passed it without any amendments, which they have not done so. I assume if they did that with an amendment or amendments to that bill, we would have to also consider that debt ceiling.

Mr. WRIGHT. The gentleman is exactly correct. It is in the other body and the Senate still has not acted on it, to my knowledge. If they were to act upon it without amendment, then of course there would be no need for our acting further. If they attached amendments to it, it might create the kind of controversy that would make it difficult for us to come to grips with it.

Mr. LOTT. Mr. Speaker, I thank the gentleman.

□ 2000

AUTHORIZING THE SPEAKER TO DECLARE RECESSES FOR REMAINDER OF TODAY AND FOR TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it shall be in order for the remainder of the day and for tomorrow for the Speaker to declare recesses, subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON TOMORROW, WEDNESDAY, OCTOBER 10, 1984

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 1985

Mr. WHITTEN. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 663) making further continuing appropriations for fiscal year 1985.

The Clerk read as follows:

H.J. RES. 663

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution of October 5, 1984 (Public Law 98-455), is hereby amended by striking out "October 9, 1984" and inserting in lieu thereof "October 11, 1984".

SEC. 2. (a) Federal employees furloughed as a result of the lapse of appropriations from midnight October 3, 1984, until the date of enactment of this joint resolution, will be compensated at their standard rate of compensation for the period during which there was a lapse of appropriations.

(b) All obligations incurred in anticipation of the appropriations and authority provided in this joint resolution for the purposes of maintaining the minimum level of essential activities necessary to protect life and property and bringing about orderly termination of other functions, are hereby ratified and confirmed if otherwise in accordance with the provisions of this joint resolution.

The SPEAKER. Is a second demanded?

Mr. CONTE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Mississippi [Mr. WHITTEN] will be recognized for 20 minutes and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN]

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

This is a simple resolution which extends the existing continuing resolution, which expires at midnight tonight, until existing midnight October 11, 1984.

In addition, language has been included to allow payment to those Federal employees who were furloughed last week when there was a brief lapse of appropriations. This language has been included at the request of my colleague from Massachusetts [Mr. CONTE] so those who through no fault of their own might have had a shortened paycheck will receive their normal remuneration.

Again I say this resolution merely continues the existing resolution so that we can operate under existing rules, and at the current rates, until October 11.

That is all there is to it, Mr. Speaker.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, very briefly, the resolution extends the current continuing resolution through Thursday, October 11, and adds two provisions in order to ensure that Federal employees do not become innocent victims of the disagreement between the House and the Senate over the big continuing resolution.

I offered these two provisions in the continuing resolution conference, and they were accepted by the conferees.

Since there will be a Federal payday before the end of this week, it is important that these provisions be included in this extension, and I thank my chairman for doing so.

The first provision relates to employees who were furloughed when appropriations lapsed at midnight last Wednsday. Although the levels in the continuing resolution provide sufficient funds to pay those employees, because of the Attorney General's ruling in 1980, there is no legal authority to do so. My first provision provides that authority. Federal employees should not receive short paychecks because we cannot complete our business on time.

The second provision relates to Federal employees who were kept on the job to perform essential services, and to begin the orderly termination of other services. The Attorney General's opinion suggests that these activities are permissible during a period of lapsed appropriations. However, I think it is preferable that Congress speak directly to that question, by statute, and specifically ratify obligations incurred for those purposes.

Mr. Speaker, if you go back and check the RECORD, and the debates on every one of these extensions, I stood here and I said that it was foolhardy to think that we could have 2- and 3-day extensions. I said this as a joke, Mr. Speaker, we are going to be back here asking for another one.

And here we are, Mr. Speaker. You do not want to hear the truth. I said make it a week.

Mr. Speaker, everybody thinks we are hung up in conference because of four or five little defense issues that we have. But the real reason is that when we first went down in the well here and we had a clean resolution that the Rules Committee brought out, unfortunately 171 Members on the other side said no. I said stay with CLAUDE PEPPER and his courageous soldiers. If you vote down that clean rule, I said, we will make the pigsty at the Chicago Stockyards look anemic by contrast. And I said wait until it gets over to the other body, it is going to get even worse.

So what happened? That pigsty got so big that the fences got knocked out and we have been trying to chase the pigs all over to catch them, corral them, and bring them back in.

I will tell you, it is like a country fair. Most of them have got grease on them and they are slipping right out of my hands. I cannot hold them.

But I tell you, I am going to do my level best to corral as many as I can before Thursday night. And if we could do that I am sure we are going to go home.

But that is the key. That is the key. If we could settle that public works part of that bill, everything will fall into place and we can all go home.

And I wish you all a lot of luck in your campaigns.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

The gentleman from Massachusetts and I both supported House Joint Resolution 648 in our appearance before the Rules Committee.

May I say that many of the amendments agreed to House Joint Resolution 648 on the other side were written and ready to be introduced before the House passed the resolution, so do not think it is all on this side.

The SPEAKER. The question is on the motion offered by the gentleman from Mississippi [Mr. WHITTEN] that the House suspend the rules and pass the Joint resolution, House Joint Resolution 663.

The question was taken.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. 317 Members being present and 35 having requested a roll-call, the yeas and nays are not ordered.

So the yeas and nays were refused.

So (two-thirds having voted in favor thereof) the rules were suspended, and the joint resolution was passed.

A motion to reconsider was laid on the table.

COMMERCIAL SPACE LAUNCH ACT

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3942) to facilitate commercial space launches, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "Commercial Space Launch Act".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) the peaceful uses of outer space continue to be of great value and to offer benefits to all mankind;

(2) private applications of space technology have achieved a significant level of commercial and economic activity, and offer the potential for growth in the future, particularly in the United States;

(3) new and innovative equipment and services are being sought, created, and offered by entrepreneurs in telecommunications, information services, and remote sensing technology;

(4) the private sector in the United States has the capability of developing and providing private satellite launching and associated services that would complement the launching and associated services now available from the United States Government;

(5) the development of commercial launch vehicles and associated services would enable the United States to retain its competitive position internationally, thereby contributing to the national interest and economic well-being of the United States;

(6) provision of launch services by the private sector is consistent with the national security interests and foreign policy interests of the United States and would be facilitated by stable, minimal, and appropriate regulatory guidelines that are fairly and expeditiously applied; and

(7) the United States should encourage private sector launches and associated services and, only to the extent necessary, regulate such launches and services in order to ensure compliance with international obligations of the United States and to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States.

PURPOSES

SEC. 3. It is therefore the purpose of this Act—

(1) to promote economic growth and entrepreneurial activity through utilization of the space environment for peaceful purposes;

(2) to encourage the United States private sector to provide launch vehicles and associated launch services by simplifying and expediting the issuance and transfer of commercial launch licenses and by facilitating and encouraging the utilization of Government-developed space technology; and

(3) to designate an executive department to oversee and coordinate the conduct of commercial launch operations, to issue and transfer commercial launch licenses authorizing such activities, and to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States.

DEFINITIONS

SEC. 4. For purposes of this Act—

(1) "agency" means an executive agency as defined by section 105 of title 5, United States Code;

(2) "launch" means to place, or attempt to place, a launch vehicle and payload, if any, in a suborbital trajectory, in Earth orbit in outer space, or otherwise in outer space;

(3) "launch property" means propellants, launch vehicles and components thereof, and other physical items constructed for or used in the launch preparation or launch of a launch vehicle;

(4) "launch services" means those activities involved in the preparation of a launch vehicle and its payload for launch and the conduct of a launch;

(5) "launch site" means the location on Earth from which a launch takes place, as defined in any license issued or transferred by the Secretary under this Act, and includes all facilities located on a launch site which are necessary to conduct a launch;

(6) "launch vehicle" means any vehicle constructed for the purpose of operating in, or placing a payload in, outer space and any suborbital rocket;

(7) "payload" means an object which a person undertakes to place in outer space by means of a launch vehicle, and includes subcomponents of the launch vehicle specifically designed or adapted for that object;

(8) "person" means any individual and any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of any State or any nation;

(9) "Secretary" means the Secretary of Transportation;

(10) "State", and "United States" when used in a geographical sense, mean the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the United States Virgin Islands, Guam, and any other commonwealth, territory, or possession of the United States; and

(11) "United States citizen" mean—

(A) any individual who is a citizen of the United States;

(B) any corporation, partnership, joint venuture, association, or other entity organized or existing under the laws of the United States or any State; and

(C) any corporation, partnership, joint venture, association, or other entity which is organized or exists under the laws of a foreign nation, if the controlling interest (as defined by the Secretary in regulations) in such entity is held by an individual or entity described in subparagraph (A) or (B).

GENERAL RESPONSIBILITIES OF THE SECRETARY AND OTHER AGENCIES

SEC. 5. (a) The Secretary shall be responsible for carrying out this Act, and in doing so shall—

(1) encourage, facilitate, and promote commercial space launches by the private sector; and

(2) consult with other agencies to provide consistent application of licensing requirements under this Act and to ensure fair and equitable treatment for all license applicants.

(b) To the extent permitted by law, Federal agencies shall assist the Secretary, as necessary, in carrying out this Act.

REQUIREMENT OF LICENSE FOR PRIVATE SPACE LAUNCH OPERATIONS

SEC. 6. (a)(1) No person shall launch a launch vehicle or operate a launch site within the United States, unless authorized by a license issued or transferred under this Act.

(2) No United States citizen described in subparagraph (A) or (B) of section 4(11) shall launch a launch vehicle or operate a launch site outside the United States, unless authorized by a license issued or transferred under this Act.

(3)(A) No United States citizen described in subparagraph (C) of section 4(11) shall launch a launch vehicle or operate a launch site at any place which is both outside the United States and outside the territory of any foreign nation, unless authorized by a license issued or transferred under this Act. The preceding sentence shall not apply with respect to a launch or operation of a launch site if there is an agreement in force between the United States and a foreign nation which provides that such foreign nation shall exercise jurisdiction over such launch or operation.

(B)(i) Except as provided in clause (ii) of this subparagraph, this Act shall not apply to the launch of a launch vehicle or the operation of a launch site in the territory of a foreign nation by a United States citizen described in subparagraph (C) of section 4(11).

(ii) If there is an agreement in force between the United States and a foreign nation which provides that the United States shall exercise jurisdiction over the launch of a launch vehicle or operation of a launch site in the territory of such nation by a United States citizen described in subparagraph (C) of section 4(11), no such United States citizen shall launch a launch vehicle or operate a launch site in the territory of such nation, unless authorized by a license issued or transferred under this Act.

(b)(1) The holder of a launch license under this Act shall not launch a payload unless that payload complies with all requirements of Federal law that relate to the launch of a payload. The Secretary shall ascertain whether any license, authorization, or other permit required by Federal law for a payload which is to be launched has been obtained.

(2) If no payload license, authorization, or permit is required by any Federal law, the Secretary may take such action under this Act as the Secretary deems necessary to prevent the launch of a payload by a holder of a launch license under this Act if the Secretary determines that the launch of such payload would jeopardize the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

(c)(1) Except as provided in this Act, no person shall be required to obtain from any agency a license, approval, waiver, or exemption for the launch of a launch vehicle or the operation of a launch site.

(2) Nothing in this Act shall affect the authority of the Federal Communications Commission under the Communications Act of 1934 (47 U.S.C. 151 et seq.) or the authority of the Secretary of Commerce under the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4201 et seq.).

AUTHORITY TO ISSUE AND TRANSFER LICENSES

SEC. 7. The Secretary may, consistent with the public health and safety, safety of property, and national security interests and foreign policy interests of the United States, issue or transfer a license for launching one or more launch vehicles or for operating one or more launch sites, or both, to an applicant who meets the requirements for a license under section 8 of this Act. Any license issued or transferred under this section shall be in effect for such period of time as the Secretary may specify, in accordance with regulations issued under this Act.

LICENSING REQUIREMENTS

SEC. 8. (a)(1) All requirements of Federal law which apply to the launch of a launch vehicle or the operation of a launch site shall be requirements for a license under this Act for the launch of a launch vehicle or the operation of a launch site, respectively, except to the extent provided in paragraph (2).

(2) If the Secretary determines, in consultation with appropriate agencies, that any requirement of Federal law that would otherwise apply to the launch of a launch vehicle or the operation of a launch site is not necessary to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States, the Secretary may by regulation provide that such requirement shall not be a requirement for a license under this Act.

(b) The Secretary may, with respect to launches and the operation of launch sites, prescribe such additional requirements as are necessary to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States.

(c) The Secretary may, in individual cases, waive the application of any requirement for a license under this section if the Secretary determines that such waiver is in the public interest and will not jeopardize the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

LICENSE APPLICATION AND APPROVAL

SEC. 9. (a) Any person may apply to the Secretary for issuance or transfer of a license under this Act, in such form and manner as the Secretary may prescribe. The Secretary shall establish procedures and timetables to expedite review of applications under this section and to reduce regulatory burdens for applicants.

(b) The Secretary shall issue or transfer a license to an applicant if the Secretary determines in writing that the applicant complies and will continue to comply with the requirements of this Act and any regulation issued under this Act. The Secretary shall include in such license such conditions as may be necessary to ensure compliance with this Act, including an effective means of onsite verification that a launch or operation of a launch site conforms to representations made in the application for a license or transfer of a license. The Secretary shall make a determination on any application not later than 180 days after receipt of such application. If the Secretary has not made a determination within 120 days after receipt of such application, the Secretary shall inform the applicant of any pending issues

and of actions required to resolve such issues.

(c) The Secretary, any officer or employee of the United States, or any person with whom the Secretary has entered into a contract under section 14(b) of this Act may not disclose any data or information under this Act which qualifies for exemption under section 552(b)(4) of title 5, United States Code, or is designated as confidential by the person or agency furnishing such data or information, unless the Secretary determines that the withholding of such data or information is contrary to the public or national interest.

SUSPENSION, REVOCATION, AND MODIFICATION OF LICENSES

SEC. 10. (a) The Secretary may suspend or revoke any license issued or transferred under this Act if the Secretary finds that the licensee has substantially failed to comply with any requirement of this Act, the license, or any regulation issued under this Act, or that the suspension or revocation is necessary to protect the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

(b) Upon application by the licensee or upon the Secretary's own initiative, the Secretary may modify a license issued or transferred under this Act, if the Secretary finds that the modification will comply with the requirements of this Act.

(c) Unless otherwise specified by the Secretary, any suspension, revocation, or modification by the Secretary under this section—

(1) shall take effect immediately; and

(2) shall continue in effect during any review of such action under section 12 of this Act.

(d) Whenever the Secretary takes any action under this section, the Secretary shall notify the licensee in writing of the Secretary's finding and the action which the Secretary has taken or proposes to take regarding such finding.

EMERGENCY ORDERS

SEC. 11. (a) The Secretary may terminate, prohibit, or suspend immediately the launch of a launch vehicle or the operation of a launch site which is licensed under this Act if the Secretary determines that such launch or operation is detrimental to the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

(b) An order terminating, prohibiting, or suspending any launch or operation of a launch site licensed by the Secretary under this Act shall take effect immediately and shall continue in effect during any review of such order under section 12.

ADMINISTRATIVE AND JUDICIAL REVIEW

SEC. 12. (a)(1) An applicant for a license and a proposed transferee of a license under this Act shall be entitled to a determination on the record after an opportunity for a hearing in accordance with section 554 of title 5, United States Code, of any decision of the Secretary under section 9(b) to issue or transfer a license with conditions or to deny the issuance or transfer of such license.

(2) A licensee under this Act shall be entitled to a determination on the record after an opportunity for a hearing in accordance with section 554 of title 5, United States Code, of any decision of the Secretary—

(A) under section 10 to suspend, revoke, or modify a license; or

(B) under section 11 to terminate, prohibit, or suspend any launch or operation of a launch site licensed by the Secretary.

(b) Any final action of the Secretary under this Act to issue, transfer, deny the issuance or transfer of, suspend, revoke, or modify a license or to terminate, prohibit, or suspend any launch or operation of a launch site licensed by the Secretary shall be subject to judicial review as provided in chapter 7 of title 5, United States Code.

REGULATIONS

SEC. 13. The Secretary may issue such regulations, after notice and comment in accordance with section 553 of title 5, United States Code, as may be necessary to carry out this Act.

MONITORING OF ACTIVITIES OF LICENSEES

SEC. 14. (a) Each license issued or transferred under this Act shall require the licensee—

(1) to allow the Secretary to place Federal officers or employees or other individuals as observers at any launch site used by the licensee, at any production facility or assembly site used by a contractor of the licensee in the production or assembly of a launch vehicle, or at any site where a payload is integrated with a launch vehicle, in order to monitor the activities of the licensee or contractor at such time and to such extent as the Secretary considers reasonable and necessary to determine compliance with the license or to carry out the responsibilities of the Secretary under section 6(b) of this Act; and

(2) to cooperate with such observers in the performance of monitoring functions.

(b) the Secretary may, to the extent provided in advance by appropriation Acts, enter into a contract with any person to carry out subsection (a)(1) of this section.

USE OF GOVERNMENT PROPERTY

SEC. 15. (a) The Secretary shall take such actions as may be necessary to facilitate and encourage the acquisition (by lease, sale, transaction in lieu of sale, or otherwise) by the private sector of launch property of the United States which is excess or is otherwise not needed for public use and of launch services, including utilities, of the United States which are otherwise not needed for public use.

(b)(1) The amount to be paid to the United States by any person who acquires launch property or launch services, including utilities, shall be established by the agency providing the property or service, in consultation with the Secretary. In the case of aquisition of launch property by sale or transaction in lieu of sale, the amount of such payment shall be the fair market value. In the case of any other type of acquisition of launch property, the amount of such payment shall be an amount equal to the direct costs (including any specific wear and tear and damage to the property) incurred by the United States as a result of the acquisition of such launch property. In the case of any acquisition of launch services, including utilities, the amount of such payment shall be an amount equal to the direct costs (including salaries of United States civilian and contractor personnel) incurred by the United States as a result of the acquisition of such launch services.

(2) The Secretary may collect any payment for launch property or launch services, with the consent of the agency establishing such payment under paragraph (1).

(3) The amount of any payment received by the United States for launch property or launch services, including utilities, under this subsection shall be deposited in the general fund of the Treasury, and the amount of a payment for launch property (other than launch property which is excess) and launch services (including utilities) shall be credited to the appropriation form which the cost of providing such property or services was paid.

(c) The Secretary may establish requirements for liability insurance, hold harmless agreements, proof of financial responsibility, and such other assurances as may be needed to protect the United States and its agencies and personnel from liability, loss, or injury as a result of a launch or operation of a launch site involving Government facilities or personnel.

LIABILITY INSURANCE

SEC. 16. Each person who launches a launch vehicle or operates a launch site under a license issued or transferred under this Act shall have in effect liability insurance at least in such amount as is considered by the Secretary to be necessary for such launch or operation, considering the international obligations of the United States. The Secretary shall prescribe such amount after consultation with the Attorney General and other appropriate agencies.

ENFORCEMENT AUTHORITY

SEC. 17. (a) The Secretary shall enforce this Act. The Secretary may delegate the exercise of any enforcement authority under this Act to any officer or employee of the Department of Transportation or, with the approval of the head of another agency, any officer or employee of such agency.

(b) In carrying out this section, the Secretary may—

(1) make investigations and inquiries, and administer to or take from any person an oath, affirmation, or affidavit, concerning any matter relating to enforcement of this Act; and

(2) pursuant to any lawful process—

(A) enter at any reasonable time any launch site, production facility, or assembly site of a launch vehicle, or any site where a payload is integrated with a launch vehicle, for the purpose of inspecting any object which is subject to this Act and any records or reports required by the Secretary to be made or kept under this Act; and

(B) seize any such object, record, or report where there is probable cause to believe that such object, record, or report was used, is being used, or is likely to be used in violation of this Act.

PROHIBITED ACTS

SEC. 18. It is unlawful for any person to violate a requirement of this Act, a regulation issued under this Act, or any term, condition, or restriction of any license issued or transferred by the Secretary under this Act.

CIVIL PENALTIES

SEC. 19. (a) Any person who is found by the Secretary, after notice and opportunity to be heard on the record in accordance with section 554 of title 5, United States Code, to have committed any act prohibited by section 18 shall be liable to the United States for a civil penalty of not more than $100,000 for each violation. Each day of a continuing violation shall constitute a separate violation. The amount of such civil penalty shall be assessed by the Secretary by written notice. The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

(b) If any person fails to pay a civil penalty assessed against such person after the penalty has become final or if such person appeals an order of the Secretary and the appropriate court has entered final judgment in favor of the Secretary, the Secretary shall recover the civil penalty assessed in any appropriate district court of the United States.

(c) For purposes of conducting any hearing under this section, the Secretary may (1) issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, documents, and other records, (2) seek enforcement of such subpoenas in the appropriate district court of the United States, and (3) administer oaths and affirmations.

CONSULTATION

SEC. 20. (a) The Secretary shall consult with the Secretary of Defense on all matters, including the issuance or transfer of each license, under this Act affecting national security. The Secretary of Defense shall be responsible for identifying and notifying the Secretary of those national security interests of the United States which are relevant to activities under this Act.

(b) The Secretary shall consult with the Secretary of State on all matters, including the issuance or transfer of each license, under this Act affecting foreign policy. The Secretary of State shall be responsible for identifying and notifying the Secretary of those foreign policy interests or obligations of the United States which are relevant to activities under this Act.

(c) The Secretary shall consult with other agencies, as appropriate, in order to carry out the provisions of this Act.

RELATIONSHIP TO OTHER LAWS AND INTERNATIONAL OBLIGATIONS

SEC. 21. (a) No State or political subdivision of a State may adopt or have in effect any law, rule, regulation, standard, or order which is inconsistent with the provisions of this Act. Nothing in this Act shall preclude a State or a political subdivision of a State from adopting or putting into effect any law, rule, regulation, standard, or order which is consistent with this Act and is in addition to or more stringent than any requirement of or regulation issued under this Act. The Secretary may, and is encouraged to, consult with the States to simplify and expedite the approval of space launch activities.

(b) A launch vehicle or payload shall not, by reason of the launching of such vehicle or payload, be considered an export for purposes of any law controlling exports.

(c) Nothing in this Act shall apply to—

(1) any—

(A) launch or operation of a launch vehicle,

(B) operation of a launch site, or

(C) other space activity,

carried out by the United States on behalf of the United States; or

(2) any planning or policies relating to any such launch, operation, or activity.

(d) The Secretary shall carry out this Act consistent with any obligation assumed by the United States in any treaty, convention, or agreement that may be in force between the United States and any foreign nation. In carrying out this Act, the Secretary shall consider applicable laws and requirements of any foreign nation.

REPORT ON LEGISLATION

SEC. 22. (a) Not later than the last day of each fiscal year ending after the date of enactment of this Act and before October 1, 1989, the Secretary shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report describing all activities undertaken under this Act, including a description of the process for the application for and approval of licenses under this Act and recommendations for legislation that may further commercial launches.

(b) Not later than July 1, 1985, the Secretary shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report which identifies Federal statutes, treaties, regulations, and policies which may have an adverse effect on commercial launches and include recommendations on appropriate changes thereto.

SEVERABILITY

SEC. 23. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act and the application of such provision to any other person or circumstance shall not be affected by such invalidation.

AUTHORIZED APPROPRIATIONS

SEC. 24. There are authorized to be appropriated to the Secretary $4,000,000 for fiscal year 1985.

EFFECTIVE DATE

SEC. 25. (a) Except for section 15 and the authority to issue regulations, this Act shall take effect 180 days after the date of enactment of this Act.

(b) Section 15 shall take effect on the date of enactment of this Act, except that nothing in this Act shall affect any agreement, including negotiations which are substantially completed, relating to the acquisition of launch property or launch services of the United States entered into on or before the date of enactment of this Act between the United States and any private party.

(c) Regulations to implement this Act shall be promulgated not later than 180 days after the date of enactment of this Act.

□ 2010

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that further reading of the amendment be dispensed with, and that it be printed in the RECORD.

The SPEAKER pro tempore [Mr. MOAKLEY]. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Florida [Mr. FUQUA]?

Mr. LUJAN. Reserving the right to object, Mr. Speaker, I shall not object but only take this occasion to ask the gentleman from Florida to explain the purpose of the legislation.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. Under my reservation, Mr. Speaker, I yield to the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Speaker, this bill represents the culmination of long and careful deliberations in both the House and Senate. I want to recognize especially the exemplary efforts and leadership of the chairman of the Subcommittee on Space Science and Applications, Mr. VOLKMER, and the senior minority member of the subcommittee, Mr. LUJAN, in preparing this legislation for consideration by the House today. I also want to thank the distinguished ranking minority member of the full committee, Mr. WINN, for his leadership on this measure.

Mr. Speaker, the Senate and House versions are very similar, and I believe the Senate amendment represents improvements that warrant adoption by the House. I urge my colleagues to support the Senate amendment to H.R. 3942, the Commercial Space Launch Act, which passed the House on June 5, 1984.

This legislation is designed to encourage the U.S. private sector to provide launch vehicles and associated launch services and to designate an executive department—the Department of Transportation—to oversee and coordinate the conduct of commercial launch operations. The step we take by passing this legislation anticipates an increase in world market demand for launch services and an expansion of U.S. commercial launch services as a complement to the space shuttle. These activities should enhance domestic economic activity and U.S. competitiveness in capturing the space launch market.

The bill responds to these changing conditions by providing for issuance of commercial launch licenses and by facilitating and encouraging private sector utilization of Government developed space technology. Government supervision over private launch activities is required to protect public health and safety, safety of property, and national security and foreign policy interests of the United States.

I urge all Members to support the Senate amendment, so that we can get this bill to the President for signature and take another important step toward our efforts to commercialize space.

Mr. LUJAN. Further reserving the right to object, Mr. Speaker, I thank the gentleman for bringing up this bill.

I think the purpose of all Government research should be for the benefit of mankind. I think the commercialization of space certainly fits into that category. We ought to commercialize it as much as possible.

Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Missouri [Mr. VOLKMER].

Mr. VOLKMER. Mr. Speaker, I too rise in strong support of the Senate amendment to H.R. 3942, the Commercial Space Launch Act. The Senate version before us today preserves the

essential features of the House bill adopted June 5, 1984. I believe most of the changes made by the other body reflect enhancements to the legislation which can be fully endorsed by the House.

As chairman of the subcommittee, Mr. Speaker, I would like to commend the chairman of the full committee, the gentleman from Florida, Mr. FUQUA, and also the ranking minority member, the gentleman from Kansas, Mr. LARRY WINN, and the gentleman from New Mexico, Mr. LUJAN, for their work. Also, I would like to commend the original cosponsors of this legislation who brought us the idea for commercializing efforts in space, the gentleman from Hawaii, Mr. AKAKA. Along with that, as we deliberated in the subcommittee on the legislation, I also wish to commend the gentleman from Washington, Mr. ROD CHANDLER, and the gentleman from Virginia, Mr. HERB BATEMAN, for their expert work and assistance in getting this legislation through this body.

Also, Mr. Chairman, I would like to incorporate in the RECORD the major differences between S. 2931 as reported and H.R 3942 as passed by the House.

MAJOR DIFFERENCES BETWEEN S. 2931, AS REPORTED, AND H.R. 3942, AS PASSED BY THE HOUSE

The Senate bill clarifies the extent of U.S. authority over launch activities conducted by U.S citizens in international territory, and within foreign territory—the State Department endorses the Senate language.

The Secretary is given responsibility for determining whether a payload to be launched complies with all requirements of Federal law. The House bill had assigned this responsibility to the appropriate agencies under current law.

The Secretary's administration and enforcement activities under the act are required to be consistent with and protective of public health and safety, safety of property, and national security and foreign policy interests of the United States. The House bill had required the Secretary to carry out the act consistent with "safety of life of property, and national security and foreign policy interests of the United States."

A determination by the Secretary to issue a license must be made within 180 days of receipt of application the House bill required a 120-day turnaround.

Any order by the Secretary to suspend, revoke, or modify a license shall take effect immediately, unless otherwise specified by the Secretary. The House bill required such orders to take effect 30 days following issuance.

In monitoring the activities of licensees under the act, the Secretary is authorized to enter into a contract to carry out such activities. The House bill authorized the Secretary to place only Federal officers or employees at launch sites.

Payments for purchase of or reimbursements for use of Government launch property or services shall be established by the agency providing the property or service, in consultation with the Secretary. In the case of acquisition of launch property by sale or transaction in lieu of sale, the amount of such payment shall be fair market value. The House bill provided that the amount of such payments be set solely by the Secretary, on the basis of fair market value or benefit to the recipient, whichever is greater.

The Senate bill requires the Secretary to consult with the Secretary of Defense on all matters under the act affecting national security and with the Secretary of State on all matters under the act affecting foreign policy. This is an elaboration on a general consultation requirement between the Secretary and other agencies in the House bill.

The bill prohibits any State from having in effect any law or regulation which is inconsistent with the act; however, a State may adopt laws or regulations in addition to, or more stringent than the act, so long as they are consistent with the act. Thus, while States may adopt regulations in the interests of protecting the public health and safety, for example, such regulations should be designed so as not to impede the achievement of the objectives of the legislation, that is, to encourage private sector launches and associated services. This approach recognizes a necessary balancing of interests, and should be sufficiently flexible to preserve the interests of all parties. The House bill did not affect the authority of States to regulate space launch activities.

The bill establishes that the launching of a launch vehicle or payload shall not be considered an export for purposes of any law controlling exports. The House bill did not address payloads in this context.

The bill directs the Secretary to report annually for 5 years on the activities undertaken pursuant to the act, and by July 1, 1985, to report on legal and regulatory impediments to commercial launch operations. The House bill required a report be submitted to Congress a year following enactment.

The bill shall take effect upon enactment, except for the authority to issue regulations and the provisions of the bill—section 15—dealing with use of Government property. Nothing in the act shall affect any agreement entered into or any negotiations which are substantially completed relating to the acquisition of launch property or services of the United States on or before the date of enactment. The House bill established an effective date—except for the authority to issue regulations—180 days following enactment.

I urge all Members' support for this legislation.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from New York [Mr. MCGRATH].

Mr. MCGRATH. I thank the gentleman for yielding.

Mr. Speaker, I congratulate the chairman and the ranking member and the ranking member of the subcommittee and the subcommittee chairman for bringing this bill before us. This is an important piece of legislation to commercialize the expendable launch vehicles to consolidate all of the permits necessary. Presently nine different permits are necessary to commercialize these expendable launch vehicles. We will establish a one-stop shop here with this legislation which I think is important for our endeavors in space in the future.

Mr. Speaker, I again thank the gentleman for yielding.

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Florida?

There was no objection.

A motion to reconsider was laid on the table.

CORRECTING TECHNICAL ERRORS IN ENROLLMENT OF H.R. 3942, COMMERCIAL SPACE LAUNCH ACT

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the concurrent resolution (H. Con. Res. 374) to correct technical errors in the enrollment of the bill, H.R. 3942.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. LUJAN. Mr. Speaker, I reserve the right to object, and I do so only to have the gentleman [Mr. FUQUA] explain the concurrent resolution.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. Under my reservation of objection, I yield to the gentleman from Florida.

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Speaker, I appreciate the time. This concurrent resolution simply corrects a technical error in the bill by extending provisions on administrative and judicial review to cover the Secretary's decision concerning payloads. This change is consistent with the House and Senate intent that such request be provided and was covered in the report language. However, through oversight the language was

not included in the bill text and this action would correct that oversight.

Mr. LUJAN. I thank the gentleman for his explanation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the concurrent resolution, as follows:

HOUSE CONCURRENT RESOLUTION 374

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 3942) to facilitate commercial space launches, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(1) At the end of section 12(a)(1) add the following: "An owner or operator of a payload shall be entitled to a determination on the record after an opportunity for a hearing in accordance with section 554 of title 5, United States Code, of any decision of the Secretary under section 6(b)(2) to prevent the launch of such payload.".

(2) In section 12(b) after "the Secretary" the second place it appears insert the following: "or to prevent the launch of a payload".

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

DECLARING THAT THE UNITED STATES HOLDS CERTAIN LANDS IN TRUST FOR COCOPAH INDIAN TRIBE OF ARIZONA

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5760) to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, Arizona, with Senate amendments, thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

TITLE I—COCOPHA INDIAN TRIBE OF ARIZONA

SEC. 101. Subject to all valid existing rights, all right, title, and interest of the United States in the following described tracts of land shall be held by the United States in trust for the Cocopah Indian Tribe of Arizona and shall be part of the reservation of such tribe:

(1) As part of the West Cocopah Reservation, containing 2,096 acres, more or less:

Gila and Salt River Base and Meridian, Arizona

Township 9 south, range 24 west

Section 18, lot 17;

Section 19, lots 24 and 25; and

Section 30, lots 19 and 27.

Township 9 south, range 25 west

Section 24, lots 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12.

Section 34, lots 1 and 2; and

Section 35, all within the United States.

Township 10 south, range 25 west

Section 2, lots 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, 26, and 27;

Section 10, lots 1 and 2;

Section 11, lots 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, and 16;

Section 14, lots 8 and 9; and

Section 15, lots 5, 6, and 7, and northeast quarter northeast quarter.

(2) As part of the East Cocopah Reservation, containing 1,548.87 acres, more or less:

Gila and Salt River Base and Meridian, Arizona

Township 9, south, range 23 west

Section 30, southeast quarter southwest quarter and

Section 31, north half, north half south half, southwest quarter southwest quarter, and southwest quarter southeast quarter.

Township 10 south, range 24 west

Section 1, lots 1, 2, 5, and 8, and south half northeast quarter and east half southeast quarter

Section 12, northeast quarter and east half southeast quarter; and

Section 13, lots 7 and 9, and east half northeast quarter, northeast quarter southeast quarter, south half southeast quarter, and south half southwest quarter.

(3) As the North Cocopah Reservation, containing 614.18 acres, more or less:

San Bernardino Base and Meridian, Arizona

Township 16 south, range 21 east

Section 25, lots 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, and 17; and

Section 24, lot 1.

Township 16 south, range 22 east

Section 19, lot 10, and

Section 30, lots 11, 12, 13, 19, 20, and 22, and south half southwest quarter.

SEC. 102. (a) Nothing in this Act shall deprive any person or entity of any legal existing right-of-way, legal mining claim, legal grazing permit, legal water right, accretion claim, or other legal right or interest which such person or entity may have in lands described in section 101 of this Act.

(b) That portion of the lands described in paragraph 2 of section 101 which are the subject of a dedication for a garbage disposal recorded at book 167, page 464 of the Yuma County Recorder's office shall remain subject to such dedication for as long as such lands are used for land fill or related purposes.

SEC. 103. Notwithstanding any other provision of this title, Executive Order Numbered 11988 of May 24, 1977, 42 Federal Register 26951, as amended, shall apply to lands described in section 101 of this Act.

SEC. 104. (a) There are reserved to the United States the following rights-of-way upon, over, and across the lands described in section 101 of this Act:

(1) A right-of-way of sixty feet from the margin of the Colorado River on the international boundary with the Republic of Mexico, as described in Public Land reservation of May 27, 1907;

(2) Rights-of-way for existing facilities of the Yuma Reclamation Project, the Colorado River Front Work and Levee System, and the Yuma Mesa Conduit;

(3) A right-of-way of fifty feet on each side of the center line of the Pesch Header, as shown on the United States Bureau of Reclamation, Yuma Project drawing numbered 35-303-634;

(4) A right-of-way for power and transmission facilities within the north seventeen feet of the south fifty feet of the southeast quarter southwest quarter, section 30, township 9 south, range 23 west, Gila and Salt River Base and Meridian;

(5) A right-of-way of two hundred feet measured horizontally landward from the high water mark of the Colorado River bankline for channel rectification, bankline maintenance, and preservation of the floodway, as well as a right, at all proper times and places, to free ingress to, passage over, and egress from the lands described in section 101 of this Act, for the purpose of exercising, enforcing, and protecting the rights reserved in this right-of-way; and

(6) A right-of-way for sludge disposal for the Yuma Desalting Plant on Sections 24, 25 (excluding lots 5 and 6), township 16 south, range 21 east, San Bernardino Base and Meridian, Arizona and sections 19, 30, township 16 south, range 22 east, San Bernardino Base and Meridian, Arizona. This right-of-way shall terminate on the earlier of the date that is 5 years after the date of the enactment of this Act, or the date on which the Secretary of the Interior determines that such right-of-way is not needed for such purpose. Any determination by the Secretary of the Interior under this subsection shall be published in the Federal Register:

Provided, That should any of the rights-of-ways reserved by this section be abandoned, as determined by the Secretary of the Interior, such rights shall revert to the Cocopah Tribe.

SEC. 105. In the event that title to any private lands located within section 1 or 2, township 10 south, range 25 West, Gila and Salt River Base and Meridian, which are contiguous to the West Cocopah Reservation, is subsequently acquired by the Cocopah Tribe, such lands shall thereupon become part of, and shall be within, the exterior boundary of the West Reservation of the Cocopah Tribe.

TITLE II—CLAIMS OF THE NAVAJO INDIAN TRIBE

SEC. 201. Notwithstanding sections 2401 and 2501 of title 28, United States Code, or section 12 of the Act of August 13, 1946 (60 Stat. 1052; 25 U.S.C. 70k), or any other provision of law, jurisdiction is hereby conferred upon the United States Claims Court to hear, determine, and render judgment on the claims of the Navajo Indian Tribe against the United States which (1) arose before August 13, 1946, (2) were timely presented under section 2 of the Act of August 13, 1946 (60 Stat. 1050; 25 U.S.C. 70a), (3) were withdrawn without approval by the Tribe and the Secretary of the Interior, and (4) were held by the Court of Claims in Navajo Tribe Indians against United States, Docket Numbered 69, on June 13, 1979, to have been voluntarily dismissed by the Tribe before being considered or decided on their merits, and which are no longer pending before the United States Claims Court and have not been previously determined on the merits by the United States Court of Claims. Such claims must be filed within six months after the date of enactment of this Act.

SEC. 202. This title shall not affect the finality of the judgments entered in Indian Claims Commission Docket Numbers 229 and 353 or alter the effect, if any, of those judgments on other litigation brought by the Navajo Indian Tribe against the United States as third parties in other judicial proceedings.

Amend the title so to read: "An Act to declare that the United States holds certain lands in trust for the Cocopah Indian Tribe of Arizona, and for other purposes.".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the Senate amendment be dispensed with, and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

Mr. LUJAN. Reserving the rights to object, Mr. Speaker, I take this time again simply to ask the gentleman from Arizona to explain the contents of the legislation.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, H.R. 5760 provides that certain public lands in Arizona will be held in trust for the Cocopah Indian Tribe of Arizona. The House passed this bill on October 2. The Senate passed the bill on October 4 with an amendment in the nature of a substitute.

First, the Senate substitute makes two minor, but germane, amendments to the Cocopah land provision. We have reviewed these changes and find them acceptable. I know of no opposition to them.

Second, the Senate substitute inserts a new title II which adds a nongermane provision authorizing the Navajo Tribe to file certain claims against the United States in the court of claims. The claims involved are claims which the Navajo Tribe filed before the old Indian Claims Commission. These claims were dismissed by the Commission on a motion of the tribe's former attorney without the consent of either the tribe or the Secretary of the Interior.

All this provision will do is to permit the tribe to refile these claims and to have them heard on their merits. Similar legislation is pending before the Judiciary Committee but I understand there is no objection to concurring in this Senate amendment.

Mr. LUJAN. Mr. Speaker, I thank the gentleman for his explanation.

Further reserving the right to object, Mr. Speaker, I yield to my friend, the gentleman from Ohio [Mr. KINDNESS].

Mr. KINDNESS. I thank the gentleman for yielding.

Mr. Speaker, I take this time solely for the purpose of pointing out that although the Judiciary Committee has not acted on the subject matter of the amendment to the bill, I would not voice objection at this point. If it turns out there is opposition by the administration, if the bill is vetoed, I would certainly be very happy to work with those interested to effect resolution of this in the days ahead in the next Congress, if I have the opportunity to be here to do that. But I would not raise objection at this point.

Mr. LUJAN. I thank the gentleman for his comments.

Mr. Speaker, there has been some problems with this as far as the Committee on the Judiciary is concerned, but I think we have straightened those matters out.

Because of that, Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

THE PRESIDENTIAL DEBATE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, both President Ronald Reagan and Democratic challenger Walter Mondale revealed themselves to the American people in Louisville last Sunday night for the first time. Contrary to the harsh, often strident image which Walter Mondale is portrayed in his disastrous television advertising, Walter Mondale appeared as he really is to those who know him, a person in command of the issues and easy to articulate them.

By contrast, without the aid of a teleprompter and cue cards, Ronald Reagan stumbled, appeared to be confused, and was ill prepared for the challenger.

Ronald Reagan made the mistake of trying to be something that he is not—in command of facts—and he forgot his real strength, and that is one who portrays emotion. When the President moves away from emotion and tries to deal with facts, he is not in command.

I include a transcript of the debate for the RECORD so that the American people can review for themsleves who was in command in Louisville:

[From the New York Times, Oct. 9, 1984]

TRANSCRIPT OF LOUISVILLE DEBATE BETWEEN REAGAN AND MONDALE

PARTICIPANTS IN THE DEBATE

The following people participated in Sunday night's Presidential debate in Louisville:

Candidates: President Reagan, Republican, and Walter F. Mondale, Democrat.

Moderator: Barbara Walters, correspondent, ABC News.

Panelists: Diane Sawyer, correspondent, CBS News; Fred Barnes, Washington correspondent, The Baltimore Sun, and James G. Wieghart, political correspondent, Scripps-Howard Newspapers.

Following is a transcript of the televised debate between President Reagan and Walter F. Mondale sponsored by the League of Women Voters in Louisville Sunday night, as recorded by The New York Times through the facilities of CBS News:

Dorothy Ridings: Good evening from the Kentucky Center for the Arts in Louisville, Ky. I'm Dorothy Ridings, president of the League of Women Voters, the sponsor of tonight's first Presidential debate between Republican Ronald Reagan and Democrat Walter Mondale.

Tonight's debate marks the third consecutive Presidential election in which the league is presenting the candidates for the nation's highest office in face-to-face debate.

Our panelists are James Wieghart, national political correspondent for Scripps-Howard News Service; Diane Sawyer, correspondent for the CBS program "60 Minutes," and Fred Barnes, national political correspondent for The Baltimore Sun.

Barbara Walters of ABC News, who is appearing in her fourth Presidential debate is our moderator. Barbara:

Moderator: A few words as we begin tonight's debate, about the format. The position of the candidates, that is, who answers questions first, and who gives the last statement was determined by a toss of the coin between the two candidates. Mr. Mondale won. And that means that he chose to give the final closing statement. It means, too, that the President will answer the first question first. I hope that's clear. If it isn't, it will become clear as the debate goes on.

Further, the candidates will be addressed as they each wanted and will therefore be called Mr. President and Mr. Mondale. Since there will also be a second debate between the two Presidential candidates tonight will focus primarily on the economy and other domestic issues.

The debate itself is built around questions from the panel. In each of its segments a reporter will ask the candidates the same general question. Then—and this is important—each candidate will have the chance to rebut what the other has said. In the final segment of the debate will be the closing segment and the candidates will each have four minutes for their closing statement. And as I have said, Mr. Mondale will be the last person on the program to speak.

And now I would like to add a personal note, if I may. As Dorothy Riding's pointed out, I have been involved now in four Presidential debates, either as a moderator or as

a panelist. In the past there was no problem in selecting panelists. Tonight, however, there were to have been four panelists participating in this debate. The candidates were given a list of almost 100 qualified journalists from all the media and could agree on only these three fine journalists.

As moderator and on behalf of my fellow journalists I very much regret as does the League of Women Voters that this situation has occurred. And now let us begin the debate with the first question from James Wieghart. Mr. Wieghart.

DEFICITS AND THE BUDGET

Q: Mr. President, in 1980, you promised the American people, in your campaign, a balanced budget by 1983. We've now had more and bigger deficits in the four years you've been in office. Mr President, do you have a secret plan to balance the budget some time in the second term, and if so, would you lay out that plan for us tonight?

Reagan: I have a plan. Not a secret plan. As a matter of fact, it is the economic recovery program that we presented when I took office in 1981. It is true that earlier, working with some very prominent economists, I had come up, during the campaign, with an economic program that I thought could rectify the great problems confronting us: the double-digit inflation, the high tax rates that I think were hurting the economy, the stagflation that we were undergoing. Before even the Election Day, something that none of those economists had even predicted had happened, that the economy was so worsened that I was openly saying that what we had thought the basis of our plan could have brought a balanced budget; that was no longer possible.

So the plan that we have had and that we're following, is a plan that is based on growth in the economy, recovery without inflation, and reducing the share of the, that the Government is taking from the gross national product, which has become a drag on the economy. Already we have a recovery that has been going on for about 21 months, to the point that we can now call it an expansion. Under that, this year, we have seen a $21 billion reduction in the deficit from last year, based mainly on the increased revenues the government is getting without raising tax rates.

Value of tax cut seen

Our tax cut, we think, was very instrumental in bringing about this economic recovery. We have reduced inflation to about a third of what it was. The interest rates have come down about 9 or 10 points, and we think must come down further. In the last 21 months, more than six million people have gotten jobs. There have been created new jobs for those people to where there are now 105 million civilians working where there were only 99 million before, 107 if you count the military.

So we believe that as we continue to reduce the level of government spending, the increase, rate of increase in government spending, which has come down from 17 to 6 percent, and at the same time as the growth in the economy increases the revenues the Government gets without raising taxes, those two lines will meet. And when they meet, that is a balanced budget.

Climbing deficit projected

Q. Mr. President, the Congressional Budget Office has some bad news. The lines aren't about to meet according to their projection; they project that the budget deficit will continue to climb. In the year 1989 they project a budget deficit of 273 billion. In view of that and in view of the economic recovery we are now enjoying, would it make sense to propose a tax increase or take some other fiscal measures to reduce that deficit now when times are relatively good?

Reagan: The deficit is a result, it is a result of excessive Government spending. I do not, and very frankly, take seriously the Congressional Budget Office projections because they have been wrong on virtually all of them, including the fact that our recovery wasn't going to take place to begin with. But it has taken place. But as I said we have the rate of increase in Government spending down to 6 percent. If the rate of increase in Goverment spending can be held to 5 percent—We're not far from there—by 1989 that would have reduced the budget deficits down to a $30 billion or $40 billion level. At the same time if we can have a 4 percent recovery continue through that same period of time, that will mean without an increase in tax rates, that will mean $400 billion more in Government revenues. And so I think that the limits can meet. Actually, in constant dollars, in the domestic side of the budget there has been no spending increase in the four years that we have been here.

Q: Mr. Mondale, the Carter-Mondale Administration didn't come close to balancing the budget in its four years in office either, despite the fact that President Carter did promise a balanced budget during his term. You have proposed a plan combining tax increases and budgetary cuts and other changes in the administration of the Government that would reduce the projected budget deficit by two-thirds to approximately $87 billion in 1989. That still is an enormous deficit that we'll be running for these four years. What other steps do you think should be taken to reduce this deficit and position the country for economic growth?

Mondale: One of the key tests of leadership is whether one sees clearly the nature of the problem confronted by our nation. And perhaps the dominant domestic issue of our times is what do we do about these enormous deficits.

Respect for President

I respect the President. I respect the Presidency and I think he knows that.

But the fact of it is every estimate by this Administration about the size of the deficit has been off by billions and billions of dollars. As a matter of fact, over four years, they've missed the mark by nearly $600 billion. We were told we would have a balanced budget in 1983. It was $200 billion deficit instead. And now we have a major question facing the American people as to whether we'll deal with this deficit and get it down for the sake of a healthy recovery. Virtually every economic analysis that I've heard of, including the distinguished Congressional Budget Office, which is respected by, I think, almost everyone, says that even with historically high levels of economic growth, we will suffer a $263 billion deficit. In other words, it doesn't converge, as the President suggests. It gets larger, even with growth.

Foreign trade problems

What that means is that we will continue to have devastating problems with foreign trade. This is the worst trade year in American history by far. Our rural and farm friends will have continued devastation. Real interest rates, the real cost of interest, will remain very very high. And many economists are predicting that we're moving into a period of very slow growth because the economy is tapering off and may be a recession.

I get it down to a level below 2 percent of gross national product with a policy that's fair. I've stood up and told the American people that I think it's a real problem, that it can destroy long-term economic growth, and I've told you what I think should be done.

I think this is a test of leadership and I think the American people know the difference.

Q: Mr. Mondale, one other way to attack the deficit is further reductions in spending. The President has submitted a number of proposals to Congress to do just that, and in many instances the House, controlled by the Democrats, has opposed them.

Isn't it one aspect of leadership for prominent Democrats such as yourself to encourage responsible reductions in spending and thereby reduce the deficit?

MONDALE: Absolutely. And I have proposed over $100 billion in cuts in Federal spending over four years. But I am not going to cut it out of Social Security and Medicare and student assistance and things that people need.

These people depend upon all of us for the little security that they have. And I'm not going to do it that way. The rate of defense spending increase can be slowed; certainly we can find a coffee pot that costs something less than $7,000.

And there are other ways of squeezing this budget without constantly picking on our senior citizens and the most vulnerable in American life.

And that's why the Congress, including the Republicans, have not gone along with the President's recommendations.

MODERATOR: I would like to ask the audience please to refrain from applauding either side. It just takes away from the time for the candidates. And now it is time for the rebuttal, Mr. President: one minute of rebuttal.

REAGAN: Yes, I don't believe that Mr. Mondale has a plan for balancing the budget. He has a plan for raising taxes. As a matter of fact, the biggest single tax increase in the nation's history took place in 1977, and for the five years previous to our taking office, taxes doubled in the United States and the budget's increased $318 billion, so there is no ratio between taxing and balancing a budget. Whether you borrow the money or whether you simply tax it away from the people, you're taking the same amount of money out of the private sector unless and until you bring down Government's share of what it is taking.

With regard to Social Security I hope there'll be more time than just this win it—minute—to mention that, but I will say this: A President should never say never. But I'm going to violate that rule and say "never." I will never stand for a reduction of the Social Security benefits to the people that are now getting them.

Moderator: Mr. Mondale.

Mondale: That's exactly the commitment that was made to the American people in 1980. He would never reduce benefits. And of course what happens right after the election is they proposed to cut Social Security benefits by 25 percent, reducing the adjustment for inflation, cutting out minimum benefits for the poorest on Social Security, removing education benefits for dependents whose widows were trying, with widows trying to get them through college. Everybody remembers that. People know what happened. There's a difference. I have fought for Social Security and Medicare and for things to help people who are vulnerable

all my life, and I will do it as President of the United States.

LEADERSHIP QUALITIES

Moderator: Thank you very much. We will now begin with segment No. 2 with my colleague, Diane Sawyer. Miss Sawyer.

Q. Mr. President, Mr. Mondale. The public opinion polls do suggest that the American people are most concerned about the personal leadership characteristics of the two candidates, and each of you has questioned the other's leadership ability. Mr. President, you have said that Mr. Mondale's leadership would take the country down the path of defeatism and despair and Vice President Bush has called him whining and hoping for bad news. And Mr. Mondale, you have said that President Reagan offers showmanship, not leadership, that he has not mastered what he must know to command his Government. I'd like to ask each of you to substantiate your claims. Mr. Mondale first. Give us specifics to support your claim that President Reagan is a showman, not a leader, has not mastered what he must know to be President after four years, and then second, tell us what personal leadership characteristics you have that he does not.

Mondale: Well first of all, I think the first answer this evening suggests exactly what I'm saying. There is no question that we face this massive deficit. And almost everybody agrees unless we get it down the chances for long-term healthy growth are nil. And it's also unfair to dump these tremendous bills on our children. The President says it will disappear overnight because of some reason; no one else believes that's the case. I do and I'm standing up to the issue with an answer that's fair. I think that's what leadership is all about.

There's a difference between being a quarterback and a cheerleader and when there's a real problem, a President must confront it. What I was referring to, of course, in the comment that you referred to, was the situation in Lebanon. Now, for three occasions, one after another, our Embassies were assaulted in the same way by a truck with demolition. The first time, and I did not criticize the President because these things can happen once, and sometimes twice, the second time the barracks in Lebanon were assulted as we all remember. There was two or three commission reports, recommendations by the C.I.A., the State Department and the others, and third time there was even a warning from the terrorists themselves.

Now I believe that a President must command that White House and those who work for him. It's the toughest job on earth. And you must master the facts and insist that things must be done, are done. I believe the way in which I will approach the Presidency is what's needed. Because all my life that has been the way in which I have sought to lead. And that's why in this campaign I am telling you exactly what I want to do; I am answering your questions; I am trying to provide leadership now before the election so that the American people can participate in that decision.

Sending a message

Q. You have said, Mr. Mondale, that the polls have given you lower ratings on leadership than President Reagan because your message has failed to get through. Given that you have been in public office for so many years, what accounts for the failure of your message to get through?

Mondale: Well, I think we're getting better all the time, and I think tonight, as we contrast for the first time our different approach to government, to values, to the leadership in this country, I think as this debate goes forward, the American people will have, for the first time, a chance to weigh the two of us against each other. And I think as a process, as a part of that process, what I am trying to say will come across. And that is that we must lead, we must command, we must direct, and a President must see it like it is. He must stand for the values of decency that the American people stand for, and he must use the power of the White House to try to control these nuclear weapons and lead this world toward a safer world.

Q: Mr. President, the issue is leadership in personal terms. First, do you think, as Vice President Bush said, that Mr. Mondale's campaign is one of whining and hoping for bad news. And, second, what leadership characteristics do you possess that Mr. Mondale does not?

Reagan: Well, whether he does or not, let me suggest my own idea about the leadership factor, and since you've asked it. And incidentally, I might say that with regard to the 25 percent cuts of Social Security before I get to the answer of your question the only 25 percent cut that I know of was accompanying that huge 1977 tax increase was a cut of 25 percent in the benefits for every American who was born after 1916.

Now, leadership. First of all, I think you must have some principles you believe in. In mine, I happen to believe in the people and believe that the people are suppose to be dominant in our society. That they, not government, are to have control of their own affairs to the greatest extent possible with an orderly society.

Now, having that, I think also that in leadership, well, I believe that you find the people—positions such as I'm in—who have the talent and ability to do the things that are needed in the various departments of government.

I don't believe that a leader should be spending his time in the Oval Office deciding who's going to play tennis on the White House court. And you let those people go with the guidelines of overall policy, and not looking over their shoulder and nitpicking the manner in which they go at the job. You are ultimately responsible, however, for that job.

But I also believe something else about that. I believe that—and when I became Governor of California I started this and I continue it in this office—that any issue that comes before me I have instructed Cabinet members and staff they are not to bring up any of the political ramifications that might surround the issue. I don't want to hear them. I want to hear only arguments as to whether it is good or bad for the people. Is it morally right.

And on that basis, and that basis alone, we make a decision on every issue.

Now, with regard to my feeling about why I thought that his record bespoke his possible taking us back to the same things that we knew under the previous Administration, his record is that he spoke in praise of deficits several times. Said they weren't to be abhorred. That as a matter of fact he at one time said he wished the deficit could be doubled because they stimulate the economy and help reduce unemployment.

Q. As a follow-up, let me draw in another specific if I could, a specific that the Democrats have claimed about your campaign; that it is essentially based on imagery. And one specific that they allege is that, for instance, that recently you showed up at the opening ceremony of a Buffalo old age housing project when in fact your policy was to cut Federal housing subsidies for the elderly, yet you were there to have your pciture taken with them.

Reagan: Our policy was not to cut subsidies. We have believed in partnership and that was an example of a partnership between not only local government and the Federal Government but also between the private sector that built that particular structure. And this is what we've been trying to do is involve the Federal Government in such partnerships. We are today subsidizing housing for more than 10 million people, and we're going to continue along that line. We have no thought of throwing people out into the snow, whether because of age or need. We have preserved the safety net for the people with true need in this country and it has been pure demagoguery that we have in some way shut off all the charitable programs or many of them for the people who have real need. The safety net is there and we're taking care of more people than has ever been taken care of before by any administration in this country.

Moderator: Mr. Mondale—an opportunity for you to rebut.

Mondale: Well, I guess I'm reminded a little bit of what Will Rogers once said about Hoover. He said it's not what he doesn't know that bothers me, it's what he knows for sure just ain't so. The fact of it is, the President's budget sought to cut Social Security by 25 percent. It's not an opinion; it's a fact, and when the President was asked the other day, 'What do you want to cut in the budget?' he said, 'Cut those things I asked for but didn't get.' That's Social Security and Medicare.

The second fact is that the housing unit for senior citizens that the President dedicated in Buffalo was only made possible through a Federal assistance program for senior citizens that the President's budget sought to terminate. So if he'd had his way, there wouldn't have been any housing project there at all. This Administration has taken a meat cleaver out in terms of Federal-assisted housing, and the record is there. We have to see the facts before we can draw conclusions.

Reagan: Well, let me just respond with regard to Social Security.

When we took office we discovered that the program that the Carter-Mondale Administration had said would solve the fiscal problems of Social Security for the next 50 years, wouldn't solve them for 5. Social Security was due to go bankrupt before 1983. Any proposals that I made at that time were at the request of the chairman, a Democrat, of one of the leading committees, who said we have to do something before the program goes broke and the checks bounce.

And so we made a proposal. And then in 1982 they used that proposal in a demagogic fashion for the 1982 campaign. And three days after the election in 1982 they came to us and said, Social Security, we know, is broke. Indeed, we had to borrow $17 billion to pay the checks.

And then I asked for a bipartisan commission, which I'd asked for from the beginning, to sit down and work out a solution, and so the whole matter of what to do with Social Security has been resolved by bipartisan legislation and it is on a sound basis now for as far as you can see into the next century.

IMPACT OF RELIGION

Moderator: We begin segment No. 3 with Fred Barnes.

Q. Mr. President, would you describe your religious beliefs, noting particularly whether you consider yourself a born-again Christian and explain how these beliefs affect your Presidential decisions?

Reagan: Well, I was raised to have a faith and a belief and have been a member of a church since I was a small boy. In our particular church we didn't use the term born again so I don't know whether I would fit that—that particular term.

But I have, thanks to my mother, God rest her soul, the firmest possible belief and faith in God. And I don't believe—I believe, I should say, as Lincoln once said, that I could not—I would be the most stupid man in the world if I thought I could confront the duties of the office I hold if I could not turn to someone who was stronger and greater then all others; and I do resort to prayer.

At the same time, however, I have not believed that prayer could be introduced into an election or be a part of a political campaign, or religion a part of that campaign. As a matter of fact I think religion became a part of this campaign when Mr. Mondale's running mate said I wasn't a good Christian. So, it does play a part in my life. I have no hesitancy in saying so. And as I say, I don't believe that I could carry on unless I had a belief in a higher authority and a belief that prayers are answered.

Q. Given those beliefs, Mr. President, why don't you attend services regularly, either by going to church or by inviting a minister to the White House, as President Nixon used to do, or someone to Camp David, as President Carter used to do.

Reagan: The answer to your question is very simple—about why I don't go to church. I start—I have gone to church regularly all my life. And I started to here in Washington. And now, in the position I hold and in the world in which we live, where embassies do get blown up in Beirut, we're supposed to talk about that in the—on the debate the 21st, I understand.

But I pose a threat to several hundred people if I go to church. I know the threats that are made against me. We all know the possibility of terrorism. We have seen the barricades that have had to be built around the White House.

And therefore, I don't feel—and my minister knows this and supports me in this position. I don't feel that I have a right to go to church, knowing that my being there could cause something of the kind that we have seen in other places; in Beirut, for example.

And I miss going to church but I think the Lord understands.

Moderator: May I ask the audience please to refrain from applause. Can we have your second question?

Q. Mr. Mondale, would you describe your religious beliefs and mention whether you consider yourself a born-again christian and explain how those beliefs would affect your decisions as President.

Mondale: First of all, I accept President Reagan's affirmation of faith. I'm sure that we all accept and admire his commitment to his faith and we are strengthened all of us by that fact.

I am a son of a Methodist minister, my wife is the daughter of a Presbyterian minister, and I don't know if I've been born again, but I know I was born into a Christian family, and I believe I've sung at more weddings and more funerals than anybody ever to seek the Presidency. Whether that helps or not I don't know. I have a deep religious faith, our family does, it is fundamental, its's probably the reason I'm in politics. I think our faith tells us, instructs us about the moral life that we would lead, and I think we're all together on that.

Political use of religion

What bothers me is this growing tendency to try to use one's own personal interpretation of faith politcally, to question others' faith, and to try to use instrumentalities of government to impose those views on others. All history tells us that that's a mistake.

When the Republican platform says that from here on out we're going to have a religious test for judges before they're selected for the federal court and then Jerry Falwell announces that that means they get at least two Justices of the Supreme Court, I think that's an abuse of faith in our country. This nation is the most religious nation on earth. More people go to church and synagogues than any other nation on earth, and it's because we kept the politicians and the state out of the personal exercise of our faith. That's why faith in the United States is pure and unpolluted by the intervention of politicians, and I think if we want to continue as I do to have a religious nation, let's keep that line and never cross it.

Moderator: Thank you. Mr. Barnes, a question? We have time for rebuttal now.

Q. I think I have a follow-up.

Moderator: Yes, I asked you if you did. I'm sorry I thought you waived it.

Q. Yes. Mr. Mondale, you've complained just now about Jerry Falwell, and you've complained other times about other fundamentalists in politics. Correct me if I'm wrong, but I don't recall your ever complaining about ministers who are involved in the civil rights movement, in the anti-Vietnam War demonstrations or about black preachers who've been so involved in American politics. Is it only conservative ministers that you object to?

Mondale: No. What I object to—what I object to—what I object to is someone seeking to use his faith to question the faith of another or to use that faith and seek to use the power of Government to impose it on others. A minister who is in civil rights or in the conservative movement because he believes his faith instructs him to do that, I admire. The fact that the faith speaks to us and that we are moral people hopefully I accept and rejoice in. It's when you try to use that to undermine the integrity of private political—or private religious faith and the use of the state is where for the most personal decisions in American life—that's where I draw the line.

Moderator: Thank you. Now, Mr. President. Rebuttal.

Reagan: Yes, it's very difficult to rebut, because I find myself in so much agreement with Mr. Mondale. I, too, want that wall that is in the Constitution, separation of church and state, to remain there. The only attacks I have made are on people who apparently would break away at that wall from the Government side using the Government, using the power of the courts and so forth, to hinder that part of the Constitution that says the Government shall not only not establish a religion, it shall not inhibit the practice of religion, and they have been using these things to have Government, through court orders, inhibit the practice of religion.

A child wants to say grace in a school cafeteria, and a court rules that they can't do it. And because it's school property.

There are the types of things that I think have been happening in a kind of a secular way that have been erroding that separation, and I am opposed to that. With regard to a platform in the Supreme Court, I can only say one thing about that. I don't—I have appointed one member of the Supreme Court, Sandra Day O'Connor, I'll stand on my record on that, and if I have the opportunity to appoint any more. I'll do it in the same manner that I did in selecting her.

Moderator: Mr. Mondale, your rebuttal, please.

Mondale: The platform to which the President refers in fact calls for a religious test in the selection of judges. And Jerry Falwell says that means we get two or three judges. And it would involve a religious test for the first time in American life.

Let's take the example that the President cites. I believe in prayer. My family prays. We've never had any difficulty finding time to pray. But do we want a constitutional amendment adopted of the kind proposed by the President that gets the local politicians into the business of selecting prayers that our children must either recite in school or be embarrassed and ask to excuse themselves? Who would write the prayer? What would it say? How would it be resolved when those disputes occurred?

It seems to me that a moment's reflection tells you why the United States Senate turned that amendment down. Because it will undermine the practice of honest faith in our country by politicizing it. We don't want that.

CHANGING ELECTORATE

Moderator: Thank you, Mr. Mondale. Time is up for this round; we go into the second round of our questioning—begin again with Jim Wieghart. Jim.

Q. After that discussion, this may be like going from the sublime to the ridiculous, but here goes: I have a political question for you, Mr. Mondale. Polls indicate a massive change in the electorate, away from the coalition that has long made the Democratic Party a majority. Bluecollar workers, young professionals, their children and much of the middle class now regard themselves as independents or Republican instead of Democrats. And the gap, the edge the Democrats had in party registration, seems to be narrowing.

I'd like to ask you, Mr. Mondale, what is causing this? Is the Democratic Party out of synch with the majority of Americans? And will it soon be replaced as the majority party by the Republicans? What do you think needs to be done about as a Democrat?

Mondale: My answer is that this campaign isn't over yet. And when people vote, I think you're going to see a very strong verdict by the American people that they favor the approach that I'm talking about.

The American people want arms control; they don't want this arms race. And they don't want this deadly new effort to bring weapons into the heavens. And they want an American foreign policy that leads toward a safer world.

The American people see this debt, and they know it's got to come down. And if it won't come down, the economy's going to slow down, maybe go into a recession. They see this tremendous influx and swamping of cheap foreign imports in this country that

has cost over three million jobs, given farmers the worst year in American history.

And they know this debt must come down, as well, because it's unfair to our children.

The American people want this environment protected. They know that these toxic waste dumps should have been cleaned up a long time ago. And they know that people's lives and health are being risked because we've had an Administration that has been totally insensitive to the law and the demands for the protection of the environment.8

The American people want their children educated; they want to get our edge back in science, and they want a policy, headed by the President, that helps close this gap that's widening between the United States and Europe and Japan.

The American people want to keep opening doors. They want those civil rights laws enforced; they want the equal rights amendment ratified; they want equal pay for comparable effort for women. And they want it because they've understood from the beginning that when we open doors, we're all stronger. Just as we were at the Olympics.

I think as you make the case, the American people will increasingly come to our cause.

Q. Mr. Mondale, isn't it possible that the American people have heard your message and they are listening but they are rejecting it?

Mondale: Well, tonight we had the first debate over the deficit. The President says it will disappear automatically. I've said it's going to take some work. I think the American people will draw their own conclusions. Secondly, I've said that I will not support the cuts in Social Security and Medicare and the rest that the President's proposed. The President answers that it didn't happen or if it did, it was resolved later in a commission. As the record develops I think it's going to become increasingly clear that what I am saying and where I want to take this country is exactly where the country wants to go, and the comparison of approaches is such that I think will lead to further strength.

Q. Mr. President, you and your party are benefiting from what appears to be an erosion of the old Democratic coalition, but you have not laid out a specific agenda to take this shift beyond Nov. 6. What is your program for America for the next decade, with some specificity?

Reagan: Well, again, I am running on the record. I think sometimes Mr. Mondale's running away from his, but I'm running on the record of what we have asked for, will continue to try and get things that we didn't get in the program that has already brought the rate of spending of Government down from 17 percent to 6.1 percent, a program of returning authority and autonomy to the local and state governments that has been unjustly seized by the Federal Government and you might find those words in the Democratic platform of some years ago. I know because I was a Democrat at that time. And I left the party eventually because I could no longer follow the turn in the Democratic leadership that took us down an entirely different path, a path of centralizing authority in the Federal Government, lacking trust in the American people.

I promised when we took office that we would reduce inflation. We have, to one-third of what it was. I promised that we would reduce taxes. We did, 25 percent across the board. That barely held even with—if it did that much—with the gigantic tax increase imposed in 1977. But at least it took that burden away from them. I said that we would create jobs for our people, and we did, six million in the last 20 or 21 months. I said that we would become respected in the world once again and that we would refurbish our national defense to the place that we could deal on the world scene and then seek disarmaments, reduction of arms, and hopefully an elimination of nuclear weapons. We have done that.

All of the things that I said we would do, from inflation being down, interest rates being down, unemployment falling—all of those things we have done. And I think this is something the American people see. I think they also know that we have.

We had a commission that came in a year ago with a recommendation on education, on excellence in education, and today without the Federal Government being involved other than passing on to them, the school districts, the words from that commission, we find 35 states with task forces now dealing with their educational problems, we find that schools are extending the curriculum to now have forced teaching of mathematics and science and so forth. All of these things have brought an improvement in the college entrance exams for the first time in some 20 years. So I think that many Democrats are seeing the same thing this Democrat saw. The leadership isn't taking us where we want to go.

Q. Mr. President, there's a—much of what you said affects the quality of life of many Americans—their income, the way they live and so forth. But there's an aspect to quality of life that lies beyond the private sector which has to do with our neighborhoods, with our cities, our streets, our parks, our environment. In those areas I have a difficulty seeing what your program is and what you feel the Federal responsibility is in these areas of the quality of life in the public sector that affects everybody. And even enormous wealth by one individual can't create the kind of environment that he might like.

Reagan: There are tasks that Government legitimately should enforce and tasks that Government performs well, and you've named some of them. Crime has come down the last two years for the first time in many, many decades that it has come down or, since we kept records, two consecutive years, and last year it came down—the biggest drop in crime that we've had. I think that we've had something to do with that, just as we have with the drug problem nationwide.

The environment, yes, I feel as strongly as anyone about the preservation of the environment. When we took office we found that the national parks were so dirty and contained so many hazards, lack of safety features that we stopped buying additional parkland until we had rectified this with what was to be a five-year program, but it's just about finished already—a billion dollars—and now we're going back to budgeting for additional lands for our parks.

We have added millions of acres to the wilderness lands, to the game refuges. I think that we're out in front of most, and I see that the red light is blinking so I can't continue but I got more.

Moderator: Well, you'll have a chance when your rebuttal time comes up perhaps, Mr. President. Mr. Mondale, now it's your turn for rebuttal.

Mondale: The President says that when the Democratic Party made its turn he left it. The year that he decided we had lost our way was the year that John F. Kennedy was running against Richard Nixon. I was chairman of Minnesotans for Kennedy. Reagan was chairman of a thing called Democrats for Nixon. Now maybe we made a wrong turn with Kennedy, but I'll be proud of supporting him all of our life—all of my life. And I'm very happy that John Kennedy was elected, because John Kennedy looked at the future with courage, saw what needed to be done, and understood his own Government.

The President just said that his Government is shrinking. It's not. It's now the largest peacetime Government ever in terms of the take from the total economy and instead of being strong where we should be strong, he wants to make it strong and intervene in the most private and personal questions in American life. That's where Government should not be.

Moderator: Mr. President.

Reagan: Before I campaigned as a Democrat for a Republican candidate for President, I had already voted for Dwight Eisenhower to be President of the United States so my change had come earlier than that. I hadn't gotten around to re-registering as yet. I found that was rather difficult to do but I finally did it.

There are some other things that have been said here, back—and you said that I might be able to dredge them up. Mr. Mondale referred to the farmer's worst year. The farmers are not the victims of anything this Administration has done. The farmers were the victims of the double-digit inflation and the 21½ percent interest rates of the Carter-Mondale Administration and the grain embargo which destroyed our reliability nation-wide as a supplier.

All of these things are presently being rectified and I think that we are going to salvage the farmers—as a matter of fact, the—there has been less than one-quarter of 1 percent of foreclosures of the 270,000 loans from government the farmers have.

POLICY ON ABORTION

Moderator: Thank you, Mr. President. We'll now turn to Diane Sawyer for her round of questions. Diane.

Q. I'd like to turn to an area that I think few people enjoy discussing. But that we probably should tonight because the positions of the two candidates are so clearly different and lead to very different policy consequences. And that is abortion and right to life. I'm exploring for your personal views of abortion. And specifically how you would want them applied as public policy.

First, Mr. President, do you consider abortion murder or a sin? And second, how hard would you work, what kind of priority would you give in your second term legislation to make abortion illegal? And specifically, would you make certain, as your party platform urges, that Federal justices that you appoint be prolife?

Reagan: I have believed that, in the appointment of judges, that all that was specified in the party platform was that they have a, they respect the sanctity of human life. Now that, I would want to see in any judge, and with regard to any issue having to do with human life.

But with regard to abortion, and I have a feeling that this is, there's been some reference, without naming it here in remarks of Mr. Mondale, tied to injecting religion into government.

With me, abortion is not a problem of religion. It's a problem of the Constitution. I

believe that until and unless someone can establish that the unborn child is not a living human being, then that child is already protected by the Constitution, which guarantees life, liberty and the pursuit of happiness to all of us.

And I think that this is—what we should concentrate on, is trying—I know there was weeks and weeks of testimony before a Senate committee. There were medical authorities, there were religious, there were clerics there, everyone talking about this matter, of pro-life. And at the end of all of that, not one shred of evidence was introduced that the unborn child was not alive. We have seen premature births that are now grown up happy people going around.

Also there is a strange dichotomay in this whole position about our court's ruling that abortion is not the taking of a numan life.

In California, some time ago, a man beat a woman so savagely that her unborn child was born dead with a fractured skull. And the California state legislature unanimously passed a law that was signed by the then Democratic Governor, signed a law that said that any man who so abuses a pregnant woman that he causes the death of her unborn child shall be charged with murder. Now isn't it strange that that same woman could have taken the life of her unborn child and it was abortion and not murder but if somebody else does it, that's murder. And it recognizes, it used the term death of the unborn child.

So this has been my feeling about abortion, that we have a problem now to determine. And all the evidence so far comes down on the side of the unborn child being a living human being.

Q. A two-part follow-up. Do I take it from what you've said about the platform, then, that you don't regard the language and don't regard in your own appointments' abortion position a test of any kind for justices that it should be? And also, if abortion is made illegal, how would you want it enforced? Who would be the policing units that would investigate? And would you want the women who have abortions to be prosecuted?

Reagan: The laws regarding that always were state laws. It was only when the Supreme Court handed down a decision that the Federal Government intervened in what had always been a state policy. Our laws against murder are state laws. So I would think this would be the point of enforcement on this.

I, as I say, I feel that we have a problem here to resolve, and no one has approached it from that matter. It does not happen that the church I belong to had that as part of its dogma; I know that some churches do.

Now, it is a sin if you're taking a human life. On the same time in our Judeo-Christian tradition, we recognize the right of taking a human life in self-defense. And therefore I've always believed that a mother, if medically it is determined that her life is at risk if she goes through with the pregnancy, she has a right then to take the life of even her own unborn child in defense of her own.

Q. Mr. Mondale, to turn to you, do you consider abortion a murder or a sin? And bridging from what President Reagan said, he has written that if society doesn't know whether life does—human life—in fact does begin at conception, as long as there is a doubt, that the unborn child should at least be given the benefit of the doubt and that there should be protection for that unborn child.

Mondale: This is one of the most emotional and difficult issues that could possibly be debated. I think your questions, however, underscore the fact there is probably no way that Government should, or could, answer this question in every individual case and in the private lives of the American people.

The Constitutional Amendment proposed by President Reagan would make it a crime for a woman to have an abortion if she had been raped or suffered from incest.

Is it really the view of the American people, however you feel on the question of abortion, that Government ought to be reaching into your livingrooms and making choices like this?

I think it cannot work, won't work and will lead to all kinds of cynical evasions of the law. Those who can afford to have them will continue to have them. The disadvantaged will go in the back alley as they use to do.

I think these questions are inherently personal and moral. And every individual instance is different. Every American should be aware of the seriousness of the step but there are some things that Government can do and some things they cannot do.

Now the example that the President cites has nothing to do with abortion. Somebody went to a woman and nearly killed her. That's always been a serious crime and always should be a serious crime. But how does that compare with the problem of a woman who is raped? Do we really want those decisions made by judges who've been picked because they will agree to find the person guilty? I don't think so and I think it's going in exactly the wrong direction.

In America, on basic moral questions we have always let the people decide in their own personal lives. We haven't felt so insecure that we've reached for the club of state to have our point of view. It's been a good instinct and we're the most religious people on earth.

One final point: President Reagan as Governor of California, signed a bill which is perhaps the most liberal pro-abortion bill of any state in the Union.

Q. But if I can get you back for a moment on my point which was the question on when human life begins, a two-part follow-up. First of all at what point do you believe that human life begins in the growth of a fetus? And second of all, you said that government shouldn't be involved in the decision, yet there are those who would say that government is involved and the consequence of the involvement was 1.5 million abortions in 1980. And how do you feel about that?

Mondale: The basic decision of the Supreme Court is that each person has to make this judgment in her own life, and that's the way it's been done. And it's a personal and private moral judgment. I don't know the answer to when life begins.

And it's not that simple either. You've got another life involved. And if it's rape, how do you draw moral judgments on that? If it's incest, how do you draw moral judgments on that? Does every woman in America have to present herself before some judge picked by Jerry Falwell to clear her personal judgment? It won't work.

Moderator: I'm sorry to do this but I really must talk to the audience. You're all invited guests. I know I'm wasting time in talking to you but it really is very unfair of you to applaud sometimes louder, less loud, and I ask you as people who were invited here and polite people to refrain, We have our time now for rebuttal. Mr. President.

Reagan: Yes. but with regard to this being a personal choice, isn't that what a murderer is insisting on? His or her right to kill someone because of whatever fault they think justifies that. Now, I'm not capable and I don't think you are, any of us, to make this determination that must be made with regard to human life. I am simply saying that I believe that that's where the effort should be directed to make that determination. I don't think that any of us should be called upon here to stand and make a decision as to what other things might come under the self-defense tradition. That, too, would have to be worked out then when you once recognize that we're talking about a life. But in this great society of ours wouldn't it make a lot more sense, in this gentle and kind society, if we had a program that made it possible for when incidents come along which someone feels they must do away with that unborn child, that instead we make it available to the adoption, there are a million-and-a-half people out there standing in line waiting to adopt children who can't have them any other way.

Moderator: Mr. Mondale?

Mondale: I agree with that, and that's why I was a principal sponsor of a liberal adoption law so that more of these children could come to term so that the young mothers were educated, so we found an option, an alternative. I'm all for that. But the question is whether this other option proposed by the President should be pursued, and I don't agree with it. Since I've got about 20 seconds let me just say one thing.

The question of agriculture came up a minute ago, and that farm income is off 50 percent in the last three years, and every farmer knows it, and the effect of these economic policies is like a massive grain embargo which has caused farm exports to drop 20 percent. It's been a big failure. I opposed the grain embargo in my Administration; I'm opposed to these policies as well.

Moderator: I'm sitting here like the great school teacher letting you both get away with things. Because one did it, the other one did it. May I ask in the future that the rebuttals stick to what the rebuttal is and also, foreign policy will be the next debate. Stop dragging it in by its ear into this one. Now having admonished you, I would like to say to the panel, you are allowed on question and one follow-up. Would you try as best you could not to ask two and three. I know it's something we all want to do, two or three questions as part one, and two and three as part two. Having said that, Fred, it's yours.

Q. Thank you. Mr. Mondale, let me ask you about middle class Americans and the taxes they pay. I'm talking about—not about the rich or the poor. I know your views on their taxes. But about families earning $25,000 to $45,000 a year. Do you think that those families are overtaxed or undertaxed by the Federal Government.

Mondale: In my opinion as we deal with this deficit, people from about $70,000 a year on down have to be dealt with very, very carefully because they are the ones who didn't get any relief the first time around. Under the 1981 tax bill people making $200,000 a year got $60,000 in tax relief over three years while people making $30,000 a year, all taxes considered, got no relief at all or their taxes actually went up. That's why my proposal protects everybody from $25,000 a year or less against any tax increases and treats those $70,000 and under in a way that is more beneficial than the

way the President proposes with a sales tax or a flat tax.

What does this mean in real life? Well, the other day Vice President Bush disclosed his tax returns to the American people. He's one of the wealthiest Americans and he's our Vice President. In 1981 I think he paid about 40 percent in taxes. In 1983 as a result of these tax preferences he paid a little over 12 percent, 12.8 percent in taxes. That meant that he paid a lower percent in taxes than the janitor who cleaned up his office or the chauffeur who drives him to work.

I believe we need some fairness, and that's why I propose what I think is a fair and responsible proposal that helps protect these people who've already gotten no relief or actually got a tax increase.

Q. It sounds as if you were saying you think a group of taxpayers making $25,000 to $45,000 a year is already overtaxed, yet your tax proposal would increase their taxes. I think your agent said those earning about $25 to $35,000, their tax rate would go up and their tax bill would go up $100, and from $35,000 to $45,000 more than that, several hundred dollars. Wouldn't that stifle their incentive to work and invest and so on, and also hurt the recovery?

Mondale: The first thing is everybody $25,000 or under would have no tax increase. Mr. Reagan after the election is going to have to propose a tax increase. And you will have to compare what he proposes, and his Secretary of the Treasury said he's studying a sales tax or a value-added tax; they're the same thing to hit middle and moderate income Americans and leave wealthy Americans largely untouched. Up until about $70,000, as you go up the ladder, my proposals will be far more beneficial. As soon as we get the economy on a sound ground, as well, I would like to see the total repeal of indexing. I don't think we can do that for a few years but at some point we want to do that as well.

Q. Mr. President, let me try this on you. Do you think middle-income Americans are overtaxed or undertaxed?

Reagan: You know, I wasn't going to say this at all, but I can't help it: There you go again. I don't have a plan to tax or increase taxes; I'm not going to increase taxes. I can understand why you are, Mr. Mondale, because as a Senator you voted 16 times to increase taxes. Now, I believe that our problem has not been that anybody in our country is undertaxed, it's that Government is overfed. And I think that most of our people—this is why we had a 25 percent tax cut across the board which maintained the same progressivity of our tax structure in the—the brackets on up.

And as a matter of fact, it just so happens that in the quirks of administering these taxes, those above $50,000 actually did not get quite as big a tax cut percentage-wise, as did those from $50,000 down. From $50,000 down those people paid two-thirds of the taxes and those people got two-thirds of the tax cut.

Now the Social Security tax of '77—this, indeed, was a tax that hit people in the lower brackets the hardest. It had two features: it had several tax increases phased in over a period of time; there are two more yet to come between now and 1989. At the same time, every year it increased the amount of money—virtually every year, there may have been one or two that we're skipping there—that was subject to that tax. Today it is up to about $38,000 of earnings that is subject to the payroll tax for Social Security. And that tax, there are no deductions, so a person making anywhere from $10, $15, $20, they're paying that tax on the full gross earnings that they have after they have already paid an income tax on that same amount of money.

Now I don't think that to try and say that we were taxing the rich and not the other way around, it just doesn't work out that way. The system is still where it was with regard to the progressivity, as I've said, and that has not been changed. But if you take it in numbers of dollars, instead of percentage, yes you can say, well that person got 10 times as much as this other person. Yes, but he paid 10 times as much also. But if you take it in percentages then you find out that it is fair and equitable across the board.

Q. I thought I caught, Mr. President, a glimmer of a stronger statement there in your answer than you've made before. I think the operative position you had before was that you would only raise taxes in a second term as a last resort, and I thought you said flatly that "I'm not going to raise taxes." Is that what you meant to say, that you will not—that you will flatly not raise taxes in your second term as President?

Reagan: Yes, I had used—last resort would always be with me. If you got the government down to the lowest level that you yourself could say it could not go any lower and still perform the services for the people. And if the recovery was so complete that you knew you were getting the ultimate amount of revenues that you could get through that growth, and there was still some slight difference there between those two lines, then I had said once that yes, you would have to then look to see if taxes should not be adjusted. I don't foresee those things happening. So I say with great confidence, I'm not going to—I'm not going to go for a tax.

With regard to assailing Mr. Bush about his tax problems and the difference from the tax he once paid and then the later tax he paid, I think if you looked at the deductions, there were great legal expenses in there. It had to do possibly with the sale of his home and they had to do with his setting up of a blind trust. All of those are legally deductions—the deductible in computing your tax. And it was a one-year thing with him.

Moderator: Mr. Mondale, here we go again; this time for rebuttal.

Mondale: Well, first of all, I gave him the benefit of the doubt on the House deal. I'm just talking about the 12.8 percent that he paid—and that's what's happening all over this country with wealthy Americans. They've got so many loopholes, they don't have to pay much in taxes.

Now, Mr. President, you said: "There you go again." Right. Remember the last time you said that?

Reagan: Um hmm.

Mondale: You said it when President Carter said that you were going to cut Medicare. And you said: "Oh, no, there you go again, Mr. President." And what did you do right after the election? You went out and tried to cut $20 billion out of Medicare.

And so when you say, "There you go again," people remember this, you know. And people will remember that you signed the biggest tax increase in the history of California, and the biggest tax increase in the history of the United States.

And what are you going to do? You've got $260 billion deficit. You can't wash it away. You won't slow defense spending; you refuse to do that.

Moderator: Mr. Mondale, I'm afraid your time is up.

Mondale: Sorry.

Moderator: Mr. President.

Reagan: Yes. With regard to Medicare, no. But it's time for us to say that Medicare is in pretty much the same condition that Social Security was, and something is going to have to be done in the next several years to make it fiscally sound.

And, no, I never proposed any $20 billion should come out of Medicare. I have proposed that the program—we must treat with that particular problem.

And maybe part of that problem is because during the four years of the Carter-Mondale Administration, medical cost in this country went up 87 percent.

RELIEF FOR THE POOR

Moderator: We can't keep going back for other rebuttals. There'll be time later. We now go to our final round. The way things stand now we have time for only two sets of questions and by lot it will be Jim and Diane and we'll start with Jim.

Q. Mr. President, the economic recovery is real but uneven. The Census Bureau just a month ago reported that there are more people living under poverty now—a million more people—than when you took office. There have been a number of studies, including studies by the Urban Institute and other non-policical organizations, that say that the impact of the tax and budget cuts in your economic policies have impacted severely on certain classes of Americans—working mothers, head of households, minority groups, elderly poor. In fact, they're saying the rich are getting richer and the poor are getting poorer under your policies. What relief can you offer to the working poor, to the minorities and to the women heads of households who have borne the brunt of these economic programs. What can you offer them in the furture in your next term?

Reagan: Some of those facts and figures just don't stand up. Yes, there has been an increase in poverty but it is a lower rate of increase than it was in the preceding years before we got here. It has begun to decline, but it is still going up. On the other hand, women heads of household, single women, heads of household, have for the first time—there's been a turn down in the rate of poverty for them. We have found also in our studies that in this increase in poverty it all has to do with their private earnings. It had nothing to do with the transfer payments from government, by way of many programs. We are spending now 37 percent more on food for the hungry in all the various type of programs than was spent in 1980. We're spending a third more on all the programs of human service. We have more people receiving food stamps than were ever receiving them before—2,300,000 more are receiving them even through we took 850,000 off the food stamp rolls because they were making an income that was above anything that warranted their fellow citizens having to support them. We found people making 185 percent of the poverty level were getting Government benefits. We have set a line at 130 percent so that we can direct that aid down to the truly needy.

Sometime ago Mr. Mondale said something about education and college students and help of that kind—half, one out of two of full-time college students in the United States are receiving some form of Federal aid, but there again we found people that there were—under the previous Administration—families that had no limit to income were still eligible for low-interest college

loans. We didn't think that was right. And so we have set a standard that those loans and those grants are directed to the people who otherwise could not go to college, their family incomes were so low.

So there are a host of other figures that reveal that the grant programs are greater than they have ever been, taking care of more people than they ever have—7.7 million elderly citizens who were living in the lowest 20 percent of earnings, 7.7 million have moved up into another bracket since our Administration took over, leaving only 5 million of the elderly in that bracket when there has been more than 13 million.

Q. Mr. President, in a visit to Texas, in Brownsville, I believe it was, in the Rio Grande Valley, you did observe that the economic recovery was uneven. In that particular area of Texas unemployment was over 14 percent whereas statewide it was the lowest in the country, I believe 5.6 percent. And you made the comment that, however, that man does not live by bread alone. What did you mean by that comment and, if I interpret it correctly, it would be a comment more addressed to the affluent who, who obviously can look beyond just the bread they need to sustain them with their wherewithal.

Reagan: That had nothing to do with the other thing of talking about their needs or anything. I remember distinctly I was sequeing into another subject. I was talking about the things that have been accomplished and that was referring to the revival of patriotism and optimism, the new spirit that we're finding all over America. And it is a wonderful thing to see when you get out there among the people. So that was the only place that was was used.

I did avoid, I'm afraid, in my previous answer also, the idea of uneven, yes, there is no way that the recovery is, even across the country, just as in the depths of the recession there were some parts of the country that were worse off but some that didn't even feel the pain of the recession.

We're not going to rest, and not going to be happy, until every person in this country who wants a job can have one, until the recovery is complete across the country.

Q. Mr. Mondale, as you can gather from the question of the President the celebrated war on poverty obviously didn't end the problem of poverty, although it may have dented it. The poor and the homeless and the disadvantaged are still with us. What should the Federal Government's role be to turn back the growth in the number of people living below the poverty level, which is now 35 million in the United States and to help deal with the structural unemployment problems that the President was referring to in an uneven recovery?

Mondale: No. 1, we've got to get the debt down, to get the interest rates down so the economy will grow and people will be employed. No. 2, we have to work with cities and others to help generate economic growth in those communities—to the Urban Development Action Grant program. I don't mind those enterprise zones, let's try them, but not as s substitute for the others. Certainly education and training is crucial. If these young Americans don't have the skills that make them attractive to employees, they're not going to get jobs.

The next thing is to try to get more entrepreneurship in business within the reach of minorities so that these businesses are located in the communities in which they're found. The other thing is we need the business community as well as government heavily involved in these communities to try to get economic growth. There is no question that the poor are worse off. I think the President genuinely believes that they're better off. But the figures show that about 8 million more people are below the poverty line than four years ago. How you can cut school lunches, how you can cut student assistance, how you can cut housing, how you can cut disability benefits, how you can do all of these things and then the people receiving them—for example the disabled who have no alternative, how they're going to do better, I don't know. Now we need a tight budget, but there's no question that this Administration has singled out things that affect the most vulnerable in American life, and they're hurting.

One final point if I might. There's another part of the lopsided economy that we're in today, and that is that these heavy deficits have killed exports and are swamping the nation with cheap imports. we are now $120 billion of imports, 3 million jobs lost and farmers are having their worst year. That's another reason to get the deficit down.

Q. Mr. Mondale, is it possible that the vast majority of Americans who appear to be prosperous have lost interest in the kinds of programs you're discussing to help those less privileged than they are?

I think the American people want to make certain that that dollar is wisely spent. I think they stand for civil rights. I know they're all for education in science and training which I strongly support.

They want these young people to have a chance to get jobs and the rest. I think the business community wants to get involved. I think they're asking for new and creative ways to try to reach it, and with everyone involved. I think that's part of it.

I think also that the American people want a balanced program that gives us long-term growth, so that they're not having to take money that's desperate to themselves and their families and give it to someone else. I'm opposed to that, too.

Moderator: And now it is time for our rebuttal for this period. Mr. President.

Reagan: Yes, the connection that's been made again between the deficit and the interest rates—there is no connection between them. There is a connection between interest rates and inflation.

But I would call to your attention that in 1981, while we were operating still on the Carter-Mondale budget that we inherited, that the interest rates came down from 21½ toward the 12 or 13 figure and while they were coming down, the deficits had started their great increase: they were going up.

Now, if there was a connection, I think that there would be a different parallel between deficit getting larger and interest rates going down.

The interest rates are based on inflation. And right now, I have to tell you, I don't think there is any excuse for the interest rates being as high as they are, because we have brought inflation down so low. I think it can only be that they're anticipating or hope—expecting, not hoping—that maybe we don't have a control of inflation and it's going to go back up again.

Well, it isn't going to go back up. We're going to see that it doesn't.

Moderator: Mr. President.

Reagan: And I haven't got time to answer with regard to—

Moderator: Thank you Mr. President. Mr. Mondale?

Mondale: Mr. President, if I heard you correctly, you said that these deficits don't have anything to do with interest rates. I will grant you that interest rates were too high in 1980 and we can have another debate as to why—energy prices and so on. There's no way of glossing around that. But when these huge deficits went in place in 1981, what's called the real interest rates, the spread between inflation and what a loan costs you, doubled. And that's still the case today, and the result is interest costs that have never been seen before in terms of real charges and it's attributable to the deficit.

Everybody, every economist, every businessman believes that. Your own Council of Economic Advisers, Mr. Feldstein in his report, told you that. Every chairman of the Finance and Ways and Means committees, Republican leaders in the Senate and the House, are telling you that. That deficit is ruining the long-term hopes for this economy. It's causing high interest rates, it's ruining us in trade, it's given us the highest small-business failure in 50 years, the economy is starting downhill, with housing . . .

Moderator: Thank you Mr. Mondale.

VIEW OF OPPONENT

Moderator: You're both very obedient, I have to give you credit for that. We now start our final round of questions. We do want to have time for your rebuttal and we start with Diane: Diane Sawyer.

Q. Since we are reaching the end of the question period, and since in every Presidential campaign the candidates tend to complain that the opposition candidate is not held accountable for what he or she says, let me give you the chance to do that. Mr. Mondale, beginning with you, what do you think the most outrageous thing is your opponent said in this debate tonight?

Mondale: You want to give me some suggestions? I'm going to use my time a little differently. I'm going to give the President some credit. I think the President has done some things to raise the sense of spirit and morale, good feeling, in this country. And he's entitled to credit for that.

What I think we need, however, is not just that but to move forward not just congratulating ourselves, but challenging ourselves to get on with the business of dealing with America's problems.

I think in education, when he lectured the country about the importance of discipline, I didn't like it at first but I think it helped a little bit.

But now we need both that kind of discipline and the resources and the consistent leadership that allows this country to catch up in education and science and training.

I like President Reagan and—this is not personal—there are deep differences about our future and that's the basis of my campaign.

Q. Follow up in a similar vein then. What remaining question would you most like to see your opponent forced to answer?

Mondale: Without any doubt I've stood up and told the American people that that $263 billion deficit must come down. And I've done what no candidate for President's ever done, I told you before the election what I'd do.

Mr. Reagan, as you saw tonight, President Reagan takes the position it will disappear by magic. It was once called voodoo economics. I wish the President would say, yes, the C.B.O. is right. Yes, we have a $263 billion deficit. This is how I'm going to get it done. Don't talk about growth because even though we need growth, that's not helping,

it's going to go in the other direction as they're estimated. And give us a plan.

What will you cut? Whose taxes will you raise? Will you finally touch that defense budget? Are you going to go after Social Security and Medicare and student assistance and the handicapped again, as you did last time?

If you'd just tell us what you're going to do, then the American people could compare my plan for the future with your plan. And that's the way it should be. The American people would be in charge.

Q. Mr. President, the most outrageous thing your opponent has said in the debate tonight?

Reagan: Well, now, I have to start with a smile since his kind words to me. I'll tell you what I think has been the most outrageous thing in political dialogue both in this campaign and the one in '82, and that is the continued discussion and claim that somehow I am the villain who is going to pull the Social Security checks out from those people who are dependent on them. And why I think it is outrageous; first of all, it isn't true. But why it is outrageous is because for political advantage, everytime they do that, they scare millions of senior citizens who are totally dependent on Social Security, have no place to turn, and they have to live and go to bed at night thinking is it true; is someone going to take our check away from us and leave us destitute? And I don't think that that should be a part of political dialogue. Now, to—I just have a minute here?

Q. You have more time. You an keep going.

Reagan: O.K. All right. Now, Social Security, let's lay it to rest once and for all. I told you never would I do such a thing. But I tell you also now Social Security has nothing to do with the deficit. Social Security is totally funded by the payroll tax levied on employer and employee. If you reduce the outgo of Social Security, that money would not go into the general fund to reduce a deficit. It would go into the Social Security Trust Fund. So Social Security has nothing to do with balancing a budget or erasing or lowering the deficit.

Now, again to get to whether I have—am depending on magic—I think I have talked in straight economic terms about a program of recovery that was—I was told wouldn't work and then after it worked, I was told that lowering taxes would increase inflation and none of these things happened. It is working and we're going to continue on that same line. As to what we might do and find in further savings cuts, no, we're not going to starve the hungry. But we have 2,478 specific recommendations from a commission of more than 2,000 business people in this country through the Grace Commission, that we're studying right now and we've already implemented 17 percent of them that are recommendations as to how to make Government more efficient, more economic.

Q. And to keep it even. What remaining question would you most like to see your opponent forced to answer?

Reagan: The deficits are so much of a problem for him now, but that in 1976 when the deficit was $52 billion and everyone was panicking about that, he said, no, that he thought it ought to be bigger because a bigger deficit would stimulate the economy and would help do away with unemployment. In 1979 he made similar statements, the same effect, that the deficits—there was nothing wrong with having deficits. Remember there was a trillion dollars in debt before we got here. That's got to be paid by our children, and grandchildren too, if we don't do it. And I'm hoping we can start some payments on it before we get through here. That's why I want another four years.

Moderator: Well, we have time now; if you'd like to answer the President's question or whatever rebuttal.

Mondale: Well, we've just finished almost the whole debate and the American people don't have the slightest clue about what President Reagan will do about these deficits. And yet that's the most important single issue of our time. I did support the '76 measure that he told about, because we were in a deep recession and we needed some stimulation. But I will say, as a Democrat I was a real piker, Mr. President. In 1979 we ran a $29 billion deficit, all year. This Administration seems to run that every morning, and the result is exactly what we see: This economy is starting to run downhill. Housing is off, last resort on new purchases is the lowest since 1982, our growth is a little over 3 percent now, many people are predicting a recession, and the flow of imports into this country is swamping the American people. We've got to deal with this problem, and those of us who want to be your President should tell you now what we're going to do so you can make a judgment.

Moderator: Thank you very much. We must stop now. I want to give you time for your closing statements. It's indeed time for that from each of you. We will begin with President Reagan.

CLOSING STATEMENTS

Moderator: I'm sorry. Mr. Reagan you had your rebuttal and I've just cut you off because our time was going. You have a chance now for rebuttal before your closing statement. Is that correct?

Reagan: No, I might as well just go with . . .

Moderator: Do you want to go with—

Reagan: I'm all confused now.

Moderator: Technically, you did. I have little voices that come in my ear. You don't get those same voices, I'm not hearing it from here, I'm hearing it from here. You have waived your rebuttal. You can go with your closing statement.

Reagan: Well, we'll include it in that.

Four years ago in similar circumstances to this I asked, are you better off than you were four years before. The answer to that obviously was no, and as a result I was elected to this office and promised a new beginning. Now, maybe I'm expected to ask that same question again. I'm not going to because I think that all of you or, not everyone, those people that have—are in those pockets of poverty and haven't caught up, they couldn't answer the way I would want them to. But I think that most of the people in this country would say yes they are better off than they were four years ago.

The question I think should be enlarged. Is America better of than it was four years ago? And I believe the answer to that has to also be yes.

I promised a new beginning. So far it is only a beginning. If the job were finished, I might have thought twice about seeking reelection to this job. But we now have an economy that for the first time—well, let's put it this way, in the first half of 1980 gross national product was down a minus 3.7 percent. the first half of '84 it's up 8.5 percent. Productivity in the first half of 1980 was down a minus 2 percent. Today it is up a plus 4 percent. Personal earnings after taxes per capita have gone up almost $3,000 in these four years. In 1980 or 1979 the person with a fixed income of $8,000 was $500 above the poverty line, and this maybe explains why there are the numbers still is poverty. By 1980 that same person was $500 below the poverty line.

We have restored much of our economy with regard to a business investment. It is higher than it has been since 1949. So there seems to be no shortage of investment capital. We have, as I said, cut the taxes but we have reduced inflation and for two years now it has stayed down there, not a double digit but in the range of 4 or below.

We believe that we had also promised that we would make our country more secure. Yes, we have an increase in the defense budget. But back then we had planes that couldn't fly for lack of spare parts or pilots. We had navy vessels that couldn't leave harbor, because of lack of crew or again, lack of spare parts. Today we're well on our way to a 600-ship navy. We have 543 at present. We have—our military, the morale is high, I think the people should understand that two-thirds of the defense budget pays for pay and salary—or pay and pension. And then you add to that food and wardrobe and all the other things and you only have a small portion going for weapons. But I am determined that if ever our men are called on they should have the best that we can provide in the manner of tools and weapons. There has been reference to expensive spare parts, hammers costing $500. Well, we are the ones who found those.

I think we've given the American people back their spirit. I think there is an optimism in the land and a patriotism and I think that we're in a position once again to heed the words of Thomas Paine who said: "We have it in our power to begin the world over again."

Moderator: Thank you Mr. Reagan. Mr. Mondale, the closing words are now yours.

Mondale: I want to thank the League of Women Voters and the city of Louisville for hosting this evening's debate. I want to thank President Reagan for agreeing to debate. He didn't have to and he did, and we all appreciate it.

The President's favorite question is, "Are you better off?" Well, if you're wealthy, you're better off. If you're middle income, you're about where you were, and if you're of modest income, you're worse off. That's what the economists tell us. But is that really the question that should be asked. Isn't the real question, "Will we be better off? Will our children be better off? Are we building the future that this nation needs?"

I believe that if we ask those questions that bear on our future—not just congratulate ourselves but challenge us to solve those problems—you'll see that we need new leadership.

Are we better off with this arms race? Will we be better off if we start this star wars escalation into the heavens? Are we better off when we de-emphasize our values in human rights? Are we better off when we load our children with this fantastic debt? Would fathers and mothers feel proud of themselves if they loaded their children with debts like this nation is now, over a trillion dollars, on the shoulders of our children? Can we be—say, really say, that we will be better off when we pull away from sort of that basic American instinct of decency and fairness?

I would rather lose a campaign about decency than win a campaign about self-interest. I don't think this nation is composed of

people who care only for themselves. And when we sought to assault Social Security and Medicare, as the record shows we did, I think that was mean spirited. When we terminated 400,000 desperate, hopeless, defenseless Americans who were on disability, confused and unable to defend themselves, and just laid them out on the street as we did for four years, I don't think that's what America is all about. America is a fair society, and it is not right that Vice President Bush pays less in taxes than the janitor who helps him. I believe there's fundamental fairness crying out that needs to be achieved in our tax system.

I believe that we will be better off if we protect this environment. And contrary to what the President says I think their record on the environment is inexcusable and often shameful. These laws are not being enforced, have not been enforced and the public health and the air and the water are paying the price. That's not fair for our future.

I think our future requires the President to lead us in an all-out search to advance our education, our learning and our science and training, because this world is more complex and we're being pressed harder all the time.

I believe in opening doors. We won the Olympics in part because we've had civil rights laws and the laws that prohibit discrimination against women. I have been for those efforts all my life. The President's record is quite different.

The question is our future. President Kennedy once said in response to similar arguments, we are great but we can be greater. We can be better if we face our future, rejoice in our strengths, face our problems and by solving them build a better society for our children.

Thank you.

Moderator: Thank you Mr. Mondale, and thank you Mr. President, and our thanks to our panel members as well. And so we bring to a close this first of the League of Women Voters Presidential debates of 1984. You two can go at each other again in the final League debate on Oct. 21 in Kansas City, Mo., and this Thursday night, Oct. 11, at 9 P.M. Eastern daylight time, Vice President Bush will debate Congresswoman Geraldine Ferraro in Philadelphia. And I hope that you will all watch once again; no matter what the format, these debates are very important. We all have an extremely vital decision to make. Once more gentlemen, our thanks, once more to you our thanks, and now this is Barbara Walters wishing you a good evening.

□ 1220

IN MEMORY OF OFFICER MARTIN MURRIN, KILLED IN THE LINE OF DUTY

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, I take this opportunity to include in the RECORD remarks of a distinguished Catholic priest from my hometown of Joliet, IL, the Reverend Vytas Memenas, Joliet Police Department chaplain and assistant chaplain of Fraternal Order of Police, Illinois State Lodge. Reverend Memenas' remarks were made at the service for a heroic Joliet Police officer, Martin Murrin, killed in the performance of his duties in contributing to the security of the community. Martin Murrin will remain alive in the memories of all who knew him until we all meet again.

Herewith is the text of the Reverend Memeans' remarks:

We are here today to pray for the repose of the soul of Joliet Police Officer Martin Murrin, to express our deepest sympathy to his wife Pamela, his children Norman and Erin, his parents, brothers, sister and relatives. We bid farewell to a loving father, devoted husband and an outstanding policeman. We are also here to remind ourselves of God's love despite this tragic loss. The badge officer Murrin wore so proudly has been washed in blood and star 215 will be put away but his memory will live forever among Joliet police officers. Martin was a brave, honest, compassionate, understanding, knowledgeable, and considerate officer.

He loved what he was doing; protecting and serving the people of Joliet. On Wednesday afternoon of this week, around 5:00 P.M., he was serving us when he and his partner Officer Thomas Ponce were trying to apprehend a criminal suspect in the performance of his duty. They were trying to remove a dangerous person from our streets; a man wanted for aggravated battery. He lost his life while serving us. He gave his life!

As Jesus Christ gave himself for all mankind, a police officer sacrifices himself for his community. He is here to protect us and our property, to fight crime, to patrol our streets, and to help the helpless. His payment for all of this is only a fraction of what he gives us which is life, peace, security and justice. In all of this he shares in the work of God. Police Officers are dedicated and devoted servants of God. They are peacemakers! They try to bring peace and justice to our society.

As we pay farewell to our brother, those of us who are not police officers should ask ourselves how we can repay them. We can repay them with our love and respect. The police officer today in our society is often scorned, abused, and ridiculed to a degree that should be reserved for the criminal. We talk so much about police brutality. Police are the only profession that is so violently attacked by our society. No lawyer, no doctor, nobody is so attacked in our society as the police. I am not justifying the fact that there are some bad apples. There are bad apples in any profession. Why don't we talk sometime as our State Attorney Petka did just two days ago about civilian brutality against police. You never hear that term do you? You lay people do not see it! You're not in the squad car! I have seen it right here in the city of Joliet. Try riding one night in a squad car and you'll see what these men and women are subjected to. We expect them to be super human beings. They are scorned, abused, ridiculed and this is a good time to think about how we do treat our cops. The State Attorney has said, "They are underpaid." They are underpaid! How many of us would put our lives at stake for $1,500 per month? How many of you would be willing to do as Martin Murrin did? This is a good time to think about it!

Officer Murrin knew all this but nevertheless he remained a dedicated and selfless servant of God, his family, and his city. He gave everything he had for the city. He gave his life. He was a great family man. They loved him because he loved them. He will be missed. In their kitchen is a plaque which reads, "Home is where the heart is." His family made his heart their home. He often talked about his wife, children and future.

Now Martin walks on a golden street and God is on his side. A song written to honor fallen police officers written by Pat Boone says. "A cop will never walk alone." God has said Martin will never walk alone. He is on a golden street where there is no more pain, suffering, tears, prejudice, crime, or murder.

We all express our sympathy to his wife, children, parents, and family.

□ 2020

LOCAL GOVERNMENT ANTITRUST ACT OF 1984

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. PORTER] is recognized for 5 minutes.

Mr. PORTER. Mr. Speaker, earlier today we considered on suspension, House Resolution 613, which provided a motion to concur in a Senate amendment and amend that to include language that would specifically have addressed a lawsuit pending in the Federal district court in Illinois against the county of Lake and the village of Grayslake for trebled damages under the Clayton Act and could have been interpreted to provide, in effect, that the jury verdict in that case would be treated as a judgment.

The House defeated House Resolution 613 on suspension and I think sent a message to the Judiciary Committee that this matter should be sent immediately to conference, the Senate is willing to go to conference on it, has been willing since last week to go to conference on it, and unfortunately that normal course has been resisted by the Judiciary Committee.

But if we are not to go to conference then the language of the section that I have just described ought to be modified to treat pending cases fairly and properly.

I submit that there is language that would be fair to the litigants, fair to the municipalities affected by pending cases, and would properly apply the intent of the House of Representatives and the other body in enacting legislation of this type.

It reads as follows:

Subsection (a) shall not apply to cases pending on the date of enactment of this Act unless the defendant establishes and the court determines, in light of all the circumstances, that it would be inequitable not to apply subsection (a) to a pending case. Included among the factors that the court shall consider are:

(A) the stage of litigation;

(B) the availability of alternative relief;

(C) whether the unit of local government was exercising its legislative, regulatory, executive, administrative, or judicial authority;

(D) the adverse impact that an antitrust damage award would have on the unit of local government and its residents; and

31-059 O-87-25 (Pt. 22)

(E) whether the action taken by the unit of local government was in furtherance of Federal or state laws, policies, or regulations.

Mr. Speaker, this seems to me to be eminently fair to all parties and I would urge that if the Judiciary Committee does not go to conference in regard to H.R. 6027, this language be placed in the bill and placed before this body for another vote and that we adopt it and send it immediately over to the other body for their concurrence.

I think it is fair. I think it is proper. I think it is the only fair and proper way for this body to proceed.

GENERAL LEAVE

Mr. PORTER. Mr Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the subject of my special order tonight.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from Illinois?

There was no objection.

EL SALVADORAN REFUGEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 5 minutes.

● Mr. MOAKLEY. Mr. Speaker, I rise today to express my continued concern regarding the current Reagan administration policy of deporting Salvadoran refugees now in the United States back to the violence and political unrest in their homeland. We deport, on average, about 100 Salvadorans a week.

There are some who proclaim that in light of the recent elections in El Salvador that many of these refugees have nothing to fear—and that they can go back to El Salvador without the threat of torture, imprisonment, or death. Though I am heartened, like many of my colleagues in Congress, by the election of José Napoleon Duarte, I am not so naive as to believe that he or anyone else can end overnight a brutal civil conflict that has been raging since 1979.

On the contrary, from most accounts, there is still a great deal to be concerned about in El Salvador. On September 9, the New York Times reported that Salvadoran Army troops killed 68 undefended residents in a tiny village during a sweep against leftist guerrillas. The Washington Post ran a front page story on September 17 asserting that Mr. Duarte has limited control over the Salvadoran military. There have also been numerous other reports of indiscriminate and intentional violence against innocent people. In short, El Salvador is a country still in turmoil.

As many of my colleagues may know, the administration has the authority to quickly reverse its current policy by implementing a procedure called extended voluntary departure status. This is merely a temporary stay of deportation that is granted to nationals from countries that are experiencing extreme civil strife. This temporary relief is currently granted to Poles, Ugandans, Ethiopians, and Afghans.

Yet, despite the overwheming evidence that the conditions in El Salvador are equally desperate—the administration refuses to suspend deportations. In view of this, many American citizens—of all faiths and backgrounds—have felt compelled to offer these refugees temporary safe haven. Many churches and synagogues have declared what is called sanctuary.

I understand the sentiments that cause a church or synagogue to declare sanctuary. It is a difficult decision that is not taken lightly or made in a casual manner. Those who are involved in the sanctuary movement are motivated by their scriptural commitment to help the oppressed. They believe that it is our obligation to help people who are fleeing dangerous civil conflicts.

It is those same sentiments that have lead me to take action on this issue. I introduced legislation, H.R. 4447, which would temporarily suspend the deportation of Salvadorans now in the United States. The bill also calls on the President to provide Congress with a study on the conditions in El Salvador so that Congress can make a determination as to when it would be safe for Salvadorans to return to their homeland.

I believe that there is the necessary support in the House—and the Senate—to pass this legislation. Unfortunately, due to the heavy legislative calendar, H.R. 4447 did not make it to the House floor for a vote. Nonetheless, I intend to promptly reintroduce the bill at the start of the next session of Congress.

In the meantime, I am appealing to the Reagan administration to halt the deportation of Salvadorans, at least until Congress has had a chance to consider this legislation early next year. I, along with several of my colleagues, have sent a letter to the President urging him to take this action.

Mr. Speaker, for the benefit of my colleagues, I would like to insert in the RECORD a copy of that letter—as well as an article which recently appeared in the Boston Globe concerning a Salvadoran family now living in Boston.

The material follows:

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: Though we are heartened by the election of President Jose Napoleon Duarte and his recent announcement to negotiate in good faith with his country's guerrilla groups, we nonetheless remain deeply concerned about continued reports of violence and political unrest in that country.

We have supported legislation in the House and Senate which would temporarily suspend the deportation of Salvadorans now in the United States, until such time as it is safe for them to return to their homeland. Whatever positive future steps Mr. Duarte implements, the changes necessary to restore stability will take time. In the meantime, Salvadoran refugees are living in a state of limbo, unable to return to their homes, and unless they are allowed to stay, as illegal aliens in a foreign country.

With 153 cosponsors in the House, we believe that the legislation has the necessary support to be passed by both the House and Senate. Unfortunately, the heavy legislative calendar at the end of the session has prevented it from coming to the floor. Therefore, we respectfully request that you suspend the deportation of Salvadorans now in the United States at least until the Congress has had an opportunity to act on this legislation early next year.

Sincerely,

JOHN JOSEPH MOAKLEY,
Member of Congress.
RALPH REGULA,
Member of Congress.

SALVADOR FAMILY ASKS TO STAY HERE: SAYS RELATIVES HAVE BEEN MURDERED

(By Julia Preston)

A family of Salvadoran refugees named Vides, living illegally in Boston, is asking immigration authorities to grant them political asylum in the United States.

Members of the Vides family contend they cannot return to their homes, in a forested hamlet in the northern Salvadoran province of Cabanas, because frequent sweeps by government forces engaged in a four-year-old civil war with leftist guerrillas have forced all the residents to flee.

They also say, in affidavits the family is currently filing, that since 1979, El Salvador's security forces, especially the national guard, have murdered Vides relatives from the Cabanas region whenever they were captured on the suspicion that they sympathized with the guerrillas.

In all, six Vides family members are named in two petitions for asylum. They have been living illegally, without valid visas, in Allston.

In the past five years, at least 14 close relatives of the family, including two small children, have been killed by the security forces, another disappeared, and yet another died in combat, according to death certificates, human rights reports and relatives who were eyewitnesses.

"The guardsmen kept telling us they were going to do away with every Vides down to the last one," said Olimpia Vides, 34, a textile worker here. "If I have to go back. I'm afraid they'll be laying in wait for me."

The family's most recent victims were Gloria Vides, 24, and her two children, aged 2 and 6 months. On July 19, Gloria Vides was killed while running from a sweep by Salvadoran army units through the steep hills near the hamlet of Santo Olaya, which once was home to the whole family.

Army troops unloaded their automatic rifles on Gloria as she crouched over her children, said Elvira Vides, 23, a cousin who survived the July sweep and was interviewed in September near Santo Olaya. Vides family members in Boston were stunned to

learn of the deaths by reading about them in the newspaper here.

The deaths of Gloria and her children convinced the Vides family in Boston that the new Christian Democrat president in El Salvador, Jose Napoleon Duarte, has not made life any safer for them in their home country.

According to statistics of the U.S. Immigration and Naturalization Service, in the past 18 months only 3 percent, or 282, of 9,326 petitions for political asylum presented by refugees from El Salvador were granted. By contrast, 25 percent of the petitions presented by refugees worldwide were granted, official figures show.

In most cases, the INS or immigration courts ruled that Salvadorans were economic—not political—refugees, moved more by a dread of instability and unemployment than by "a well-founded fear of political persecution," as the asylum law requires.

Some lawyers who represent Salvadorans in asylum petitions charge that the State Department's human rights bureau, which makes a recommendation in each asylum case, looks unfavorably on accusations that El Salvador's government acts repressively. The Reagan Administration supported El Salvador with $527 million in aid this year alone.

"El Salvador is the clearest example where foreign policy considerationis have injected themselves into the adjudication process," said Arthur Helton, an immigration expert at the New York-based Lawyers' Committee for International Human Rights.

But Charles T. Cobb, INS district director in Boston, said a country's relations with the United States do not influence whether its citizens get asylum. Petitions are processed "on a case-by-case basis," Cobb said. "It's not done by any nationality."

Mauro Vides, 33, who works in a Cambridge car-parts factory by day and a Boston restaurant by night, is a central figure in the asylum cases. Mauro says his family's travail began in 1979, when his 21-year-old brother, Ovidio Vides, became a leftist "subversive."

Ovidio was beaten and robbed once by national guardsmen in a town near Santo Olaya, Mauro recalls. To avenge himself, Ovidio became a rifle-toting guerrilla commander. In November 1981, Ovidio was killed in a shootout with army regulars, family members said.

"Now the soldiers would even kill me," said Isabel, 26, Mauro's wife, who works in an electronics factory in Boston. "Mauro was never a guerrilla. But since his brother was, the guardsmen said Mauro was, too. And since I was Mauro's wife, they said I was, too." The Vides family members who are petitioning for asylum say they have never been politically active, either in El Salvador or the United States.

El Salvador's top military officer, the minister of defense, is also named Vides: Gen. Carlos Eugenio Vides Casanova, and Mauro says he is a distant relative. Said Mauro: "Nobody's going after him. He's the big muckety-muck. He's so high up he can't see what's happening down where we are."

According to Mauro, when word spread in 1979 that Ovidio was a "subversive," national guardsmen came patrolling in Santo Olaya, disguised as guerrillas, with a list of names in hand. They caught up with Mauro's uncle, Antonio Quezada Vides, 28, in a corn field. Finding Antonio's name on the roster, they shot him on the spot, said Mauro, who says he helped bury the body.

Only days later, guardsmen came again, this time looking for Mauro. They shot down the door of his house with rifles but no one was inside. When the family crept back to the house, "the bed was full of bullets," Mauro's wife Isabel remembers.

That year, 1979, was also when government troops began descending on the hamlet in frequent sweeps. Mauro said, "The guardsmen sent word that anyone who wanted to stay alive should move away from Santo Olaya, because anyone who stayed would die."

Some of the Vides women with sons said they hid the boys' shoes in the bush so probing troops wouldn't realize that any males lived in their houses.

By mid-1980, Mauro said, the Vides family and others were forced out of the hamlet, leaving it deserted. "There were only dogs howling at night in hunger," he recalled. Reporters who walked through the area this September confirmed that Santo Olaya remains abandoned. Surrounding hamlets are populated by villagers who proclaim their allegiance to the leftist guerrillas.

By 1980, Mauro had moved his family to a more tranquil village in western El Salvador. After he left Cabanas, 11 other family members were reported murdered or disappeared.

As a result, still nervous about their family name even in western El Salvador, in 1982 Mauro and Isabel paid a Mexican smuggler $600 each to sneak them into Texas. They trekked for eight days through the Texas desert, Isabel recalls, at times using a tube of hand cream to soothe their blisters enough to walk.

In 1983 they took a bus to Boston to join cousin Olimpia Vides, who had been living here for five years. Mauro and Isabel, speaking no English, still can't understand most street and place names in Boston. They guide their lives entirely along familiar bus routes.

Mauro said they cannot bear any longer the fear of sudden arrest by immigration authorities. Another of Mauro's brothers, Juan, 35, was caught last month by INS agents in Houston and is facing deportation there.

The Vides family is represented by two groups that provide legal services to immigrants. the International Institute of Boston and Centro Presente in Cambridge. Lawyers there said they expect the INS, pressed with bureaucratic backlogs, will take two or three years to act on the asylum request. During the proceedings the Vides family cannot be deported

But until the case is decided, Mauro and Isabel cannot bring their three young children, whom they haven't seen in more than three years, from El Salvador.

Family Members Reported Slain

(By Julia Preston)

Mauro and Isabel Vides left Cabanas nearly five years ago. But they say that Vides family members who stayed there, even though they joined neither the guerrillas nor the army, paid a high price.

Mauro's brother Fredy, then 19, was captured by army troops and disappeared late in 1979.

A cousin, Oscar Vides. 22, was shot to death Jan. 18, 1980, when he was caught carrying a pistol by national guardsmen.

A 50-year-old uncle, Adan Vides, was gunned down March 1, 1980, during a military search-and-destroy mission through the hamlets, according to relatives and the records of Amnesty International.

Three more uncles, Salvador, Toribio and Ramon, were shot by soldiers with machine guns in Salvador's home on May 7, 1980. Salvador Vides' daughter, Elvira, still lives in the Cabanas hills, cooking for leftist rebels and expecting a child. In a September interview, she said her father had been a government policeman for 25 years, but grew disillusioned and began to lean toward the guerrillas. He and his two brothers were assassinated by his subordinates, she said.

An aunt, Anita, 60, was shot down by national guardsmen while shopping in a marketplace near Santo Olaya in 1980.

Another of Mauro's brothers, David, 19, fled to San Salvador. But he was soon arrested at a national guard roadblock. His death certificate states that a relative found his body, arms fractured and face flayed, tossed alongside a highway north of the capital on Aug. 13, 1981.

Three other Vides relatives also died, reportedly at national guard hands. "A captured Vides is a dead Vides," said cousin Nelly, 19, who now lives in Boston.

Salvador Control of Rebels Seen by 1986

WASHINGTON.—A top Pentagon official said yesterday that a continuation of "favorable" trends in El Salvador could bring that nation's leftist insurgents "under control" by the end of 1986.

Fred C. Ikle, deputy undersecretary of defense for policy, said in a telephone interview that a variety of factors is making US officials optimistic the Salvadoran military can control the rebel forces.

The United States has supplied increasing amounts of aid to the Salvadoran government to try to help it fight back the rebels.

One of the main factors for the improved situation is the failure of outsiders, especially the Nicaraguan government, to significantly increase shipments of military supplies to the Salvadoran rebels, according to Ikle.

"If that changes, then the favorable trend can be reversed," Ikle said.

The Reagan Administration has contended that the leftist Nicaraguan government is supplying aid to the rebels in nearby Salvador.

He said one reason for the trend is that the pressure of US-backed rebels fighting inside Nicaragua against the Sandinista government has prevented the Sandinistas from increasing aid to Salvadoran rebels.

Other positive factors cited by Ikle for the optimism about El Salvador were:

Better leadership of the Salvadoran military.

A better and steady supply of US equipment to El Salvador, allowing the armed forces to carry out long-range rebuilding plans.

"An improvement in the human rights situation, which improves the morale of the population."●

NETWORK PROJECTION VS. VOTER RIGHTS

The SPEAKER pro tempore. Under a previous order for the House, the gentleman from Colorado [Mr. WIRTH] is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, the public outcry over the continuing disdain by the television networks for our democratic electoral process has been loud and persistent. The strong feeling that the television networks should

not tell us who is winning a race before the polls close goes well beyond the Congress. Both Houses of Congress have passed a resolution expressing our sense that the networks should voluntarily refrain from projecting or characterizing the winner of a race before the polls for that race have closed. Yet, only 2 days ago, the Subcommittee on Telecommunications, Consumer Protection and Finance, which I chair, heard executives from the three networks tell us that these characterizations will continue.

Bill Woods, a political scientist at American University, captured the public outrage over the danger to the electoral process posed by network projections in a recent article in the Los Angeles Times.

As Mr. Woods noted, no one would ever suggest a poll of a jury be broadcast to that jury before their final vote. The networks persist, however, in interjecting their exit polling results and characterizations to voters in the middle of the most fundamental right we have as Americans—our democratic electoral process.

I find Mr. Woods' description of this situation most compelling, and I believe that other Members would find his article informative.

The article follows:

NETWORK PROJECTIONS VS. VOTER RIGHTS

UNTIL POLLS CLOSE, FAIRNESS TO ALL REQUIRES WITHHOLDING TALLIES

(By Bill Woods)

The practical effect of the early-evening network projections of a presidential winner on Election Day will be to persuade 427,977 voters to stay home. That is one estimate of potential voters who will hear the news and believe that their votes are fruitless, in the 13 Western States where the polls will still be open. When voters (wrongly) believe that their ballots are meaningless because media executives lack public responsibility, democracy is endangered.

Not only will the networks reduce the voting power of the Western States to a trivial exercise in democratic symbolism, their authoritative reports will work against those local candidates whose supporters go late to the polls. In recent elections, several Western congressional seats have been lost by merely 1% of the vote.

Such interference is unconscionable, and raises serious constitutional questions. The problem is whether free speech may subvert free choice, or whether free speech is supposed to serve the ends of free choice.

In response to that challenge, the networks have largely refused the requests of Congress and the parties voluntarily to postpose all characterizations about election results until the last polls close-although they routinely make choices about what is to get the broadcast every day. There are, however, sufficient Supreme Court cases to suggest the possibility of a congressional and judicial mechanism for preventing network interference with the election process. The court has indeed given broad protection to the substance of speech, but it also has allowed for its regulation in time, place and manner.

Directly analogous to the election process is the jury process. It is the one other strategic and sensitive mechanism for pubic decision-making within our democratic system. It is also an arena wherein speech and choice values often collide, and have been accommodated by the court.

In Sheppard vs Maxwell, the court overturned Dr. Sam Sheppard's conviction because of publicity prejudicial to a fair jury verdict. The court catalogued permissible judicial restrictions on the press such as not communicating with witnesses and jurors, and proscribing extra-judicial statements to the press by police and other officials. In Nebraska Press Assn. vs Stuart, the court overturned a gag rule imposed on the press because it was unwarranted, ineffective and too vague. But Chief Justice Warren E. Burger left open the constitutionally valid possibility of a restraining order that could meet those tests if necessary to restrict irresponsible press practices.

Regarding essentially political speech, Justice Hugo L. Black, allowed the government in *Adderly* vs. *Florida* to regulate the time, place and manner of speech in public places in order to maintain other important values—if the substance of speech were not regulated and if the proscription were narrowly drawn. In that case, the police had arrested civil-rights protesters who were blocking the driveway to a jail and threatening its secure operation. Even in their dissent, Justices William O. Douglas, Earl Warren, William J. Brennan and Abe Fortas allowed for the possibility that the First Amendment could be curtailed under criminal law if the evil were isolated and narrowly drawn.

It might seem that Black forbade any direct regulation of the press in *Mills* vs. *Alabama*, which overturned a state statute forbidding partisan newspaper editorials on Election Day. The statute was to protect the public from confusing last-minute charges made too late for rebuttal. Mills was about protecting the quality of what Douglas called political speech "in a basic form: the right to express views."

But the networks materially degrade the quality of political speech because their authoritative projections purport to show the conclusion before many have chosen, and because they occupy essentially a monopoly position in controlling the broadcast public dialogue. No losing candidate or Western voter has the opportunity (or right) before the polls close to comment about the projections on the air.

The court would never allow an entry poll of a jury to be broadcast to that jury before their final vote. By the same token, network projections in the middle of an election should not be allowed to prejudice the fairness of that election process. In Adderly, Black wrote that the constitutional guarantee of liberty implies the existence of a society maintaining public order, without which liberty would be lost in the excesses of anarchy.

Congress could protect the integrity of elections by making it illegal to release official results before all polls close. And as the Canadians do, Congress could make it illegal to "publish the result or purported result of any polling" before the polls close. Those who say that this would be a direct assault on freedom of expression would appreciate that Election Day involves the people speaking: Rights of the private media must give way to the rights of the electorate on the day when the voice of the people must be heard above all others.

Citizenship is a public office, deserving respect and protection. But the networks' projections undermine citizens' belief in their own power.●

A NEW CALL TO PUBLIC SERVICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, this year marks the 20 year anniversary of the Volunteers in Service to America [VISTA] and the 23 year anniversary of the Peace Corps. These two Federal programs represent vivid examples of Americans volunteering to better the lives of those less fortunate both here at home and abroad. I rise today because I believe that we can expand upon these examples and others like it, in an attempt to tap the vast reservoir of Americans of all ages, and particularly of young people, who I believe are willing to answer a new call to public service.

As a nation, we are committed to providing assistance for our elderly, ill, and disabled citizens; caring for our children; conserving and protecting our environment and our natural resources; rebuilding our cities; educating our young people and helping educationally disadvantaged adults. Many valuable and worthwhile government programs exist to help us reach these goals. Yet, the last few years have seen a growing realization that government alone cannot provide all the answers. As we move into the end of the 20th century, we must expand our horizons; we must draw all the resources available to us; we must use imagination and innovation. I believe that voluntary youth service is one of the most promising of our alternatives to meet these challenges, a vast natural resource which we have barely begun to tap. Many opportunities for service already exist. We must provide the encouragement and assistance needed to transform this potential for greater service into a reality.

I am introducing legislation today—the Voluntary Youth Service Act of 1984—which would provide the necessary incentives for the development of a truly broad-based program of voluntary youth service in our Nation's local communities. By providing matching Federal grants to State and local voluntary youth service programs this legislation would encourage young people ages 17 to 24 to volunteer to serve in local nonprofit, social services, or government agencies that meet important human, social, or environmental needs. Under these State programs, participants would volunteer full-time for a minimum 6 months of service with an approved sponsor organization.

In order to be eligible for a Federal grant, State Youth Service Programs

must provide participants with stipends, housing, food, or other in-kind assistance ranging in value from 50 to 110 percent of the Federal minimum wage. The State programs may also provide participants with health benefits or post-service benefits—including education loans and grants or matching salary grants for post-service employment. Total benefits would range between the equivalent of 80 to 160 percent of the Federal minimum wage. The sponsor organizations who receive youth service volunteers must contribute a portion of their volunteers' living allowances to the program.

While the Federal grants would be administered nationally by the Director of the ACTION Agency, the overall focus of the program is at the local level. In this way, local individuals would be working directly in responding to local needs and situations. Participants would be recruited locally in any number of ways including through service orientation programs at local high schools. The regional programs would maintain computerized information on various service opportunities to allow participants to match their interests with available service opportunities.

States and localities must be allowed the flexibility necessary to develop innovative programs that encourage the maximum participation of young people in meeting the needs of their communities. The State and local programs are free to determine the exact combination of living allowances and post-service benefits that would best encourage youth service in their locality. This legislation also contains protections for salaried employees from replacement by voluntary youth service participants. Finally, under this legislation individuals, businesses, foundations, and other groups can contribute time and money to local youth service programs. The key to the success of a voluntary youth service program is not only to enhance the service-ethic in this country but to energize local communities behind these projects.

Already a number of cities and States have seized upon this potential for public service. The Washington State Service Corps, the Seattle Program for Local Service, and the California Conservation Corps are all examples of innovative local efforts to focus the energies of young people toward meaningful constructive public service. Major Koch of New York City has recently announced plans for a city wide national service program for approximately 3,000 18-year olds. The Governor of New York, Mario Cuomo, has also taken the initiative on the idea of youth service by appointing a 20-member commission to study the possibilities of a State-wide program. Most recently, the State of Minnesota has begun to explore the possibility of a youth service initiative. With these and other initiatives underway at the State and local levels, I believe it is essential for the Federal Government to lend its support to these programs.

Mr. Speaker, the development of a program of voluntary youth service will not only spark our Nation's spirit of activism and service but will help fulfill unmet social needs that must be addressed if we are to move into the 21th century as one nation. Not only would such a program provide important social benefits but would impart lasting personal benefits to those who participated. Personal growth and self-esteem, a sense of participation in one's community as well as useful on the job training and experience are valuable products of public service. The fact is that public service can have unique and invaluable results in terms of personal growth of its individual participants—growth which reflects back on the society of which those individuals are a part.

Our young people represent our most precious resource, our investment in America's future. We cannot allow an entire generation to become dispirited and demoralized. It is shocking that 18.4 percent of American youth are currently unemployed and it is a national tragedy that over 300,000, 41.7 percent, of our black teenagers are jobless. Public service can serve as a barrier against the aimlessness and despair these high rates of unemployment can foster, in addition to making constructive use of idle energies and talents. It is unacceptable—economically, morally, politically, and socially—to allow the vitality and creativity of these young people to go to waste.

It is time that we revive the notion of citizenship. I continue to believe we can rekindle the spirit and activism which has motivated American youth in the past. John F. Kennedy sent out a call and received an answer to the challenge "ask not what you country can do for you . . . ask what you can do for your country." I believe that my proposal for Voluntary National Service Program can succeed in rekindling this flame of activism and sounding a new call to national service. It is my hope that the challenge of national service will be answered in the upcoming 99th Congress. I sincerely hope that these remarks, and the legislation which follows, will help foster a renewed debate on the immense potential of voluntary service. For the convenience of my colleagues the text of my legislation follows:

H.R. 6422

A bill to authorize the Director of the ACTION Agency to provide grants to States and units of general local government for youth service projects, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Voluntary National Youth Service Act".

PURPOSE

SEC. 2. The purpose of this Act is to encourage persons who are between 17 and 24 years of age, inclusive, to participate in voluntary national service by providing matching grants to eligible States and units of general local government for the operation of youth service projects.

DEFINITIONS

SEC. 3. For purposes of this Act:

(1) The term "Director" means the Director of the ACTION Agency.

(2) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

(3) The term "unit of general local government" means any city, county, town, township, parish, village, or other general purpose political subdivision of a State, or any combination of such political subdivisions recognized by the Director. Such term also includes any public body or agency, including a political subdivision, created by or under the laws of a State or two or more States, or any combination of such public bodies or agencies.

YOUTH SERVICE PROJECT GRANTS

SEC. 4. The Director of the ACTION Agency may provide, to States and units of general local government determined to be eligible under section 6, grants for youth service projects adminstered by such States and units of general local government.

DESIGNATION OF SERVICE CATEGORIES

SEC. 5. (a) The Director shall by regulation designate specific activities as service categories in which persons serving in youth service projects may serve for purposes of this Act.

(b) An activity may be designated as a service category under subsection (a) if the Director determines that—

(1) such activity is of substantial social benefit in meeting human, social, or environmental needs of or in the community where service it to be performed;

(2) involvement of persons serving in youth service projects under this Act in such activity will not interfere unreasonably with the availability and the terms of employment of employees of employers with positions available in such activity;

(3) persons serving in youth service projects under this Act are able to meet the physical, mental, and educational qualifications that such activity requires; and

(4) such activity is otherwise appropriate for purposes of this Act.

(c) The service categories referred to in subsection (a) may include—

(1) positions in State, local, and regional governmental agencies;

(2) positions in public, private, and parochial schools;

(3) positions in nonprofit hospitals;

(4) positions in law enforcement agencies;

(5) positions in penal and probation systems;

(6) positions in private nonprofit organizations whose principal purpose is social service; and

(7) any other position that the Director determines to be appropriate for purposes of this Act.

(d) The Service categories referred to in subsection (a) may not include any position in any—

(1) business organized for profit;

(2) labor union;

(3) partisan political organization;

(4) organization engaged in religious activities, unless such position does not involve any religious functions; or

(5) domestic or personal service company or organization.

ELIGIBILITY FOR GRANTS

SEC. 6. (a) In order to be eligible for any grant under section 4, a State or unit of general local government shall—

(1) submit a plan that describes the existing or proposed youth service project for which such grant will be used; and

(2) demonstrate to the satisfaction of the Director that it will expend, for purposes of a youth service project assisted under this Act, an amount from public or private non-Federal sources (including the direct cost of employment or training services provided by State or local programs, private nonprofit organizations, or private for-profit employers) equal to the amount made available to such State or unit of general local government under section 4.

(b) The plan referred to in subsection (a)(1) shall include—

(1) a list of positions from which any person serving in such project may choose a service position, which list shall, to the extent practicable, identify a sufficient number and variety of positions so that any person living within such State or unit of general local government who desires to serve in voluntary youth service may serve in a position that fufills the needs of such person;

(2) a list of requirements to be imposed on any employer of any person serving in a youth service project under this Act, including a provision that any employer who invests in any project that has been awarded matching funds by making a cash contribution or by providing free supervision and training of any person serving in such project shall be given preference over any employer who does not make such an investment;

(3) a provision that any permanent part-time or full-time employee of any employer shall not be displaced from any position by any person serving in a youth service project under this Act;

(4) a provision that any person serving in a youth service project under this Act who is not a high school graduate shall be encouraged to earn, and assisted in earning, a high school diploma or its equivalent;

(5) a provision that any person serving in a youth service project under this Act may arrange to receive academic credit for service satisfactorily completed;

(6) a provision that persons who are eligible to serve in a youth service project under this Act shall be consulted as to the types of positions that should be available to persons who serve in youth service projects under this Act;

(7) a provision that the percentage of persons who are below the poverty level and who are recruited to serve in a youth service project under this Act shall be twice the percentage of persons below the poverty level in the general population of the State or unit of general local government that is receiving a grant for such youth service project under this Act, as determined by the Director from available statistics;

(8) a provision that the percentage of persons who are unemployed and who are recruited to serve in a youth service project under this Act shall be twice the percentage of persons who are unemployed in the general population of the State or unit of general local government that is receiving a grant for such youth service project under this Act, as determined by the Director from available statistics;

(9) a provision that no person serving in a youth service project under this Act may serve in any position unless the grant, contract, or agreement with the employer offering such position provides that such employer shall not discriminate with respect to such position on the basis of race, creed, belief, color, national origin, sex, handicap, or political affiliation; and

(10) a schedule providing for an aggregate amount of wages and benefits, to be distributed to any person who serves in a youth service project under this Act—

(a) equal to not less than 80 percent and not more than 160 percent of the amount such person would have earned if such person had been paid at a rate equal to the minumum wage under section 6(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206) during the period of service of such person; and

(B) that includes a subsistence allowance of not less than 50 percent and not more than 110 percent of such minimum wage, to be paid to such person during such period of service.

SELECTION CRITERIA

SEC. 7. The Director shall distribute grants among eligible States and units of general local government on the basis of which such States and units of general local government will best use such funds to further the purposes of the this Act, as determined by the Director on the basis of the plans submitted by such States and units of general local government under section 6.

NONDISCRIMINATION PROVISION

SEC. 8. (a) No person in the United States shall on the grounds of race, creed, belief, color, national origin, sex, handicap, or political affiliation, be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with, any youth service project for which any State or unit of general local government receives a grant under section 4.

(b) For puposes of title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), any youth service project for which any State or unit of general local government receives a grant under section 4 shall be considered to be receiving Federal financial assistance.

LIMITATIONS

SEC. 9. (a) Any person who serves in a youth service project under this Act shall be not less than 17 years of age and not more than 24 year of age on the date of beginning such service.

(b)(1) No person may serve in a youth service project under this Act for more than a 3-year period.

(2) Any person who agrees to serve in a youth service project under this Act shall agree to serve for not less than a 6-month period.

(c) Any person who does not hold a high school diploma or its equivalent may not be accepted for service in a youth service project under this Act unless such person has not been enrolled as a high school student during the 3-month period before the date of such acceptance.

(d) Not more than 10 percent of any grant awarded to any State or unit of general local government under section 4 may be used for administrative expenses.

REVIEW AND REPORTING REQUIREMENTS

SEC. 10. (a) Each State and unit of general local government that receives any grant under section 4 shall provide oversight of service by any person in a youth service project under this Act, and of the operations of any employer of such person, in accordance with procedures established by the Director. Such procedures shall include fiscal control, accounting, audit, and debt collection procedures to ensure the proper disbursal of, and accounting for, funds received under this Act. In order to carry out this section, each State and unit of general local government that receives a grant under section 4 shall have access to such information concerning the operations of any employer as the Director determines to be appropriate.

(b) Each State and unit of general local government receiving a grant under section 4 shall prepare and submit an annual report to the Director on such date as the Director shall determine to be appropriate. Such report shall include—

(1) a description of activities conducted by the youth service project for which such grant was awarded during the year involved;

(2) characteristics of persons serving in such youth service project;

(3) characteristics of positions held by such persons;

(4) a determination of the extent to which relevant standards, as determined by the Director, were met by such persons and their employers; and

(5) any additional information that the Director determines to be appropriate for purposes of this Act.

CONFORMING AMENDMENTS

SEC. 11. (a) Section 401 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5041) is amended—

(1) in the fifth sentence thereof, by striking out "one Associate Director" and inserting in lieu thereof "two Associate Directors";

(2) in the sixth sentence thereof, by striking out "Such Associate Director" and inserting in lieu thereof "One such Associate Director"; and

(3) by inserting before the period at the end of the sixth sentence the following: ", and one such Associate Director shall carry out operational responsibility for all programs authorized under the Voluntary National Youth Service Act".

(b) Section 402 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5042) is amended—

(1) by inserting "or the Voluntary National Youth Service Act" after "this Act" the first place if appears; and

(2) by inserting "or the Voluntary National Youth Service Act" after "this Act" each place it appears in paragraphs (3), (5), (7), (11), (13), and (14) thereof.

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. There are authorized to be appropriated to carry out the provisions of this Act such sums as may be necessary for fiscal year 1986 and for each succeeding fiscal year. Any amount appropriated under this section shall remain available until expended.●

A TRIBUTE TO THE HONORABLE J. KENNETH ROBINSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. WHITEHURST] is recognized for 60 minutes.

Mr. WHITEHURST. Mr. Speaker, few colleagues in my 16 years of congressional experience have impressed me so much as KENNETH ROBINSON has by his dedication to public service. Although I never served in the Virginia General Assembly, I knew of KEN ROBINSON's reputation when he was a member of that body. He was known then as a person of uncompromising integrity and unsurpassed industry. These virtues he brought with him to this body, and it was because of them that he was recognized early on as a particularly unique and valuable colleague. His appointment to the Appropriations Committee was wise because it insured that there would always be a voice of moderation and caution on that key committee.

It is significant to me that in the Virginia congressional delegation, more often than not, it is KEN ROBINSON's vote that frequently triggers a positive response by the other Virginia Members. It is his counsel that is sought when there is uncertainty with respect to an amendment or vote on a particular piece of legislation. I cannot recall in the past any colleagues of mine whose opinion in my delegation was so highly valued.

In the last 6 years, I have had the privilege of serving with KEN on the House Permanent Select Committee on Intelligence. He always brought to very sensitive subjects keen perception and a high sense of doing what best served the vital interests of the United States. Although, in recent times, there have been sharp divisions within that committee, KEN ROBINSON always retained the respect and esteem of Members on both sides of the table.

KEN's departure from our ranks leaves a great void in Virginia and in this House. It is not likely that we will see anyone of his stature among us again soon. I speak for all of us when I say that we will miss him very much in the succeeding Congresses, but we wish for him and for his wife, Kit, continued good health and happiness, and hope that he will be available for another public service role that will be less demanding. His talents are too precious to be lost.

□ 2030

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. WHITEHURST. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding, and I thank him for taking this time to give us an opportunity to express our views on the wonderful service of a great American, KEN ROBINSON.

Mr. Speaker, I rise today in high regard for my colleague Congressman KEN ROBINSON, who will be leaving this Chamber at the end of this session. KEN has decided to give up the long legislative nights and extended hearings, and spend all his time in the beautiful mountains and valleys of Virginia. It sounds very appealing especially today, as we continue to prolong debate over the continuing resolution.

In his seven terms of service to this Chamber, KEN ROBINSON has committed all his energies and knowledge towards serving his people. By doing so, he has not only served them well, he has served the country and added distinction to the House of Representatives.

Indeed, his district is a land filled with important history. The Blue Ridge Mountains and the Shenandoah Valley are the site of some of America's bloodiest and most violent battles. These country roads are also the home of our Founding Fathers and former Presidents. Presidents Jefferson, Madison, and Monroe all made their home in this region. KEN ROBINSON well understands the important role history plays in a community and has enlisted his efforts in advancing our appreciation and understanding of all that has taken place.

I have had the privilege to work closely with KEN ROBINSON on the Defense Appropriations Subcommittee. His true dedication to the job is evident. While we may differ on a few matters, I greatly admire his conviction and contributions towards our National defense. America is a free and great country because men like KEN ROBINSON enlist their energies in Government service.

He has given untiring effort, knowledge, and dedication as the ranking minority member of the Intelligence Committee.

I will miss his expertise and dedication.

I wish to thank him for his service to the committee and wish KEN, his wonderful wife Kit, and his family the best in their future endeavors. He will be missed.

Mr. WHITEHURST. I thank my colleague for his comments.

Mr. BLILEY. Mr. Speaker, will the gentleman yield?

Mr. WHITEHURST. I yield to my colleague, the gentleman from Virginia.

Mr. BLILEY. I thank the gentleman for yielding.

Mr. Speaker, Virginia is proud of its long tradition of service and leadership to the country. In addition to being the home of eight of our Nation's Presidents, our Commonwealth lists among her sons and daughters some of America's most able and noteworthy public servants. J. KENNETH ROBINSON must certainly be named among those on Virginia's honor roll.

For the past 14 years, KEN ROBINSON has represented the citizens of Virginia with the kind of determination and singlemindedness that characterize our great leaders. He has been diligent in protecting the rights of his constituents and in protecting the values on which America and Virginia were founded. I believe that it's fitting that a former distinguished minority leader referred to KEN ROBINSON as the "Rock of Gibraltar." KEN has brought stability and tough thinking in a time of ambiguity and the quick fix. America and the U.S. Congress have been better for his contribution.

When I arrived in the House of Representatives nearly 4 years ago, I was privileged to have KEN ROBINSON take me under his wing. His counsel and advice on defense and intelligence issues were invaluable and provided an education and insight that few of us have the opportunity to receive. I consider my friendship with KEN ROBINSON to be one of the highlights of my career in Government. And I consider his assistance to be one of the most important assets for my work in the House of Representatives. Through his encouragement and example, my colleagues and I in the Virginia delegation have been able to serve and represent the citizens of the Commonwealth with renewed energy and wisdom.

It's impossible to speak of KEN ROBINSON without mentioning his contributions in strengthening the defense of our country. As the only Virginia member of the House Appropriations Committee, KEN has provided that consistent voice on the Defense Subcommittee that reflects the traditional beliefs of our State's citizens in a strong national defense. His support of President Reagan in establishing a policy of Peace through Strength is a reflection of KEN ROBINSON's long standing efforts in behalf of America's security.

Ken has also shown his commitment for a strong America in his tireless work to strengthen and maintain the United State's intelligence activities. As the ranking member of the House Intelligence Committee, Ken has been a diligent watchdog of this vital national function. We saw this most graphically displayed in his effective action to retain required intelligence capabilities at the Vint Hill Army Installation in Virginia.

But KEN's efforts have not been limited merely to national defense issues. As a strong supporter of President Reagan's economic policies, the gentleman from Winchester has played a vital role in America's future. As a supporter of the Reagan tax cuts, Ken has helped to turn around our Nation's economy and insure stability

and prosperity for people across the country. As a sponsor of the balanced budget amendment and strong right-to-work legislation, KEN has provided an example of sanity in a Congress sometimes preoccupied with economic chaos. Millions more Americans are working today because of KEN ROBINSON's willingness to speak out and work for progress.

KEN ROBINSON is leaving us now. He and Kit will be sorely missed. They have represented the people of Virginia with enthusiasm, charm, and intelligence. In an age that often lacks these attributes, we can ill afford to be deprived of such noble and gracious examples. I know that KEN and Kit will continue to provide moral and spiritual leadership in whatever they do. I'm thankful that they're returning full-time to their home in the Old Dominion to enjoy a well-deserved rest. We are saddened by their retirement, but thankful that we have for so many years been blessed by their service and dedication. God bless you both.

Mr. WHITEHURST. I thank the gentleman.

Mr. Speaker, I yield to my colleague, Mr. BATEMAN, from Virginia's First District.

Mr. BATEMAN. I thank the gentleman for yielding, and I appreciate your having obtained this special order so that Members of the House may have this opportunity to speak to the subject of our colleague, J. KENNETH ROBINSON.

Mr. Speaker, it is always a pleasure for this Member to have the opportunity to speak words of praise about my colleague from Virginia, J. KENNETH ROBINSON. It is also an easy thing to do: There are nothing but good things to say about KENNETH.

But today is nevertheless a sad occasion for me, as I face the reality that Congressman ROBINSON will not be among us next year. In my freshman term, I have received valued counsel and guidance from many of you in this Chamber, but no one in the Congress has been more consistently helpful to me than KENNETH. He is a dear friend and a mentor without peer.

KENNETH came to the House in 1971 after 6 years in the Virginia State Senate, during the last 2 of which he was my colleague and chairman of the Republican delegation. Since coming to Washington he has encountered little difficulty in being reelected six times—clearly the people of the Seventh Congressional District of Virginia know a good thing when they have one.

In the House, he has made his mark as a man dedicated to conservative principles and a diligent member of the Committee on Appropriations, where he serves as second ranking minority member of the important Subcommittees on Agriculture and Defense. He is also ranking minority member of the House Permanent Select Committee on Intelligence, a demanding and usually thankless assignment.

KENNETH is above all a man of sound judgment, and possesses that uncommon virtue of common sense, in an unusually high degree.

All who know KENNETH will miss him, and his district, his State, and the whole Nation will be poorer for his taking leave of the House. I wish for KENNETH, his charming wife Kit, who like KEN is our dear friend, and all members of the Robinson family every blessing in the years ahead.

Mr. WHITEHURST. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from Louisiana [Mr. LIVINGSTON].

Mr. LIVINGSTON. Mr. Speaker, I want to thank the distinguished gentleman from Virginia for yielding to me, as well as for calling for this special order on behalf of our good friend, KEN ROBINSON.

KEN is one more of those valuable people on whom the House depends so heavily, and will miss so greatly. As a seven-term Member of the House, senior member of the Committee on Appropriations and the Agriculture and Defense Subcommittees, as well as ranking member on the House Intelligence Committee, KEN will indeed be sorely missed.

It is unfortunate that men like KEN ROBINSON, JACK EDWARDS, BARBER CONABLE, JOHN ERLENBORNE, and others are leaving the House. KEN ROBINSON has particularly been an able and effective Member, combining his vast experience as World War II infantry veteran, farmer, administrative chieftan, community and civic leader, State and Federal legislator, husband, and father of seven children, to produce his outstanding achievements as a stalwart and eminently respected Representative of the people of the Shenandoah Valley.

A quiet, thoughtful and religious man, KEN has been one of those Members who enjoys the deep admiration and respect of his colleagues, as was evidenced by the standing ovation he received along with JACK EDWARDS at the last meeting of the Appropriations Committee.

His deep-seated beliefs in the traditions and values of this great Nation were always at the forefront of his service to the House. Thus, he was dependable—"like the Rock of Gibraltar" according to former minority leader John Rhoads. He never hesitated to back programs or policies which put the interest of his country first—before any other priorities; and he likewise supported the policy of standing by our friends—no matter the odds.

KEN ROBINSON has always been a man on whom you could count—so while we shall miss him greatly—we have no doubt but that he will find much success and happiness wherever life takes him. There simply are not enough men like KEN ROBINSON—and he will be much in demand.

Mr. WHITEHURST. I thank my colleague.

Mr. Speaker, I yield now to my colleague, the gentleman from Alabama [Mr. EDWARDS].

Mr. EDWARDS of Alabama. I thank the gentleman for yielding and for taking this time for all of us to be able to express our thoughts about our colleague, KEN ROBINSON.

Mr. Speaker, I suppose that I have no closer friend in the House of Representatives than KEN ROBINSON and his lovely wife Kit. For the 10 years that I have been ranking Republican on the Defense Appropriations Committee, KEN has sat next to me and we have become extremely close. I have come to know him as a person who has this tremendous ability to get into a subject and grasp the heart of it almost immediately, and he has this very incisive mind that sometimes makes me sit there in bewilderment when I am still trying to figure out what is being discussed in the hearing and KEN has already got it up here in his head. He has been a real credit to our Defense Subcommittee, a real rock when it comes to concern about the defense of this country, a real asset when it comes to the question of trying to carry out the President's program of rebuilding the defenses of this country, adding that strength that we need as we attempt to deal with the Soviet Union in the bargaining process. So he is the kind of person that one is very proud to serve with in the Congress and especially on the Defense Subcommittee. He also serves, as has been said, on the Agriculture Subcommittee of Appropriations and does yeoman's service there. How he has time for that as well, I do not know.

□ 2040

But even more than that, I think perhaps the place where he has done probably the most service to this country and to this Congress is in his ranking Republican position on the Intelligence Committee.

KEN went on that committee at a time when the intelligence community was in considerable disarray. From many quarters there were those who were raising sincere and severe criticism of the agencies—the intelligence agencies. That committee, much because of KEN ROBINSON's leadership, I think, has brought a sense of responsibility back to this whole discussion of the intelligence communities; and what he has done, along with his colleagues on that committee, has helped to reorient the work of the intelligence community. It is once again a

viable, active, responsible part of our governmental process.

I think we can say to KEN ROBINSON in that context that he has done tremendous work there. I am going to miss him, and I will tell you, if the gentleman would permit, that I am also retiring at the end of this year. If it were not for that, I would really be fussing at KEN ROBINSON, but I do not know how to fuss at him when I am leaving, too.

This House is going to miss him.

Mr. WHITEHURST. If the gentleman would permit, I would say the House will miss both of you.

Mr. EDWARDS of Alabama. Well, I thank the gentleman. I was not fishing for anything; I was trying to make a point. Many Members who are leaving I would love to fuss at, but I cannot do it. This is one person that I feel so close to. We have worked together; we have played together. I have been at his home in Virginia; he has been in my home in Alabama. We have become so close—his wife and my wife and KEN and I. It is my fond hope that after we depart this phase of our lives we will all be able to visit from time to time and renew the acquaintances that we have enjoyed for so long.

I want to commend the gentleman again and say that my wife Jolane joins me in extending the very, very best to KEN and Kit in their retirement.

Mr. WHITEHURST. I thank the gentleman, and I yield now to the gentleman from Illinois [Mr. O'BRIEN].

Mr. O'BRIEN. I thank the gentleman for yielding.

IN HONOR OF J. KENNETH ROBINSON, ON HIS RETIREMENT

Mr. Speaker, we are about to lose one of the sturdy, steadiest hands the minority party in the House of Representatives has known in recent years. J. KENNETH ROBINSON, the distinguished Representative of Virginia's Seventh District, is retiring after 14 years of unbroken service.

Once referred to by minority leader John Rhodes as "the Rock of Gibraltar," J. KENNETH ROBINSON has consistently urged passage of a balanced budget measure, the creation of a smaller Federal bureaucracy, and a practical, well-thought-out program of national defense.

Indeed, in 1982, one of his major interests was the proper support of maintenance and personnel in the armed services—programs he said at the time would have problems that would come back to haunt Congress if not adequately funded.

I am especially sad to see KENNETH ROBINSON retire, as he is a fellow minority member of the House Appropriations Committee. He has served with distinction as the second ranking minority member of the Subcommittees on Agriculture and Defense, and as a member of the Permanent Select Committee on Intelligence. In past congressional sessions, he has served on the Committees on Agriculture and Government Operations.

His congressional service comes after two terms as Virginia State Senator in the 1960's. In 1968 and 1969, he led the Republican delegation in the State General Assembly.

Since coming to Washington, J. KENNETH ROBINSON has seen his scenic and bountiful district in the Shenandoah Valley become the fastest-growing congressional district in the State.

A native of Winchester, VA, J. KENNETH ROBINSON continues to hold orchard, fruit packing, real estate, and other business interests in the area. He is past president of the Shenandoah Apple Blossom Festival and a past director of Winchester Memorial Hospital and the Winchester-Frederick County Chamber of Commerce. He is a former member of the Dulles International Airport Development Commission.

The past president of Virginia Fruit Growers, J. KENNETH ROBINSON will now return to the historic Shenandoah Valley to continue with his family orchard business.

I ask my fellow Members of Congress to rise in honor of this champion of fiscal conservatism and valued Member of this body.

Mr. Speaker, one final note with respect to KEN ROBINSON: He was never a part of the wind on Capitol Hill. He only spoke when the issue required it, and when there was something of value to be said. He is one of a handful of outstanding Members about whom that compliment can be said.

He and Kitty, like JACK and Jolane EDWARDS, have something special in common: They have class. I personally regret his leaving, and I will sorely miss him.

Mr. WHITEHURST. I thank the gentleman, and I now yield to the gentleman from Virginia [Mr. DANIEL].

Mr. DANIEL. I thank the gentleman for yielding and for taking this special order.

Mr. Speaker, with the retirement of Congressman J. KENNETH ROBINSON, this body loses one of its most valuable contributors to our national security. His service on the House Defense Appropriations Subcommittee and the Permanent Select Committee on Intelligence has significantly identified him as one who conscientiously goes about his tasks in quiet way with positive results.

KENNETH has devoted long hours and keen insight into matters of highest national concern and possesses the kind of balanced thinking which we so badly need today. Loss of those who have been closely connected with any area of our national life always leaves a void, but this is particularly true in the case of Defense and Intelligence.

Congressman ROBINSON has ably represented the Seventh Congressional District of Virginia since 1971, after distinguished service in the Virginia State Senate. There also, he demonstrated the attributes of a hard-working, caring legislator and brought with him to Washington a genuine concern for his State and Nation.

He is typical of many who have served in the Congress over the years who approach their task with a multiplicity of purposes. He has served well the varied interests of the people in the Seventh District who elected him; he has brought distinction to Virginia as a member of our delegation; he has discharged his committee responsibilities in a most impressive way and represented his constituency and the national interest on the floor year after year.

The growing responsibilities of this job are beginning to take a toll on those who serve here—and Members do not stay as long as they once did. This, too, is a national loss—because prospective Members, with the background, the dedication, the spirit, and the energy of KENNETH ROBINSON are not easy to find.

Although it is difficult to imagine that KENNETH will ever retire, in the commonly held meaning of that term, we wish him well in whatever he does, and the best wishes of all of us go with him and his family.

Mr. WHITEHURST. I thank the gentleman for his remarks and I yield to the gentleman from Arizona [Mr. RUDD].

Mr. RUDD. I thank the gentleman for yielding to me.

Mr. Speaker, I applaud the gentleman for taking this special order out with regard to J. KENNETH ROBINSON, our colleague and our friend, and a great human being, as well as being a highly distinguished Member of this great body.

Mr. Speaker, the first day I arrived here, having been elected by the people of the State of Arizona, I met KEN ROBINSON at that time. I have come to know him very well. I feel close to him; I have watched his activities here. I know that he has really presented himself in a very honorable way in all of the activities that he has engaged in here in the House of Representatives. He is a gentleman that everyone here knows has struck a real blow for the defense of our country and in the manner in which he has conducted himself on the Defense Subcommittee of the Appropriations Committee. He always kept in mind a very reasonable way that defense is the most key part of the survival of this Nation. I am very proud to be a part of this special order for KEN ROB-

INSON, a great human being and a great American.

Mr. Speaker, I am pleased to take part in this special order this afternoon to pay tribute to one of the stalwart leaders of this house, my friend and colleague, KEN ROBINSON.

KEN has left an indelible mark on numerous pieces of legislation in this house, but his leadership has been especially important in the area of defense. He has worked hard to ensure that our Nation remains strong and that aggression from abroad is deterred. His efforts have helped to protect the liberty and freedom of all our people.

KEN has been a good friend and ally. It is therefore with profound sadness that we look to his retirement.

KEN will be missed by all of us, and especially missed by the people of Virginia's Seventh District, whom he has served so well.

Mr. WHITEHURST. I thank the gentleman for his comments and I now yield to the gentleman from Ohio [Mr. MILLER].

Mr. MILLER of Ohio. I thank the gentleman for yielding to me.

Mr. Speaker, the Seventh District of the great State of Virginia will soon lose one of the most effective and responsible voices in Government with the retirement of my good friend and House colleague, J. KENNETH ROBINSON. For the past 14 years, KEN ROBINSON has honorably served the citizens of one of the Nation's most historic regions: the Blue Ridge of Virginia. He has listened to their concerns and put their concerns before the Congress of the United States.

I have had the privilege to serve with KEN ROBINSON on the House Appropriations Committee, and I can assure the American people that his hard work and attention to detail has been responsible for sound legislative action on this important committee. I have seen him demonstrate the kind of leadership that is essential in our turbulent society. I have seen him stand out in the midst of debate and bring reason to issues that are being buried in controversy and ill feelings. I have seen him stand up for democratic principles and speak out for the programs that will benefit not only the people who have sent him to Congress, but all of America.

We will miss KEN in this Chamber and on the committee. He has served us well and I, for one, am grateful to have served here with him.

Mr. WHITEHURST. I thank the gentleman and I yield now to the gentleman from California [Mr. COELHO].

Mr. COELHO. I thank the gentleman for yielding.

Mr. Speaker, I just heard that the gentleman was doing a speical order for the gentleman from Virginia, KEN ROBINSON, and I just want to say that in the last couple of years I got to know KENNY and his wife, and they are outstanding people and he is an outstanding Member of this body.

As one on the other side of the aisle, I am very sad to see him leave. He is a credit to this institution and has been a tremendous force on the Appropriations Committee. We are, as a House, sadder and less fortunate that he is not with us. I appreciate the gentleman bringing this to our attention.

□ 2050

Mr. WHITEHURST. I yield to the gentleman from California.

Mr. LEWIS of California. Mr. Speaker, first I would like to say to Mr. WHITEHURST, my colleague, congratulations for making this effort to recognize one of the great members of the Appropriations Committee and the House of Representatives.

It has been my privilege to serve with KEN in the Appropriations Committee and I watched with great respect the fantastic job that he has done there. That is a very, very tough committee. As you know, the country has gone through leaps and bounds in terms of the public's attitude about what we should do with our defense systems.

Following Vietnam we faced that time when people wanted to withdraw from the world and there was an undermining of our defense systems and the appropriations therefor. Through all of those years, KEN was on the mark. He recognized that if you truly are concerned about freedom in the world; if you are concerned about peace in the world, that that is accomplishable better with a strong America.

So he has been there up front, willing to fight the tough battles, but it was not so popular to fight those battles.

We need men and women in public affairs who look to more than just partisanship alone. KEN ROBINSON is one of those people who has demonstrated by the deep friendship that he has experienced on both sides of the aisle, that he is the kind of person who recognizes that we are here first to govern.

You have to deal with people problems in a human kind of way and you have got to deal with your colleagues in that same fashion. I must say to my colleague that KEN ROBINSON in another sense reflects the best among us, for he has an understanding that not all issues are partisan politics, but that beyond that, you need some flexibility in public affairs, a very sensitive, decent human being who came here to serve and indeed he served his people well.

Mr. WHITEHURST. I thank the gentleman for his remarks.

I recognize the gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Speaker, I thank the gentleman for taking out this special order and for allowing us to express our sentiments about KEN ROBINSON, and let me simply say as a member of the House Armed Services Committee, the same committee that the gentleman from Virginia [Mr. WHITEHURST] serves on, knowing that KEN has served on the Appropriations Defense Subcommittee and also on the Select Committee on Intelligence, I have been very impressed with his capability of being able to analyze defense systems and to do what the country needs, and to move on programs that the country needs, but also to be kind of a very strong force, an anchor if you will, on foreign policy.

There is an element, the dimension of foreign policy in the Select Committee on Intelligence, and on the Committee on Appropriations and the Defense Subcommittee, and I have watched KEN ROBINSON stand up here when it was pretty darn tough to take a strong stance with regard to Central America and I think the fact that Mr. Duarte is leading the government in El Salvador now and seems to have a fair chance of success in making that fragile democracy work has to be attributed to some degree to the efforts of people like KEN ROBINSON, who stood up here and defended America's right and America's interest in giving El Salvador and other nations that military shield, if you will, while they develop their very fragile representative political system, and I want to commend also the gentleman [Mr. WHITEHURST] as being one of those champions who stood shoulder to shoulder with KEN ROBINSON and made that work.

I think now we have a chance of making that Government work down there and seeing a new democracy come into the Americas and that, I think, for that those people and many other people in the world can thank KEN ROBINSON for taking efforts when it was a very difficult thing to do and for standing tall and being that anchor and I thank the gentleman for taking out this special order.

Mr. WHITEHURST. I thank the gentleman for his remarks and contribution.

Mr. Speaker, I recognize the gentleman from Colorado [Mr. KRAMER].

Mr. KRAMER. I appreciate the gentleman's yielding to me.

Mr. Speaker, let me first express my appreciation to the gentleman [Mr. WHITEHURST] for taking out this special order for a very notable individual who will be leaving us. Clearly while I am from Colorado there is no question that the Virginia delegation stands very tall in the House of Representatives and in the Senate of the United, States and it has been a historical role, I think, if my memory serves me cor-

rectly, Colorado having produced more presidents than any State has contributed.

KEN ROBINSON has made a very tremendous impact not only on this House but more importantly on this country. He served on the Intelligence Committee at a time when intelligence capabilities was a dirty word, and he not only persevered, served as a steady rock and steady anchor on that committee, but I think through his leadership helped turn that situation around where today we recognize the need for good solid intelligence information.

In making that contribution, I think that many of us who never really know the full extent of the value of his service because, as we all recognize, so many of the things that go on on that committee cannot be publicly made known, but certainly the impact of whether the country stands today and its place in the world is well-known not only to the House of Representatives but to our allies and again perhaps most importantly of all, to our potential adversaries.

In making the United States stand tall again, certainly the contribution of KENNETH ROBINSON is one that needs to be recognized and called to people's attention.

● Mr. FUQUA. Mr. Speaker, I appreciate this opportunity by our colleague from Virginia [Mr. WHITEHURST] to pay tribute to Congressman KEN ROBINSON. KEN has served ably and well since his election in 1970 and he will be missed.

As a member of the Appropriations Committee, he has served with distinction and made many valuable contributions. His work on the Agriculture Subcommittee will have a lasting and positive impact on rural areas, such as those I am privileged to represent, and through his work on the Defense Subcommittee he has helped ensure that our military is strong and ready to meet any challenge.

The Select Committee on Intelligence has extremely important work to perform and, as ranking minority member, KEN has stood firm for the role the intelligence community must play to ensure our freedom at home.

He has been a key Member of this body and he will be missed. The people of Winchester, VA, and surrounding area are losing a strong and positive voice in the House of Representatives.●

● Mr. PARRIS. Mr. Speaker, it saddens me to have to rise today to say goodbye to a trusted, dear friend, a collegue whose 14 years in this august Chamber have been filled with honors.

KEN ROBINSON is a good friend to us all, and he has been a good friend to the people of the Seventh Congressional District of Virginia, and to all of the people of this great Nation. I shall miss him, and I wish him well in his private life once he crosses the Potomac and heads for the Shenandoah Valley.

I have known him longer than most of you, for KEN ROBINSON and I served in the Virginia General Assembly in the late 1960's. He was a force to be reckoned with then, and he remains a force to be reckoned with now.

He has been an outspoken and effective supporter of an improved national defense, casting votes in favor of the B–1 bomber, new nuclear aircraft carriers and sponsored and helped enact tougher legislation designed to protect the identities of U.S. undercover agents on dangerous missions overseas. He has a great grasp of national defense issues because of the perspective he enjoys as a member of the House Appropriations Defense Subcommittee, and as a member of the Select Committee on Intelligence.

He shares with many of us the philosophy that too much Federal Government needlessly infringes upon the activities of private citizens and adds wasteful expense, both to the Government and to the citizens and businesses who must do the paperwork to comply with the regulations.

KEN ROBINSON has sponsored a proposed constitutional amendment to require a balanced Federal budget as one of many reform measures aimed at improving the performance and the responsiveness of the Federal Government to the taxpayers.

I could go on and on in my praise of KEN ROBINSON, but there is no need. All of us know what he stands for, and how he stands up for what he believes is in the best interest of this Nation.

I could call him successful, but that would be redundant, for to those of us who know him, KEN ROBINSON means success.

I shall miss him, and I hope that every so often he will leave the apple orchards of Winchester, cross the Potomac River, and visit us. And, speaking for all of us, I believe, I can say with all honesty that we will also miss those little bags of apples he drops off every now and then. I would hope that the distinguished gentleman from the Seventh Congressional District of Virginia would recommend to his successor that Congress would appreciate being kept on the apple list.●

● Mr. SHUMWAY. Mr. Speaker, I am delighted to have this opportunity to recognize the outstanding congressional record of our friend and colleague, J. KENNETH ROBINSON, and to extend every best wish to him as he prepares to leave the Halls of the House of Representatives.

Since his election to Congress in 1970, KEN has provided those he is privileged to represent with excellent leadership and sound reason. That latter quality has been of critical importance not only to his personal constituency but the entire Nation as a result of his prudent decisions as a member of the Appropriations Committee. We in this House use a descriptive expression which can truly be said to describe KEN ROBINSON: He is, indeed, "the gentleman from Virginia."

I will certainly be sorry to see KEN go, but I wish him the very best for continued success, security, and prosperity. He has left a mark which his colleagues will long remember, as will those who have been fortunate enough to have had his representation.●

● Mr. BOLAND. Mr. Speaker, as chairman of the Permanent Select Committee on Intelligence, I welcome this opportunity to participate in this special order in honor of our colleague, KEN ROBINSON.

As Members of the House know, but as too few members of the public appreciate, KEN ROBINSON has been the ranking minority member of the Intelligence Committee since 1979.

He has been a Member of the Committee since its inception in 1977 and throughout has served as the ranking minority member of the Subcommittee on Program and Budget Authorization.

Too few appreciate what KEN ROBINSON has done for the security of this country through his service on the committee.

Too few appreciate the improvements that he has helped ensure in our intelligence capabilities.

Too few will ever realize the enormous and debilitating workload that KEN has assumed in his service on the Intelligence Committee.

Mr. Speaker there is no member of the committee who has worked harder.

There is no member—including the chairman—who can claim as thorough a knowledge and as sound a judgment in reviewing and overseeing intelligence matters.

I have said so often but to too few that KEN ROBINSON is the rock on which the Intelligence Committee has endured.

I say it again.

His dedication to fiscally sound, fair, bipartisan solutions has made the task of reaching agreement on many complex intelligence issues so much more achievable than it otherwise would have been.

I know of no Member of this body of whom I could extend these accolades and still fail to properly express the great service that KEN has provided to the committee, to the House, and to the American public.

Mr. Speaker, KEN ROBINSON didn't just work hard, he has acquired a detailed knowledge of intelligence systems, intelligence capabilities, and most difficult of all, a sense of the actual nature of the art of intelligence that outstanding judgment to which I

referred earlier, plus the knowledge, the tireless application, and the long hours all have resulted in a credibility to which none but KEN ROBINSON can rightly claim.

It is a credibility that did not end within the Intelligence Committee.

It is one that was and is respected without hesitation in the Appropriations Subcommittee on Defense in which he also serves.

Finally, it is accepted throughout the intelligence community itself as a benchmark of probity.

Mr. Speaker, some will say I have described a paragon of virtues in KEN ROBINSON and indeed I have.

What makes this glowing description work, however, is not just hard work or a keen intellect or even superb judgment.

KEN ROBINSON has all those things.

But, first and last, he is and will always be a gentleman of the highest order.

His true courtesy and respect for me, for his colleagues, and for all those who have appeared before the committee have offered a guide to us all.

Mr. Speaker, all of us in the House, KEN'S constituents in the Seventh District of Virginia, but most of all, the United States of America, will suffer from the loss of this good and faithful servant of this Nation's security.

The debt of gratitude we all owe him will not soon be repaid and I trust that the richly deserved accolades delivered tonight will not soon be forgotten.●

● Mr. LAGOMARSINO. Mr. Speaker, tonight we honor one of the most distinguished members of this body, the Honorable J. KENNETH ROBINSON, who has ably represented the Seventh District of Virginia during his 14 years of service in the House of Representatives.

KEN has done an outstanding job here in the Congress, particularly in the areas of national defense and intelligence-related activities. His dedication and loyalty to not only his constituents, but to enhancing the safety and security of all Americans will be remembered by all involved in this field, and KEN will be sorely missed.

One of KEN'S many outstanding attributes is his ability to work closely with Members on both sides of the aisle in order to find real, workable solutions to the varied and complex problems facing America's defenses and intelligence community. He has performed admirably in this regard (his legislative successes are a testament to this), and his experience and insight into the political process will, again, be sorely missed.

All of us thank you, KEN, for your outstanding service, your dedication, your love of country and your friendship. We wish you the best in your future endeavors. Congratulations on a job well done.●

● Mr. LOEFFLER. Mr. Speaker, it is an honor for me to pay tribute to a man who has served his Nation and the people of the Commonwealth of Virginia with distinction and who will be sorely missed in the 99th Congress.

KENNETH ROBINSON has devoted his years of public service to bettering the lives of all Americans. He has worked diligently, as ranking Republican on the Select Intelligence Committee, in support of our efforts to combat the Marxist threat in Central America, and for this I am deeply grateful. I have had the privilege of working alongside him on the Appropriations Committee, where he has contributed special expertise on issues relating to agriculture, rural development, and defense. Finally, he has stood firmly by his principles that hard-working Americans should not be overburdened by Government regulation and taxes and that free enterprise is the great hope for the development of human potential.

Thank you, KEN for your dedicated efforts in behalf of our country. We will miss you. Stay in close touch.●

● Mr. SISISKY. Mr. Speaker, I am proud to be among those joining today in paying our respects to J. KENNETH ROBINSON, the distinguished Congressman from Virginia's Seventh Congressional District.

KEN has served in the House of Representatives since 1970. You don't work around here for 14 years without leaving your mark on Congress, and without being missed when you leave. His work as Virginia's only member on the Appropriations Committee will long be missed.

KEN is a skilled politician, an effective Congressman. His gentleness, his decency, his sense of humor, his ability to disagree without being disagreeable—this is what membership in this House ought to be all about.

One of the greatest assets of this distinguished body is the membership, which reflects the diversity of our Nation. It is encouraging when diverse members put aside their differences and work together toward common goals.

We Virginians are proud of the fact that we can work together for the good of our Commonwealth and our Nation—no matter which side of the aisle we stand on. J. KENNETH ROBINSON has been a proud part of that tradition.

KEN, you will also be missed by your constituents. You are known in Virginia for your strong commitment to those you represent. When your people needed you, you were there to help. Of that, you should be especially proud.

As Members of this body, we hear the word gentleman countless times daily. Well, I am pleased to report that KENNETH ROBINSON is not just a gentleman, but he is a Virginia Gentleman. And where I come from, that is something special indeed.

Many know KEN as a man of strength and uncommon skill as a legislator. But, as I'm sure many will attest, he has been a friend to us all—and in times like these, we need friends like KEN ROBINSON.

This member will miss you, KEN, and I wish you health and happiness as you return to Frederick County and to Virginia. And thank you for all your years of service to Virginia and to this Nation.●

● Mr. DICKS. Mr. Speaker, I am pleased to join in this special order recognizing the outstanding contributions of KEN ROBINSON during his 14 years of service in the House of Representatives.

During the last 6 years it has been my pleasure and privilege to serve with KEN ROBINSON on the Defense Appropriations Subcommittee. While we have served on opposite sides of the aisle, we share the common objective of a strong national defense that is well managed and structured to provide the capabilities we need without waste and extravagance.

KEN has been particularly valuable as the Defense Appropriations Subcommittee's representative on the Select Committee on Intelligence. His expertise in this critical area is well respected by all of his colleagues on the subcommittee, and it has been repeatedly relied upon as we considered these matters.

KEN'S contribution to the defense appropriations will be sorely missed, along with that of his close friend, JACK EDWARDS. But I know that while he will be missed here in the House, he will continue his lifelong interest in public policy questions.●

● Mr. RUSSO. Mr. Speaker, it's refreshing to see that nice guys don't always finish last. Representative J. KENNETH ROBINSON is one of the nicest Members if has been my pleasure to work with and, rather than come in last, his hard work and diligence and commitment have often placed him in the forefront. Especially in the area of defense and intelligence, his efforts have made a significant contribution to our Nation's security.

KEN is such a soft-spoken gentleman that you may not notice at first how effective he is. And then you realize that in his understated fashion, he has most skillfully made his point and gotten the job done—or entertained you with his wry humor. It's a most welcome change in an environment sometimes too full of loud words and shrillness and I admire KEN for a style that makes him a good friend as well as capable legislator.

It has been a great personal pleasure for me to work with KEN and I wish him and his lovely wife Kit all the best in the future. I know I also speak for

many when I commend KEN for a job well done in representating the people of Virginia's Seventh District and the Nation. He will be greatly missed here.●

● Mr. EMERSON. Mr. Speaker, I am pleased to participate in this special order today in honor of our friend and colleague, J. KENNETH ROBINSON. KEN, unfortunately, will be leaving the House after 14 years of service to the Congress and his constituents in Virginia.

Since first coming to the House, KEN has earned a reputation for unswerving commitment to the principles in which he believes—principles, I might add, which he and I share. It was this strength of conviction that led our former minority leader, John Rhodes, to call him "the Rock of Gibraltar," and I believe that term accurately describes KEN's record in the House.

Throughout his career, KEN ROBINSON has demonstrated a keen interest in the needs of our agricultural community. From his seat on the Agriculture Appropriations Subcommittee he has worked hard on behalf of farmers across the Nation, and I know the farmers of my own congressional district in Missouri have benefited from his presence here.

In addition, KEN ROBINSON has been quietly adamant about our need to maintain a strong national defense and has left his mark in this area through his service on the Defense Appropriations Subcommittee and the Intelligence Committee.

KEN's constituents in the Seventh District of Virginia did not want to see him go and neither do I. But he has served both his constituents and his country with strength and courage and his retirement is well earned. He will be sorely missed in this body, and my best wishes go with him in the years ahead.●

● Mr. DICKINSON. Mr. Speaker, distinguished colleagues, I am pleased to be here today to speak in honor of my long-time friend and respected colleague, KEN ROBINSON, who will retire this year after 14 years of active, determined and productive service to his State, his country, and this House of Representatives.

KEN came to the House in 1970, 6 years after my own arrival here, and his friendship has been a strong and a valuable one to me from the outset. It is with a great sense of my personal loss and the loss to this body that I see him retire. His absence in this Chamber will be a noticeable one, as will his absence on the House Appropriations Committee, that Committee's Subcommittees on Agriculture and Defense, and the Permanent Select Committee on Intelligence on which he has diligently and effectively served. KEN recognizes the tremendous and vital importance of maintaining and improving America's national defense, and has spent immeasurable energy in his contributions in the areas of defense and intelligence. As a member of the House Armed Services Committee, I am grateful for his leadership and resolve.

My desire is that he have good health and contentment in his retirement, that he enjoy the remainder of his career as an apple producer and packager, and that he reflect with pride and fondness on his years of service to this body. I am grateful for this opportunity to express my appreciation, my respect and my gratitude to KEN, as I am for his friendship and for his hard work in Congress.

Thank you.●

● Mr. QUILLEN. Mr. Speaker, I would like to take this opportunity, along with my colleagues, to pay tribute to the distinguished gentleman from Virginia, Congressman, J. KENNETH ROBINSON, and to congratulate him on the outstanding job he has done during his many years on Capitol Hill.

The tremendous work he has done in serving his constituents and our Nation is a shining example for others to follow, and his efforts will long be remembered.

Because of the proximity of our congressional districts, and through the urgings of a mutual friend, KEN and I worked together to obtain for the university of Virginia a lithotripter, a device which disintegrates kidney stones by means of shock waves. This, of course, was no small feat, as the machine, in 1983, was still in the testing stages, and only five had been approved for FDA studies to be sent from the manufacturer in Germany. After numerous letters to military officials, diplomatic officials, and custom officials, the mission was accomplished, and the equipment is now fully operational at the University of Virginia.

KEN has served with distinction on the Permanent Select Committee on Intelligence and has played an important part in the congressional oversight of our country's intelligence activities.

There have been many noteworthy achievements throughout his legislative career, and I know KEN will continue his high level of service as he moves on to new and even greater challenges. He will be sincerely missed in the House of Representatives.●

● Mr. YOUNG of Florida. Mr. Speaker, I commend the gentleman from Virginia for requesting this time today to honor our colleague KEN ROBINSON for his 14 years of service to our Nation.

KEN and I were first elected to Congress in 1970, and ever since then our paths have continued to cross as we share many of the same committee assignments. Most notably, KEN was the first and only ranking minority member of the Permanent Select Committee on Intelligence on which I have served for the past 6 years. During that time, KEN was a leader in our efforts to strengthen and improve our Nation's intelligence-gathering capabilities.

We have also served together on the closely related Appropriations Subcommittee on Defense where we appropriate funds for many of the same programs we authorize on the Intelligence Committee. The subcommittee also oversees the entire Department of Defense budget. In this role, KEN has been instrumental in the strengthening of our Nation's defense.

Because these two assignments involve numerous sensitive and highly classified programs, we have spent many long hours in closed committee hearings. Through our work together, I have come to understand why KEN is one of the most respected Members of the House.

All Americans will miss KEN's work in Congress, especially his dedication to provide for our national security. The people of the Seventh Congressional District of Virginia certainly will miss KEN's efforts in Congress on their behalf. Through his position on the Appropriations Committee, and its Subcommittee on Agriculture, KEN has been able to provide important Federal support to the large population of western Virginia farmers.

Just as his two decades of service will be missed by his friends and neighbors back home, his strong leadership and special friendship will be missed by me and his many colleagues in Congress. I join with all Americans in thanking KEN for his service on behalf of our Nation, and in wishing him and his wife Kathryn the best of luck as they return home to the beautiful countryside of Winchester, VA.●

● Mrs. HOLT. Mr. Speaker, today I join with my colleagues in honoring KEN ROBINSON who is retiring at the end of this year after seven terms of consistent support for defense and foreign policy. I have always been impressed by KEN's reliability and straightforward attitude toward the problems we encounter in Congress. His intelligence and sincerity have been an inspiration to me and my good wishes go with him as he returns to northern Virginia and one of the most beautiful countrysides in the United States. We will miss KEN and the wisdom that comes from his accumulated experience in the House of Representatives. He has truly been a fine representative of his district.●

● Mr. McGRATH. Mr. Speaker, I rise today to bring to the attention of my colleagues the announced retirement of J. KENNETH ROBINSON. KEN has selflessly and with staunch determination served the people in the Commonwealth of Virginia and the Nation. As ranking minority member of the

House Select Committee on Intelligence, this gentleman has proven himself an outstanding leader and valued friend. KEN's contributions to this body include a wide diversity of legislative initiatives ranging from such areas as agriculture and rural development to defense. A leader who Members of both sides of the aisle can work with and respect.

J. KENNETH ROBINSON has served the Seventh District of Virginia for 14 years. Born and raised in Winchester, this gentleman has never forgotten the roots of his heritage. His constituency has been served by an individual who can be credited for his personnal understanding of the intricate needs and details of an area rich in history.

I am happy to be able to participate today in this special order to honor our good friend, J. KENNETH ROBINSON. It saddens me to see KEN retire, but I am equally confident that this gentleman will leave an impressive mark wherever his career and personal endeavors lead him.●

● Mr. STUMP. Mr. Speaker, I wish to associate myself with the laudatory remarks of my colleagues paying tribute to J. KENNETH ROBINSON from Virginia. I, too, wish to join in the chorus of paying tribute and recognizing the everlasting contributions KENNETH has made to this institution and our Nation.

Few Members of Congress have achieved universal respect during their service. J. KENNETH ROBINSON is such a Member. All of his colleagues—Republican and Democrat, conservatives and liberals—hold him in the highest regard. His expertise, his wise counsel, and the day-to-day privilege of his companionship will be sorely missed in this Chamber upon his retirement at the end of this Congress.

In addition to serving the good people of the Seventh District of Virginia for the past 14 years, KENNETH ROBINSON has served all the American people in an area vital to their well-being—the national security of the United States. Those of us who served with him on the Permanent Select Committee on Intelligence or the Committee on Appropriations know that KEN's leadership on national security issues has contributed tremendously to the improved security this Nation enjoys today. A list of his achievements as the ranking minority member of the Intelligence Committee and as a senior member of the Appropriations Committee would constitute a ballad of an unsung hero—unsung because he has worked assiduously and without fanfare to improve the Nation's most sensitive classified intelligence programs.

Through his service as ranking member on the Intelligence Committee and on the Committee's Budget Subcommittee, KEN led us in the rebuilding of America's intelligence capabilities. I am personally knowledgeable of his dedication to this purpose—and for this achievement the American people will be eternally grateful.

Mr. Speaker, I had the privilege to serve under KEN ROBINSON on the Intelligence Committee and the Budget Subcommittee. I consider that association to have been one of the greatest privileges that accompanied my election to this body.

Mr. Speaker, we wish KEN well as he moves forward to new pursuits. God bless, KEN, and Godspeed.●

● Mr. WOLF. Mr. Speaker, I am pleased to join with my colleagues in this special order to pay tribute to my colleague from Virginia, KEN ROBINSON, as he nears the end of his service in Congress after 14 years as the Representative of the Seventh District. I thank our colleague from Virginia [Mr. WHITEHURST] for organizing this special time.

It has been an honor to serve in this House for the past 4 years with KEN ROBINSON. It has been reported that former Minority Leader John Rhodes once called KEN ROBINSON the "Rock of Gibraltar," and that's a good description of KEN: always steady, always there and available and willing to help when you needed it. We will miss your steadying influence, KEN.

Since coming to the House in 1971, KEN ROBINSON has been true to his conservative beliefs and throughout his service has consistently urged a balanced budget, reduced Government growth, and a stronger national defense. His service in Congress has provided him with the opportunity to work for those principles in the important Appropriations Committee in the Subcommittees on Defense and Agriculture, and as the ranking Republican on the Intelligence Committee. He has recognized that the United States must be strong to be free and a part of being strong means adequate spending for personnel, equipment, and maintenance. He has worked in his quiet, yet firm and steadfast way to make those vital improvements necessary for the security of our Nation, motivated only by what needs to be done and what is best to make this Nation secure.

What has impressed me, too, about KEN ROBINSON is his solid devotion as a family man and his high ethical standards. Those are attributes every Member of Congress would do well to emulate.

KEN ROBINSON has been a true asset to the Virginia delegation and has served his constituents and this Nation with honor and distinction. He will leave a void in the delegation and in this House that will be hard to fill. I would hope that this administration will see the wisdom in using KEN ROBINSON in some capacity in the future on defense and intelligence-related matters and I will be working to convince administration officials that KEN ROBINSON can make a vital contribution to this Nation through his experience and expertise in these crucial issues.

There has been no finer gentleman to serve in this House than KEN ROBINSON. The Seventh District of Virginia, the Congress and the Nation are better because of his unselfish devotion to public service. My best wishes go to KEN and his family in all his future endeavors.●

● Mr. LENT. Mr. Speaker, I would like to join my colleagues today in paying deserved tribute to my good friend and distinguished colleague, Representative J. KENNETH ROBINSON, who will be retiring at the end of this session of Congress.

First elected in 1970, KEN and I were classmates together in the 92d Congress. In recent years, we occupied offices nearly opposite each other in the Rayburn House Office Building. Over the many years we have shared in Congress together, our personal and professional friendship has continued to grow. I have come to know and respect KEN as a man of honesty and integrity. Throughout his career, KEN has been a dedicated public servant, committed to doing the best job possible in representing the fine people of Virginia's Seventh Congressional District. His efforts on their behalf deserve our highest commendation.

With his key committee assignments, KEN has also had a significant impact on legislation important to our Nation, particularly in the defense and intelligence areas. As ranking minority member on the House Select Committee on Intelligence, KEN has demonstrated leadership and skill as one of our Nation's most able legislators. He is also a longstanding and influential member on the powerful House Appropriations Committee. In this capacity, KEN has been a key force in determining the all-important funding priorities for our Federal Government's programs and operations from top to bottom. KEN has met the challenges and responsibilities of his demanding post with energy and enthusiasm and has carried out his duties with the highest standards of excellence. He is an outstanding individual, and I am gratified to have served with him in the House of Representatives.

I know I speak for my colleagues in saying that we greatly appreciate KEN ROBINSON's exceptional contributions to this great Nation. He will be long remembered as one of our country's finest legislators.

My wife Barbara and I extend our warmest wishes to KEN, his lovely wife Kit, and their six children for happiness and success in the years ahead.●

● Mrs. VUCANOVICH. Mr. Speaker I am pleased that my colleague, Congressman WHITEHURST, has called this special order to recognize the many

contributions that Congressman KENNETH ROBINSON has made during his service in the Congress.

KEN ROBINSON has served the Seventh District of Virginia well for the last 14 years. He has served this House well particularly as the Ranking Minority member on the Select Committee on Intelligence. He has consistently supported funding for our intelligence operations and worked diligently to insure that our intelligence and defense needs are met. He will be greatly missed.

Although I have only served in this body for 2 years, I have come to rely on KEN ROBINSON'S opinions especially in defense and intelligence areas. He has provided his colleagues with accurate information when guiding intelligence legislation on this floor. I regret that KEN ROBINSON has chosen to leave this House, but I wish him the best of luck in whatever new endeavors he pursues.●

● Mr. SCHULZE. Mr. Speaker, I rise today to pay tribute to my friend, the Honorable J. KENNETH ROBINSON. KEN will retire at the end of this Congress, having faithfully served the Seventh District of Virginia since he was elected in 1970.

In point of fact, the most enduring accomplishment of KEN ROBINSON has indisputably come about through his service on the House Select Committee on Intelligence. Looking back on the late 1970's—when our intelligence community suffered through a blizzard of revelations regarding its intelligence capabilities—is not a savory experience. It is still not possible to calculate the extent to which our national security was damaged.

The fact that our intelligence community has only slowly bounced back to the point where it is again a sacrosanct and effective servant in the subtleties of our national security is due in great portion to the tireless, stable, and studied dedication of KEN ROBINSON.

Mr. Speaker, it is in the nature of intelligence work that few can be entrusted with its handling. The American people will never know all the contributions that KEN has made to their collective security because of the overriding dictates of confidentiality.

But it is safe to say that our country would be the worse had not KEN ROBINSON been called to serve in this body.

KEN, it won't be the same in the 99th Congress without you, but your decency, public spiritedness, and commitment to the welfare of the American people will always infuse this Chamber. I wish you Godspeed as you return to your Jeffersonian paradise in Virginia.●

Mr. WHITEHURST. I yield back the balance of my time.

GENERAL LEAVE

Mr. WHITEHURST. Mr. Speaker, I ask unanimous consent that all members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the subject of my special order tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 663. Joint Resolution making further continuing appropriations for fiscal year 1985.

A TRIBUTE TO THE HONORABLE RAY KOGOVSEK OF COLORADO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado [Mr. BROWN] is recognized for 60 minutes.

Mr. BROWN of Colorado. Mr. Speaker, I rise to pay tribute to my good friend and colleague from Colorado, RAY KOGOVSEK, who unlike others of us, has the good sense to be leaving this body voluntarily at the end of this session.

In addition to being a dedicated Member of Congress since his election in 1978, RAY is a close friend—even to Republicans. I had the honor of serving with him in the Colorado State Senate. He has always served the public with integrity, and I want to take this occasion to wish him well in any future endeavor—at least nonpolitical ones.

Just 43 years old, RAY is giving up his House seat to return home to Colorado. He plans to become a consultant on natural resources, education, and labor issues. As many of us have, RAY has felt the pressures of working hard to serve his district in the House—the constant travel, missing home and family, living on airplanes. He has decided that his family is more important than political considerations, and who among us can argue with him? RAY is leaving us for the best of reasons. I know he will miss his two colleagues from Arkansas and Connecticut, with whom he shared bachelors quarters. But I imagine this loss will be tempered by the fact that neither of these esteemed gentlemen are known for their culinary skills.

The son of a Pueblo, CO, steelworker, RAY has spent his 6 years in the House as a member of the Interior and Insular Affairs Committee, including its Subcommittees on Public Lands and National Parks, Water and Power, Mining, Forest Management and Bonneville Power Administration; and the Education and Labor Committee and its Subcommittees on Employment Opportunities and Post-Secondary Education. He also served one term on the House Public Works and Transportation Committee and its Surface Transportation Subcommittee. RAY was active in several House organizations, including those focusing on solar and renewable energy resources, coal, steel, rural problems, tourism, small business, U.S. relations with Mexico and the Democratic whip organization, and we forgive him for that last activity.

From 1968 until 1978, RAY served in the Colorado General Assembly, the last 5 years as minority leader of the Colorado Senate. During those years, RAY was actively involved in working on the State budget and served as chairman of the Audit Committee. Education was a special interest then, as it has continued to be.

As a Member of Congress, RAY has used the money he has received as pay raises to fund a college scholarship for a specially deserving resident of his congressional district. So far, seven individuals have been provided with a year's tuition and books. Now as he is leaving Congress, he would like his relationship with education to continue. He will become a part-time visiting professor to hold seminars for students on the practical side of politics.

As is traditional for Representatives from Colorado, RAY has vigorously been involved with water and public lands issues.

□ 2100

Of the more than 40 pieces of legislation he has sponsored in his House career, most have touched in these areas. These include legislation to provide Federal payments in lieu of taxes, additional Colorado wilderness, and vitally needed Colorado water projects.

Mr. Speaker, I know my colleagues will join me in wishing RAY all the best in the future. I will miss his wise counsel, his sense of humor, and his friendship. Colorado will miss his dedicated service. Indeed, the House will be a poorer place without him.

Mr. Speaker, I would like to yield to my colleague, the gentleman from California [Mr. COELHO].

Mr. COELHO. I thank the gentleman for yielding.

Mr. Speaker, when RAY and you and I and others were first elected, he came here and joined the Committee on Interior and Insular Affairs and became one of the more responsible members of that committee, understanding the tough decisions that needed to be made in regard to balance, and so forth. He has done a tremendous job there.

But the thing that RAY has done is that he has been able to develop his personal relationships with so many of us in the House. He is one of the more popular Members of this body, and he is sorry that his wife, Eulice, could not spend more time with him here. She and my wife, Phyllis, became very good friends, and we know that his commitment to his family is uppermost in the family, and we appreciate and respect his decision to leave.

While the gentleman in the well forgave him for being in the Democratic whip organization, we have not forgiven him for leaving the House because we felt that he could keep that seat as long as he wanted to.

But we are here tonight, those of us who are, to let RAY and the people in Colorado know that he will be missed. His friendship in particular will be missed by me and many others. But we know that he will be successful in his new chosen field and we wish him luck.

Mr. BROWN of Colorado. I thank the gentleman for his comments.

While it is clear that he was the only Democrat who could hold that seat, we are delighted to have him relinquish it.

Mr. COELHO. If the gentleman will yield further, I think that the gentleman in the well knows that while we are going to miss RAY and his counsel and his friendship that he has set things up in that district so that we will have a replacement from the same side of the aisle. I do not want to mention party labels here, but from the same side of the aisle.

Mr. BROWN of Colorado. The gentleman from California is well known for his sense of humor.

Mr. Speaker, I would like to yield at this time to the gentleman from Colorado [Mr. KRAMER].

Mr. KRAMER. I thank the gentleman for yielding and for taking out this special order. I am going to try to have a little bit of fun here. I know these are always so formal, so I hope that the person on behalf of whom this special order is taken out, who happens to be in the chair now, will allow me to have a little liberty with my prepared remarks.

Our good friends, the gentleman from California, had some liberty with his remarks, so think it is only fair that this side of the aisle get to join in the fun.

Mr. Speaker, I rise in tribute to my good friend and colleague from Colorado delegation, RAY KOGOVSEK. Too often around here when we use the expression "good friend," you better watch out because you know that perhaps something other than that is intended. But in this context, I truly mean that: a good friend, one that I will sorely miss.

RAY has only been here three terms, but he has made a mark on this body and he will be retiring; as you pointed out, one of the few to retire voluntarily from this institution.

I went back to figure out how long I had known our colleague from the Third Congressional District, and in my case I came up with a decade. Perhaps he will not believe this, and perhaps he will not want to believe it, but our careers in elective office are very much parallel.

We served together in the Colorado State house, he as a Senator and I as a Representative. In 1978 the people of our neighboring districts both sent us back here to represent them in the House. In the 96th and 97th Congresses, we both served on the Committee on Education and Labor, a committee on which RAY still serves with steadfast dedication.

Now RAY is leaving us, so in January, for the first time in many, many years, we will not be serving together as legislators.

I had the privilege of attending a dinner in Pueblo last evening at which RAY was the featured speaker and the honored guest, and it was very obvious from the loud accolades and standing ovation that he received how well regarded, and I would say beloved, Congressman KOGOVSEK is in his wonderful hometown of Pueblo.

RAY is the grandson of immigrants from Yugoslavia, and he has shown the best of what the American dream is really all about, that a person can rise as far as his dreams and aspirations will take him.

I am going to get in a few unprepared comments here that I just made note of as we were waiting to go on this evening.

RAY, I am going to give you forgiveness tonight for that dastardly statement that you made about me one time in which you indicated to a press reporter that I would not be the kind of guy who you would want to sit down and have a drink with, but I think this needs to be explained and taken in context.

RAY was under a great deal of pressure, in a vigorous campaign that I had, to make some rather adverse comments about me in order to help the opposition. He was continually hit upon by this reporter day after day after day, and finally in some kind of relinquishment, that was the worst thing that he could come up with about me. I know that many have done much better in that regard. So, RAY, not only are you forgiven, but you have my sincere appreciation for not having taken the gloves off when you had a full opportunity to do so.

I might make another observation about why I am personally so sad to see you leave, RAY. When those disclosure statements come out once a year and we have to make those annual filings, I know some folks around here are very hesitant to make those filings because their assets are so voluminous that it is embarrassing to have to state them.

Others of us sometimes make those statements with trepidation because our assets are so inconsequential. Quite frankly, by my calculations, although I was never good at mathematics, with your departure I now become the poorest Member of the delegation, so I have my personal reasons to really regret your departure.

RAY, let me say, if I might, that you are taking this in really the good natured way in which it was intended. One of the things that characterizes you as such a fine person is your good humor, down-to-earth style, optimistic outlook—rare commodities in Washington. You are always smiling.

Over the years you and I have often come down on opposite sides of the issues, probably more often than not, but I might say that in doing so you have always been a gentleman and it has been a real pleasure to serve with you not only in the Colorado Legislature but here as well. I only regret that I have not been able to convert you to my way of thinking. Nevertheless, your departure from this body does not in any way mean that I will relinquish future attempts to do so.

I know that I echo the sentiments of our colleagues, RAY, when I say that I hope you do come back and frequently visit the Nation's Capital.

My heartfelt good wishes to you and Eulice and the girls, and I sincerely hope your return to private life will bring you all the success and happiness in the world.

□ 2110

Mr. BROWN of Colorado. Mr. Speaker, I yield to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Speaker, I appreciate the gentleman yielding.

I think it is only appropriate that the gentleman from Colorado [Mr. BROWN] took this special order, because I know he appreciates RAY tremendously for a number of reasons, foremost among them, however, is the fact that RAY interrupted the line of succession and took Jim Johnson's white whale off the district's hands.

RAY, of course, continues to be well-known in town, driving one of the more antique automobiles that was ever found abandoned on Capitol Hill. It looks like something that just barely missed a role in Ghostbusters, but it has gotten him back and forth to Dulles Airport and all of us who enjoy flying from Denver and back on a regular basis with RAY know how important it is to have him along on those trips to keep us all in good morale.

I wanted to provide some solace to our good friend, the gentleman from Colorado [Mr. KRAMER]. He said that

RAY is a guy who said at one time that you could not sit down and have a drink with him. Well, I can say the same about RAY. You cannot sit down and have a drink with RAY, either; five maybe, but not one.

RAY is the kind of guy who makes friends easily and they will go to the wall for him. I remember, as a matter of fact, during our first time here when Mr. KRAMER and Mr. KOGOVSEK worked so closely together for the benefit of Colorado in regard to Fort Carson. All of us remember just exactly the effect of that teamwork. It split our class right down the middle, as I remember.

But RAY, there are a lot of reasons why I am pleased to be here tonight. Foremost among them is the fact that there are so few others here. This evening, of course, with the camera panning the floor, as I am sure it normally does, somehow a misimpression may be sent back to Pueblo and it is embarrassing, of course, to have you in the chair to preside over this, but I want everyone to know, I want to go on record that HANK BROWN did not plan it this way. This was supposed to be an outpouring of feeling from your friends. I am sure others eventually will join us here on the floor in order to be able to provide you with some real sense of your value and worth to your colleagues.

I think particularly it is important that you know who your friends are and I think you can really very quickly conclude tonight just exactly who they are.

It is not inappropriate for me to be here this late, because many times during the last 6 years you have kept me out late and it has normally been among the more enjoyable evenings that I get to spend here, because truly, you have been somebody who it has been very enjoyable to get to know and to deal with in ways that go beyond the business of the floor and the activities of Congress and reelection and the things that normally take all of the attention and time of Members, to the point where we rarely have a chance to really get to know each other as individuals.

I know you very well. I know you are the kind of guy who will let my socks burn up in the dryer. You do not do it regularly, because I never asked you to help me again in that regard after the time it did happen; but without being too facetious, you are the kind of guy, RAY, who it was enjoyable rooming with and spending evenings with and helping, because you appreciated it. We were and still are and hopefully will continue to be people who got beyond the surface here. It so often does not happen that way.

I have been privileged to sit on the Water and Energy Subcommittee and to know more about the problems of your district than I had ever intended or frankly any interest in knowing.

I assume that you will continue to keep me educated on this subject, not only during the next 2 years, but perhaps in the future beyond that when I hope you have an opportunity to continue to serve the people of Colorado in perhaps even a broader sense.

There is, I think, some courage you are showing as you leave, and I am serious about this now. I felt this way when JIM SHANNON made a decision, an ill-fated one in retrospect, to take the courage to look beyond the immediacy of his career at a young age to try to move on to another place in time, the Senate. You had the same kind of courage to stand up to the pressure that we all feel simply to maintain ourselves in office, the pressure to try just one more term in Congress to see whether or not we could find some other option, some other way to go. You had the courage to face up to the fact that there is life after Congress and we can make it so if we simply have the will to do it.

I respect more than I can say your dedication to Eulice and your family and to the people of Pueblo and to the people hopefully in the Greater Colorado area appreciate your service here.

I think you will continue to serve them in many other ways, both private and public. I certainly respect your willingness to go into the future with courage and dedication to some real values that transcend the kind of things that propel and motivate most of us to come here and perhaps stay longer than we should.

Let me conclude simply by saying that I intend to do anything I can to perpetuate your memory. I may introduce a bill next year to name a bookstore in Pueblo after you. I am sure after my bill would be enacted and signed into law that certainly would cause it to be closed, but only through your most diligent efforts have you prevented that absolute catastrophe from happening over the last 6 years. I have been ashamed to have some role in assisting you in that regard, as a matter of fact.

Let me conclude simply by thanking the gentleman from Colorado [Mr. BROWN] for giving us this opportunity for a bipartisan tribute to a man who I think among many in our class of real substance stands out and really is alone in his courage and in the number of people who truly find him a friend.

Mr. BROWN of Colorado. Mr. Speaker, I thank the gentleman from California.

I might say that those of us on the Republican side who have been concerned about Mr. KOGOVSEK, because obviously he is talked about as a possible candidate for Governor or Senator, and in planning tonight there was some concern about speaking in negatives in regard to him; but frankly, our Democratic colleagues have done such a good job on that, I do not think we need to go ahead with that.

I would like to yield at this time to the gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Speaker, I thank the gentleman for yielding.

I just happened to be walking by and I heard we were having a roast, so I thought I would come on over and talk a little bit. It was interesting to listen to my colleague, the gentleman from Colorado [Mr. KRAMER], also from Colorado, speaking about the parallels between his career and RAY KOGOVSEK's career.

I noticed he said you served in the State House together. You served in Congress together. You had the same committees and now, Congressman KRAMER, RAY is leaving Congress. I wonder if that tells you anything about your present campaign for reelection. I hope not.

Let me just say that this is a gentleman with whom I have had few opportunities to stand on some common ground. We do not have any committees together. We have not worked on legislation together, but one thing I have noticed about RAY is that somehow you remember him and you remember your very incidental contacts with RAY.

You know, there are so many trappings in this job and so many different dimensions to it, being here in Washington with the people that you meet and the things that you do, it seems that really the most important thing to us and the things that really stay with us the longest are the people we meet and the people of truly fine character. I have not known RAY for a great deal of time and I have not had those common committees or that common ground, but he truly stands out as a guy who has a lot of depth, who can disagree with you on issues without being disagreeable, which I think is a very important thing in this House of Representatives.

I am very sorry to see RAY leave. Even though he is from the other side of the aisle, I think that he has brought a great deal of decency and good will to this House and that is something we have been in very short supply on lately.

So I thank the gentleman, my friend from Colorado, for taking out this special order.

Mr. BROWN of Colorado. Mr. Speaker, I thank the gentleman from California.

I might say that his observation about the similarity between Congressman KRAMER's career and Congressman KOGOVSEK's career is certainly apropos and well understood. Those who know the two well understand that they have complementary voting

records; that is to say if Congressman KOGOVSEK would get a 95 AFL-CIO rating, Congressman KRAMER would get a 5, the other 5, and when Congressman KRAMER got a 90 in the conservative index, Congressman KOGOVSEK got the other 10; so they have worked as a team I think to balance things out.

I would like to yield at this time to the gentleman from California [Mr. LEWIS].

Mr. LEWIS of California. First, HANK BROWN, I appreciate your taking out this special order on behalf of our dear friend, RAY KOGOVSEK.

I must tell you that I had no idea that we were doing this bit tonight. Frankly, I only learned of it—if the gentleman would share with me his attention—I only learned about this after spending 2 hours waiting at the Democrat Club for RAY to join me and inquiring in his office, I heard they were having this affair on the floor in his behalf.

□ 2120

He is an amazing fellow. I am frankly amazed that a fellow from Pueblo could have these kinds of friends. I am kind of amazed that a fellow from Pueblo can have friends at all.

But to go to the extent, RAY, of moderating, as you have, KEN KRAMER, I mean if there is a contribution to be remembered it is that when I first met you you said "I am not sure I want to have a drink with KEN KRAMER." I mean at this point in time what you have done with him is probably going to radically readjust our side of the aisle for all time to come.

It is interesting to see as many people over here talking about RAY KOGOVSEK as there were on the other side. I remember as we came to Congress together one of our early conversations involved our sharing a mutual frustration about this place; that is, that everything tends to be painted in partisan terms. "What is this business, that side of the aisle and this side of the aisle?" And instead of dealing with each other as people and recognizing that issues and problems are involved by realizing there is a lot more involved than just partisan politics, you were one of those people who early on around here communicated once again that it does not have to be that way.

Rather than just having this be an ongoing roast, I would like to make a serious point, if you will. Your predecessor, Jim Johnson, was a very decent guy, the kind of person I believe we need in public affairs, and he chose to leave early. You, in turn, coming into his place reflected the fact that your district appreciates talent, not just partisanship.

The kind of people that we need in public affairs are those who recognize that we have got a job to do and a contribution to make, that the job is a lot more important than just our ego maybe.

The crime of it all, however, is centered around the fact that in the Congress these days, in the goldfish bowl that is a part of our life, in the reality that the fourth estate tends to deal in the negative, the pressures are such that often very capable, very talented people like yourself, for any number of reasons, choose to leave early.

I am not one of those who is here to say that I am glad you were able to make a decision to leave voluntarily. I frankly think the House will be the lesser for it, and I think we would all be better off if we had more people like you, and there were reasons, circumstances that encouraged you to stay an awful lot longer.

This not going to be the end of your work in public affairs. You have a great contibution to make, there is no doubt about that in my mind. And as you go out there and enjoy some of the value in a material sense of the private sector, I am sure that you are going to be chipping away at trying to make a difference.

It has been for me a real thrill to be able to say that RAY KOGOVSEK is a friend, and he is a friend who will be a part of my life and relationship long beyond this evening.

Congratulations, RAY.

Mr. CARR. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Colorado. I yield to the gentleman from Michigan.

Mr. CARR. I just want to wish you well, RAY. If you get out there and decide you want to come back after a sabbatical, give me a call and I will show you how to do it.

You will be missed, and it has been my privilege to serve with you. I hope we will always be friends.

Mr. NIELSON of Utah. Will the gentleman yield?

Mr. BROWN of Colorado. I yield to the gentleman from Utah.

Mr. NIELSON of Utah. I was on the phone for an hour on a radio talk show, because we had scheduled a debate for this evening and we decided to do it from here. When I got out of that I understood that we were having a roast for Mr. KOGOVSEK, and so I felt there were two things that I could say.

First I think it is very clever, first of all, to be presiding at your own eulogy. Very few of us have that opportunity.

Second, I would like to point out I do have some claim to association with RAY because we share a common border, the whole length of the State of Utah on the east side which is shared with you, and we have at least one project, the Deserette G&T Program which has an electric powerplant in Utah, and using coal from neighboring Colorado.

We also have common interests in the Synthetic Fuels Corporation activities in our common area, plus the fact that we have competiton among our ski resorts. Yours are almost as good as Deer Valley and Park City, and we appreciate that common ground.

Finally, we have been on the Education and Labor Committee together this last time. Let me say I have never heard you raise a partisan voice in that committee. You have been a moderating influence. You have helped to keep some of the more expansive rhetoric down from your side of the aisle. I cannot say you have done it one our side, but you at least have done it on your side.

It is a pleasure to know you, and to know you as a good colleague and a neighbor, and I hope whoever they do send from the district will be as fine a Congressman as you are.

Mr. BROWN of Colorado. I might note for the benefit of our colleagues that know Colorado pretty well, political leaders in Colorado have been noted sometimes for their name changes. It is not an uncommon event in Colorado for political leaders to decide they would like a different name, and Congressman KOGOVSEK is certainly no exception.

Well I remember in the State senate that Senator Harry Lock used to refer to him as Congressman Kovofig. Yet sometimes Senator Lock changed that, and we finally convinced Senator Lock to change that and correct his pronunciation of RAY's name, and thereafter he became known as Congressman or Senator Kosygin. It was by that title that Senator Lock referred to him often in the senate chamber.

But RAY's name changes did not stop there. In Pueblo at the Columbus Day dinner that they have, he has become known as Congressman or Senator Kogoselli.

RAY never seems to bother with those. He seems pleased by all of those different names.

Mr FAZIO. Will the gentleman yield?

Mr. BROWN of Colorado. I am pleased to yield.

Mr. FAZIO. I might just point out that our good friend from Alabama, Congressman BEVILL, calls RAY Kogosek, Congressman Kogo-sek. The good thing is that he does know how to pronounce animus laplata and has done so each year in the appropriations bill.

Mr. BROWN of Colorado. He seems to excel at that during campaign time, and he finally gave up having people learn his name and he changed his

name during the campaign to Congressman Kogo.

But in spite of the name changes, because name changes do not seem to bother politicians from Colorado, RAY has prospered, and I think some historian will look back some day and could well ask the question why RAY has been so well liked and so effective, because he has indeed been both.

I think it is because he is poised enough to admit it when he has made a mistake. I think it is because he is wise enough to listen to others. I think it is because he is honest and modest, even in the heat of a campaign when we are all not necessarily at our best.

I remember a time when Congressman KOGOVSEK was the leader of the Democratic Party in the State senate and I was assistant majority leader in that same State senate, and we had a chance to testify or to speak before the Colorado Counties Association. I was well prepared for him. I had him dead to rights on the issues. He and his party had done horrible things, or at least proposed horrible things to the Colorado counties, and indeed this would be my chance to make sure that the county commissioners of both parties throughout the State knew their sins in detail. So I prepared with great vigor at the chance that I had to make my presentation, and I made it with all of the vigor that I could, and enthusiasm, dealing in infinite detail, and I had him dead to rights.

After I sat down RAY came to the microphone knowing, knowing there was not a thing that he could do to defend himself, knowing he had indeed sinned on the issues before the Colorado counties, and his response was something to the effect of what a nice person HANK BROWN was and how much he liked him, and he could not understand what had gotten into HANK today, but normally, he assured them, they would like me very much, and he utterly destroyed me before the group that I had come to destroy him before.

I pass that on because I suspect in the future there will be those who think they have RAY KOGOVSEK dead to rights and they will find his charm and wit and his intelligence and his candor may well reverse the tables.

It has been a privilege to serve with you, RAY, and I suspect you are not finished with your public service. At least I think our State and our Nation will be poorer if that is the case.

● Mr. FORD of Michigan. Mr. Speaker, I rise today to commend my distinguished colleague from Colorado, RAY KOGOVSEK. RAY will be retiring from the Congress at the end of this session and his presence will be sorely missed by those of us who have had the opportunity and good fortune to serve with him over the past 6 years.

I have had the pleasure of working with RAY as a colleague on the Education and Labor Committee and more specifically as a fellow member on the Subcommittee on Postsecondary Education. He has served that subcommittee well by his attentiveness and quick grasp of the issues and his willingness to dedicate his time and energies to the many difficult problems that presented themselves. For example, RAY is responsible for handling a floor amendment to an omnibus education bill this summer that will ensure the smooth operation of the Federal student financial aid system for the next 2 years.

Above and beyond his legislative activities, I have found RAY KOGOVSEK a pleasure to work with. He has at all times conducted himself with the integrity and decency that brings honor to the House of Representatives. As a legislator he was always on the side of those who needed help and were struggling for their rights. As a person, he fought for his beliefs in a direct and honest manner that reflected well not only on him but also on our institution.

Serving in the Congress was not RAY'S first effort in the political arena. In fact, most of his adult life has been spent in public service. He is a veteran legislator with 10 years experience in the Colorado Legislature before coming to Washington. I wish him well in his future and feel confident that he will use the benefits of his experience and expertise to continue to serve the public as he enters the private sector.●

● Mr. WIRTH. Mr. Speaker, I rise with my colleagues from Colorado and the House today to commemorate the conclusion of the outstanding congressional career of my good friend from Colorado's Third Congressional District, Mr. KOGOVSEK. I am pleased to join with RAY'S many other friends from this body in extending this well-deserved tribute to my fellow Coloradan.

I'm not sure all of the Members realize the challenges anyone faces when he or she aspires to represent Colorado's Third District. For those unfamiliar with the Third District, let me point out that it is among the five largest geographic areas represented in this body. It is certainly among the most beautiful of any in the Nation. Yet, ultimately it is the third's diversity that really stands out. From the industrialized southern end of the Front Range around Pueblo, to the agricultural areas of the Western Slope, the Third District provides a stark contrast between Colorado's agricultural and ranching heritage, its older urban industrial areas and its new, growing technology interests. To be sure, the task of representing a district as large and diverse as Colorado's Third is not an easy one. But it is in that very challenge—that of representing his district—that we all owe RAY KOGOVSEK our utmost praise and respect.

When Mr. KOGOVSEK first joined this body in 1979, he wisely sought and won assignments on both the Education and Labor and the Interior Committees—assignments that allowed him the opportunity to work daily on the issues which impact most dramatically on his constituents. From his work on public lands issues, to those involving Native Americans, to the questions of how best to protect the West's precious water resources, RAY'S work on these and the other issues within the purview of his committee assignments are indicative of his real commitment to serving the needs of Coloradans within and outside his district.

Many of my colleagues are aware that RAY grew up the son of a steelworker in Pueblo, CO. It's important to remember that background in labor and a working class family when assessing the strength of RAY'S career. Ultimately, it is that background and its attendant concern for common American families everywhere that has guided RAY'S achievements in the House.

Mr. Speaker, I'm sure many of my colleagues rising today will eloquently speak to the many accomplishments of RAY KOGOVSEK'S career in this body. I will not build on that any further, but, rather, close by praising my friend from Colorado for his concern, for his caring, for his tireless work on behalf of his constituents and the people of Colorado. RAY, here's hoping the people of the third will always be so adeptly represented.●

● Mr. SEIBERLING. Mr. Speaker, I rise to pay tribute to Congressman RAYMOND P. KOGOVSEK, who is retiring from the House. It has been my pleasure to work with RAY on the Subcommittee on Public Lands and National Parks and on the full Interior Committee.

The House is certainly losing a fine Member. RAY is a warm, intelligent, thoughtful, and considerate individual. His charm and grace have certainly made it very easy to work with him. RAY is a quiet but effective legislator who gives careful reflection to every issue.

Several years ago, I worked with RAY to get wilderness legislation enacted for the State of Colorado. As is often the case with such legislation, there were competing interest at work which made it hard to reach a consensus. RAY worked diligently and tirelessly to find a compromise which was acceptable to all the interested parties. I enjoyed working with RAY on this

issue, as I have enjoyed working with him on various wilderness and national park legislation. The people of Colorado should be very proud of his efforts.

I also greatly appreciated RAY's help in passing the 1980 Alaska lands bill. While RAY and I did not agree on every issue during the debate on that landmark legislation, I certainly did appreciate his reasoned approach to the matter. His support for the final version of the bill was very helpful in getting the bill through Congress, and he and the people of his State can be proud of the role that he played.

RAY, those of us who have worked with you will miss you a great deal. The people of your District are losing a fine Representative.

RAY KOGOVSEK has represented the people of Colorado well. He has consistently been a strong supporter of working people across the country, and he has never forgotten those who elected him to Congress. RAY has made a lasting contribution to the work of the House, and RAY's colleagues will miss him a great deal.●

Mr. BROWN of Colorado. I yield back the balance of my time.

PLANT CLOSING AND THE COLLECTIVE-BARGAINING PROCESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. CONTE] is recognized for 60 minutes.

● Mr. CONTE. Mr. Speaker, back-to-back recessions have educated us as to the harsh realities of plant closings and layoffs. There is no definitive data that outlines clearly the national dimensions of the problem, but the Bureau of National Affairs estimates that there were 619 closures directly affecting 215,525 workers in 1982. Other studies suggest that those figures are conservative. In my home State of Massachusetts, a survey of plants with over 50 employees was conducted to determine the impact of plant closings. Recently completed, the survey revealed that between January 1982 and December 1983, 67 plants closed and 12,368 jobs were lost. In that same report, a study of permanent and indefinite layoffs during the 8-month period between January through August of 1983 showed that 11,696 people were laid off from 72 companies. Whatever the exact figures, no elaboration of the considerable personal and social suffering associated with these decisions is required.

To ensure the compilation of more complete and comprehensive data on the national level, I worked this year through my position as ranking minority member on the House Appropriations Committee to secure $5 million to fund and create a plant closing data collection project in the Bureau of Labor Statistics. This money will be used to establish an official national statistic on plant closings and mass layoffs. In a time of budgetary constraint, it is difficult to advocate the creation of new programs, but I fought for this money without hesitation because I strongly believe that addressing the plant closing issue needs to be a priority for Federal policymakers.

Creation of a national plant closing statistic is an important step forward, but it is not a solution. My friend and colleague from Michigan [Mr. FORD] has led the effort to fashion a comprehensive Federal response to this problem. We are all familiar, however, with the problems that have plagued the legislation he has sponsored. After 10 years of debate, the National Employment Priorities Act remains before committee, and further revision is understood by almost all parties to be necessary. In an effort to help further the stalled plant closing debate, I have introduced new legislation addressing this critical issue. The measure is not yet in perfect form. It is introduced, in effect, as a discussion draft, designed to inject a new idea into the debate and help put the plant closing issue back on the front burner.

In essence, my bill (H.R. 6258) would amend the National Labor Relations Act [NLRA] to include plant closing as a mandatory topic of collective bargaining. Plant closing would be defined as any change of operations that may reasonably be expected to result in the unemployment of 100 employees or 15 percent of the work force at a particular plant, whichever is less. This standard is borrowed from the Ford bill.

Currently under the NLRA, "wages, hours, and other terms and conditions of employment" are mandatory topics of bargaining between the union and management. "Terms and conditions of employment" have been defined by the courts and the National Labor Relations Board [NLRB] to include severance pay, work rules, health and retirement benefits, and other related issues. In First National Maintenance Corp. versus NLRB (1981), however, the Supreme Court ruled that management's decision to close a plant is not a term and condition over which the Congress has mandated bargaining. My legislation would, in its simplest restatement, reverse that decision.

What will this mean? Currently, a number of collective bargaining agreements contain plant closing provisions, such as notice requirements and job relocation assistance. Recent contracts negotiated by the United Rubber Workers and the United Auto Workers are perhaps the best known such examples. Management, however, is not required by law to negotiate to impasse over this issue, and labor is not permitted to strike if agreement cannot be reached with respect to plant closing. Given the uncertainties of today's economy, plant closing and job security have joined wages and benefits as labor's priority items in negotiation. H.R. 6258 would provide organized labor with the statutory protection it needs to ensure that plant closing will be a subject of bargaining.

Although the bill is applicable to union shops only, a survey of Fortune 500 firms by Robert Schmenner provides some evidence indicating that collective bargaining over plant closing could have considerable impact. Of the facilities surveyed by Schmenner, 66 percent of the closings involved unionized plants—although only 52 percent of the surveyed firms were unionized.

The bill also contains a mechanism that would be applicable should a plant closing decision be made during the life of the existing labor agreement. This four-step process would proceed as follows:

First, when management makes a decision to change its operations that would result in a plant closing—as defined above—it must notify the union and the Federal Mediation and Conciliation Service [FMCS] of the proposed change in operations.

Second, no later than 21 days after receipt of that notice, the FMCS must decide whether bargaining over the proposed decision would be futile. In making that determination, there will be a presumption that bargaining should be required. Management can rebut that presumption only by demonstrating that bargaining at that point would not "further the purposes of the NLRA." This phrase is defined in the NLRA's preamble to mean "maintaining industrial peace." Put in layman's terms, this broadly defined standard would mandate bargaining in most cases, except those were management can prove that negotiation would be unquestionably futile. Labor would certainly be afforded the opportunity to participate in that decisionmaking process.

Third, if management cannot rebut that presumption, a 90-day period of bargaining would be required in an effort to save the plant and/or jobs.

Fourth, if at the end of the 90-day period an agreement has not been reached, management would be free to proceed with its decision to change operations unless the FMCS determined that management had not bargained in good faith or that an extension of the bargaining period held out the reasonable possibility of saving jobs at the plant. In either case, the FMCS

would be empowered to extend the negotiating period.

This four-step process would be superceded by an similar provision agreed to by labor and management and embodied in a local contract.

Several points are worth noting about this process. First, and perhaps most importantly, the negotiating authority embodied in this mechanism should be distinguished from authority that labor currently has to bargain over the effects of a plant closing, or effects bargaining. H.R. 6258 would give unions the authority to bargain with respect to the actual decision to close, or decisions bargaining.

Second, until the decision in First National Maintenance there had been considerable debate in the courts and the NLRB about the impact of a per se rule that would require bargaining in all plant closing decisions. Although the simplicity of a per se rule is attractive, there certainly are those situations where no amount of bargaining would change the decision—the closing is, in effect, unavoidable. A natural disaster that destroys the plant is the most extreme such example, but there are other circumstances that demonstrate the need for permitting management to retain some degree of flexibility in ordering a closing relatively quickly.

I believe, however, that bargaining has the potential to make a difference in most decisions. Dispute resolution is the legacy of collective bargaining, and there can be no more important issue of potential dispute between labor and management than the ultimate decision to close a plant.

The task then is to strike a balance between management's need to retain flexibility in certain limited circumstances on the one hand, and the considerable potential that bargaining holds for saving jobs on the other. The rebuttable presumption test contained in H.R. 6258 is an attempt to strike that appropriate balance. It would presumptively mandate bargaining in all cases except those where management can convince the FMCS that bargaining would be futile. In recognition of the time-sensitive nature of those closing decisions, the FMCS would be required to make that determination within 21 days.

With the close of the 90-day period mandated for bargaining, another difficult hurdle presents itself for resolution. If no grant of authority is made to permit extension of the negotiations, there remain the possibilities that management may use this process solely as a means of extracting new concessions from workers or that either party may simply stonewall throughout the 90-day period. To surmount these obstacles, the bill vests authority in an independent third party which can act as final arbiter in this process by extending the negotiations if it believes management has not negotiated in good faith or that an extension holds out the reasonable possibility of saving jobs and/or the plant. Admittedly, this new authority increases the role and responsibilities of the FMCS. This would have been the case, however, regardless of which agency was given this new authority. Given that the FMCS is established under the NLRA and currently has authority to intervene in labor disputes, I believe it is the most appropriate agency to assume the functions specified in the bill.

The following example illustrates how I envision this process working. The management of Company X makes a decision that profit margins are no longer at a level that will support continued operation of the plant—shipping rates have increased and overhead at the plant is too high. Under current law, that decision to close is clearly, and solely, within the purview of management. Under H.R. 6258, however, management would be required to notify the union and the FMCS of its proposed decision to close, once made. If management argues that this decision is unavoidable and that no amount of bargaining could possibly change it, the FMCS would have up to 21 days to decide if bargaining would truly have no impact with respect to modifying or reversing the decision. In the example cited, increased shipping rates are likely to be a fixed cost that bargaining cannot directly affect. The implementation of cost-saving measures at the plant, however, could indirectly compensate for or overcome the total increased manufacturing costs caused by the change in shipping rates.

Assuming, therefore, that management is unable to meet the burden of demonstrating that bargaining would be futile, a 90-day period of bargaining would be mandated to explore alternatives to the closing. If at the end of that 90-day period a conclusion to the negotiations has not been reached, the FMCS is authorized to extend the bargaining period if it concludes that management has not bargained in good faith or if further negotiations hold out the reasonable possibility of saving jobs at the plant.

It should be remembered that this process would be superseded by any similar provision contained in the local contract. The trust of the bill is to give deference to the collective-bargaining process whenever possible, and if the parties have negotiated a process through which a plant closing decision is to be bargained, that process should be respected. Once plant closing is made a mandatory topic of bargaining, presumably most or all local contracts will contain plant closing provisions within the next few years. In the interim, H.R. 6258 provides a resolution mechanism in the event the closing occurs during the life of the contract and the contract does not yet contain an applicable provision.

One of the most attractive features of using the collective-bargaining process for this purpose is that it will allow plant closing solutions to be tailored to meet the specific needs and circumstances surrounding a particular shutdown proposal. This has been one of the most troubling problems confronted during the plant closing debate of the last 10 years—fashioning an omnibus bill that meets universal concerns but remains flexible enough to meet specific factors contributing to a particular closing. The Massachusetts report cited earlier conceded that macroeconomic and international factors often motivate a decision to close. The study noted, however, that regional and firm-specific factors also contribute to most closing decisions. "Boilerplate" solutions, therefore, may simply be inadequate, inappropriate, or both. H.R. 6258 would ensure that at least some plant closing solutions would be sensitive to local needs.

It is also important to note that H.R. 6258 mandates no new programs, no new bureaucracies, no new Federal dollars. It mandates only collective bargaining, a process with a tried and true history in this country.

Let's look at the bottom line—can this process work? Recent history indicates that it can. Detroit Trim makes seat covers for Chrysler cars. In 1981, Chrysler determined that it could purchase seat covers of the same quality from vendors using non-UAW labor at a substantial savings. As rumors about a plant closing circulated in the factory, UAW representatives contacted management in an effort to forestall the decision. In response, management conducted a study which found that the savings originally thought to be gained from a closing were unrealistic, given the rollover of certain management salaries, pension costs, and other items.

An independent consultant was hired to research cost-saving measures, and management and labor split the fee. Using the consultant's recommendations, a joint labor-management steering committee authored a new productivity plan that saved the plant. Total employment—including management personnel—at the plant was reduced, work rules were made more flexible, and job barriers dropped. It was a difficult pill to swallow but, given the alternative, the union approved the agreement by a 4-to-1 margin and the plant was saved. The moral is clear—good faith bargaining between labor and management can

save a plant. H.R. 6258 seeks to make results like this the rule—if not the law—rather than the exception.

In conclusion, I must reiterate that H.R. 6258 is not intended as a comprehensive solution, nor is it perfect in its current form. With an eye toward next year, it is presented as a discussion draft that asks a simple question—given the plant closing stalemate, is the collective-bargaining process worth exploring as a partial solution to this dilemma? I believe that question can be answered in the affirmative, and I encourage my colleagues and other interested parties to work with me in refining this legislation and moving it forward.●

ARKANSANS EXPERIENCE TWO IRELANDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 30 minutes.

● Mr. ALEXANDER. Mr. Speaker, my old friends, Bill and Marian Penix of Jonesboro, AR, have evolved an unusual way of helping the younger generation of their family relate history and current events. As their grandchildren reach the age to celebrate the 12th anniversary of their birth, Bill and Marian take the youngster on a visit to a foreign nation where history and current events associate in a living mix and where the youngster can observe, and perhaps participate, in the culture of the nation.

Most recently, the Penixes traveled, with their grandson, Justin Mixon, to Northern Ireland and to the Republic of Ireland. And, as he has in past years, Bill Penix, newspaperman turned lawyer, shared with the readers of the Jonesboro, AR, Sun, observations on their experiences, including a visit to Jonesboro, County Armagh, Northern Ireland.

I believe that my colleagues might be interested in learning of the reactions of people like the Penixes, interested, thoughtful Americans visiting Northern Ireland and the Republic of Ireland, to gain firsthand knowledge of how religious, national, and cultural history may be impacting today's events in this region of the world and of how peoples living in a storm center of economic, political, and religious tension may be coping with the everyday business of living. Thus, I want to include in the CONGRESSIONAL RECORD at this point an account of the Penix-Mixon visit to Ireland recently published in the Jonesboro, AR, Sun.

The article follows:

ARKANSANS EXPERIENCE TWO IRELANDS

(My globetrotting friends, Jonesboro residents Bill and Marian Penix, along with grandson Justin Mixon, recently returned from a trip to that Emerald Isle, Ireland—a land of contrasts, a deeply troubled land where, in author Leon Uris' words, there is "a terrible beauty." Their observations:)

Seven of us were isolated from other airport passengers and subjected to severe search of our persons and baggage in the Aberdeen, Scotland airport Friday, July 6. We were whisked away aboard a small plane. Less than two hours later we were in Belfast, Northern Ireland.

After landing, while Bill was renting a car, Justin and Marian discovered from the map of Northern Ireland (Ulster to the British) that about 40 miles to the south of Belfast lay the town of Jonesboro. It was to be our first objective in the North.

From the airport we drove 25 miles to our lodging, The Conway, a Trust House Forte Hotel, like the Excelsior in Little Rock. The only difference was that The Conway had been blown to smithereens by a the I.R.A. at the time Bobby Sands who lived a short distance away, starved himself to death in a Northern jail four or five years ago.

The Conway is a luxury hotel, but heavily patrolled by armed guards. It was well lighted and surrounded by cyclone fences and coils of barbed wire. We hurried from the Conway down the roads southward about 40 miles to Newry (scene of recent rioting) and on four or five miles more to Jonesboro (earlier called Jonesborough) in County Armagh. Jonesboro is very near to County Down, but, more significantly Jonesboro is within a few hundred yards of the border between Northern Ireland and the Republic of Ireland to the south.

Jonesboro is a very old settlement. It has a fort, hundreds of years old, built to defend against invaders from the South. Its primary school building is 130 years old. Near the town is the oldest Christian monument in Ireland.

Although a part of Northern Ireland, Jonesboro must be 99 percent Catholics who are anxious to move the border a few hundred yards to the North and join the Republic. The people were warm, friendly and impressed to know we came from a Jonesboro of over 30,000 people who are predominantly Protestant. Marian kept her promise to return home and send such printed matter on our Jonesboro as the Chamber of Comerce could furnish her.

We felt perfectly safe in Northern Ireland. All the British soldiers we encountered were very friendly and helpful but very tense and nervous about their situation. We grieved several days later to learn that two of the soliders a man and a woman, who we probably had encountered crossing into the Republic near Sligo, had been ambushed and killed; probably by the I.R.A. Bill had wanted to drive across some fields and cross unoffically into the South in order to save 40 miles of driving to a checkpoint. The British had, in a friendly but firm manner, insisted we stay on the main roads to avoid explosive mines. The two soliders who died were killed by a mine at this point.

The six counties of Northern Ireland have about 1.5 million people. Until 1972 Northern Ireland was governed by a locally elected parliament (the Stormont) which remained responsible to the central government in London. In March 1972, because of increased rioting, the Northern Ireland Act of the British Parliament suspended the Northern parliament and the North has remained under virtual martial law, controlled from London.

When we arrived in the Republic the tensions and the soldiers disappeared. The Republic did not have the apparent wealth of shipyards and factories of the North, but it was as beautiful as the North. And peaceful.

Throughout the Northern six counties there were banners across the highways and signs preparing the populace for July 12, the anniversary of the victory over the Catholics by William of Orange in the Battle of the Boyne in 1690. Catholics of the North told us they dreaded the annual Boyne celebration because their Protestant neighbors wouldn't speak to them for a couple of weeks while things returned to normal. We decided that the annual binge of July 12 in the North pointed up the insoluble problems of Northern Ireland.

For a time in early Irish history the migrant Scots were as hungry and mistreated as the Irish and they were as one. From this brief period came the happy comingling of the two peoples into what we still today call the Scotch-Irish.

It ended for all time when Oliver Cromwell, the Lord Protector, with his massacres at Drogheda and Waterford, in the name of a Protestant God, took their lands from the Catholics and gave them to Protestants, particularly in the North.

Two weeks is a short time in which to travel the six counties of the North and 17 of the 25 in the Republic and evaluate a people and their problems. But, we could not help believe that Rev. Ian Paisley and his "Free Presbyterian Church of Ulster" together with events like the July 12 Boyne celebrations, are as destructive of Northern Irish peace as the I.R.A. with all of its horrible violence. However, the I.R.A. is as unacceptable by the government and most of the people of the Republic as it is in the North.

The citizens of both the North and of the Republic in the South are among the friendliest on earth. The wonderful Irish make fun of themselves to a degree that doesn't exist anywhere else on this earth. They are a small country, hardly the size of Arkansas, but they surely have made more of an impression upon the American personality than any other people on earth.

It is an oversimplification of the Northern Irish problem to see it in terms of Catholics vs. Protestants. We found this to be true only in the sense that the Protestant leadership of the North refuses to allow economic equality for the Catholic minority. There is an unreasoning fear that the Ulster Catholics someday will breed themselves into a political majority which will take over the six counties.

Some of the great martyrs of the Republic were Protestants who were hanged beside their Catholic comrades. And, it must be remembered that the great school in Dublin, Trinity University, is Protestant.

Yes, we found the green, green Ireland to have the beauty we expected. The Republic's flag has the colors green, white and yellow, as does the land. Everything in Ireland seems to be in miniature. The farms are small. There is an illusion of even more compactness by the fact that Irishmen throughout the centuries have neatly piled up rock fences into a national checkerboard of what appear as small lots within fields.

Leon Uris has given us his epic Irish historical novel, "Trinity," which paints a sad, but true, history of how Ireland, North and South, got to where the island is today. Uris has no solutions. Nor do we.

Only this past spring after 11 months of meetings and discussions, leaders of the North and the Republic met in Dublin seeking fresh alternatives to Irish unity. Interestingly, the most uncompromising parties were led by a lawyer-turned-preacher, Rev. Ian Paisley of the North.

Alas, like all the rest of the world, Ireland has too many politicians and too few statesmen.●

□ 2130

THE PRESIDENTIAL DEBATE: THESE ARE THE FACTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 60 minutes.

Mr. WALKER. I thank the Speaker.

Mr. Speaker, the Nation watched with interest the other evening as the two candidates for President of the United States debated with each other, and I think that the analysis since that debate has made it clear that most people watching the debate felt that Walter Mondale won the debate on style, if not on substance.

One of the problems coming off the debate is the fact that nobody has done much analysis thus far of what it is that Walter Mondale said.

So this evening in this special order I want to talk a little bit about some of the incidents where Walter Mondale showed himself to be something less than familiar with the truth about some of the charges and countercharges that he made in the course of his debate the other evening.

In one of the most publicized incidents of that debate we saw Walter Mondale in an exchange accuse President Reagan of seeking to slash the Medicare Program. As I pointed out in a 1-minute speech this morning, that was a most interesting point for Walter Mondale to make, since his most recent deficit reduction program that he personally put forward to the Nation contained a $12 billion cut in, nothing else than, medicare.

The very thing that he accused President Reagan of doing is what he has done in his own deficit reduction program.

One has to wonder whether he simply forgot that that was in his deficit reduction program or whether or not he decided that it was something where you make a charge and hope that the people do not catch up with the facts.

What he said was that President Reagan, right after the election, referring to the election in 1980, tried to cut $20 billion out of medicare.

Well, that leaves a little bit of room for distortion. In reality, President Reagan's proposal did not come right after the election, it came in 1983, about 2 years after the election. And what he suggested at that time was that the rate of medicare growth, not the Medicare Program, but the rate of growth of the program, should be cut by $37 billion over a 5-year time period.

Now any kind of calculation will tell you that that is something just over $7 billion a year on average that Mondale was accusing President Reagan of proposing.

Now compare that with the 1-year cut that Walter Mondale has talked about in 1989 of $12 billion. In other words in terms of 1-year figures Walter Mondale's cut is greater than what he was accusing President Reagan of doing.

Now you have to be a little bit willing to distort the facts in order to make that kind of charge.

Another charge made by Walter Mondale the other evening was that President Reagan had been responsible for the rate of poverty going up in the country.

Now that ignores the fact that in the last year of the Carter-Mondale adminstration the poverty rate went up at 1.3 percent compared to an average of not much more than 1 percent in the 2 years of the Reagan administration, and in those first 2 years of the Reagan administration where we have got the statistics, those are years when we were in a recession as a result of the failed Carter-Mondale economic policies.

So it would be interesting to note that any poverty increases that might be noted in the Reagan years are, first of all, less than the last Carter year when we were in the process of going into that recession and then, also, that as a result of some of the things that President Reagan did, the actual rate came down from 1.3 down to 1 percent.

It also calls into question this whole war on poverty that was started back in the 1960's that Walter Mondale, as a Senator, helped put in place and enthusiastically endorsed over a period of years.

In 1966 when we committed ourselves to spending billions of dollars, in fact trillions of dollars that we have spent in the time since on the war on poverty, the poverty rate in this country was 14.7 percent.

Today after literally trillions of dollars of spending the poverty rate stands at 15.3 percent. Now that tells you that there is something wrong with the policies; the very policies that Walter Mondale and his allies have endorsed over a period of years, have failed.

The proposals he is putting forth today are precisely the same as the failed policies of the Carter-Mondale administration and the failed policies that go back over his entire 20 years of public life.

Yet he puts those forward as a solution to the future. The poverty rate alone shows that it has failed. The question has to be whether or not we do not need a new approach to helping people out of poverty, a new approach which promotes things like opportunity, self-interest, entrepreneurship, and a number of things that really do have an empirical record of lifting people out of poverty.

President Reagan was also accused by Walter Mondale the other evening of trying to terminate a program that Reagan had, days earlier, praised as a part of his campaign trip to Buffalo.

Well, one has to assume that what Mr. Mondale was referring to was the housing for the elderly program. Well, a look at the facts will find that President Reagan has not cut that program. In fact, the last Carter-Mondale budget projection for 1980 in that program was for $700 million. Today under the Reagan administration we are spending $802 million for that very program, $100 million higher than the last Carter-Mondale budget. It sounds to me as though Mr. Mondale did not check the facts too carefully.

One of the key points that Mr. Mondale has been making in his campaign is with regard to interest rates and how interest rates, how real interest in the country is the problem.

So therefore we have to raise taxes by $157 per month for every family across this country in order to get in more revenue to bring down real interest rates.

And he wants to tax our way to prosperity in order to bring down real interest. Now he did not put it in those terms the other night, but that is specifically what his program calls for.

And he talked about, in a somewhat garbled fashion I must say, how real interest rates had doubled. What he did not seem to mention is just when they doubled and under whose administration they doubled.

Well, let us look at the facts: In 1976 when the Carter-Mondale administration came to office, real interest rates in this country, that is the difference between inflation and the prime rate, real interest in this country was at 2 percent. We had 6.8 percent prime rate and an inflation rate of 4.8 percent leading to a real interest rate of 2 percent.

When the Carter-Mondale administration left office, real interest stood at 9.1 percent. We had at this point a 12.4-percent inflation rate and an unbelievable 21.5-percent interest rate, prime interest rate in the country, for 9.1 percent real interest.

Under the Reagan administration we have seen the real interest rate drop. It is still not low enough, it still needs to come down further, but real inter-

est today stands at 7.5 percent if you use the present prime rate of 12.5 percent being offered by a number of major banks; or, if you take the other major banks that are offering a 13-percent prime rate, the real interest in the country today stands at 8 percent.

□ 2140

That is lower than the final real interest rate of the Carter-Mondale administration and it is in fact the truth, as Walter Mondale says, that the real interest rate more than doubled. But it doubled under his administration. It was his policies. It was Jimmy Carter and Walter Mondale who doubled the real interest rate in this country.

The Reagan administration has been attempting to bring it back down.

So for the gentleman to make that kind of statement in the course of the debate and lay the blame on President Reagan's doorstep was a distortion of rather large magnitude.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

I think the gentleman is making a very important point here. The gentleman is saying essentially that the real interest rate is the difference between the prime rate and inflation. So if you have a prime rate of 10, if you have inflation of 5 percent; then your real interest rate is 5. Is that right?

Mr. WALKER. That is right.

Mr. HUNTER. So, what the gentleman is saying is that the Carter-Mondale administration had a real interest rate of over 20 percent. What was it if the gentleman could give it to me again?

Mr. WALKER. Well, the real interest rate——

Mr. HUNTER. No, the prime rate?

Mr. WALKER. Indicates that that was 9.1 percent.

The prime rate stood at 21½ percent.

Mr. HUNTER. So they had a 21½-percent prime rate and they had what inflation rate; 12 point something?

Mr. WALKER. 12.4 percent.

Mr. HUNTER. 12.4 percent. So the real rate was 9.1 percent and he was upset because President Ford had a prime rate of 6.8 percent and an inflation rate of 4.8 percent. So he had a real interest of about 2 percent.

Mr. WALKER. Those are the figures as they show in the books.

Mr. HUNTER. Now, I think that is very interesting because we have now, we have taken under the Reagan administration, we have brought the Carter-Mondale prime interest rate down from 21.5 percent down to 12¾ percent. So we have cut it almost in half.

But what Mr. Mondale is really saying is that President Reagan has done a bad job because he has brought inflation down too low. Because if President Reagan had kept inflation at the same high rate that it was under Mr. Mondale, 13 percent or 12 percent, there would not be any increase in the real interest rate. It would be almost a flat comparison. There would be no increase in the real interest rate at all.

Mr. WALKER. The gentleman certainly makes a different analysis than I made, but it certainly makes the point that if you took the Carter-Mondale inflation rates and put those along side the Reagan interest rates, in fact, the real interest expenses would come down. Of course, the gentleman knows in a real economic world you cannot do that. If you are going to have raging double digit inflation, you are going to have interest rates go outrageously high, which is precisely what the Carter-Mondale people gave us.

The question you have to ask is: How did they get that massive inflation?

Well, they got that massive inflation by doubling taxes in the country. We were collecting twice the amount of tax revenue at the end of the Carter administration than we had been when the Carter administration began. They got it by pumping all of that money into the economy in unproductive government spending.

At the same time you had all that high inflation and those high interest rates, you had negative productivity in the country. You had a GNP that was dropping, not going up. You had all kinds of problems in the economy that went beyond the statistics that we have here. That is how you got there and that is precisely the solution that Walter Mondale is now proposing for the economy again. More taxes, more spending, which result in lower productivity, which will result in more inflation and more interest. How he is going to bring down real interest rates in that kind of a situation is beyond me. But his past record does not speak very well.

Mr. HUNTER. If the gentleman will continue to yield, I find it very interesting that former Vice President Mondale, candidate Mondale, talks increasingly about his plan, about his economic plan. He fees like he must give a great deal of time to explaining what his plan is, how he is going to produce this budget that is going to have a lower deficit by 1989.

I think that is good because I think when you are a 150 hitter—I am watching our San Diego Padres here win the World Series and I think they are going to do it and I was reminded—you have a lot to explain. This is a guy who brought us 21 percent interest rates and he is taking President Reagan to task for bringing about the greatest economic recovery and period of prosperity that we have had in many, many years. The guy who gave us 21-percent interest rates is asking the guy whose economic recovery is batting 1,000 is explain what he is doing.

I think that Mr. Mondale should explain just how the policies that he is putting together in his package right now will differ from the Carter-Mondale policies that brought us the 21-percent interest rates, brought us the 12-percent inflation rates, and produced a tremendous misery index that meant that millions of American housewives would go to the store on a fairly regular basis and would find that goods were going up on the shelves and the prices were going up on a weekly basis.

Mr. WALKER. The prices were going up so fast at that time if you did not reach for a can fast enough you got your hand stamped. They were changing the prices almost daily out there in the supermarkets as a result of 12-percent inflation rates.

Mr. HUNTER. I think that is the Mondale definition of a fast food. When inflation is going up that rapidly you have got to be fast to get the food before the price rises. I think that is where the definition come from.

I find another thing interesting that Mr. Mondale made some statement in the debate about a statement that he thought Will Rogers had made one time about Herbert Hoover, alluding to President Reagan perhaps as being a Herbert Hoover type. I am reminded that really in many ways President Reagan should be looked at as being an FDR type because the FDR administration followed the Hoover administration. And his program was to create jobs, to create a better standard of living, to put two chickens in every pot. In fact at one time he was working on balancing the Federal budget. I am reminded that President Ronald Reagan's programs, if you talk about jobs and if you look at Mr. Carter's administration as being the Hoover administration when we saw a crash, if not a stock market crash, at least a crash of prosperity and a crash of standard of living for the American people, if you look at President Reagan's program and you look at the number of jobs he has created, I will bet that he created in the 5½ million new jobs that have come about in the last 18 months, I would bet—I have not looked at the figures—that that is more new jobs being created than FDR created in his entire career.

Does the gentleman have any figures about hom many real jobs—not

Government make-work jobs—FDR created in the 1930's and 1940's?

Mr. WALKER. There are some figures that show that in a 1-year period of time recently that Ronald Reagan's programs created more jobs than at least the first 4 years of the New Deal created.

Mr. HUNTER. So he has created more jobs in the first year then the New Deal created in the first 4 years?

Mr. WALKER. That is right.

Mr. HUNTER. As I recall the statistics are to the effect that he has created more jobs in the last 18 months than Japan has in the entire decade of the 1970's and more jobs then Canada has since 1955 approximately.

Mr. WALKER. Or then the Common Market has in the entire decade of the seventies.

Mr. HUNTER. And he has persuaded the French President Francois Mitterrand, to take another look at policies of free enterprise because those bankrupt socialist radical policies have not created jobs and they have not brought inflation down. So he has the whole world looking at this great experiment in economics that is taking place and is working in America right now.

Mr. WALKER. The gentleman is absolutely correct. Of course, it also needs to be pointed out that none of us heard Walter Mondale criticizing President Carter when President Carter made his famous national malaise speech. When President Carter told us that the best days of America were behind us and that we were in a period of national malaise in which all of these things that could go wrong were not as a result of their leadership, but were as a result of the American people's problems. We never heard Walter Mondale contradict that. We never heard Walter Mondale exert leadership as Vice President saying "No, we ought to be more optimistic about the future."

It took a President Reagan to come along and start talking about optismism and start projecting the nation into the future.

The Carter-Mondale people had given up on this country. It took a President Reagan to come back and give the American people new hope and new spirit.

Now Mr. Mondale seems to want to be critical of that and yet be critical with facts that do not stand up to very good scrutiny.

□ 2150

Mr. Mondale said in the debate the other evening, and he said often on the campaign trail, that the Republican platform calls for an imposition of a religious test for the appointment of judges. I think maybe Mr. Mondale needs to get hold of the facts and read the Republican platform, because this is the section of the Republican platform that he refers to: It says that what will be done is judges will be picked "who represents traditional family values and the sanctity of innocent human life." That is what it says. It says, "who represent traditional family values and the sanctity of human life, should be appointed." That is the reference to judges.

What is Mr. Mondale saying? Is he saying that he will not appoint judges who represent traditional family values? Because that is what the platform says. I would hope that one of the standards that anybody would think about for Federal judges is whether or not they will stand for traditional family values as a part of their judicial performance.

So Mr. Mondale is just absolutely misrepresenting what is in the Republican platform. He is obviously doing it for political reasons. But it is distortion. It has no relationship to the facts whatsoever. There is nothing in the platform that indicates that someone from the outside, some religious groups from the outside, are going to have veto power over judges. All it says is that we ought to appoint judges who represent traditional family values and who will help preserve the sanctity of innocent human life. Those are not very radical statements. And I think for Walter Mondale to misrepresent them as terribly as he did in the debate the other night is a disservice.

One other point, it just interested me today as we heard a number of our Democratic colleagues come to the floor talking about the debate of Sunday night, and, of course, they were exuding the optimism that comes off the press reports that Walter Mondale was the winner. I did note, though, with some question, the fact that some of the very people who were out on the floor talking about that are the very people who have challengers who have told me in recent days that those people refused to debate them back in their home districts. Now, if this debate is such a good thing and the two Presidential candidates ought to face off against each other, and if incumbents have the duty to debate, one has to wonder why these Democrats in the House of Representatives who were talking about the debate on the House floor today have refused to debate their Republican challengers back in their districts.

Debate is a good thing. I think it was a good thing the other night. I think that some of the issues got aired. I think one of the important things that has come out of the analysis of the debates so far is that the American people may have agreed that Walter Mondale won on style and substance; however, they gave it to President Reagan because overwhelmingly, by 20-point margin, they are saying that they agreed with Reagan and what he was saying, not with Mondale. So that in terms of substance, and so on, I think the American people got something very important out of the debate the other night. They can get the same thing out of congressional debates.

I think it is very, very interesting that some of the very people who talked so loudly this morning about debating are some of the very people who are refusing to debate their challengers back home.

Let us have a debate. We ought to have a national debate. We ought to have a debate on this floor instead of these empty chairs tonight, if there is someone who believes that this information I am giving here is not correct, they ought to come out here and challenge me. I would like to hear some of those Democrats who spoke this morning come out and challenge some of these facts and figures, because they are the facts and figures, that anybody can find. And if Walter Mondale has not presented the facts right, then it seems to me that he needs to be challenged. If what I am saying is not the truth, let somebody come out and challenge it.

There are all kinds of seats here, we have got open microphones, they can come out here and challenge this. The fact is that I doubt we will get very much challenge on it because the facts are pretty clear, and the actual fact is that Walter Mondale did not exactly keep in close reference to the facts the other evening.

I would be very glad to yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

I think particularly these facts that the gentleman has brought up with respect to Mr. Mondale's misstatements on the interest rates have been very interesting, and I just hope that there are not a lot of Americans who went out today, after listening to that debate, trying to buy a car for the real interest rate and paying a real interest rate.

What is a real interest rate? A real interest rate is what you have to pay the bank or the credit union or whoever is financing the particular item that you are buying. Mr. Mondale brought us the highest interest rates in 40 years. In fact, I think that the 21-percent prime rate that he brought us was what, the highest since the Civil War? Is that an accurate statement?

Mr. WALKER. I really do not know if that is an accurate statement. It is certainly one of the highest in the history of the country. We have never

had very many periods where we have experienced anywhere close to a 21-percent prime rate.

Mr. HUNTER. Well, I guess Congressman PEPPER is a Member who has been in one of the Houses for longer than anybody else here, I wonder if he has ever seen, in his lifetime, until he saw Walter Mondale's and Jimmy Carter's economic plan, if he had ever seen 21-percent interest rates.

Mr. WALKER. Of course, you may remember that you had trouble finding the Mondale-Carter economic plans because in 1 year, the last year they were in office, they had five of them in 1 year; so there was a constantly changing economic plan. The gentleman on our side of the aisle, I know, had trouble finding it, too.

Mr. HUNTER. I think the gentleman is right. It was like a multiple choice test. You had five choices, A, B, C, D and E. And finally the American people picked none of the above and they elected the guy, Ronald Reagan, who brought those interest rates down to 12.75 percent, brought inflation down to 4 percent and gave the American people a real feeling of optimism and hope. I hope that they follow their common sense and follow that substance that the gentleman talked about, and let Vice President Mondale run in another year.

Mr. WALKER. I thank the gentleman, and I think that that is precisely what the American people are likely to do. I think the American people are likely to say, "well, sure, Walter Mondale did a better job than we expected of him in the debates, and that is to his credit, but the fact is that we agree with President Reagan that we should not have to pay $157 a month out of our family budget for additional taxes, that we should not go back to policies that failed us in the past and that we need to keep the country moving ahead on economic recovery." Those are the issues that I think the American people will address in a few weeks when they vote, and there is no doubt that at that point they are going to choose to reelect President Reagan.

I yield back the balance of my time.

GRENADA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. HUNTER], is recognized for 60 minutes.

Mr. HUNTER. Mr. Speaker, on October 25, 1983, President Reagan and Eugenia Charles announced to the American people that the Marines and Rangers, elements of the Marines and Rangers, along with some of our allies in the Eastern Caribbean, had landed on Grenada, and I can recall sitting here on the House floor and watching some of the more liberal Members of the House, some Members who felt that the President's actions were not in the best interest of the country, rising and very strongly criticizing this action and saying, essentially, that the President's claim that the operation was justified in order to save American lives was not in fact the case but that they had heard that there were school officials from the medical school down in Grenada who were saying, actually "everything is fine, not only are the students safe, but send us more students."

As I sat there and listened to those statements, I thought the proof is going to come out when these medical students come back to the United States and when they tell us whether in fact they were in danger, whether they needed to be saved and whether they felt the President took appropriate action.

After the battle was over, some 18 American servicemen were killed, 116 were wounded, approximately 800 Cubans had been captured and 599 American citizens, most of them medical students, had been safely evacuated from Grenada at their request.

In a couple of weeks, on October 24 and 25 of this year, a number of those students will be returning to the United States, about 100 of them, and they will be speaking in colleges and universities across America, talking to our young people, holding forums, having question and answer sessions, teach-ins, what have you, and talking about the situation that they were in and talking about those very tense weeks in Grenada when Maurice Bishop, then the Prime Minister, was held in house arrest and ultimately was murdered in a very bloody coup along with several members of his cabinet and several dozens of innocent civilians.

I think it will be very interesting for the colleges and universities that are participating in this program to have these open forums and to invite all sorts of political organizations, Republican organizations, Democrat organizations, even service clubs, Rotary clubs and Kiwanis clubs, and the like, to come in and participate in these teach-ins and to have a debate, if you will, or at least to have a dialog with the students and to find out what really happened in Grenada on October 24 and 25 and what that meant to those students.

Along those lines, the American Marines and Rangers who liberated the students and landed on Grenada did something that had not been accomplished before. They captured and discovered about 35,000 pounds of documents. In these documents we have essentially the entire record of a Communist bureaucracy.

□ 2200

It appears that the Marxists in Grenada loved documentation; they loved to record things. Practically every meeting is recorded. I think that we have some very good lessons in Grenada that we can find in reading these documents. I think there are lessons for Members of Congress who are constantly propagandized. We have people come up and put on dog and pony shows for us and explain to us why we should support certain foreign policy stands, and when these people leave, I think sometimes we wonder, Democrats and Republicans, whether we were taken in. Whether these people really meant to do what they told us they were going to do.

Whether the human freedoms that we seek so vigorously in this country and that we seek in our foreign policy were really intended to come about or whether this was simply window dressing that was applied to Members of Congress in order for them to receive favorable attention from Members of these bodies.

In looking at the Grenada documents, and there are a lot of documents. Let me tell you, there are about 35,000 pounds of documents. This is one section, and it is about as thick as a phone book, and it has some very interesting and provocative statements in it.

But in looking at these documents you can see that in fact Maurice Bishop and a lot of his people really did intend to deceive the United States. I can remember Mr. Bishop coming back last spring and a colleague of ours, the gentleman from California [Mr. DELLUMS], allowing Members of the Armed Services Committee to meet with Mr. Bishop on an informal basis and several members of his entourage and we thanked Mr. DELLUMS for arranging this meeting and allowing us to have this dialog.

I can remember asking with other Members whether or not there were in fact political prisoners in Grenada, and I can remember Mr. Bishop saying essentially, no, we do not believe in political prisoners, and if we have a few people that are in jail, they are going to be released fairly shortly.

Yet, when we read a statement that was reported in a secret session of the Central Committee, we see that in fact Mr. Bishop, while saying those things to us as Members of the U.S. Congress intended just the opposite. Let me read one quote from Mr. Bishop that is in document 1, page 25. It was a quote made at a meeting of the Central Committee of the Marxist government in Grenada in September 1982.

He is talking about how laws and arrests are made in Grenada, and I quote:

I want to think of another area. Just consider, comrades, how laws are made in this country. Laws are made in this country when Cabinet agrees, and when I sign a document on behalf of Cabinet. And that is what everybody in the country, like it or don't like it, has to follow.

Or consider how people get detained in this country. We don't go and call for no votes; you get detained when I sign an order after discussing it with the National Security Committee of the party, or with a higher party body. Once I sign it, like it or don't like it, it is up the hill for them.

Of course at that time Mr. Bishop, who could not have imagined that on October 19, 1983, it would be up the hill for him and up against the wall, and he would be in fact assassinated by some of the same people that he was talking to in this Central Committee meeting who happened to be perhaps a little more radical than he was.

I yield to the gentleman from Pennsylvania.

Mr. WALKER. I think it is very interesting to look at some of the documents and the gentleman has obviously gone through them in some detail and understands just what is there. As I recall some of the speeches that we heard on the House floor at the time the liberation of Grenada was taking place, that one of the speeches that we heard here that day called it the moral equivalent of invading Duluth, MN.

From what the gentleman has learned from the documents there, I think we can assume that that was probably a statement that is pretty much out of line with the facts, was it not?

Mr. HUNTER. Absolutely. You know, when the students came back and said yes, they were in danger, I had the opportunity to interview one of the students, and I remembered the President being severely criticized for his actions, and I remember that statement. You ask the students, at least the ones that I talked to, and they said you are darn right we were in danger.

Let me just relate what was related to me when they were up in the dormitories and they heard the machinegunning in the village. Pretty soon the maintenance people who lived in the village came up to the dormitories and talked to them and said they are killing a lot of people down there. Then the Marxist guards came up and told them that they would be killed if they left the dormitories.

Now, I do not think that the person who uttered that statement that you referred to that this was the moral equivalent of invading Duluth, MN, would agree that that was a situation of safety for those students. When the Marxist guards came up armed with AK-47's and said, "You walk out the door, you are dead." I think that is pretty serious.

Perhaps the most telling statement that they made to me was when they huddled back in the dormitories knowing they would be shot on sight if they left them; if they made an attempt to escape. They started talking about how this could possibly be a recurrence of Iran. Thankfully, because they had a President who was decisive and who acted in the interests of saving American lives, even though he did not know at the time that this would be a politically good thing. This could have been ruinous politically, for the President. But he has to be, besides being a politician, he has to be the President of the United States. He took those actions; he saved those lives.

To get back to Mr. Mondale, I know Mr. Mondale made statements initially that were in disfavor of the President's action in Grenada. I understood that later on, after he consulted with one fairly knowledgeable Member of the House on the Democrat side that he said, well, really I think perhaps the action was in order, or words to that effect.

I yield to the gentleman from Pennsylvania.

Mr. WALKER. The gentleman understands that it took him about 11 months to come to that conclusion.

Mr. HUNTER. I think the gentleman has made my point. After 11 months, which is a long time to be in captivity if you are a hostage, whether you are in Iran or in Grenada, Mr. Mondale decided it was time to act. I hope that Mr. Mondale explains that situation when he has his foreign policy debate with President Reagan in a couple of weeks.

Mr. WALKER. If the gentleman would yield, the gentleman remembers, of course, that it did take the Carter-Mondale administration about 11 months to decide to undertake a rescue mission to try to get the hostages out of Iran, rather than moving quickly and do something to try to keep the hostages from being taken, they allowed them, first of all, to be captured. Then, it seems to me, I am not certain, but it was at least 10 or 11 months until they finally decided they were going to attempt a rescue mission. So it is about in the same timeframe as Walter Mondale finally deciding that what was done in Grenada was the right thing. It matches completely with the decisions going on in the Carter-Mondale administration with regard to Iran.

Mr. HUNTER. The gentleman makes a very good point. Let me say also that another statement that was made when Maurice Bishop was speaking informally to members of the Armed Services Committee, at least to me, was in response to our concern about the airport—the 10,000-foot runway that was being constructed by the Cubans on Grenada. Mr. Bishop said, essentially, as I recall, "No; that airport is simply for importing and exporting our spices, and for our commerce, and it is not intended to be a military airport.

Yet, according to the recording of a Central Committee meeting by Leon James, who was the deputy to General Austin, there is a statement in the meeting that is recorded and I quote: "Airport will be used for Cuban and Soviet military." This is what the Grenadians were saying in their private meetings while they were telling American Congressman that it was no sweat; that President Reagan was way off base when he made his assertion on April 27, 1983, that in fact that 10,000-foot runway posed a threat to the United States.

I yield to the gentleman.

Mr. WALKER. In other words, what the gentleman is saying is that here is one instance where the documents that we have show that the Grenadians, as they were coming to this country, talking to the Congress, were just telling baldfaced lies?

Mr. HUNTER. That is exactly right.

Mr. WALKER. I think another statement that we heard on the floor at the time of the liberation was that this was just like the Soviet invasion of Afghanistan—when the United States went into Grenada, that it was something just like or very similar to the Soviets invading Afghanistan.

What the gentleman is telling us here is that such statements are almost farcical in the context of what we now know from the documents that we captured. Is that correct?

□ 2210

Mr. HUNTER. That is absolutely correct, and you know, the tragedy of the statements that were made on the House floor is not that they were made with ill motive or with an intent simply to embarrass the President, because I do not think they were.

Mr. Speaker, they were made at a time when Members of this body, and I think it has been said several times, that sometimes we think that we are 435 Secretaries of State, but Members of this body on October 24, 25, and 26 could not possibly have all the facts at our disposal.

So for us to come out and severely criticize our President who is our leader in foreign policy, who has information that others do not have and who acts for all Americans to save and protect American lives and liberty in foreign countries.

When he takes this decisive action, important and necessary action to have Members of this Congress to get up and blast the President for that action before they could get all the

facts, I think is to do our foreign policy a disservice because you know, although we were able to carry this operation off and it was successful, the time could come, for example, we could have been in a situation where we would have needed the help of Great Britain, for example, or other allies.

If we would have needed the help of these allies and they could look over on American television and see Members of Congress blasting the President, and questioning the President's judgment; that type of opposition in the early stages when there is no way that they could tell whether or not the President had the proper information, that type of opposition could have curtailed our getting help from our allies. It could have put them off. It could have made them decide not to help us.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

I think the gentleman makes an excellent point. I think a number of these people did come to the floor and did not know the facts; had no idea what was really going on. Had only a passing familiarity with the situation there and made the statements.

But you know it is interesting that when they lacked the facts of what was going on they did, as Ambassador Kirkpatrick talked about at the Republican convention, they blame America first. That their first instinct in this instance was to blame not the Grenadians, who were in the process of slaughtering the present government, not the Cubans that were on the island with armed troops, but to blame America first.

Their immediate speeches out here blamed this country, blamed the President before they even had the facts at their command. And I think that that is one of the problems with foreign policy analysis that sometimes then we find out later just had no basis in reality at all.

What we now find out is there was no reason to blame America for what we were doing. We were doing the right thing not only in terms of protecting the lives of American citizens but in terms of helping to liberate the people of Grenada.

As the gentleman points out, that the runway there was designed to turn Grenada into an armed camp and the people of the country were going to suffer as a result, and what we did was absolutely right but the initial reaction of too many Members, I am afraid, of this House, was to blame America first.

Mr. HUNTER. I thank the gentleman.

Mr. Speaker, I think he has made some excellent points, and I hope that these documents and the remembrance of the liberation of Grenada on the 24th and 25th of October will give us some lessons, give some lessons to the American news media, for example, when they have leaders from other nations coming up and telling them that they intend to be democratic, that we want to be friendly, that they simply want to be left alone; that they are not in the Soviet camp and Soviet sphere.

I think that perhaps this type of revelation, a case history of deception of the American news media as well as the American Congress should lead our news media to be a little more careful, be a little bit sharper in cross-examination.

Do not let Mr. D'Escoto, the Foreign Minister of Nicaragua, get away with all of his statements.

I remember following that gentleman when the President was being chastized for the decision to mine American harbors; I remember following Mr. D'Escoto from media place to media place, from studio to studio as he put out his message about how the residents of the United States had done a terrible thing in allowing the mining of the Nicaraguan harbors.

Mr. Speaker, within a couple of days of making this tremendous media drive, and every place I went, Mr. D'Escoto's large black limousine was parked there and he was in telling Americans how they had a bad President.

Within a couple of days of his visit we had up here a resolution on the House floor and it whipped through by a fairly large margin. I think even a larger margin in the other body, and I was thinking to myself: My gosh, I wish I could drive legislation through that fast. I would be the most effective legislator in this House.

We allowed this person to do this, without questioning him; without cross-examining him. Without looking at some of the actions that have been taken by that country that belie the assertions that they are very peaceloving and do not want to bother the United States and are not a threat to our security.

I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, the gentleman is more familiar with the documents captured from Grenada than I am but it seems to me that some of the peripheral reading I have done of that has indicated that we have some documentation there that Nicaragua has been less than honest with this country in some of the things that they have told us; that some of the records of the Grenadian Government with regard to Nicaragua all show that Nicaragua has not been telling the truth a good part of the time in what they have been telling the world and telling the United States.

Is that correct?

Mr. HUNTER. That is absolutely correct.

Mr. Speaker, we have discovered some other things that are not manifested in the documents but as I understand it in the arms that we have captured, for example in Grenada, we have found arms that because of their serial numbers being consecutive to serial numbers of arms that are captured from Communists, Communist insurgents in El Salvador, we have come to the conclusion that they are part and parcel of the same shipment, and we have evidence that they have been moved from Grenada through Nicaragua ultimately to the insurgents in El Salvador.

So I can recall sitting and debating Mr. D'Escoto again and having him absolutely tell the host on the "MacNeil-Lehrer Report" that, no, they are not shipping arms to the El Salvadorans and yet the evidence that we have concerning the serial numbers and the arms that are cacheted in Grenada would tend to contradict that statement.

So, yes, in fact, the Grenada documents not only tell us about what happened, how the Bishop government came about; what happened to it, but also it gives us a good reflection of what the intent of Cuba and the Soviet Union and Nicaragua were with regard to their neighbors and to the United States.

Let me quote just a couple more statements here.

On page 6, document 26 of the Grenada papers, we read that: Grenada's revolution "has to be viewed as a world-wide process with its original roots in the Great October Revolution."

Now if that is not Marxist dogma, I do not know what is.

And to the extend that we can take credit for bringing any other country into this progressive fold, our prestige and influence would be greatly enhanced.

Two mentioned targets were Surinam and Belize. So already the Grenadians, while they were professing in the words of Mr. Bishop to the effect that they were simply peace-loving people who did not want to be ideologically aligned with anybody and simply wanted to go on about their business, those statements were absolutely false. They wanted to be a major base for Marxist operations in the Caribbean and yet when they came up and told us exactly the opposite, not only was the American media in a hurry to be taken in but I do not think Members of Congress gave the scrutiny and the cross-examination

that they should have given to these statements.

So, on the 24th and 25th of October, besides having these students and incidentally, this is a nonpartisan event. Everybody and anybody is invited whether they are members of service clubs, of PTA, VFW, American Legion, Democratic students, members of Republican student organizations or just students who want to go and talk to somebody who is over there because it is a very interesting part of our history. These forums will be absolutely open and I hope we have some debates, because I think out of these debates we can come up with some real answers about what the lessons of Grenada are.

So on the 24th and 25th, besides having these we will be having a 2-hour documentary on the 24th and a 1-hour documentary on the 25th, and we will talk about a number of the questions that are involved in Grenada.

We will be having, for example, Mr. Sam Donaldson talking about why he thinks American troops should have been accompanied by the American media when they went into Grenada; some of the peripheral issues.

We will be talking with students, Grenadian politicians, soldiers, marines who were over there. It will be a very interesting documentary.

□ 2220

This documentary will be followed each day, October 24 and 25, by a 1-hour talk show. It will be a cable program and we will be beaming it in to as many universities and colleges as will request it. So I think it will be an interesting time for America.

Certainly these documents are very, very enlightening. They are a very rich storehouse of information for historians and for people who have an interest in political science, to be able to really understand what is going on in the Caribbean. If you really want to understand the geopolitical politics of that area, the geopolitical situation, you need to get hold of a copy of the Grenada documents. If you are intensely interested and you want to do some in-depth research, you should get down to the Grenadian Archives, which are now available, and as I understand, all 35,000 pounds of documents will be available there. Take a look at them and do some analyzing, do some research, because here we see something that you do not see in the press releases, you did not see in the press releases, in the press conferences, and the meetings with Members of Congress, and all the self-serving statements that foreign leaders often make when they come to the United States.

Here are these documents. You can see what they really thought about us, what they really thought about America's politicians, what they really thought about America's leadership, and what they really thought about the American news media, and whether or not they figured they could manipulate them. It is a very interesting set of documents. I think it is a great thing for liberals, conservatives, Republicans and Democrats to take some interest in.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. Absolutely.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I think the gentleman may be finishing up, and I just thought that since both this gentleman and the gentleman from California talked a lot about debates, I thought maybe we might want to yield some time to the gentleman from Colorado in the chair to give a rebuttal to all those folks who had talked so glowingly of him out here earlier.

It was very deserved, but we would be very glad to yield to the gentleman for rebuttal time if he would like it.

The SPEAKER pro tempore. The Chair would tell the gentleman from Pennsylvania that House rules prevent the Speaker from commenting on ongoing debate.

Mr. HUNTER. I thank the gentleman. I think that is perhaps why the gentleman in the chair had this roast, because they had him in a position in which they will never have him again.

Mr. Speaker, I thank the gentleman, and I yield back the balance of my time.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. McEWEN (at the request of Mr. MICHEL), for today, on account of official business.

Mr. TAUKE (at the request of Mr. MICHEL), until 5 p.m. today, on account of airline scheduling problem due to inclement weather.

Mr. GRAY (at the request of Mr. WRIGHT), for this week, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WORTLEY) to revise and extend their remarks and include extraneous material:)

Mr. CONTE, for 30 minutes, today.
Mr. GINGRICH, for 60 minutes, today.
Mr. WALKER, for 60 minutes, today.
Mr. HUNTER, for 60 minutes, today.
Mr. PORTER, for 5 minutes, today.

(The following Members (at the request of Mr. TORRES) to revise and extend their remarks and include extraneous material:)

Mr. MOAKLEY, for 5 minutes, today.
Mr. GLICKMAN, for 5 minutes, today.
Mr. WIRTH, for 5 minutes, today.
Mr. RAY, for 5 minutes, today.
Mr. PANETTA, for 5 minutes, today.
Mr. ANNUZIO, for 5 minutes, today.
Mr. GONZALEZ, for 60 minutes, today.
Mr. LEVIN of Michigan, October 10, for 5 minutes.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. OBERSTAR, to revise and extend his remarks on H.R. 6163 just prior to the vote on passage in the House today.

Mr. O'BRIEN, on the conference report on S. 540, immediately prior to the vote.

(The following Members (at the request of Mr. WORTLEY) and to include extraneous matter:)

Mr. GILMAN.
Mr. KEMP.
Mr. EMERSON.
Mr. DEWINE.
Mr. HILLIS.
Mr. LENT.
Mr. GEKAS.
Mr. LAGOMARSINO in two instances.
Mr. ROTH.
Mr. KRAMER.

(The following Members (at the request of Mr. TORRES) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. GONZALEZ in 10 instances..
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. WHEAT.
Mr. CLARKE.
Mr. MAZZOLI.
Mr. HUBBARD.
Ms. FERRARO.
Mr. McHUGH.
Mr. HOWARD.
Mr. MORRISON of Connecticut in two instances.
Mr. BRYANT.
Mr. FAUNTROY.
Mr. MILLER of California.
Mr. ACKERMAN in two instances.
Mr. WON PAT.
Mr. KOSTMAYER.
Mr. ECKART.
Mr. SOLARZ.

Mr. HAYES.
Mr. VENTO.
Mr. ADDABBO.
Mr. RICHARDSON.
Mr. BROOKS.
Mr. WEISS.
Mr. MAVROULES.
Mr. BORSKI.
Mr. MOODY.
Mr. HAWKINS.
Mr. BONKER.
Mr. FORD of Michigan.
Mr. DYSON.
Mr. WALGREN.
Ms. KAPTUR.
Mrs. BURTON of California.
Ms. OAKAR.
Mr. LELAND.
Mr. HOYER.
Mr. OTTINGER.
Mr. MARKEY in two instances.

SENATE BILL REFERRED

A bill of the Senate of the following titles was taken from the Speaker's table and, under the rule, referred as follows:

S. 2449. An act for the relief of the Sisters of Mercy of the Union, Province of Saint Louis, MO; to the Committee on the Judiciary.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 659. Joint resolution making further continuing appropriations for fiscal year 1985.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER pro tempore announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 416. An act to amend the Wild and Scenic Rivers Act by designating a segment of the Illinois River in Oregon and the Owyhee River in Oregon as components of the National Wild and Scenic Rivers System, and for other purposes;

S. 1146. An act to amend the the Federal Aviation Act of 1958 to provide for the revocation of the airman certificates and for additional penalties for the transportation by aircraft of controlled substances, and for other purposes;

S. 1711. An act providing for a 15-year extension of patent numbered 3,376,1989;

S.J. Res. 299. Joint resolution to designate November 1984, as National Diabetes Month; and

S.J. Res. 309. Joint resolution authorizing and requesting the President to designate January 1985 as "National Cerebral Palsy Month."

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 607. An act to amend the Communications Act of 1934;

S. 648. An act to facilitate the exchange of certain lands in South Carolina;

S. 1102. An act to provide authorization of appropriations for title III of the Marine Protection, Research, and Sanctuaries Act of 1972, and for other purposes;

S. 1151. An act to compensate heirs of deceased Indians for improper payments from trust estates to States of political subdivisions thereof as reimbursements for old age assistance received by decedents during their lifetime;

S. 1330. An act to establish a National Council on Public Works Improvement to prepare three annual reports on the state of the Nation's infrastructure, to amend the provisions of title 31, United States Code, relating to the President's budget to require it to separately identify and summarize the capital investment expenditures of the United States, and for other purposes;

S. 1510. An act to establish uniform audit requirements for State and local governments receiving Federal financial assistance;

S. 1790. An act to authorize the Secretary of the Interior to enter into contracts or cooperative agreements with the Art Barn Association to assist in the preservation and interpretation to assist in the preservation and interpretation of the Art Barn in Rock Creek Park in the District of Columbia, and for other purposes;

S. 2048. An act to provide for the establishment of the Task Force on Organ Transportation and the Organ Procurement and Transplantation Network, to authorize financial assistance for organ procurement organizations, and for other purposes;

S. 2175. An act to designate certain national forest system lands in the State of Arkansas for inclusion in the National Wilderness Preservation System, and for other purposes;

S. 2166. An act to reauthorize and amend the Indian Health Care Improvement Act, and for other purposes;

S. 2303. An act to amend the Public Health Service Act to revise and extend the authorities of that Act for assistance for alcohol and drug abuse and mental health services;

S. 2483. An act to rename Dulles International Airport in Virginia as the "Washington Dulles International Airport";

S. 2496. An act to extend the authorization of appropriations for certain education programs, and for other purposes;

S. 2663. An act pertaining to the inheritance of trust or restricted land on the Lake Traverse Indian Reservation, North Dakota and South Dakota, and for other purposes;

S. 2773. An act to designate certain National Forest System lands in the State of Georgia as wilderness, and for other purposes;

S. 2808. An act to designate certain National Forest System lands in the State of Mississippi as wilderness, and for other purposes;

S.J. Res. 80. Joint resolution to grant posthumously full rights of citizenship to William Penn and to Hannah Callowhill Penn; and

S.J. Res. 273. Joint resolution to designate the week of October 7, 1984, through October 13, 1984, as "Smokey Bear Week."

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on October 5, 1984 present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.J. Res. 659. Joint resolution making further continuing appropriations for fiscal year 1985;

H.R. 2838. An act entitled the "Federal Timber Contract Payment Modification Act";

H.R. 2859. An act for the relief of John Brima Charles;

H.R. 2878. An act to amend and extend the Library Services and Construction Act;

H.R. 2889. An act to amend the National Historic Preservation Act, and for other purposes;

H.R. 3601. An act to modify the boundary of the Pike National Forest in the State of Colorado, and for other purposes;

H.R. 3697. An act to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes;

H.R. 4932. An act to withdraw certain public lands in Lincoln County, NV, and for other purposes;

H.R. 4994. An act to exempt from taxation by the District of Columbia certain property of the Jewish War Veterans, U.S.A. National Memorial, Incorporated;

H.R. 5223. An act to amend the Federal Meat Inspection Act and the Poultry Products Inspection Act to exempt restaurant central kitchens under certain conditions from Federal inspection requirements;

H.R. 5513. An act to designate the Delta States Research Center in Stoneville, MS, as the "Jamie Whitten Delta States Research Center";

H.R. 5540. An act to provide for restoration of Federal recognition to the Confederated Tribes of Coos, Lower Umpqua, and Siuslaw Indians, to institute for such tribe those Federal services provided to Indians who are recognized by the Federal Government and who receive such services because of Federal trust responsibility, and for other purposes;

H.R. 5631. An act to provide for the acquisition of a visitor contact and administrative site for the Big Thicket National Preserve in the State of Texas;

H.R. 5782. An act granting the consent of Congress to an amendment to the Delaware River Basin Compact; and

H.R. 5818. An act to enable the Consumer Product Safety Commission to protect the public by ordering notice and repair, replacement or refund of certain toys or articles intended for use by children if such toys or articles contain a defect which creates a substantial risk of injury to children.

H.R. 5997. An act to designate the U.S. Post Office and Courthouse in Pendleton, Oregon, as the "John F. Kilkenny U.S. Post Office and Courthouse"; and

H.R. 6223. An act to amend the Act providing for the incorporation of certain persons as Group Hospitalization, Inc.

ADJOURNMENT

Mr. WALKER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 24 minutes p.m.) under its previous order, the House adjourned until tomorrow, Wednesday, October 10, 1984, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4144. A letter from the Secretary, Railroad Retirement Board, transmitting notification of an expenditure or obligation in excess of appropriation or apportionment, pursuant to 31 U.S.C. 1517(b); to the Committee on Appropriations.

4145. A letter from the Deputy Assistant Secretary of Defense, transmitting notification of the Navy's intent to exercise the provision for exclusion of the clause concerning examination of record by the Comptroller General, pursuant to the act of June 30, 1949, chapter 288, section 304(c) (80 Stat. 850); to the Committee on Armed Services.

4146. A letter from the Secretary of Education, transmitting a report on institutions which did not satisfy the waiver requirements of section 312(2)(A)(ii) or 322(a)(2(A)(ii) of the Higher Education Act, pursuant to HEA, section 342(a)(2) (94 Stat. 1398); to the Committee on Education and Labor.

4147. A letter from the General Counsel, Department of Energy, transmitting a notice of meetings related to the International Energy Program; to the Committee on Energy and Commerce.

4148. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of items proposed for removal from the U.S. Munitions List, pursuant to AECA, section 38(f) (95 Stat. 1522); to the Committee on Foreign Affairs.

4149. A letter from the Chairman, Foreign Claims Settlement Commission of the United States, transmitting the Commission's 1983 annual report on operations under the War Claims Act of 1948, as amended and the International Claims Settlement Act of 1949, as amended, pursuant to the act of July 3, 1948, chapter 826, section 2(6) (79 Stat. 1312) and the act of March 10, 1950, chapter 54, section 3(c); to the Committee on Foreign Affairs.

4150. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a) (92 Stat. 993); to the Committee on Foreign Affairs.

4151. A letter from the Commissioner, Immigration and Naturalization Service, transmitting a report on the adjustment of status of nonimmigrants to that of aliens lawfully admitted for permanent residence, pursuant to Public Law 85–136, section 13(c); to the Committee on the Judiciary.

4152. A letter from the Acting Under Secretary of Agriculture for International Affairs and Commodity Programs, transmitting the initial commodity and country allocation table showing current programming plans for food assistance under title I/III of Public Law 480 for fiscal year 1985, pursuant to the act of July 10, 1954, chapter 469, section 408(b) (91 Stat. 552; 94 Stat. 2246; E. O. 11963); jointly, to the Committees on Agriculture and Foreign Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PANETTA:

H.R. 6422. A bill to authorize the Director of the ACTION Agency to provide grants to States and units of general local government for youth service projects, and for other purposes; to the Committee on Education and Labor.

By Mr. CONYERS:

H.R. 6423. A bill to amend the U.S. Housing Act of 1937 to require the Secretary of Housing and Urban Development to administer a program of construction and revitalization of public housing, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BROOKS:

H.R. 6424. A bill to provide for contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A or 4C of the Clayton Act; to the Committee on the Judiciary.

By Mrs. COLLINS:

H.R. 6425. A bill to require each depository institution to disclose to its customers all terms, conditions, and charges which apply to services offered by such depository institution; to the Committee on Banking, Finance and Urban Affairs.

Mr. DOWDY of Mississippi:

H.R. 6426. A bill entitled: the Bogue Chitto Creek Relief Act; to the Committee on Public Works and Transportation.

H.R. 6427. A bill entitled: the Purple Creek Relief Act; to the Committee on Public Works and Transportation.

By Mr. HOWARD (for himself and Mr. WRIGHT):

H.R. 6428. A bill to amend the Congressional Budget Act of 1974 to require the annual concurrent resolutions on the budget to separately identify and summarize the public civilian and military capital investment expenditures of the United States, and for other purposes; to the Committee on Rules.

By Mr. SCHUMER (for himself, Mr. GONZALEZ, and Mr. MCKINNEY):

H.R. 6429. A bill to authorize the Secretary of Housing and Urban Development to provide assistance for the construction and substantial rehabilitation of single-family homes, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HOYER.

H.J. Res. 662. Joint resolution making further continuing appropriations for fiscal year 1985; to the Committee on Appropriations.

By Mr. WHITTEN:

H.J. Res. 663. Joint resolution making further continuing appropriations for fiscal year 1985; to the Committee on Appropriations; committee discharged; rules suspended, considered and passed.

By Mr. UDALL:

H. Con. Res. 371. Concurrent resolution directing the Clerk of the House of Representatives to make a correction in the enrollment of the bill H.R. 2790; considered and agreed to.

By Mr. ROSTENKOWSKI:

H. Con. Res. 372. Concurrent resolution to correct the enrollment of H.R. 3398; considered and agreed to.

By Mr. EDWARDS of California:

H. Con. Res. 373. Concurrent resolution to correct a technical error in the enrollment of the bill H.R. 6257; considered and agreed to.

By Mr. FUQUA:

H. Con. Res. 374. Concurrent resolution to correct technical errors in the enrollment of the bill H.R. 3942; considered and agreed to.

By Mr. RODINO:

H. Res. 613. Resolution to provide for the concurrence in the Senate amendment to H.R. 6027 with an amendment; considered under the suspension of the rules and not agreed to.

MEMORIALS

Under clause 4 of rule XXII,

508. The SPEAKER presented a memorial of the Legislature of the State of California, relative to albacore fishing; jointly, to the Committees on Armed Services and Merchant Marine and Fisheries.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 3024: Mr. PORTER and Mr. DANNEMEYER.

H.R. 3026: Mr. YOUNG of Alaska, Mr. JEFFORDS, and Mr. HUGHES.

H.R. 3300: Mr. SMITH of Iowa.

H.R. 3405: Mr. YOUNG of Alaska.

H.R. 4791: Mr. QUILLEN and Mr. CARPER.

H.R. 5032: Mr. PATTERSON.

H.R. 5423: Ms. OAKAR.

H.R. 5446: Mr. COLEMAN of Texas.

H.R. 5641: Mr. MCNULTY.

H.R. 5784: Mr. GREGG.

H.R. 5943: Mr. STUMP and Mr. RUDD.

H.R. 6021: Mr. RITTER.

H.R. 6043: Mrs. BOGGS and Mr. OBEY.

H.R. 6062: Mrs. KENNELLY.

H.R. 6074: Mr. SILJANDER.

H.R. 6096: Mr. WOLPE and Mr. VENTO.

H.R. 6203: Mrs. COLLINS, Mr. MARTINEZ, Mr. MOAKLEY, Mr. CROCKETT, Mr. DOWNEY of New York, Mr. WISE, Mr. KILDEE, Mr. DORGAN, Mr. BERMAN, Mr. FEIGHAN, Mr. DEWINE, Mr. TOWNS, Mr. ROE, Mr. SCHUMER, Mr. OWENS, Mr. YOUNG of Missouri, Mr. MITCHELL, Mrs. SCHNEIDER, Mr. RICHARDSON, Mr. BARNES, Mr. BEREUTER, Mr. RODINO, Mr. SIMON, Mr. SOLARZ, Mr. STARK, Mr. DURBIN, Mr. GEJDENSON, Mr. COYNE, Mr. LEVINE of California, Mr. LEVIN of Michigan, Mr. DASCHLE, Mr. SYNAR, Ms. KAPTUR, Mr. RANGEL, Mr. DELLUMS, Mr. WALGREN, Mr. OBERSTAR, Mr. FRANK, Mr. ACKERMAN, Mr. STOKES, Mr. SAVAGE, Mr. MOODY, Mr. HALL of Ohio, Mr. WAXMAN, Mr. JEFFORDS, Mr. BEDELL, Mr. TORRICELLI, and Mr. EDWARDS of California.

H.R. 6207: Mr. ADDABBO.

H.J. Res. 623: Mr. RINALDO and Mr. SYNAR.

H.J. Res. 627: Mr. ANNUNZIO.

H.J. Res. 630: Mr. MADIGAN and Mr. WOLF.

H. Con. Res. 306: Mr. DANNEMEYER.

H. Con. Res. 317: Mr. GREGG.

H. Con Res. 339: Mr. GINGRICH and Mr. BILIRAKIS.

H. Con. Res. 363: Mr. HUBBARD, Mr. LIVINGSTON, Mr. MCCLOSKEY, Mr. ARCHER, Mr. STENHOLM, Mr. STUMP, Mr. HALL of Ohio, Mr. HANSEN of Idaho, Mr. SKELTON, Mr. ECKART, Mr. YOUNG of Missouri, Mr. VOLKMER, and Mr. SKEEN.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 5745: Mr. CORRADA.

PETITIONS, ETC.

Under clause 1 of rule XXII,

416. The SPEAKER presented a petition of the Convention of the International Typographical Union, Colorado Springs, CO relative to clean air; which was referred to the Committee on Energy and Commerce.

EXTENSIONS OF REMARKS

THE STATE ROUTE TO HIGH TECHNOLOGY: NO EASY ROAD

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mrs. LLOYD. Mr. Speaker, the distinguished Governor of Arizona, the Honorable Bruce Babbitt, has authored a thoughtful article, "The States and the Reindustrialization of America," which appeared in the fall 1984 "Issues in Science and Technology." Governor Babbitt has served as the chairman of the Western Governors' Policy Office and the Nuclear Safety Oversight Committee. He is an author of several books and has written a most valuable article which outlines the problems and opportunities for the Federal Government and the States in the massive effort to achieve "the reindustrialization of America."

Governor Babbitt notes the critical need to nurture technology from the laboratory bench through the applied research stage on the way to product development by noting, "[t]he fruits of university research and development activity has little economic value unless they are systematically harvested in the marketplace."

While realizing the necessity for growing industry/university ties in research, he notes that it is not without problems: "[t]he emerging university-business ties raise subtle issues of academic freedom, proprietary restrictions on the dissemination of information, and patent and royalty rights."

He also comments on the rapidly achieved national consensus on upgrading the quality of our schools and our teachers: "[t]ougher academic standards and objective performance requirements, with greater emphasis on math and science, are now the rule across the Nation."

Governor Babbitt also recognizes the fact that the lure of high technology may be somewhat illusory and suggests an alternative: "[t]here should be more attention to using electronic technology to upgrade and revive traditional regional industries."

I hope that this article will catalyze more thoughtful debate on the question of this country's high technology future and help to dispel the prevailing misperception that the path of many States to such a future is easy or even necessarily desirable:

Two years ago ten American high technology companies, including Control Data, Honeywell, Lockheed, Motorola, Sperry, and NCR, stepped forward to meet the Japanese challenge for supremacy in supercomputer development by pooling resources to form a research consortium called Microelectronics and Computers Corporation (MCC). The consortium hired a former deputy head of the Central Intelligence Agency, Admiral Bobby Inman, to run MCC, and the admiral set out to find a permanent home for his new company.

Admiral Inman and his associates toured the country like an imperial court as mayors and governors extolled the virtues of their respective sites and offered up such tangible inducements as real estate, research facilities, and endowed professorships. When the bidding finally peaked with an unbeatable offer from Texas, Inman had secured a multimillion dollar package, including thirty million dollars in faculty endowments at the University of Texas in Austin, thirty-seven million dollars in equipment and operating expenses, twenty acres of land a nominal rent in the Balcomes Research Park, twenty million dollars worth of office space, subsidized home mortgages for MCC employees, a petty cash fund of a half-million dollars for country club initiation fees and other services, and a Lear jet with two pilots available at all times. Some sixty mayors and twenty-seven governors complained about the unfair advantage of Texas oil money and promised their constituents a better showing next time.

The great MCC bidding war marks a special chapter in American industrial history. State and local governments across the country have discovered scientific research and technological innovation as the prime force for economic growth and job creation. And local officials have also uncovered a broad base of public interest that can be translated into support for aggressive action programs. With the exception, perhaps, of the post-Sputnik era, such grassroots enthusiasm for science and technology had not been seen since the Gilded Age of the nineteenth century, when communities vied to finance the transcontinental railroads.

This renewed public interest in industrial innovation and technological progress is rooted, in some measure, in the sharp economic recession and increase in unemployment that began in 1980. It is a product of Japanese competition and of a growing awareness that helping new, small businesses creates more jobs than trying to lure giant smokestack industries. There is a realization that technology—the application of scientific knowledge—is the basis for economic expansion and diversification, the key to the formation of new business, and the competitive survival of old ones. This is very much a grassroots phenomenon, developing and taking shape through independent efforts in thousands of communities, hundreds of universities, and fifty state legislatures.

Across the country, governors have appointed public commissions to examine the role of state and local government in economic revitalization and to make recommendations for stimulating economic growth. In some states, the recommendations of these commissions amount to a state industrial policy, a comprehensive plan addressing all aspects of governmental performance including taxation, expenditures, regulatory policy, infrastructure development, and education. Other states have proceeded more cautiously, emphasizing such areas of traditional concern as public schools and better roads. Typically, however, state programs recognize that economic development is linked to technology and that technology in turn builds upon scientific research, public education, and the investment of capital.

Why should states be involved in all this? In part because they have unique capabilities that flow from a longstanding relationship with education. Elementary and secondary education is a state and local responsibility. State universities have long been the center of agricultural research, and in recent years they have expanded into medicine, computers, electronics, bioengineering, materials science, and other fields. State economic development planning, the involvement of states in budgeting university research, and the demand of the private sector for university excellence have made it possible to build close connections between university research and economic development and job creation.

Recent changes in the American economy have enhanced the role of state and local governments in formulating industrial policy. In past decades, technology had a centralizing impact. Only massive multinational corporations joined with big labor and big government to dominate our economic life. Washington and Wall Street made economic policy, and governors and state legislators contented themselves with placing ads in the Wall Street Journal offering tax breaks and discount real estate to any company willing to locate a branch facility.

The microelectronics revolution is now exerting an opposite, decentralizing force in the American economy. Big growth in the technology sector is coming from hundreds of new companies that did not even exist a few years ago. From Massachusetts to California, software companies in backyard garages are taking root and moving into the national market overnight. The near mythical story of Steven Jobs and Apple Computer inspires dissatisfied and restless corporate engineers to think about starting their own businesses.

The process of decentralization has also been accelerated by the liberation of industry from the constraints of geography. A circuit manufacturer or software company, with a high value added product and insignificant transportation costs, no longer needs a deep-water port or proximity to coal fields and steel mills. The new technology enterprise is free to locate anywhere its founders wish to go.

The technology-driven decentralization of the American economy and the dominant role of small business in job crreation were confirmed in 1979 by a landmark study undertaken by David Birch of the Massachusetts Institute of Technology. Based on a computerized analysis of six million businesses in the United States, Birch concluded that small businesses (those with fewer than twenty employees) generated two-thirds of all new jobs. Here were shared data reaffirming the diversity and decentralization of the American economy. The Birch study conveyed a strong message that state and local policies could be the crucial factor in the use of science and technology to create and sustain new companies and new jobs.

31-059 O-87-26 (Pt. 22)

Nearly every state has increased its support for university-based research and development. In the West, state legislatures, lobbied by both businessmen and academics, have come to understand the crucial role that Stanford University played in providing the ideas, research, and scientific and engineering talent that produced Silicon Valley. In the East, Harvard and MIT did the same for the high-tech companies that flourished along Route 128.

A few years ago, in Arizona, a group of companies that included Motorola, Sperry, and Garrett banded together and offered matching grants to induce the state legislature to fund a fifty million dollar microelectronics and engineering center at Arizona State University. This year, the Arizona legislature, recognizing the potential of biotechnology and medical science, established a statewide commission, modeled after the National Science Foundation, to provide three million dollars a year in grants for medical research in the treatment of cancer and other diseases.

The pattern has been repeated in many other states. Texas has committed, over and above the MCC package, more than one hundred million dollars in added support for science and technology in the University of Texas system. North Carolina has budgeted forty million dollars for a multi-university microelectronic center. And Michigan plans to spend more than one hundred million dollars for major efforts in industrial technology, robotics, and molecular biology. In most cases, these programs have been linked with increased support from industry and private donors.

What is noteworthy is that behind this funding lies a new awareness that the fruits of university research and development activity have little economic value unless they are systematically harvested in the marketplace. Every student of Japanese industry knows that while basic research remains an American strength, the Japanese are much more successful at translating research into marketable products. Many state technology programs have recognized the traditional wall that separates the university from the business community as a barrier to innovation and business development; steps are being taken to eliminate the barriers and to build bridges of cooperation.

Research parks are proliferating across the country. Perhaps the best known are those at Stanford, Princeton, and Research Triangle Park in North Carolina. The University of Utah Research Park is noteworthy because of its successful initiation in a state without a strong tradition of high tech industry. The park was established in 1977 adjacent to the Salt Lake City campus. University participation was actively encouraged and produced an interesting mix of commercial ventures. Work in the electrical engineering department gave rise to a computer graphics company. The biology department pursued research that led to the formation of a public company that uses plant genetics to create new strains of native intermountain plants. And the park's much-publicized artificial heart research produced a medical products company that has expanded beyond the confines of the facility.

To be effective, a research park must have more than a prestigious location with the word "university" in its address. Success relies on a solid linkage between industry and university personnel working on shared research, a carefully thought-out university patent policy that encourages entrepreneurship, and a supportive university administration. The availability of venture capital and professional management skills is also important. Most universities have little notion of the potential commercial successes languishing in their research laboratories. To stimulate university interest, a few years ago Control Data Corporation devised a program called "Quest for Technology." For a negotiated fee, including royalty participation, Control Data arranged with several universities to conduct systematic analyses of all on-campus research to assess the prospects for commercialization.

These emerging university-business ties raise subtle issues of academic freedom, proprietary restrictions on the dissemination of information, patent and royalty rights, and other issues. But such problems are being resolved as they arise. The skeptics who warn against greater cooperation might recall the origins of one of America's greatest universities. Back in 1865, leaders of the emerging Boston industrial community tried to persuade Harvard to modify its rigidly classical curriculum and provide more applied science and engineering. Frustrated by an apathetic response, the civic leaders went down the Charles River and threw their support behind a more practical new institution called the Massachusetts Institute of Technology.

A step beyond the research park is the "incubator facility" in which government, the university, and industry join to provide a full spectrum of the management, technical, professional, and marketing services necessary to aid in the start-up of a new technology enterprise. Pennsylvania, with one of the most extensive programs based on the incubator concept, has established centers in partnership with universities, industry, and organized labor. Each "Ben Franklin Parternship Center" provides a one-stop cafeteria of services for the technology entrepreneur. An aspiring businessman can obtain assistance in preparing a business plan or feasibility study, as well as access to employee training and capital.

One such center in State College, Pennsylvania, uses a vacant school building, renovated and leased at three dollars per square foot. Another center uses an old building on the campus at Lehigh University together with shared space at an underutilized Bethlehem Steel research center. One start-up business consists of six laid-off photographers from Bethlehem Steel who have developed a process for linking photography with computer-aided design and computer-aided manufacturing techniques. Another new firm using incubator space and facilities developed a computer program for storage and retrieval of newspaper archives, a process requiring use of the mainframe computer on the Lehigh campus. In each case, the availability of support and business consulting services was essential to the venture's success.

These new programs to harness university resources to technology and business development have strong roots in American history. During the Civil War, Congress enacted the Morrill Act, creating land grant colleges with agricultural research stations. The agricultural experiment stations pioneered research in human nutrition. They developed the hybrid corn and wheat that revolutionized agricultural production. Research at experiment stations also aided in local economic development. Work at the University of California at Davis gave birth to the California wine industry. In the early 1900's, experimentation with varieties of Egyptian cotton led to the Pima cotton that became Arizona's major farm crop.

The Morrill Act also provided a unique American model for transferring university research to economic production. The county extension agent spread the benefits of research to farmers and their families through extension bulletins, demonstration programs, personal advice, and 4-H clubs. Today's research parks and incubator programs are attempting to do the same for modern technology.

The technology revolution has also revived public interest in education. A century ago, most Americans worked on farms. Productivity required a strong back and McGuffey's reader was sufficient education for most. Fifty years ago, most Americans worked in assembly lines and other industrial jobs that required basic literacy and some apprenticeship training. By the end of this century, however, vast numbers of Americans will be working in information and technology jobs requiring solid quantitative skills and a measure of computer literacy as a condition of employment.

The relationship between economic change and education can be dramatized by comparing a couple of help-wanted ads. The following ad was run in a San Francisco newspaper in 1860 by the organizers of the Pony Express: "WANTED: Young, skinny, wiry fellows, not over 18. Must be expert riders willing to risk death daily. Orphans preferred."

The following ad for engineers appeared in a recent edition of *The Los Angeles Times:* "Your background should include extensive experience with repetitivley-pulsed excimer lasers, with emphasis on pulsed power, fluid dynamics, and materials science aspects. An additional background in linear and nonlinear optics, electronics, and computer modeling would be helpful."

In 1960 most of those wiry young orphans couldn't read or write, which made little difference because literacy never has been a requirement for riding a horse. Many of today's new careers are far more sophisticated.

Paradoxically, as the information revolution accelerated the need for an educated work force, Americans drifted into an era of diluted educational standards, lower achievement levels, and technological pessimism. During those decades of decline, state attitudes toward education ranged from indifference to uncritical acceptance of programs put forth by teacher lobbies and other interest groups. Happily, this era of indifference is at an end, and the states are moving to reverse the seventeen-year decline in high school achievement scores. But many governors have advanced educational reform programs only to encounter opposition from teacher groups, taxpayer lobbies, and others. In many instances those governors have appealed directly to the public for support, usually with considerable success.

The most basic reform is to introduce strong curriculum standards. Before 1980 most states did not have minimum high school graduation requirements. It was not uncommon for high schools to graduate students with as little as one year of English and with no math or science instruction at all.

This trend is rapidly being reversed. Arizona, Illinois, California, and other states have all adopted minimum high school graduation standards that require two years of math and two years of science. Connecticut and Florida have mandated three years of mathematics and science. Most states

now require three or four years of high school English, and many are introducing computer literacy programs at both the elementary and high school levels.

Uniform student achievement testing, once controversial, has gained widespread acceptance. A majority of states now mandate some form of statewide achievement testing. A Florida provision requiring minimum test scores for high school graduation has been attacked as discriminatory and has been temporarily deferred. Nonetheless, the trend is undeniable: tougher academic standards and objective performance requirements, with greater emphasis on mathematics and science, are now the rule across the nation.

In recent years teacher shortages have become a serious problem, particularly in science and mathematics. Qualified math and science teachers can often double their salaries by simply crossing the street to work for a local technology company. All too often this means that a football coach with a course in college algebra winds up as the principal mathematics teacher.

Extensive efforts are underway in most states to improve teacher performance and to raise salaries. The movement to raise salaries has been especially strong in the South, which historically has lagged below national norms. In Arkansas, Governor Bill Clinton pushed through the legislature a state program of mandatory teacher testing that required all Arkansas teachers, old and new, to pass competency tests in reading, writing, mathematics, and other special subject areas. The proposal was sweetened by an increase in the state sales tax that raised an additional one hundred and fifty million dollars for teacher salaries.

In Tennessee, where teachers earned an average of seven thousand dollars a year, 30 percent below the national average, Governor Lamar Alexander has implemented a plan to raise salaries by an average of 20 percent, financed by a two-penny increase in the state sales tax.

The Alexander pay plan is tied to a comprehensive merit pay scheme. Teachers will be evaluated regularly by professional committees, and the most effective teachers will be eligible for merit promotions that carry additional responsibility and higher pay. The merit pay concept is a major departure from the American public school tradition of lock-step egalitarianism, where teacher salaries are based strictly on seniority and the number of academic degrees held. Superior teachers are paid exactly the same as average teachers, who are paid the same as mediocre teachers. The Tennessee plan was enacted over strong protests from teacher groups. Variants of the merit pay concept are now being implemented in California and several other states, and the idea is spreading despite strenuous opposition.

Efforts to reinvigorate public education have been matched by renewed attention to vocational education in both high schools and community colleges. Vocational education, which originally grew out of links with the county extension service, has all too often lagged behind the rapidly changing requirements of the marketplace. Many states now have programs underway to match training to the needs of the business community and to ensure that students are well grounded in basic literacy and computation skills.

The last wave of educational reform created in the late 1950s when the first Sputnik earth satellite sent a message that our science and technology was lagging. At that time, America responded from the top down by enacting the National Defense Education Act and by vastly increasing the budget of the National Science Foundation. There was immediate improvement, but the changes were not supported by sustained public interest and commitment. Perhaps the lack of sustained commitment was the byproduct of imposing broad reforms from the top down. There is reason to believe that the reforms of the 1980s will be more long lasting. They are being won at the local level with persistent leadership, intense debate, and widespread public involement. The reforms are coming more painfully and more slowly, but for precisely that reason they are likely to be more permanent.

The third area of state activity is the financing of new technology enterprises. Starting up a high technology business is the ultimate risky adventure. Developing a new product typically takes several years. The lemons ripen yearly, and the apples seem to develop more slowly. The reward can be very high but so is the risk of failure.

The typical venture will require several million dollars up front. The entrepreneur with a new idea and no track record of previous success will have a difficult time finding capital. The local bank is traditionally not a very good budget; all too often American bankers prefer real estate to research and would rather take their risks with Penn Square and loans to Argentina.

The banking industry, however, is beginning to change. Many banks are training loan officers to deal with the special problems of technology start-ups and are providing them with information and referral sources to guide risktakers to other sources of capital.

Some states have begun to consider public pension funds as a source of venture capital. A landmark study of California pension funds initiated by Governor Jerry Brown suggested that the multibillion dollar California pension funds, traditionally invested in Wall Street, could be used at home to stimulate technology growth. Based on this study, a number of proposals were advanced to utilize portions of various funds for investment in new high-tech enterprises in California. Many other states have followed suit, typically earmarking 2 to 5 percent of their funds for investment with venture capital companies. The cumulative national total of these changes will add many hundreds of millions of dollars of previously unavailable capital for innovative new enterprises.

The classic source of start-up finance is the private venture capital company. Venture magazine's list of the 100 largest venture capital firms reveals that one-third are located in New York and another third in California. This uneven distribution of capital and the clear link between risk capital and technology development have caused some states to use public funds to enter directly into the venture capital business.

Public venture financing originated in New England and the Great Lakes region in states that were heavily impacted by the economic stress of the last decade. A prototype is the Massachusetts Technology Development Corporation, established in 1979 by the Massachusetts legislature with an appropriation of two million dollars. So far, the Massashusetts fund has provided venture capital to more than fourteen new companies.

Another example is the Connecticut Product Development Corporation, which provides risk capital to existing companies for new products and procedures. While emphasizing technology, the corporation has also invested in such low-tech products as soupbase concentrate. The corporation receives its return from royalty payments, typically 5 percent of product sales. Since 1973 the corporation has invested eleven million dollars in products and received one million four hundred thousand dollars in royalties. Its biggest success has been a manufacturer of electronic key telephone systems with 1,000 employees and more than three hundred million dollars in annual sales.

The most comprehensive state initiative to date is a Rhode Island proposal called the "Greenhouse Compact." In 1982 the governor of Rhode Island appointed a Strategic Development Commission to formulate a plan for reviving the state's stagnating economy. The commission hired Ira Magaziner, a nationally known industrial policy advocate, to prepare a detailed analysis of the state's economy and to recommend action. In November 1983 the commission recommended improving the business climate by modifying taxation, expenditure, and regulatory polices. More significantly, the commission concluded that traditional laissez-faire polices were not enough. "Measures which improve the state's business climate will not by themselves be sufficient to turn around the state's economy." the commission reported. It then proposed to make Rhode Island a testbed of industrial policy ideas.

The resulting proposals resemble many of the policies being advanced at the national level for creation of a successor to the old Reconstruction Finance Corporation to invest public funds for expansion and modernization of industry. The Rhode Island plan called for one hundred and thirty million dollars in grants and loans to expand traditional industries, including fishing, boat building, jewelry manufacturing, and tourism. It also proposed to invest ninety million dollars in new technology industries through a forty million dollar venture capital fund and fifty million dollars to support research "Greenhouses." The Greenhouses were perceived as independent nonprofit institutions that would take technologies that were well advanced in basic research—such as those involved in new clinical drugs, robotics, and thin-film materials—and accelerate the process of commercial development.

Compared to other state efforts, the Rhode Island proposal is heavily weighted toward existing industries and somewhat thin on support for education and basic research. In June the Greenhouse Compact was submitted to the voters in a special referendum. After a heated campaign, it was rejected by a four-to-one margin. State leaders differ on the reasons for the overwhelming defeat. Some see it as a wholesale rejection of the concept of industrial policy. Others label it an antitax vote or even an expression of voter concern about charges of corruption in municipal government, summed up by the campaign slogan "Clean House, Then Greenhouse."

It is too soon to tell whether the Rhode Island episode represents the high tide of state activism. It is also still too early to evaluate many of the new experimental programs being carried out in other parts of the country. But it is certainly time to begin posing some questions.

For example, can the states carry the financial burden of reforming public education wihtout increased federal assistance? Can fifty states subsidize expensive basic research without duplication of effort and in-

efficiency? Can states, working with unions, industry, and the financial community, enhance the processes for translating basic knowledge into practical applications for the marketplace? To what extent should government attempt to pick technology winners and losers by allocating investment capital?

Even at this early point, it seems clear that public education will emerge a strong winner. Elementary and secondary education is a traditional state and local responsibility, and the renewal of public interest bodes well for science and technology, our economic competitiveness, and our national security. The push for higher standards and student performance is still gathering momentum. The campaign for adequate salaries and merit pay, however, is moving more slowly, trapped in a crossfire of opposition from taxpayer lobbies resisting additional public expenditures and teacher organizations opposed to merit pay.

State university systems are also a clear winner. But there are questions of emphasis and direction. The explosion of support for electronics has not been matched by support for research basics—mathematics and the physical sciences—and there has not been adequate consideration of the relationship between federal and state support for scientific research. At the federal level, the National Science Foundation has been a strong force for coordination and peer review, but there are few comparable institutions at the state level.

State initiatives to enter and manage the risk capital market are more ambiguous. States are powerfully attracted to the electronic glitter of Silicon Valley, but the ingredients of that success are not well understood. Not everyone believes there is a shortage of venture capital, and some argue that there is already too much money chasing too few deals.

Others question whether it is realistic to replicate Silicon Valley and advocate more attention to the relatinship between high-tech and low-tech, or the process of using electronic technology to upgrade and revive traditional regional industries.

Nonetheless, one overall trend seems clear. The flurry of governmental activism at the state and local levels amounts to an important rebalancing of the American system. Justice Brandeis once characterized the states as "laboratories of democracy," suggesting that the federal government should stay its heavy hand and learn from state experience before applying any one model to the entire country. The best new approaches to reinvigorate scientific research, to build new patterns of public and private cooperation, stimulate educational reform, and promote savings and capital investment are beginning to bloom somewhere out in the American heartland. It is still a little early to pick the fruit, but we can be confident that harvest time is not too far away.●

THE RETIREMENT EQUITY ACT

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Ms. FERRARO. Mr. Speaker, on August 9, the House gave final passage to the Retirement Equity Act and it was signed into law on August 23. I said at that time that this legislation, based on my Private Pension Reform bill and 4 years in the making, was just a first step in providing greater retirement equity and old age security for all American workers—men and women.

It was my intention to introduce in this Congress the VIP bill—a bill to substantially reform ERISA to reflect the workforce realities of today and the future. Because this 98th Congress is drawing to a close and because I will not be a Member of the 99th Congress, I have decided that rather than introduce this important legislation at the 11th hour, I would instead allow the discussion to begin by laying out in the CONGRESSIONAL RECORD the principles of the proposed VIP bill.

My distinguished colleague from Missouri, BILL CLAY, chairman of the Labor-Management Subcommittee of the Education and Labor Committee, who played such a key role in passage of the Retirement Equity Act, has assured me this legislation will be a priority of his in the 99th Congress.

On the Senate side, the Senator from Massachusetts, Mr. KENNEDY, has been working with me to develop the legislation and will actively pursue it in 1985.

We are calling this legislation the VIP bill because vesting, integration and portability are the three areas in which ERISA is in the greatest need of reform if it is to be fair to all workers and flexible enough to accommodate modern-day working patterns.

Here is what the bill will do:

VESTING

It reduces, from 10 years to 5 years, the number of years of service a pension plan participant must complete in order to earn a 100-percent nonforfeitable right to a retirement benefit.

It would permit multi-employer pension plans to retain 10-year vesting, on condition that there is complete reciprocity for workers who move from one regional pension plan to another within the same industry.

In a time when many industries, particularly the high tech industries, actually encourage workers to change employment every few years; when statistics show that the median number of years in one job is 2.5 years for women and 4 years for men; and when the high unemployment rate makes it difficult for many workers to accumulate 10 years of uninterrupted service under a pension plan, this reform will assure that far more workers receive benefits when they retire.

INTEGRATION

Integration is the practice of offsetting a pension plan participant's earned benefit by the amount of Social Security benefits the worker will receive on retirement. Some 45 percent of medium and large plans and almost all smaller pension plans use integration in calculating retirement benefits. The impact on the lowest-paid workers is very serious because integration can wipe out their entire pension, leaving them totally dependent on Social Security.

This legislation requires all integrated pension plans to provide a minimum benefit, above and beyond the Social Security benefit. For integrated defined benefit plans this minimum would be 1.5 percent of the employee's compensation over a 10-year period. For integrated defined contribution plans, the minimum would be 2.5 percent of compensation for all years of service.

PORTABILITY

Workers may vest in several pension plans during their work careers. With 5-year vesting, this will become even more common and the accrued benefit in each plan would be rather small.

This bill gives workers the opportunity to invest these small vested benefits in portable pension accounts in order to maximize their income upon retirement.

A worker who leaves employment having accrued a vested benefit of $7,000 or less would have the option of leaving it in his or her employer's pension plan, or withdrawing the money for deposit in his or her own Portable Pension Account.

The PPA would work like an individual retirement account with two major differences:

First, only the pension rollover could be deposited in this account. The worker would not be allowed to add $2,000 each year.

Second, any withdrawal from this account before age 59½ would be punishable with a 100-percent penalty excise tax. The purpose of this strict penalty is to assure that the money would be used as intended—for retirement income.

In addition, I expect the VIP legislation to call for a study of cost-of-living adjustments in private pension plans and a study of vesting rules as they relate to part-time workers. Both studies would be conducted by the Secretary of Labor.

Mr. Speaker, this year ERISA celebrated its 10th anniversary. This landmark legislation has significantly enhanced old age security for American workers. The Retirement Equity Act will further assure justice for women workers and the spouses of pension plan participants. It is my hope that VIP will complete our efforts to build an effective private pension system and that this legislation will be introduced and move swiftly in the 99th Congress.●

WELCOME TO OUR NEWLY NATURALIZED AMERICANS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. GILMAN. Mr. Speaker, it is with sincere pleasure that I congratulate the residents of New York's 22d Congressional District who have recently chosen to become citizens of the United States, with all of the privileges, freedoms, and responsibilities that American citizenship entails.

Our Hudson Valley region in New York State is proud of its newest citizens, and I invite my colleagues to join in welcoming the following newly naturalized Americans and extending to them our best wishes for a happy and prosperous life in their new homeland:

Mr. Antonio Abreu, Ms. Caterina Addino, Mr. J. Aghamkar, Mr. George Praca Alcoforado, Mr. Mir Wizarat Ali, Mr. Syed Mukhtar Ali, Mr. Soterios Andrikos, Ms. Carole Armand, Mr. Marc Armand, Ms. Carminia Erana Avecilla, Ms. Nursel Aydin, Mrs. Linda Yung Bae, Mr. Shimon Baum, Ms. Roselene Peggy Beauchard, Mr. Mordcai Blau, Ms. Paulette Lurine Bogle, Mr. Octave Borgelin, Ms. Ginette Bossicot, Mr. Lorenzo Boswell, Mr. Seamus Anthony Brady, Mr. Sergio Alcadio Castillo, Ms. Norma Bahia Cepeda, Mrs. Maria Cerzon, Mr. Edmar Elias Chahine, Ms. Hilda Chatelain, Mr. Jean Claude Chatelain, Mrs. Gloria Ray-Poo Chen, Ms. Susanne Clark, Ms. Chong Sin Chae Cleveland, Mr. Vicente Jovanni Cueva, Mrs. N. Cunha-Leite, Mr. Rodrigo Abadilla Custodio, Mr. Frantz Hercule Daniel, Mr. Eneliot Demosthene, Ms. Doris Carmela Diaz, Mrs., Gulden Dogan, Ms. Lydia Valenzuela Domingo, Mr. Evens Edouard, Mrs. Ching Mon Lau Eng, Mr. Peter Kowk Gong Eng, Mr. Sun Kwong Eng, Ms. Annemasse Carmand Etienne, Ms. Marie Yolande Etienne, Mr. Roger Etienne, Mrs. Nunziata Fanelli, Ms. Marie Assephie Felix, Ms. Marta Helena Fernandes, Ms. Devora Feuerstein, Mrs. Margaret Ellen Field, Mr. Clarence Delvin Fields, Ms. Anna Fiorisi.

Mrs. Evelyn Fischer, Mr. Antonio Forgione, Mr. Syslin Hyacinth Francis, Ms. Edna Lauchengco Francisco, Mr. Leo Chor-Yin Fung, Ms. Rachel Wai-Yin Fung, Mrs. Ana Maria Galarza, Mr. Dinesh Chunilal Ganatra, Ms. Ovenia Gaspard, Mr. Rodney Gelin, Mrs. C. Giacombe, Mrs. Yudith Gluck, Mrs. Miriam Gruber, Mr. Saul Jesus Henriquez, Mr. Edwin Rufus Herman, Mr. Ruben Everist Hernandez, Mr. George Julio Hidalgo, Mr. Jean Benice Hippolyte, Mrs. Diva Hurtado, Ms. Marie Modeste Innocent, Mrs. Durupadi Jagtiani, Mr. Samuel Haiti Jean, Ms. S. Jean-Baptiste, Mr. Romain Jean-Charles, Mr. Akasalayil Chummar John, Mr. Israel Francois Joseph, Mr. Eduardo Delano Josephs, Mrs. Maria Karasaridis, Mr. Nubar Karincaian, Mrs. Nubar Karincaian, Mr. Yohannes Kaypaghain, Mr. Daniel Kaypaghian, Mrs. F. Kaypaghian, Mr. Simon Kaypaghian, Mrs. Mina Kim, Ms. Yong Ok Kim, Mr. Amador Canda Laput, Ms. Aurora Pineda Laxamana, Ms. Hai-Ping Lee, Mrs. Kyung Ai Lee, Ms. Ock Kyung Lee, Ms. Lina Leibov, Mr. Mikhail Leibov, Mr. Robert Levi, Ms. Devorah Baila Levovitz, Mrs. K. Limniatis, Ms. Seema Shahid Lodhi, Ms. Mariouse Lubin.

Mr. Shui-Wai Louis Lung, Mr. Gerald Michel Lys, Ms. Mirka Madhere, Mrs. Farkhanda Malik, Mr. Martin Mandlsperger, Ms. Zehavit Avy Margalit, Mr. Derrick John Martin, Mr. L. Martinez, Mr. Luis Rafael Martinez, Mr. Saturnin Maurice, Mr. Luke Harrison Mauro, Ms. Anne Cecilia Maria Miller, Mr. Geoffrey Sloan Miller, Mrs. C. Millingen, Miss Musarrat Perveen Moghal, Mr. Jean Raymond Montilus, Ms. Sarah Neuman, Mr. Jose Manuel Noceda, Ms. Christa O'Leary, Ms. Virginia Mismonte Ocampo, Mrs. Laura Teresie Olsen, Mrs. M. Palaran, Mrs. Mayuri Parikshit Pandya, Ms. Panna Anil Parikh, Mrs. Ai Young Park, Mr. I. Parvulescu, Ms. Voica Parvulescu, Mr. Raymond John Pawlyk, Ms. Marta Paz, Ms. Bernardita Peckham, Mrs. Agnes Pertis, Mr. Peter Pertis, Ms. Francisca Maranan Pineda, Mr. Pascual Antonio Polanco, Mr. Dominador Suriba Ponsades, Mr. R. Poole-DiSalvo, Mrs. Nicolina Pupo, Ms. N. Purohit, Ms. Anna Quacquarelli, Ms. Haidee Pidor Quijano, Mr. Z. Quijano, Mrs. Gloria Ramos, Ms. Bandaru Rajani Reddy, Mr. Germain Gadner Remy, Mr. Camilo Roa, Mr. Efraim Roa, Jr., Mr. George Rogachevsky, Ms. Irina Rogachevsky, Mrs. Gloria Cecilia Romano, Mr. Ricardo Daniel Romano, Mr. Nambi Salgunan.

Mr. Raoul Salvant, Mrs. Judith Sandel, Ms. Eugenia Francisco Santos, Ms. Eufemia Hernandez Santos, Mr. Ludwig Schlesinger, Mrs. Ludwig Schlesinger, Mrs. Ingrid Waltraut Schulz, Ms. Catalina Schutak, Mrs. Ansuya Shah, Ms. Deval Anill Shah, Ms. Kamala Shankar, Ms. Chandrakala Sharma, Mr. Devendra Mohan Sharma, Mr. Aron Shtirmer, Mr. Gennady Shtirmer, Mrs. Yevgenia Shtirmer, Ms. Dhaminy Singh, Mr. Ram Singh, Mr. Rudy Balanga Somera, Mr. Antonios Souris, Mrs. Antonios Souris, Miss Ourania Souris, Ms. Athena Uranise St. Clair, Mrs. Rivka Leah Stein, Ms. Ruth I. Hsu Su, Ms. P. Sullivan, Mr. Mark Sun, Mr. Renardz Sylvain, Ms. Patty Kwan Hoo Tang, Ms. Guillermina Tello, Mr. David Moni Thomas, Ms. Jennifer Ter-Ry Ting, Mr. Jack Tao Ting, Mr. Giovanni Tulino, Mr. Tsuyoshi M. Tung, Ms. Maria Elsa Velez, Ms. Marie Angelle Venant, Ms. Elvira Calinescu Vladescu, Ms. Anita Vunnam, Mr. Ernest Newton Walker, Mrs. Breindel Weinstock, Mr. Tai-Sheng Wong, Mrs. Yu-Fun Shih Wu, Ms. Ursual Claudina Wynn, Mr. Claudio Silva Xerem, Ms. Christine Choon Ja Yoon, Mr. Amado Ronquillo Zapanta, Ms. Galina Zhuravlev, Mr. Olavo da Cunha-Leite.●

AN AMERICAN SUCCESS STORY: FRANK O'CONNOR

HON. JAMES McCLURE CLARKE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. CLARKE. Mr. Speaker, one of the pleasures I have had during my first term in Congress is to meet the many men and women who contribute so much of themselves to making our Nation's Capital such a special place. One friend I have made during the last 2 years has been a young man who works as an engineer for the Architect of the Capitol.

Kevin O'Connor has enthusiastically escorted countless numbers of my constituents from western North Carolina up hundreds of steps to the top of the Capitol Dome. Along the way he has provided each one of them a brief and informative history lesson regarding this most magnificent building. The trip has impressed some of my constituents so much that they have later written to say that it was the highlight of their trip to Washington.

Having come to know Kevin so well during these last 2 years I was pleased to read a recent article on his father, Frank O'Connor, which appeared in the July 13, 1984, Dunfermline Press, a newspaper published in Scotland.

Mr. Speaker, if ever there was a Horatio Alger story of a man going from a humble background to a rewarding and successful career, Mr. O'Connor's life certainly typifies it. Born in Scotland he came to the United States as a young boy who grew up fatherless but with an uncommon spirit worked hard and rose to become a distinguished business and community leader, serving with the Shell Oil Co. for some 40 years.

At an age when most men retire Mr. O'Connor embarked on a new career serving as the vice president of TK Valve, Ltd., owned by Mr. Henry Zarow of Tulsa, OK. Calling it one of the most fulfilling jobs of his life, Mr. O'Connor took on his new responsibilities with all the enthusiasm and vigor he displayed when he joined Shell some four decades ago. Together with Mr. Zarow they are working hard to bring new industry to Scotland which will provide employment and economic hope for the people of that land.

Earlier this summer at the request of Mr. Zarow, Frank O'Connor once again returned to Scotland to explore plans for further expansion of his company. It was a family affair which he shared with his lovely wife, Marcel, and daughters, Deirdre and Maura. In addition to Kevin, the O'Connor's have three other sons. During the course of their visit the story which I referred to earlier appeared on the front page of the Press.

Mr. Speaker, I would like to share this true success story of Mr. Frank O'Connor, a man who exemplifies the best of the "American Dream" and who never forgot where he came from, with all of my colleagues. I know they will enjoy it as much as I have.

The story follows:

HOMING IN ON FURTHER EXPANSION

Although he only spent the first 12 years of his life in the area, Frank O'Connor has never forgotten his native West Fife.

And Mr. O'Connor, who left for the United States with his family in 1926, has played a major role in the expansion plans of a firm which has become a major employer in West Fife.

In the 1930's he began working with the Shell Oil Company in the States and, after

40 years with them, he became Vice President of TK Valve Ltd., the industrial valve manufacturing concern, which opened a factory in Dunfermline in 1975.

Mr. O'Connor was a regular visitor to the Lyneburn Industrial Estate plant and, when TK Valve decided to expand and were looking for a part of the world in which to develop, the Lochgelly native was to the fore in promoting West Fife as the site for a new operation, as was managing director in Dunfermline, Mr. Tim Tompkins.

The TK Valve board in the United States agreed, and the massive new plant at Pitreavie Industrial Estate is the result.

This week, with Mr. O'Connor paying a visit to West Fife, TK Valve indicated that they have plans for further expansion at their Pitreavie site.

Commented Mr. Tompkins: "Mr. O'Connor played a major role in bringing the new plant to West Fife. There were many meetings and a major feasibility study was carried out, before a decision on the Dunfermline site was taken in preference to locations in Singapore and Australia.

"Mr. O'Connor fought from Dunfermline's corner and the new plant is here. Now matters have gone a stage further, and again Mr. O'Connor has been closely involved.

"There are still one or two rough edges to be smoothed over, but we intend to announce further plans for expansion at the Pitreavie site in the very near future."

Mr. O'Connor is delighted to see TK Valve continue development in the Dunfermline area for which he has always had the highest regard.

Mr. O'Connor was in West Fife on Wednesday with his wife, Marcel, and daughters, Deirdre and Maura. The couple also have four sons. This was Marcel's fourth visit to Scotland but the first for the girls.

Now 69-years-old, Mr. O'Connor was born in Lochgelly, one of four sons in a mining family, who left in 1926 for the United States where father, Frank, continued life as a mineworker.

Shortly after they had settled in their Pennsylvania home Mr. O'Connor senior was killed in an explosion.

Son Frank was to become involved in another sector of the energy industry.

He began undertaking office work with Shell in New Jersey in 1937. He worked his way up the ladder and became involved in selling products to the United States Defense Department, as well as becoming an adviser on Government legislation as it affected the company.

By the time he retired from Shell in 1977, he had become head of their operations in Washington.

In 1978 he joined TK Valve and became Vice President.

During his stay in Dunfermline on Wednesday, Mr. O'Connor and his family visited the City Chambers, where he met Councillor David Campbell, Lochgelly, Chairman of the District Council Policy and Resources Committee.

The O'Connor's also visited the Cowdenbeath and Lochgelly area.●

KISSINGER RETHINKS VIEW ON STRATEGIC DEFENSE POLICY

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mrs. LLOYD. Mr. Speaker, former Secretary of State Henry Kissinger wrote an article entitled "Should We Try To Defend Against Russia's Missiles?" which appeared in the September 23, 1984 Outlook section of the Washington Post. Mr. Kissinger is a distinguished diplomat who, besides serving as Secretary of State, has served several other administrations in a key advisory capacity and, thus, his perspective on the strategic defense initiative [SDI] is a valuable one. The article indicates that although Mr. Kissinger was initially less than enthusiastic about President Reagan's Star Wars speech, he now believes that the "arms control theory is now at a dead end" and that "[a] breakthrough requires reductions of the number of warheads on a scale inconceivable so long as the strategic balance depends entirely on offensive weapons." He goes on to discuss the possibility of reducing the level of strategic warheads to a few hundred on both sides and outlines the questions which must be answered to set the stage for such reductions. I recommend the article to my colleagues as a valuable contribution to the debate on strategic nuclear policy which, as Mr. Kissinger notes, has unfortunately characterized "by sloganeering."

The article follows:

We may be witnessing the preliminaries of a Soviet peace offensive. First, we are presented with the clumsily handled resurrection of Andrei Sakharov and his wife to calm Western opinion. Then an American television network is given a relatively free hand to report on the Soviet scene. Next Konstantin Chernenko releases an interview in Pravda which softens some of the harsher Soviet rhetoric. This is followed by the announcement that Andrei Gromyko would meet with President Reagan.

Whether all of these events are connected does not emerge clearly from the crablike manner by which Soviet diplomacy advances. A steady stream of attacks on the United States continues. But at a minimum, the Soviets seem intent on showing a milder face to the world. A full-scale peace campaign may await the outcome of our elections. But there can be little doubt that its centerpiece, whenever it comes, will be the demilitarization of outer space.

It is also safe to predict that the Soviets will follow their almost unvarying tactic of seeking to achieve their principal objective by insisting on their agenda. Thus Chernenko in characteristically elliptical fashion has put forward these propositions:

That negotiations about defensive space weapons must precede talks dealing with offensive weapons.

That the United States must commit itself at the outset to demilitarization of space.

That the United States must agree to a moratorium on testing weapons in space.

It is not too early to begin thinking about two basic issues. The first is whether the administration should continue to insist that talks on offensive and defensive weapons be conducted simultaneously. Second will be the question of what the U.S. position should be, including whether the United States can afford to commit itself to the demilitarization of space at the outset of negotiations.

As to the issue of linkage, a little history may be instructive. In 1967 President Johnson proposed to Prime Minister Alexei Kosygin that anti-ballistic missile (ABM) defenses be banned; Kosygin flatly rejected it. President Nixon finally submitted a plan for an American ABM to Congress in 1969. After Congress went along with the president, the Soviets opened the very negotiations they had rejected two years earlier. Now they would talk about no other subject, least of all offensive weapons. As late as three weeks before the final breakthrough, the Soviets put forward what is now the Chernenko ploy: they offered the "concession" of talking about offensive weapons but only after negotiations about defensive weapons had been completed. Finally in May 1971, the Soviets grudgingly agreed to link the two. Today the outcome is likely to be the same if the administration holds its ground.

The Soviets have been vociferous about banning defensive weapons in outer space, where U.S. technology is superior. They have been ambivalent or silent about land-based defensive weapons, in which they have conducted vigorous research and appear to be constructing radars that violate the spirit and almost surely the letter of the ABM treaty.

A few facts may help the reader: a treaty now limits both sides to one land-based ABM site. The United States has unilaterally dismantled its. The Soviets have maintained theirs and spurred research on traditional technology. The United States is doing research aimed at a new system which would destroy incoming warheads in space but would also require some defensive stations on the ground that catch the missiles that get through. To deploy such a system would require a renegotiation or abrogation of the ABM treaty.

I have not yet made up my own mind on what position the United States should ultimately take on that issue. I was less than enthusiastic about President Reagan's "Star Wars" speech when I first read it. As one of the architects of the existing ABM treaty, I instinctively resisted the proposition that it be modified. Too, a foolproof defense of civilian population—that seemed implied by that speech—is a mirage; even a 90 percent effective defense would still let enough weapons through to destroy an unacceptable proportion of our population.

As I reflected, that argument more and more struck me as superficial.

The nuclear age forces the statesman to navigate between the callousness which reduces mass slaughter to a mathematical equation of technicians and the nihilism which abdicates to totalitarianism in the name of survival. Since the ABM treaty was signed, it has become clear that to rely on a strategy of mutual annihilation based on unopposed offensive weapons raises profound and political issues. Has a president the right to expose our people forever to the vagaries of an increasing number of volatile decision-makers? Such a course involves the near certainty of a growth in pacifism or the risk of a holocaust as a

result of miscalculation or the gradual escalation of peripheral crises.

Even granting—as I do—that a perfect defense of our population is almost certainly unattainable, the existence of some defense means that the attacker must plan on saturating it. This massively complicates the attacker's calculations. Anything that magnifies doubt inspires hesitation and adds to deterrence.

The case grows stronger if one considers the defense of Intercontinental Ballistic Missile (ICBM) launchers. A defense of the civilian population would have to be nearly 100 percent effective, while a defense that protected even 50 percent of land-based missiles and air bases would add hugely to deterrence. The incentive for a first strike would be sharply, perhaps decisively, reduced if an aggressor knew that half of the opponent's ICBMs would survive any foreseeable attack.

Then there is the problem of third nuclear countries. Calculations and restraints that are highly plausible to advanced industrial societies are not necessarily equally persuasive to leaders of the Qaddafi variety. Although a foolproof civilian defense against a superpower is difficult to conceive of, substantially complete defense against third nuclear countries could be possible well into the next century.

Perhaps the most compelling argument is the possible beneficial effect of some missile defense on arms control. Arms control theory is now at a dead end; the stalemate in negotiations reflects an impasse in thought. The reductions proposed by the Reagan administration would add little to stability; the freeze which is its alternative would perpetuate what needs correction.

A breakthrough requires reductions of the numbers of warheads on a scale inconceivable so long as the strategic balance depends entirely on offensive weapons.

Under present conditions the reductions that can be verified are relatively small. They are either dangerous because they simplify an attacker's calculations, or they are irrelevant because they leave large residual numbers of warheads.

If, however, the strategic warheads of both sides were reduced to a few hundred—a number astronomically below any so far envisaged—the side capable of hiding even a thousand warheads might be able to disarm its opponent by a surprise attack or blackmail him into submission when the clandestine weapons are revealed. But with a properly designed defense, much larger numbers would be needed for a strategically decisive evasion, and those numbers could be detected.

I consider these arguments compelling with respect to three propositions:

We should not commit ourselves at this point to the demilitarization of space.

We should proceed actively with research and development and forgo moratoria.

We should be prepared to negotiate over arms control of all defensive weapons.

Before committing ourselves to actual deployment, an answer to the following questions is needed:

Is it possible to design a ballistic missile defense that is primarily useful for the defense of a retaliatory forces or against maverick third nuclear countries?

If such a limited defense were to become part of an arms control agreement, how would the limitation be expressed and verified?

Could we avoid loopholes for further expansion to a full-scale defense?

Would such a defense be destabilizing by tempting a first strike and relying on the defense to absorb the counterblow? (In theory this should not be, if both sides have relatively limited defenses.)

What in such a context would be the appropriate low level of offensive forces to bring about the breakthrough toward real arms control which has eluded us for a decade?

Or would strategic defense at any level destroy all hopes for an equilibrium?

The real debate will be joined after the American election. Theoretically both superpowers should have an interest to prevent war by miscalculation and irresponsible third nuclear powers from blackmailing them with nuclear weapons. Neither side can gain from seeking unilateral advantage.

Thus a renewal of negotiations will be a test less of ingenuity than of political maturity. There seems general concern with the precariousness, both physical and psychological, of a balance based on large unopposed offensive systems. This article argues that some limited defense—yet to be analyzed—coupled with a revolutionary approach to reduction of offensive forces by agreement may advance us toward the elusive goal of stability. It remains to be seen whether domestically we can overcome debate by sloganeering and internationally whether the superpowers can move the quest for peace from polemics to a joint enterprise.●

TRIBUTE TO REPRESENTATIVE JACK EDWARDS

HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. QUILLEN. Mr. Speaker, I would like to take this opportunity to pay tribute to my good friend and colleague, JACK EDWARDS. He will be sincerely missed in the House of Representatives, and I want to congratulate him on the outstanding job he has done during his 20 years in the House.

The tremendous work he has accomplished in serving his constituents and our Nation is a shining example for others to follow, and his efforts will be long remembered. His record shows great dedication and ability, and it has been a privilege for me to serve with him in this legislative body.

JACK is known as a man who can get things done, not only in the First District of Alabama, but throughout this great country. In his position on the Committee on Appropriations, he has come to be respected as an authority on defense appropriations. He was among the first to express and address the problem of combat readiness, and among the most dedicated of those who favored fair value for every dollar spent in the Nation's defense budget.

My distinguished friend and I share many similarities: We are both Republicans, we are both Members of the House Republican leadership, and we are both from Southern States. Having worked so closely with JACK on our side of the aisle, I have a genuine admiration for him as a friend and as a fellow legislator. He has ably represented the Republican Party, faithfully represented his constitutents and their Southern heritage, and wisely advised Americans on matters of defense.

I have had the pleasure to know a number of fine Representatives while serving in the U.S. Congress, but none more diligent, more scholarly, or more gentlemanly than JACK EDWARDS. My best to you, JACK, and I know you will continue your high level of service as you move on to new challenges.●

TRIBUTE TO ALABAMA CONGRESSMAN JACK EDWARDS

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. SHELBY. Mr. Speaker, it is my privilege to join my colleagues today in tribute to the distinguished Congressman from Alabama's First Congressional District, the Honorable JACK EDWARDS, on the occasion of his retirement from the U.S. Congress.

JACK's departure will be a significant loss for the House of Representatives. He is a man of many achievements, abilities, and interests. More important, he has been a man of selfless service to the people of Alabama and the Nation during his 20-year tenure in Congress.

He combines all of the qualities that a good legislator should have, such as honesty, respect, dedication, skill, background, knowledge, and a willingness to apply himself to the task at hand.

In these troubled times, the House of Representatives has had to deal with many issues of grave concern to our country. These have involved national defense, fiscal soundness, adherence to constitutional principles and to our system of private enterprise. JACK EDWARDS could always be counted upon to be on the side of his country on these important and crucial issues. His work has made a great contribution to all legislation, but particularly legislation dealing with our national defense.

JACK has served on the House Appropriations Committee for 16 years, where he has been the third ranking Republican. On the defense subcommittee, he has been the senior Republican since 1975; and he has served on the Transportation Subcommittee for 14 years.

Within various appropriations bills through the years, JACK has been instrumental in funding the Theodore Channel, a valuable asset to the Port of Mobile; the Tennessee-Tombigbee,

Alabama-Coosa, and Warrior-Tombigbee Waterway projects; and a new Federal office building in downtown Mobile—just to mention a few of his efforts locally and throughout the State.

Through his efforts on his defense subcommittee, JACK backed foreign policies and military programs designed to promote the U.S. international interests and enhance the Nation's security.

I want JACK to know and to always remember that I have enjoyed our association and labors together. Our relations have always been most amiable and pleasant. It has been a privilege to work with him as we tried to serve our country and our Alabama constituency. My very best wishes are certainly extended to JACK and his lovely wife, Jolane, for their continued happiness when they return to private life.●

A HERO FOR OUR TIME

HON. JACK KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. KEMP. Mr. Speaker, Jack Javits is a giant among men. His contributions to this Nation during his 24 years as Senator from New York are without parallel. He left a legislative legacy on issues ranging from pension security and education for the handicapped to foreign affairs and support for peace that will continue to shape the debate on these issues for generations to come, as well as provide untold benefits to millions of Americans and millions of New Yorkers.

But Jack Javits has given us much more than the fruits of his legislative genius. He is courageously living with an illness that would leave a lesser individual without hope, and in doing so has provided us all with a lesson in life. Jack Javits said:

. . . my own philosophy is that you don't belong only to yourself. You have an obligation to the society which protected you when you were brought into the world, which taught you, which supported you and nurtured you. You have an obligation to repay it.

Mr. Speaker, Jack Javits has repaid this debt a thousand times over. I commend the following article to my colleagues' attention and thank him for his friendship, his counsel and most of all his tremendous example to all of us:

[From the Washington Post, Sept. 14, 1984]

THE PUBLIC TWILIGHT OF JACOB JAVITS

LIVING WITH INFIRMITY BUT NEVER LETTING UP

(By David Remnick)

STONY BROOK, NY.—Jacob Koppel Javits sits in a wheelchair behind his old Senate desk, 80-year-old public man.

A form of Lou Gehrig's disease has left his body a husk. He cannot lift a hand to sign his name or greet a visitor. A stiff collar keeps his head from slumping onto his chest. A portable respirator pumps life through a hole in his throat and into his lungs. A nurse feeds him clear soup through a straw, a solicitious aide sets a piece of correspondence before him for his inspection and approval.

The afternoon light in the Javits Room of the library is a bit weary and wan and so is the senator. Javits was a fiery orator in his 24 years in the senate, one born to the soapboxes of political New York and, in his prime, a match for the likes of Hubert Humphrey. The accent is still that familiar blend of Lower East Side edge and Senate elan, but the phrases last just a short breath. After each bundle of words, Javits waits for the respirator to fill him with the strength to speak:

"I was an active man, strong and in close touch with the world. Illness, you never think of those things. You just go on for years, working, taking life for granted. My illness is considered terminal. I had to think about what to do, what it means. And I decided I had to keep on as long as I could."

Javits still has the same clear and restless mind that distinguished his years in the Senate. Lou Gehrig's disease, or amyotrophic lateral sclerosis, is a devastating condition. Because of his illness, it takes Javits nearly three hours to prepare for the day, but what he does with the remaining hours is extraordinary.

He has given commencement addresses and testifed before congressional committees. He is in regular contact with his colleagues and may soon write a book about his illness. This week Javits has been in Washington to help celebrate the 10th anniversary of one of his many achievements in the Senate, the Employes Retirement Income Security Act.

This late-summer day a week ago on Long Island is also typically vigorous. Already Javits has reviewed portions of his papers, which he is collecting for the library of the State University of New York at Stony Brook, given a 90-minute speech on foreign policy before an audience of 250 students, held a news conference and appeared at a reception.

"I had to take a boxing course when I was a student and the instructor told me to put up my hands. The next thing I knew I was on my behind. He told me, 'There, that's the first lesson. Hit them from where you are.' And that's what I'm doing. I'm sick. Maybe I won't live much longer, but I'm hitting 'em from where I am. I'm not giving up a thing."

"Absolutely."

Jacob Javits knows the question is coming, and when he answers, his voice lifts and blue eyes sparkle. He is absolutely sure, he says, that he could be an effective senator now if he had the chance. Although both he and the public knew he was sick, Javits ran for a fifth term in 1980. After losing the Republican nomination to his right-wing challenger, Alfonse D'Amato, Javits campaigned under the Liberal Party banner. D'Amato did not hesitate to mention Javits' age and illness, and the supporters of Democrat Elizabeth Holtzman wanted him to bolt the race and leave the liberal constituencies undivided.

Javits had once been an avid tennis player, but now he could offer only mental vigor to his job. "The people of New York will have to decide if they want a tennis player or a brain," he said at the time. The electorate was unconvinced, and the formula of one conservative and two liberals cast the election in D'Amato's favor. Holtzman finished a close second, Javits a distant third.

Now, there seem to be 1,001 subjects he would rather discuss than Alfonse D'Amato.

"I haven't examined his Senate career with any particularity." Javits says. "He is a conservative. He's followed what he told the voters he would do. I have no comment on it. He hasn't done anything that particularly excites me. If he runs again, and I'm still alive, I'll see what I'll do."

But if he had won, could Javits have served?

"Absolutely," he says, "I told the people I would and, considering the schedule I've kept up, I've certainly shown it to be the case.

"I would have been chairman of the Committee on Foreign Relations. I had unbelievable seniority for a New Yorker. I had a great opportunity to be of influence with senators of my own party and with the Democrats. And justly so. I never let them down. When I told them I'd do something, I did it.

"I served a very useful role in the Senate and I felt it was my duty to the people of New York, who had brought me to such a high position, not to fire myself. There was no reason for it. But the campaign against me, the exploitation of my age and health combined with the appeal of the right wing of the Republican Party was obviously more than I could handle."

His wife, Marion, puts in this way: "For all his [health problems], my husband certainly would have done a better job than the man that replaced him. I know you'll think I'm biased, but I believe the world is starving for men like [Javits]. He would have functioned almost as well during his illness as he did before . . . I spoke to Senator McGovern recently, and told him, 'George, he's still working like he's in the Senate. The only difference is, he can't vote.' "

Throughout his Senate career Javits and his wife lived quite distinct lives. His devotion to the Senate was primary and consuming. As a liberal Republican, Javits was deeply involved in creating the Legal Services Corp., the War Powers Act, the Comprehensive Employment and Training Act and educational funding for both the gifted and mentally handicapped. He was a key supporter of Israel, the arts and the bailout of New York during the city's financial crisis in the mid-'70s.

Marion Javits found Washington life intolerable and rarely spent time in the capital. Though friends say their marriage has been complicated and even tempestuous at times, Richard Clurman, a writer and one of Javits' closest friends, says, "Marion is doing her loving, martial duty as well as anyone could now."

"My husband has never really had a personal life. And I was the one that always got blamed for it," Marion Javits says. "But his public spiritedness is total for him. It's just like other people regard their families or vacations. He wants us to be there for him, but it was never first for him. He chose that public life and that has always prevailed. The personal doesn't rank with the public. It never has. There's no use complaining now, but it's not easy to live with when you're another kind of person."

Jacob Javits nearly died two years ago. He was brought from Florida to Bethesda, where he was treated for severe respiratory problems.

"When he was in Bethesda, he was hooked up to all sorts of machines and res-

pirators," says a friend who asks not to be identified. "He was out of it. We thought it was the end. There was even discussion of pulling the plug. And Marion started to laugh and cry at the same time. I remember she said, 'What a time to fall in love with him.'"

Those who come now to Stony Brook or Manhattan to meet Javits typically expect to find a man whose mind is as wasted as his body. They are prepared to honor him and patronize him, to pay homage to him before he dies. Javits will not allow it. He immediately commands his listener's attention and respect.

"It's the most valiant dying I've ever seen," says Clurman. "I remember he made me feel foolish once. I'd made plans to visit him but I had to call and say that my back was bothering me and I couldn't make it. He said, 'No problem, I'll come to you.' And he did. He's acquired a scope and grandeur. He's put his accomplishments into a very human frame of intelligence and courage."

"He is as sharp as he's ever been," says John Trubin, Javits' law partner and closest confidant. "He's always been a driven person and he's still got that fire in him. His thing is living."

Javits has always been relentlessly public and he has found a new cause in his infirmity. "Jack looks at his own illness from a distance," says Clurman. "It's as if it were somebody else and he had to think about it on a political scale."

Several months ago, Javits was a patient at New York Hospital. At the hospital's weekly medical conference, the patient lectured 150 doctors, Javits said the most important thing in his life is to "keep my brain in order and functioning . . . This is the essence of life.

"If there is anything I can leave with you in terms of the treatment of patients with a terminal illness, it is this: We are all terminal—we all die sometime—so why should a terminal illness be different from terminal life? There is no difference."

Javits' impulse to think in terms of legislation has waned very little since leaving the Senate, and he urged the doctors to help develop a test "to enable us to determine socially who should live and who should die." He spent much of the summer thinking about that "test" and how its principal barometer should be the individual's mind. If that is gone, says Javits, then there is a question whether that life should be sustained.

"The more I thought about such a test, the more I believe it has worth for serious consideration," he says. "You must remember, my own philosphy is that you don't belong to yourself. You have an obligation to the society which protected you when you were brought into the world, which taught you, which supported you and nurtured you. You have an obligation to repay it."

Those closest to Jacob Javits are not surprised by the way he has led his "retirement." His autobiography, published three years ago, was given the title "Javits: The Autobiography of a Public Man," and the last chapter of his life will not do anything to alter its appropriateness

"It was poverty that made me this way," says Javits, the son of Jewish immigrants from eastern Europe. "Poverty made me see the importance of a public life. It's also talent. I could always speak and get people to listen. It's a certain gregarious quality. You like a crowd and you evaluate your deeds in terms of their worth and how many people they affect. And I'm sure, too, it's ego. It's a glorious feeling any time you have the power to persuade people toward a justifiable purpose."

When he was a boy, Javits learned a lesson about justifiable purposes from his father. Morris Javits had been a Talmudic scholar in the Ukraine but was forced to work endless hours as a janitor on the Lower East Side. To make a few extra dollars, Morris bought votes for the Tammany machine at $2 apiece.

The Democratic Party in New York in 1932 was the party of Tammany Hall and Jimmy Walker and corruption. Javits turned to a steady diet of progressive politics as a youth—even supporting the Socialists for a time—and so it seemed logical for him to join the party of reform and Fiorello La Guardia. Javits joined a Republican club on Third Avenue and 72nd Street and has resisted entreaties to switch parties ever since, even as he has become that increasingly rare political animal—the liberal Republican.

"I never can forget that my party's basic roots are in equality," he says. "I am, in philosophy and ideology, a liberal. As Lincoln said, government should do for the people what they cannot do, or do as well, for themselves. . . . When people like John Lindsay and Wayne Morse switched to the Democrats, I thought about it and had discussions about it, but I never really considered it too seriously."

In 1964, Javits supported Nelson Rockefeller for the presidency, but when Barry Goldwater won the Republican nomination, Javits could not support the party ticket. But he says he will vote for Ronald Reagan this year. His public explanation is vague, perhaps deliberately so. Those close to him say that Javits is unenthusiastic about both presidential candidates, but regards himself a "party man." Javits clearly feels he can be most useful as a critic-from-within. In his speech at the university earlier in the day, he supported the nuclear freeze movement and a nonmilitary approach to the conflicts in El Salvador and Nicaragua.

"I've never been inhibited about criticizing presidents before," he says, "and I won't hesitate now."

Javits did not go to Dallas this summer, but he did watch the Republican convention on television. He found his wing of the party in eclipse, if only temporarily. There was Sen. Lowell Weicker of Connecticut battling the Rev. Jerry Falwell and the evangelical right wing, but few liberals and fewer liberal mavericks could be heard above the nearly unanimous voice of the conservative movement.

"The progressive wing of the party must be represented," Javits says. "I'll do all I can to help develop the ideas and the leadership to help that along.

"But right now there is a big middle-class revolution going on. It still commands the majority and has Reagan way ahead in the polls. The revolt was against what was considered to be inadequately monitored or evaluated welfare programs and entitlements. The theory is that those who were enjoying the entitlements were doing so fraudulently. And the ones paying the bills weren't getting what they wanted.

"The whole thesis has been dressed up in patriotism and more military strength. I feel the premise is untrue. Yes, there was undoubtedly some waste and fraud and probably more experimentation than the public was interested in . . . But this revolution won't extend in 1988. I think you'll see a very different candidate for the Republicans."

"These things come in cycles," Javits says. "I've seen it all my life."

The room is getting darker and Jacob Javits' words are now almost pure breath.

Javits once told an aid, "I am more than a senator. I am an institution." The remark was neither humble nor false.

"I meant that I'd established an institutional character," Jacob Javits says the end of a long, long day. "What I stood for was institutional in the sense that probably my greatest ambition was the prestige, the capability, the authority of a senator. Mike Mansfield coined the term, 'a Senate man.' He was one. I believe I was another."●

TRIBUTE TO BARBER CONABLE

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. CLINGER. Mr. Speaker, my great admiration of BARBER CONABLE is rooted in the respect that I and all Members of this body have for him as a brilliant thinker and legislator. The keenness of his logic and the clarity of his vision have led us to do better work.

No one in this House has greater knowledge of the Tax Code and how changes will affect Americans than BARBER. In the field of financing, particularly, he has guided us to making more sound and equitable laws. He has used his position as ranking Republican on the Ways and Means Committee to advance crucial legislation, including the tax proposal at the beginning of the current administration, Tax Code reforms, Social Security solvency, revenue sharing, long-term care for the elderly, and financing of charities. He has been at the vanguard of the fight for a balanced budget amendment. His loss will be sorely felt in the coming battle.

His value as a legislator, however, goes beyond the quality of the legislation he has promoted. He has been instrumental in elevating the integrity of every Member with whom he has come in contact, a fact demonstrated by the great number of gentlemen from the other side of the aisle who are paying him tribute. I cannot think of anyone who has been more central in moving bipartisan legislation than BARBER CONABLE. He is truly the Congressman's Congressman, as evidenced by the accolades he has inspired. The people of New York and the people of the United States will miss his contributions in the House of Representatives.●

THE 67TH ANNIVERSARY OF THE BOLSHEVIK REVOLUTION—A DAY OF SORROW AND IRRECONCILABILITY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. BIAGGI. Mr. Speaker, November 7 of this year will mark the 67th anniversary of the Bolshevik Revolution in Russia. At this time, I would like to recognize this day as one of sorrow and irreconcilability with communism.

Since they seized power in 1917, the Soviets have oppressed and enslaved not only the Russian people but the people throughout Eastern Europe. These people continue to live under the brutality and inhumanity of Soviet tyranny. November 7, 1917, also marked the beginning of Soviet-sponsored aggression and terrorism throughout the world. This unbridled agression continues to manifest itself throughout the world—most notably in Afghanistan and throughout Eastern Europe where even the most basic of human rights are routinely and callously violated.

The list of innocent victims of Soviet-sponsored aggression is endless. The savage downing of the Korean Air Liner and continued Soviet support of Communist terrorism in Central America gravely threaten the peace and stability of the free world.

By recognizing the 67th anniversary of the Communist takeover in Russia as a day of sorrow and irreconcilability with communism, we commemorate and mourn all those who have perished at the hands of Soviet aggression and violations of human rights. It also displays our solidarity with, and unbending support for, all those still living under the yoke of Communist tyranny who seek freedom and self-determination. From Ukraine, to Estonia to Latvia, to the Russian Republic itself, the cry for freedom and human rights must never be ignored. To remain silent in the face of such gross violations of human rights would be an even greater crime against humanity.

The history of communism, as practices by the Soviet Union, is one of oppression, enslavement, and disregard for human rights. Unfortunately, this legacy persists, and in our recognition of this grim anniversary, we must express, without equivocation, our irreconcilability with communism and our undying resolve to defend the rights and liberty of free peoples throughout the world.

At this time, Mr. Speaker, I insert into the RECORD the following statement made by the Congress of Russian-Americans:

CONGRESS OF RUSSIAN-AMERICANS, INC.,
Nyack, NY, October 1984.

A DAY OF SORROW AND IRRECONCILABILITY—1984

As we approach November the 7th, the day when the Soviet Union annually celebrates international communism's arrogation of power in Russia, we—Russian-Americans—appeal to the U.S. Government and to freedom-loving citizens of this country to designate it as a Day of Sorrow and Irreconcilability.

Sadly, albeit fittingly, among all the ethnic groups making up the tapestry of these United States of America, only the Russian-Americans persist in annually asking their Government and their fellow Americans to observe this inglorious day. Russian-Americans feel it is their sacred duty to mark with mourning and defiance the day international communism claimed their former countrymen as its first victim. Thus, they honor their brothers living under the Soviet rule.

On this day we express our Sorrow for all the victims of the communist terror, and our Irreconcilability with the theory and practice of communist doctrine.

Moreover, let us not forget that November 7, 1917 marked not only the beginning of immeasurable sufferings for the Russian and other enslaved peoples of the Soviet Union, but also the beginning of a global human tragedy which today endangers the existence of the Free World. Utilizing the threat of a nuclear war, the Soviets have gradually taken over key strategic positions in all parts of the world. Today there hardly a nation on the face of the earth that has not been victimized by communist aggression.

Therefore, we ask the Government of the United States and all other Free World governments to designate November the 7th as a Day of Sorrow and Irreconcilability.

Over the past 67 years the Soviet government has spared no effort in trying to strip the Russian nation of its heritage. Despite the desecration and destruction of over 50,000 churches and monasteries, the persecution and extermination of millions of people in concentration camps and prisons, we witness today in the Soviet Union a revival of faith and awakening of national pride. The determination of the Russian people to live free blazes as never before. Perhaps the Russian soul, having nurtured its people through their long, barren winter of oppression, senses at last spring's hymm of freedom yearning to be sung. How more can we honor our brothers than by lending voices to this chorus? For by proclaiming this day of Sorrow and Irreconcilability, we intone "Let There Be Light" and indeed for all those who hear our voices in their darkness there is light!

BOARD OF DIRECTORS,
CONGRESS OF RUSSIAN AMERICANS.●

A TRIBUTE TO SERGEANT EARL K. BELL

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. FAUNTROY. Mr. Speaker, on Saturday, October 5, 1984, many of the residents of the District of Columbia will come together in testimony to a dedicated law enforcement officer who has worked to provide optimum public safety for this community.

Sgt. Earl K. Bell of the Washington, DC, Metropolitan Police Department has earned the highest respect and esteem from his superiors, fellow officers and District of Columbia residents. Throughout his 14 years of service on the DC Police Department, he has exhibited integrity, courage, compassion, and personal commitment. His choice of a career in law enforcement was based on his conviction and sincerity of purpose in combatting crime, protecting the citizens of the District, and giving something back to his community.

On March 14 of this year, Sergeant Bell was seriously injured in an automobile accident, which left him paralyzed from the waist down. He will need extensive medical treatment, speech and physical therapy. It is for this reason that the members of the Mount Airy Baptist Church and others in our community will hold a fundraiser in his honor. We are appreciative of the many contributions Sergeant Bell has made to this community and this tribute will afford us the opportunity to express our gratitude.

Sgt. Earl K. Bell has given unselfishly of himself and has upheld the highest standards of a public safety officer.

Mr. Speaker, I join the people of Washington, DC, in recognizing the outstanding example of public service that we find in Sergeant Bell.●

REMARKS OF CONNECTICUT SUPREME COURT CHIEF JUSTICE JOHN A. SPEZIALE

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. MORRISON of Connecticut. Mr. Speaker, I would like to share with my colleagues the remarks of the distinguished Chief Justice of the Connecticut Supreme Court, the Honorable John A. Speziale, at the annual Columbus Day celebration in New Haven, CT.

Chief Justice Speziale, who has served the people of Connecticut for 36 years in many capacities, will retire from the supreme court next month. He has been an outstanding jurist with a career dedicated to improving the administration of Connecticut's court system. He has been an inspiration to many, and I know he will continue to serve our State for many years to come in the private practice of law. I consider it a great privilege to have appeared before him as an attorney and to have worked together with him as a Member of Congress toward achieving our shared goals, including passage of the State Justice Institute

Act which passed the House today as part of H.R. 6163.

Chief Justice's Speziale's remarks, I believe, capture the spirit of Columbus Day—the aspiration, the dedication to hard work, the pride in achievement, which have been especially characteristic of the Italian-American community and which really represent what this country is all about. I am honored to share it with my colleagues.

The remarks follow:

REMARKS BY HON. JOHN A. SPEZIALE—COLUMBUS DAY DINNER

The themes of Columbus Day are many. There is much that can be said about our nation, our heritage, the spirit of exploration and the joy of discovery.

But, if I may beg your indulgence a few moments, I would like to begin with a quotation from a time before our country was born, even before Columbus set sail. It is one of the most often-quoted passages from the Bible. From Ecclesiastes:

"To every thing there is a season," it says, "and a time for every purpose under Heaven. A time to be born; and a time to die. A time to plant; and a time to reap."

This passage is important to me, because as many of you may know, I announced a few weeks ago that the time has come for me to harvest the plant sown almost a quarter of a century ago, when I left the practice of law to become a judge. That plant, first sown with my appointment to the then Court of Common Pleas, has grown to its fullest—it can grow no more—yet there is still time to sow, and sow I must. As the poet, Robert Browning, wrote: "A man's reach should exceed his grasp." And, if we who celebrate Columbus Day commemorate anything on this occasion, it is human daring, the quest for achievement, the willingness to reach out from where we are and to grab on to what beckons us.

For me, the beckoning dream has always been the law.

I do not use the word "dream" lightly. I can remember my youth, when a young girl laughed with ridicule at my dream of becoming a lawyer because I had patches on the knees and seat of my pants.

I can remember the long nights when I attended Duke University and the Duke Law School, studying so hard and also using the musical talents which God gave me to help pay not only for tuition and books, but also for food. And all the while, I would be wondering whether I would be able to afford another year of education. In fact, my mother even took a job in a factory to help provide the money for my schooling.

We did have those dreams. The dream to be educated. The dream to succeed. My dream was to become a lawyer; perhaps, someday, even a judge. All of us here tonight can remember similar dreams, and those days in which they were dreamt. We knew that if we persevered, we would succeed.

We persisted.

We persevered.

We succeeded;

But the struggle goes on.

Life today is no less a perilous journey than that faced by Columbus nearly 500 years ago because, as all of you know, we Americans of Italian heritage have experienced the prejudices and the biases. We have seen the doors close, the eyes turn away. We have seen and heard the huddled whispers. But today, we can point both within the boundaries of our state, and without, to the countless numbers of our heritage who have succeeded. For example:

We can point to our many elected and distinguished public officials, and prominent citizens, well-represented tonight by the presence of our esteemed Lieutenant Governor, Joseph Fauliso;

We can point to my colleague—the individual who honored me by his introduction this evening—Judge Robert Zampano, for his exemplary service; he was the first—and I might emphasize, the only—individual of Italian heritage ever appointed to the federal bench in Connecticut;

We can point to the Mayor of this great city, Mayor Biagio DiLieto, who several years ago led the effort which raised a half million dollars to help rebuild the earthquake ravaged town of Avellino, Italy, and who, here at home, is the personification of the new, vibrant, growing New Haven.

We can point to the strong, yet compassionate leadership of our late, beloved Governor, Ella T. Grasso, the first woman governor ever elected in her own right;

We can point with pride to the brilliance and the scholarly genius of A. Bartlett Giamatti, President of Yale University;

We can point to the achievement of Gov. Mario Cuomo of New York, and his eloquence at the Democratic National Convention;

Putting aside partisan politics, we can point with pride as a nation, and as people who are proud of their heritage, that today, at long last, an American of Italian heritage is seeking the second highest office in our nation; and that she is the first woman to be nominated by a major party;

And, I join you this evening with pardonable pride and a deep sense of humility, as the "first Chief Justice of Italian heritage in Connecticut history." It is a "pride" born in the realization that all of our hard-working, dedicated judges of Italian heritage have made significant contributions not only to our judicial system, but also to their community. It is a "humility" based on the knowledge that if it were not for the sacrifices of our families and the trust of our friends, we would not have had the opportunity to achieve as we have. We have come a long way, but there remains a long way to go.

For example, it was recently reported in the New York Post that the President of a huge household supply sales company told a Washington convention that in a certain mid-west town they still refer to people of Italian heritage as "wops." Questioned later by the Post, this executive was quoted as saying that the word was "not at all offensive" because it referred to Italian immigrants who came to this country "without papers." He added, "They ought to take the word with pride. . . . Out our way, you have fun with a guy and you call him a wop and he'll call you something else."

Now, really, is that something to brag about?

But what bothers me even more is that here in the State of Connecticut, today, the question is still being asked "whether there are too many people with Italian surnames being hired in certain judicial districts." This is clearly an attempt to influence and exploit possible ethnic prejudices.

So, it is apparent that the battle is not all won; the fight not over. But I do have faith that not only will our entire nation prevail, but also we will continue to succeed as an ethnic group within that nation. For no one who knows this country, its people, its land, and its history, can doubt that we are all blessed. Look around you, and you can see everywhere the signs of our nation's greatness and glory.

I am confident that the "Great American Experiment" will continue to survive its tests, and that it is fulfilling its destiny as the embodiment of "one nation, under God, with liberty and justice for all." We must continue to strive to give our people government that is responsive and caring; and, both capable and willing to deliver essential services to its people. I believe that we must continue to reach out toward the fulfillment of the principles of Jefferson, Jackson, and Lincoln, and all of our forefathers, for we will then have fulfilled the dreams which our ancestors carried with them from Italy. My entire career in public service has been devoted to the attainment of these principles.

For some time, however, my wife and I have seriously considered the possibility that the time may have come for me to retire as Chief Justice of the Supreme Court and to return to the private sector.

Since 1978, I have worked long and hard to implement the court unification and other innovations in our judiciary. The many pressures which were associated with those efforts were offset by the satisfaction that our accomplishments were having a constructive impact upon our judicial system.

On November 21, I will become 62 years of age. Retirement, for me, is out of the question because it is no secret that I am a workaholic. However, it has become apparent to me that while I am still young enough, and healthy enough to continue, the time has come to do other things where the pressures and responsibilities are not as demanding; and I may finally fulfill my desire to be able to better enjoy both my family and the world around me.

Therefore, after much soul-searching and long discussions with my wife and family, I am resigning my position of Chief Justice of the Supreme Court, effective November 21, 1984, to return to the private sector and the active practice of law.

Although I will be leaving the public sector, I plan to remain active as a private citizen in all aspects of the legal profession, which I love and respect so much. I plan to continue my lifelong efforts to fight for improvements in the administration of justice for all of the people of this great state.

This decision to accept anew and exciting challenge has not been an easy one. But I look back upon my career in public service with satisfaction and a strong sense of accomplishment. For most of my adult life, I have served in the legislative, executive, and judicial branches of state government.

For the last quarter of a century, I have worked in a wide range of judicial capacities: as a Judge of the Court of Common Pleas, Superior Court Judge, Chief Judge of the Superior Court, Presiding Judge of the Appellate Session, Justice of the Supreme Court, Chief Court Administrator, and since 1981, Chief Justice. During that period, every aspect of my life has been devoted to my judicial responsibilities. I believe I have done it all, and it is time to move on.

Three years ago, when I took the oath of office as Chief Justice, I said that, "for me, the American Dream has indeed become a reality." That is as true now as it was then. I shall be forever grateful for the honor and trust which was placed in me in all of these judicial positions, which afforded me the

opportunity to serve the people of our State.

We who are of Italian heritage have long prided ourselves on the strong family unit which we have emphasized and nurtured in our homes down through the years. We learned at an early age that success required discipline, dedication, perseverance, and hard work. I'm sure you agree that these qualities were ingrained in us by our parents and families, and that they were the ones who provided us the spiritual and emotional guidance to bring about this strong family unit. Their financial sacrifices afforded us the opportunity to receive the education and training that ultimately led to our accomplishments. I, for one, have been especially fortunate because throughout my professional life I have received the strong support of a women whom I have known and loved since we were childhood sweethearts in the eighth grade. I would like to take this opportunity to introduce to you my wife, Mary, and to publicly thank her for all she has done for me and our two children, and for all she has meant and will always mean to us.

I mentioned before that the last three years have been for me the fulfillment of the American Dream and that this was true now, even though I am resigning my position. This may seem difficult for some to understand.

But, I believe that "to fail to dream" is "to die in spirit." My decision to move on to other challenges in no way reflects on my respect and love for this office, but rather is because of my firm belief that "America is a land of opportunity" where we should continue to dream and to see those dreams fulfilled. The United States has afforded not only Americans of Italian heritage the opportunity to grow and become fulfilled, but also has provided the same opportunities to a host of other nationalities, races, and religions. Since the very inception of this nation, countless individuals of diverse backgrounds looked to the United States for a better life for themselves and their children. Waves of immigrants came to these shores. They, in turn, contributed to the fabric of American culture, and eventually received recognition for their particular gift. I am certain that those of you here this evening who are not of Italian ancestry, including my wife, Mary, who is of Hungarian ancestry, you, too, can look back upon your origins and point with justifiable pride to accomplishments of past and present generations. In what other nation could this merger of nationalities, races, and religions live together as one? In what other nation could we rely so faithfully on the precepts that we have God-given rights to life, liberty, and the pursuit of happiness.

Throughout my entire life—in all my endeavors—I have always prayed to God to give me the compassion and understanding, the humility and wisdom, and the strength and courage to carry out properly my duties and responsibilities. No one who has done what I have done and seen what I have seen can fail to look to Almighty God in Thanksgiving.

I would like to conclude with a story, which some of you may have heard, which is as true for me as it is for you—and it was also true in the days of Columbus.

One night a man had a dream. He dreamed he was walking along the beach with the Lord. Across the sky flashed scenes from his like. During these scenes he noted two sets of footprints in the sand. One set belonged to him and one set belonged to the Lord. When the last scene flashed before him, he looked back at the footprints and noticed that many times along the path there was only one set of footprints in the sand. He also noticed that this happened during the lowest and saddest times in his life. This really bothered him, and he questioned the Lord. "Lord, you said that once I decided to follow you, you would walk all the way with me, but I noticed during the most troublesome times of my life there was only one set of footprints. I don't understand why! When I needed you most, you deserted me." The Lord replied, "My precious, precious child, I love you and would never leave you. During your times of trial and suffering when there was only one set of footprints in the sand, it was then that I carried you in my arms."●

TRIBUTE TO BARBER CONABLE

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. RUSSO. Mr. Speaker, the Congress of the United States throughout its history has been served by many talented citizens of the country, and sometimes individuals possessing unusual insight and greatness have passed through the Halls of the Capitol, leaving behind a rich legacy for the people of America. BARBER CONABLE is just such an individual.

Throughout his life, Representative CONABLE has demonstrated his capacity to succeed and to accomplish. He has an impressive educational background. He has served this Nation in battle and in the legislative arena. He has raised a family and always cared about the people he has served. In short, he is a man with the rare capacity to live a full life, be an outstanding citizen and contribute to the common good.

Serving with Representative CONABLE on the Ways and Means Committee has been both a professional and personal pleasure for me. He has been a most impressive legislator there and a strong, nonpartisan voice to whom I was always comfortable to turn to for advice. He has never sought partisan advantage but always legislated with the interest of the country in mind. Possessing great integrity, he is surely one of the most honorable men it has been my pleasure to know, as well as being one of the most intelligent men in the Congress. His ability to comprehend the complexities of the Tax Code has been an inspiration and a challenge to us all.

Knowledgeable, hardworking and dedicated, we will miss him. He has served his State and his Nation with distinction, and I join with my colleagues in commending him for his fine work and wishing him all the best.●

NHS: A FORCE REVITALIZING KANSAS CITY'S NEIGHBORHOODS

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. WHEAT. Mr. Speaker, I take this opportunity to bring to the attention of my colleagues a program that is helping to revitalize neighborhoods in Kansas City and throughout the Nation.

Mr. Speaker, too many of our cities have troubled neighborhoods: Areas with deteriorated housing, an eroding tax base, and the social ills that accompany economic decline. Those who suffer most from these conditions—lower income minorities, single parents, the elderly and the disadvantaged—often feel helpless to improve their environment. Many of them gave up long ago. Yet today in Kansas City and in 136 other American cities, a very special program is helping the residents themselves turn around these neighborhoods.

This program is called Neighborhood Housing Services [NHS]. Each NHS is a local, nonprofit, privately supported partnership of residents, business leaders and local government officials. The commitment of public and private sector leaders to work as partners and share responsibility for neighborhood improvement creates a renewed sense of pride and optimism among residents. Together, each NHS partnership builds bridges of cooperation and understanding between the private and public sectors at the same time that it upgrades the physical, social, and economic elements of the neighborhood.

The improvement that NHS is able to achieve is remarkable. Deteriorated homes are repaired and brought up to housing code standards. Abandoned buildings are rehabilitated and new owners found for them. Vacant lots blossom into neighborhood miniparks or become the sites for new homes—in many instances, the first new construction in the neighborhood for decades. Neglected streets are repaired and crumbling curbs and sidewalks are replaced. Many NHS partnerships develop special improvement and beautification projects—free or low-cost house paint, neighborhood clean-up days, crime prevention programs, energy conservation assistance, and neighborhood block parties. Through NHS revitilization efforts, once declining areas are now becoming neighborhoods of choice.

Mr. Speaker, in Kansas City, NHS is celebrating its 10th anniversary and has been referred to as the "spearhead" for a remarkable resurgence in the appearance and value of some of

the older neighborhoods in our city. One current NHS effort includes turning a vacant school building into a 47-unit apartment complex for elderly and handicapped tenants.

The NHS is also working in partnership with 13 insurance companies to make major improvements in the neighborhoods. In addition to providing increased availability of insurance coverage, the companies are helping the NHS organize block clubs, provide loans to encourage absentee owners to renovate neighborhood properties, and carry out landscape projects to improve the neighborhoods' appearance.

Working with the NHS here in Kansas City is Neighborhood Housing Services of America [NHSA], a private, nonprofit organization created to work in concert with NHS to expand the private sector base of support of the local NHS partnerships. In particular, NHSA provides a national "secondary market" for the revolving loan funds of the local NHS organizations. A key factor in the success of the NHS programs is that all homeowners may participate in fixing up their homes, even those who do not qualify for home repair loans from conventional lending sources. For them, each NHS has a revolving loan fund from which they can borrow at interest rates and terms that meet their individual abilities to repay.

In light of its success here in Kansas City and nationally, NHS has been strongly endorsed by leaders in both the public and private sectors, including President Reagan and former Presidents Nixon, Ford, and Carter.

Mr. Speaker, I joined with more than half the Members of Congress to cosponsor legislation making the week of October 7, 1984, "National Neighborhood Housing Services Week." This proclamation will enable the Nation as a whole, and the business community in particular, an opportunity to recognize the progress the Neighborhood Housing Services programs have made in recent years in reversing the decline of America's neighborhoods. But the challenge remains—to expand current efforts so that every neighborhood in need, in Kansas City and elsewhere, is strengthened.●

CHILE PARTIES NEAR COALITION PACT

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. ACKERMAN. Mr. Speaker, last month's protest demonstrations in Chile—the latest in a series that began in May of 1983—and the Government's reaction to them should serve to remind us all of the continuing role that repression plays in that country. It is important to note that in contrast to its repeated calls for full democracy in Nicaragua, the State Department has remained silent on the restoration of democracy in Chile. If we are sincere in our efforts to promote democracy in this hemisphere, we must apply a single standard not only to governments opposed to our policies, but to our friends as well, even if they are the kind of rightwing dictatorships favored by this administration.

An article which appeared in a recent issue of the Council on Hemispheric Affairs' Washington Report on the Hemisphere, by staff researcher John Tweedy, outlines recent events in Chile. This article provides a broad overview of the efforts to achieve unity among the various opposition groups of differing ideologies. I recommend the article to the attention of all my colleagues who share an interest in seeing democracy returned to Chile in an expeditious manner:

CHILE PARTIES NEAR COALITION PACT

(A memorandum by John Tweedy, COHA Research Associate)

A ground-breaking cooperation agreement, bridging differences between Chile's major centrist and leftist parties and supported by unions and the Catholic Church, now appears on the verge of consummation. The pact would end 11 years of partisan bickering and demoralization within the opposition, presenting a united front to the dictatorship of Gen. Augusto Pinchot.

The political parties' move towards unity, one of several in recent years, came in part as a result of a rare Aug. 7 interview Pinochet gave Edward Schumacher of the New York Times, in which he rejected opposition demands for a return to democracy in advance of his 1989 timetable.

Prior to the interview, negotiations had been underway between Interior Minister Sergio Onofre Jarpa and the Christian Democratic-led Democratic Alliance (AD), over precisely that issue. The AD was seeking a congressional ballot in 1986.

These negotiations had riven deep divisions between center and left opposition groups, because they envisioned excluding the Communist Party—still a potent political force in Chile—from the elections. But with publication of the Times interview, in which Pinochet characterized opposition leaders as "caballeros who have been unemployed for the past 11 years and want to return to power and their privileges," and said that he had no confidence in "orthodox democracy," the AD realized that collaboration with the regime was futile. They therefore decided to join with the left Democratic Popular Movement (MDP) and the country's major union coalition, the National Workers' Command (CNT), in calling for major demonstrations Sept. 4 and 5.

The protests were deemed a complete success by both acting AD president Mario Sharpe and MDP president Manuel Almeyda, who hailed the "joint mobilization of the opposition." But the government reacted harshly, killing nine—including French priest Andre Jarlan—and arresting 1,000.

The new mood towards cooperation between the AD, MDP, and the Socialist Bloc—an array of left and center-left political groups—prompted negotiation of a "Constitutional Pact," the signing of which is believed imminent. The pact would commit signatories to renounce violence in the struggle against Pinochet and to cooperate in a transitional government after his ouster.

Calling the agreement a "guarantee [of] civilized coexistence among Chileans," Sharpe said in a Sept. 26 interview: "This pact must include the fundamental elements of a democratic institutionality, respect for human rights, and the bases of the country's economic structure, thus opening the way for a peaceful and orderly transition towards full democracy." The Movement of the Revolutionary Left (MIR), committed to armed struggle against the regime, is not a party to the negotiations.

The possibility of the unification pact is good news for Chile's labor unions, which for some time have maintained the most solid and unified opposition to Pinochet, and which also have borne the brunt of repression. Outlawed in 1979 from organizing beyond the plant level, the unions have moved beyond demands centering around working conditions to a comprehensive political agenda.

In May 1983, five major unions—including the Copper Workers' Confederation (CTC) and the leftist National Union Coordinator (CNS)—joined to form the CNT which, under the dynamic leadership of copper workers president Rodolfo Seguel, has become a major actor on the political scene. Seguel, jailed several times over the last 18 months, was beaten so badly during the September demonstrations that he had to be taken to a medical station on a stretcher.

The Sept. 4 shooting of Jarlan by government forces brought church-government relations to a new low as well. The local Archdiocese filed a criminal complaint over the murder, and Santiago Archbishop Juan Francisco Fresno termed the incident "a shame for our country." Jarlan's funeral at the Metropolitan Cathedral Sept. 6 drew over 10,000 mourners.

GOVERNMENT FRICTION

There are signs that Pinochet's new hard line is causing friction within the government itself. Interior Minister Jarpa was attending a conference in Ecuador, where he stated that the government did in fact have plans to speed up the election timetable, when Pinochet's Times interview was published. According to persistent rumors, reportedly confirmed by the Archbishop's office, Jarpa was so angered that he tendered his resignation to Pinochet, who refused to accept it. Other cabinet members also allegedly offered to resign.

For his part, Pinochet has formally charged 10 opposition leaders, including Sharpe, Seguel and Christian Democratic Party leader Gabriel Valdes, with trying to overthrow the government in connection with the recent demonstrations. Jailing Valdes would invite enormous international repercussions, given his lofty reputation and close connection to democratic leaders throughout the world. If convicted, they could receive up to five years in prison.●

ENDORSEMENT OF TERRORISM?

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. HUBBARD. Mr. Speaker, I read an excellent editorial in the October 2 Wall Street Journal entitled, "ASALA's Day," which I urge my colleagues in the House to read. Indeed, the points raised about considering resolutions in the House and Senate that might be interpreted as endorsing terrorism against the diplomats of a democratic ally, namely Turkey, are definitely worthy of our consideration.

The editorial follows:

ASALA's Day

In the 11 years since an Armenian terrorist campaign against Turkey began, 41 Turkish diplomats plus members of their families and other innocents have been murdered.

The Armenian Secret Army for the Liberation of Armenia (ASALA), one of the major perpetrators, seems reasonably clear in its long-range goal, although its objectives are sometimes clouded by factionalism. Its dominant faction wants to "liberate" the eastern provinces of Turkey and incorporate them into the Soviet Union. This was explicitly stated when the ASALA official journal editorialized: "Our forces never strike against the Soviet Socialist Republic of Armenia which is already liberated."

NATO bases in eastern Turkey, just the region that ASALA wants to liberate," are essential to any Western defense against a Soviet attack in the Mideast. The Soviets poured more than a billion dollars of arms through Bulgaria into the hands of both leftist and rightist Turkish terrorists during the 1970s in an attempt to destabilize the bulwark of NATO's southern flank. The Turks responded with martial law and defused the threat sufficiently to allow the present movement back to democracy. But there is no reason to believe that the Soviets have given up their campaign to isolate Turkey from its NATO allies.

The U.S. Congress has managed to bumble into this nasty game. Two bills now before that body seek to commemorate the large number of deaths of Armenians in eastern Turkey during World War I. There can be little doubt that the Armenian repression was a terrible chapter in history and perhaps the Turks have been too insistent on denying guilt. But it was only one part of a global tragedy that claimed nearly 15 million lives. Dredging it up now in Congress, some 70 years after the event, may be a generous gesture toward Americans of Armenian descent but is hardly an appropriate signal to U.S. enemies.

The milder version, sponsored by Rep. Tony Coelho (D., Calif.) and passed by the full House, calls for April 24, 1985, to be a day to commemorate the Armenian "genocide perpetrated in Turkey between 1915 and 1923." In specific terms, this bill would not directly affect U.S. policy.

But the bill that has recently passed the Senate Foreign Relations Committee makes no pretense of avoiding current policy implications. Sponsored by Sens. Carl Levin (D., Mich.) and Pete Wilson (R., Calif.), Senate Resolution 241 calls for U.S. foreign policy "to take into account the genocide of the Armenian people. . . ." No one knows exactly what this means. According to his spokesman, Sen. Levin wants to link U.S. aid to the Turkish record on human rights.

The Turks are understandably confused, worried and upset. The Senate bill specifically says that the Ottoman empire and not the modern Turkish republic was responsible for the killings of Armenians. So, perhaps, the Turks have reacted too strongly to the threat of its passage. But, after more than a decade of terrorism, they can be excused for suspecting that the bills are part of a wider political agenda to separate Turkey from the West.

In a week when Congress is examining ways to prevent attacks on our embassies, it is particularly ironic to consider resolutions that will be widely interpreted as endorsing terrorism against the diplomats of a democratic ally.●

EPA INACTION ON ASBESTOS DRIVES SCHOOLS TO COURTS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. FLORIO. Mr. Speaker, a Federal district court judge in Philadelphia recently approved a class action lawsuit brought on behalf of the thousands of school districts across the country which are currently mired in a desperate effort to contain the growing public health emergency posed by asbestos in the schools. The schools have sued 55 asbestos manufacturers who produced the materials which have caused these environmental hazards in the classroom.

The Department of Education has estimated that as many as 14,000 schools across the country have an imminent asbestos problem and that 15 million schoolchildren and 1.4 million school workers could be affected. Asbestos is an indisputed human carcinogen which can cause fatal diseases after even low level, short-term exposure.

Last week, the subcommittee I chair held a hearing on the Federal Government's effort to deal with the asbestos crisis. The Environmental Protection Agency's top official for the asbestos program told the subcommittee that EPA would continue to oppose congressional efforts to provide financial relief to the schools through a $600 million loan program authorized this past summer. The next day, EPA tried to retract his statement, saying that the Agency had made no decision on funding requests for the loan program. But in reporting on the retraction, the Washington Post correctly characterized it as an effort to contain a "public relations disaster."

The EPA official also testified that the Agency has no plans to improve the guidance documents which are the only materials available to school districts attempting to assess and debate the asbestos hazard. Many school officials have correctly noted that these guidance documents are totally inadequate and often serve only to confuse cleanup efforts.

The Agency's inaction on asbestos has produced a situation where school districts' only recourse is to seek relief in the courts. EPA's defiance of the law will only serve to delay the elimination of asbestos from our schools, leaving ultimate resolution to the lengthy and uncertain process of litigation. I commend the following article from the New York Times describing the school districts' plight to my colleagues.

[From the New York Times]

Class Action Set in Asbestos Cases—Federal Judge's Ruling Applies to About 14,000 Schools That Are Contaminated

(By Tamar Lewin)

A Federal district judge in Philadelphia has approved a suit against 55 asbestos manufacturers on behalf of the nation's primary and secondary schools. It would be the first nationwide class action for property damage arising out of a product liability question.

According to the United States Department of Education, about 14,000 of the nation's 36,000 public school districts and private schools have asbestos in their ceilings or in pipe and boiler insulation. The fibers, when inhaled, have been known to cause cancer and a variety of lung problems.

"In my view the school asbestos litigation is uniquely suitable to class action treatment," Judge James McGirr Kelly wrote in the decision issued Friday. "Instead of hundreds of thousands of school asbestos cases in separate forums, the litigation would be concentrated in a single forum, thereby economizing litigation expenses."

Thousands of school districts, the judge said "will be benefited by being relieved of the onerous burden of bringing a complex action which could consume in costs more than the recovery anticipated."

$1.4 BILLION COST ESTIMATED

The Department of Education has estimated that it will cost the schools $1.4 billion to remove the asbestos. About 50 school districts have already filed their own lawsuits against the asbestos companies.

Under Judge Kelly's ruling, school districts that have already spent money to remove asbestos would be able to use the class action to recover their costs from the asbestos companies. As other schools incur such expenses, they too will be able to seek compensation.

"I think this is a great decision, because it sets the framework for a global solution to the whole school asbestos problem," said David Berger, a lawyer for some of the schools.

The filing of some 25,000 individual personal injury cases by workers who had been exposed to asbestos prompted the Manville Corporation to file for reorganization under the bankruptcy law two years ago. Although claims against Manville are frozen as long as it is in bankruptcy, the company formerly the world's largest asbestos producer, is expected ultimately to shoulder some of the school liability as well.

SCHOOLS FREE TO CHOOSE

School districts that wish to bring their claims for compensation separately would be allowed to do so, but in order to seek punitive damages from the asbestos compa-

nies, schools would have to join the class action.

Lawyers for the school districts have said in their court filings that they would seek $200 million to $300 million in punitive damages from the asbestos manufacturers, and another $75 million to $150 million for medical monitoring of people who had been exposed and for monitoring schools after asbestos had been removed.

The Environmental Protection Agency has estimated that 15 million children and 1.4 million employees spend their days in schools that contain asbestos. Under E.P.A. rules, schools are required to test for the presence of asbestos and notify parents if the substance is present.

So far, Congress has appropriated $50 million for asbestos abatement in schools, but the E.P.A. has not requested any new money for the 1985 and 1986 fiscal years.

Judge Kelly's ruling has particular legal significance because product liability cases are usually handled on a state-by-state basis, since state laws govern the damage awards. However, dividing up the claimants by state often makes it difficult for those with small claims to join forces and share the costs of their legal efforts to win compensation.

Judge Kelly ruled that there were enough common issues, including the hazards of asbestos and the defendants' knowledge of those hazards, to warrant class treatment.●

TRIBUTE TO RON PAUL

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, since Dr. RON PAUL won a special election in his Texas district in 1976, he has emerged as a leading spokesman for a genuine American philosophy. It is sad to consider that when the 99th Congress convenes, such an eminent gentleman will not be among its number.

RON came to Congress with strong beliefs and definite convictions. He has therefore, during his time in the House, fervently pursued the implementation of measures consistent with his beliefs through the sponsoring and the cosponsoring of many important bills. His persistent advocacy of sound money, economic and civil liberty and limited constitutional government have all won him national acclaim as a responsible and principled statesman.

RON has ended his time here serving on the House Committee on Banking, Finance and Urban Affairs and on three of its subcommittees. He has developed a particularly keen interest in economic affairs and has been concerned about inflation and the value of paper money. In 1981 he served on the U.S. Gold Commission and through his interest in the economy he founded the Foundation for Rational Economics and Education in 1976. He is also an author of three books.

I am proud to say that I have served with such an honorable legislator, and I feel sure that his loss will be regretted by us all, both socially and professionally.

However, knowing his many talents as I do, together with his experience and his personality, I am certain that we shall not have heard the last from RON PAUL. We shall all miss you, RON, but we will cherish the years that we have worked with you. May your future be blessed with good fortune, good health, and happiness.●

TRIBUTE TO RICHARD OTTINGER

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. BIAGGI. Mr. Speaker, one of the genuine losses the Congress will suffer at the end of the 98th Congress will be the departure of my friend and neighboring colleague from New York, RICHARD OTTINGER. Not only are the people of the 20th Congressional District losing a most effective representative—the Nation is as well.

DICK in his decision to retire perhaps articulated a concern which we must all feel on occasion—a sense of frustration over the job and our efforts to shape policy. Yet few have worked harder at trying to impact on policy than DICK OTTINGER in a Congressional career which began with his election in 1964. DICK OTTINGER throughout his career blended two seemingly diverse characteristics—idealism and pragmatism. In his mind and heart, he knew which way he wanted a particular policy to go but he also knew that at times to get something you must also give up something. The blend has produced more benefits than setbacks, over DICK's career. During his years in the House, he played a prominent role in such diverse areas as reforming House procedures—and working for a better environment. He was an unabashed champion of nuclear safety—even a pioneer on the subject.

DICK served with special effectiveness as Chairman of the powerful Energy Conservation and Power Subcommittee of the House Energy and Commerce Committee. He was also a leading member of the Science and Technology Committee. He was also the founder and past Chairman of the Environment Study Group which during his leadership was a most effective voice in the Congress on behalf of environmental causes.

I have had the especially good fortune to have worked more closely than many of my colleagues with DICK OTTINGER. On two different occasions in my 15 years in the House I have had the good fortune to represent a neighboring congressional district in part of Westchester County in New York. I therefore know first hand how revered DICK is among his constituents and how he has been an exemplary protector of their interests in Washington. DICK was active in the various communities which make up the 20th Congressional District and was a familiar figure.

I also worked closely with DICK on an issue of mutual interest—peace and justice for Northern Ireland. DICK has been a most valued member of the Ad Hoc Congressional Committee for Irish Affairs and in that capacity was the author of one of the more enlightened bills on Northern Ireland, H.R. 3465. This legislation seeks to have American firms doing business in Northern Ireland adhere to nondiscrimination in their hiring and promotion policies in the North. Last August, DICK traveled to Northern Ireland to conduct on-the-scene meetings with a number of officials from Northern Ireland to learn more about the problems related to discrimination. The very fact that he took the time to travel to the perilous area of Northern Ireland was indicative of his depth of commitment to a particular cause. I know that in his honor I will continue to work for the passage of this legislation in the 99th Congress.

DICK OTTINGER now returns to a more private life but all of us who know him know full well that DICK will continue to be involved in issues and causes. It is too much a part of him for him to do anything else. However in his future endeavors I wish him not only success—but satisfaction. I also wish he and Sharon health and happiness in the years ahead.

At this point in the RECORD I would like to insert an article from the Yonkers Herald Statesman but which was run throughout Westchester County in the various papers under the Gannett ownership focusing on the career and thoughts of DICK OTTINGER. It not only portrays DICK; it also provides some of DICK's thoughts and reflections on his own career.

[From the Yonkers Herald Statesman]

OTTINGER REFLECTS ON HIS 20 YEARS OF HIGHS AND LOWS IN WASHINGTON

(By Judith Horstman)

WASHINGTON.—It's a bittersweet week for Democratic Rep. Richard Ottinger. After 20 years of off-and-on service in Congress, he's coming home to Westchester.

Monday, colleagues will throw a wingding to say goodbye. Thursday, the 98th Congress hopes to adjourn.

The other day, with his feet propped on a coffee table, the 20th District representative talked about his Washington years. He mulled the high and low points, his reputation as a loner and "troublemaker," and took a few parting shots at House Speaker Thomas P. "Tip" O'Neill, D-Mass.

What he'll miss most. Ottinger said, are his friends in Congress and the ability "to

make some kind of action and effective noise about the outrages."

What he will not miss, he said, are the brutal demands of the job.

Ottinger is 55 and is tired and frustrated with the uphill fight to rekindle the Great Society. His said his job helped cause the failure of his first marriage, and probably contributed to his recent separation from his second wife.

"I won't miss not having control over my life," he said. "Having weekends. Getting home before midnight. Just staying home and reading books, actually reading some interesting books."

He plans to come home to Mamaroneck and hopes to teach part time, write, and create a television series showing how to fight bureaucracy.

"I really don't have Potomac fever," Ottinger said. "The only problem will be pressure put on me to maintain an active political life. Already people are pressuring me to run for county executive. I won't do it."

Ottinger's first attempt at politics came in 1957, when he belly-flopped with an unsuccessful run for Mount Pleasant town supervisor.

Undaunted, Ottinger, heir to the U.S. Plywood Co. fortune, became the second to enroll and serve in the brand new Peace Corps before he won the congressional seat from what was then the 25th District in 1964.

From the start, he was an independent idealist, a chain-smoking rumple-suited congressional freshman tackling environmental damage and corruption. He was such a workaholic, one wag quipped: "If Brownie badges were being given out, you could count on Ottinger being there."

Always in a rush and always preoccupied with larger issues, he sometimes overlooked small things and ended up walking in the wrong door or; once, getting on the wrong airplane. His staff, as a joke, pinned a note on his overcoat one election year that read "My name is Dick Ottinger. If I am found wandering, please call (the office number). He never even noticed it.

Ottinger shrugs aside a query about whether or not growing up rich made him a populist.

"Tradition has it the first generation makes it and the second generation gives it away, all right? I'm the second generation. I guess I follow that pattern."

And it wasn't getting his fortune from a wood company that fueled his fierce interest in environmental protection—It was "growing up in Westchester and appreciating the beauties that offers," he said.

"And corny as it sounds, it's true nonetheless that being a Boy Scout had something to do with it," he said with a shy smile.

His career had its ups and downs. An unsuccessful bid for the U.S. Senate in 1970 cost him $4.5 million ("Damn near ruined the family finances," he said) and he failed in his first bid to reclaim his congressional seat from Peter Peyser in 1972.

But re-elected in 1974, he was back in Congress by 1975 and elected chairman of the New Members Caucus—the high point of his Washington years, he said. He said that group would make wide reforms in House procedure.

Other high points were his chairmanship of the powerful Energy, Conservation and Power Subcommittee, and creation of the bipartisan Environmental Study Group.

The low point, he said, was losing a bid for Democratic Study Group chairman in 1979, because it showed him bluntly he would never have a major House leadership role.

"That was a very damaging blow to my ego and my aspirations for leadership in the institution," he said. He said his lack of obeisance to the House leadership put him on the outskirts of power.

"The leadership likes you to genuflect and say 'yes' to whatever they do and I'm not that way. And if you take on the speaker on issues where you disagreee with him, he tends to look at you as being disloyal and unreliable," he said.

"Even though I wrote the speaker a letter demonstrating to him that I have been one of his most loyal supporters, supporting him in terms of the votes, a lot more than many of his committee chairmen or his leadership group, he still views me as a troublemaker," Ottinger said.

But, Ottinger said, he has learned to deal with defeat and disappointment.

"I basically react the same whether it's losing the election or the tragedies I've experienced in my personal life. I pull up my socks and go on to the next challenge."

"I hurt, sometimes badly, but there's no sense dwelling on the past."

In a lighter moment, Ottinger was more than willing to deliver one-line comments on some of the figures he's known.

Lyndon Johnson: "Were it not for the Vietnam war, Lyndon Johnson would have been one of our greatest presidents."

Jimmy Carter: "I think he'll go down in history much better than present estimates."

George McGovern: "Don Quixote."

John Anderson: "Don Quixote's brother."

Sen. Patrick Moynihan: "Oversize ego, certainly one of the most creative people in politics."

Sen. Alfonse D'Amato: "Overachiever. He tries harder."

Gov. Mario Cuomo: "A magnificent human being."

Walter Mondale: "Very decent and totally colorless."

Geraldine Ferraro: "A woman who would make a splendid president."

Peter Peyser: "A superb showman."

Lt. Gov. Alfred Del Bello: Long pause. "My mother told me if I didn't have anything nice to say about anybody I shouldn't say anything at all and I'm not going to say anything about him."

John F. Kennedy: "One of the most inspiring presidents we ever had."

Ottinger wanted to say more.

"Kennedy really inspired the country to achieve its fullest, its best potential, whereas Reagan and Nixon played on people's fears and prejudices. Jack Kennedy brought out the best in people," he said.

It is possible to return to those ideals, Ottinger said.

"It takes another really affirmative leader to move us forward," he said. "One person makes all the difference in the world."

That is the optimistic philosophy he's carried through his years in Washington.

"It's been just the most fascinating thing anybody could do," he said. "There is no other job where you can get involved and have a meaningful impact on virtually anything going on in the country—or for that matter, the world. I would certainly do it over again."●

GOOD IMMIGRANT BILL

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. MAZZOLI. Mr. Speaker, I commend to the attention of my colleagues the following article by Brandeis University Pro. Lawrence H. Fuchs, which appeared in the October 9, 1984, New York Times.

Professor Fuchs' comments are very much on target and I hope my colleagues will give them careful consideration in the few hours remaining in the 98th Congress to give final approval to crucial immigration reform and control legislation.

The article follows:

GOOD IMMIGRANT BILL

(By Lawrence H. Fuchs)

WALTHAM, MASS.—In a minor miracle, a conference committee has reached a tenative compromise on the Senate and House versions of the Simpson-Mazzoli immigration bill. Months of bitter debate have produced a sound bill that deserves final approval. Even so, we are likely to hear again that the measure is racist and anti-family, that its legalization provision will open the immigration floodgates, that its employer-sanction measure will be ineffective and discriminatory.

The bill is not racist. The employer-sanction provision, which will penalize employers who knowingly hire illegal aliens, is designed also to protect everyone eligible to work—brown and black Americans and resident aliens alike. There was a concern that employers would use their fear of sanctions as a cover for discrimination against lawfully resident aliens. In fact, the bill provides for new mechanisms—including a new special counsel to investigate complaints—that will help protect aliens against such discrimination.

The bill is not anti-family. It emphasizes family reunification exactly as does present law. The crucial provision legalizing the status of undocumented aliens who have lived in America before 1981 will strengthen family reunification by allowing newly legalized aliens married to resident aliens to emerge from the shadows under the full protection of the law.

Nor will this provision open the floodgates to immigration. Even the most dramatic forecasts do not predict that more than two million will apply for legalization. Overall, the Simpson-Mazzoli bill will affect only marginally the total number of immigrants lawfully admitted in the years ahead, while bringing an exploitable underclass into more open participation in American life and also deterring future illegal immigration in a more effective way than the dangerous cops-and-robbers game that we call border enforcement.

How will Simpson-Mazzoli start us toward effective enforcement? Short term, the flow of illegal aliens will not be cut drastically. Employers will need time to move to a workforce that is substantially lawful. And it will take seven to 10 years to develop a universally secure system to validate those who can work and who can't. But by that time, the incentive to enter the country illegally will have been removed. The main reason

for starting now is to prevent the growth of a larger underclass and to protect us from the terrible divisiveness that would result from large-scale illegal migration in the future.

Simpson-Mazzoli will not work miracles. But it does do several important things. At one point, for example, efforts were made by restrictionist elements in Congress to make refugees (for example, those in Southeast Asia) compete with immigrants under an absolute ceiling. By repudiating these efforts, the bill keeps alive a humanitarian policy of accepting people who come here not with the primary purpose of seeking jobs but to escape persecution. It also makes more expeditious our method of deciding who is entitled to asylum (persons already in this country who fear persecution if deported). To that end, it provides an improved judicial system that will reduce delays and provide for greater uniformity in asylum cases. And it will reduce the underclass of illegal aliens in our midst through legalization while deterring the flow of illegal aliens in our midst through what eventually will become an effective mechanism of providing employment only to those who are lawfully permitted to work.

For various reasons, the bill is an improvement over earlier versions. It greatly strengthens the Senate's provisions against discrimination; it eliminates an ill-conceived House effort to allow up to a half million foreign workers to enter this country temporarily each year; it eliminates the Senate's absolute cap on the number of immigrants who can be reunited with their families; its legalization provisions cover more people than authorized by the Senate but are less costly than provisions proposed by the House. Simpson-Mazzoli deserves to triumph over wildly inaccurate rhetoric.●

TRIBUTE TO ABRAHAM KAZEN

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. UDALL. Mr. Speaker, a good friend and a longtime colleague in this House, ABRAHAM "CHICK" KAZEN, will be leaving us at the end of this Congress, and I'm sorry to see him go.

CHICK KAZEN is one of those folks who commands respect, and he has always had mine. Whether presiding over the Water and Power Resources Subcommittee or pleading the case for a piece of his own legislation, we've come to know that CHICK always speaks to us from the heart.

During all our years together on the Interior and Insular Affairs Committee, I've come to depend on CHICK. Behind this passionate man possessed of passionate beliefs, there has always been a fundamental fairness and decency. And like an oldtimer out in Arizona once told me, "that fella sure works hard at workin'."

CHICK KAZEN has been a credit to the Congress, to his native Texas and to the people of his congressional district. His example is what the Congress is all about.

I wish him and his family all the best of what they seek in the years ahead and extend to each of them my warmest regards.●

LIBRARY SERVICES FUND LEGISLATION HIGHLY DESIRABLE

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. OWENS. Mr. Speaker, I am pleased to rise and support the passage of the conference report for the Library Services and Construction Act Amendments of 1984. This report was passed on October 4, 1984. The resolution of the differences between the House and the Senate has been reasonable.

The conference report authorizes funds for library services, including the development of literacy services, as well as funds for construction. The library construction funds are clearly insufficient to meet the need for library construction in this country. However, it is my hope and the hope of others who worked to develop this bill, that these funds will serve as a catalyst which stimulates fundraising from other sources.

The library services funds can be put to many purposes as libraries expand their programs and reach out to those who have not yet discovered the knowledge, excitement, and reading pleasure which can be found in libraries. People talk about educational standards in this country and they forget that the most vital element in learning is reading—reading beyond that required in a class. There is so much available which will open new thoughts and interests. Children, with their natural curiosity, should be led to all that is available. Once started, they will develop the habit of reading which will serve them well in their personal and work lives. Every which will serve them well in their personal and work lives. Every book read not only adds to one's knowledge, but represents a triumph over the seduction of TV, the fast food of the mind. Libraries are a major component of the educational infrastructure of this Nation and libraries will continue to play a vital role in the creation and maintenance of the "learning society" advocated in the report, "A Nation at Risk."

The Library Services and Construction Act amendments are a beginning. I urge my colleagues to not only support the conference report, but to support the libraries in their districts as well as the efforts to expand and improve library services which were begun in this session of Congress. These efforts include the Academic Libraries and Information Technology Enhancement Act, the Computer Literacy Act, the Federal Correctional Educational Assistance Act, and several attempts to treat museums and libraries as public charities for income tax purposes.

Next year, as we consider the reauthorization of the Higher Education Act of 1965, we will have the opportunity to review college library assistance programs provided under title III of that act. This session's proposal, the Academic Libraries and Information Technology Enhancement Act (H.R. 5210) would have reauthorized funding for the college library resource development grant program, which has been reduced to zero, and targeted the new grants to needier insitutions. It would also have increased the proposition of title III funds allocated to library career training grants, contracts and fellowships and established a new program of 3-year grants to academic libraries to be used to acquire the technological equipment needed to participate in information-sharing networks.

The Computer Literacy Act (H.R. 3750) introduced this session would have addressed general computer literacy issues as well as providing grants to libraries to serve as a computer software and hardware loan centers for local schools and colleges and universities which will receive funds under the act. The concept of sharing computer information through libraries makes sense in light of the need for this resource and the costs of purchasing duplicative equipment and software when sharing can be used.

Several efforts were made to allow museums and libraries to be treated as public charities for income tax purposes. These efforts died in the Senate Finance Committee. Let us hope that those who urge charitable giving as a substitute for Government funding will see their way clear to provide some incentives for giving to libraries in the next session of Congress.

Prisoners are not a politically favored group. The Federal Correctional Educational Assistance Act (H.R. 5240) would have provided additional funds through a grant program to States. The funds would be for educational programs in juvenile and adult correctional institutions and would have included library services. At this time, the estimates of the illiteracy rates in prisons vary greatly. In many prison populations, the inmates who can read at or above the fifth grade level are less than 50 percent. This indicates a clear need to improve basic reading skills so that other skills can be learned. If we wish to prepare prisoners for any occupation other than crime, they must be able to read well enough to receive training.

Although I am disappointed that the measures discussed above did not

become law in this session, I remain optimistic that the Congress will take up these or similar measures in the next session. I urge all of my colleagues to discuss the needs of libraries with their constituents while they are back in their districts.●

CONYERS PROPOSES CONSTRUCTION OF 5 MILLION HOUSING UNITS IN RESPONSE TO PUBLIC HOUSING CRISIS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. CONYERS. Mr. Speaker, I am proud to announce the introduction of the Jessie Gray Housing Act. This bill is an essential response to the severe inadequacies of public housing in America.

The Jessie Gray Housing Act, named after the founding chairman of the National Tenants Organization, proposes the construction of 5 million new public housing units and the revitalization of 100,000 existing units each year for a period of 10 years. This project would be financed in part by a new National Housing Fund. In addition, a substantial percentage of the construction jobs created by this project would be set aside for unemployed individuals living in or near public housing. Finally, the share of personal income which all housing-aid recipients would be required to use for rent would be reduced to 25 percent, reversing a Reagan administration decision to set the share at 30 percent.

The passage of the Jessie Gray Housing Act is made vital by the regressive policies of the current administration. While the number of homeless in America has risen steadily, Federal expenditures for housing assistance have plummeted from $27 billion to $9.9 billion over the past 3 years. This administration is infatuated with voucher programs which fail to address either the shortage of actual housing units or the discrimination against low-income and minority rental applicants shown by landlords.

This act would reduce the public housing shortage by financing the construction of 500,000 new units each year for a total of 10 years. Funding would come from three sources: Direct Federal grants, the new National Housing Fund, and bonds issued by Public Housing Agencies [PHA's] and guaranteed by the Federal Government. During the first fiscal year, Federal grants to PHA's from general revenues would total $5 billion. During the same period, grants would be made to PHA's from the National Housing Fund in the aggregate amount of $15 billion. This fund would consist of revenues raised specifically for this purpose through a corporate income surtax. Finally, the Federal Government would assume responsibility for a total of $10 billion in bonds issued annually by PHA's. Figures for funding in subsequent fiscal years would be adjusted to reflect increases in the Consumer Price Index. At the end of the 10-year period covered by this bill, the National Housing Fund should have the resources to cover a greater percentage of future public-housing construction, thus eliminating the need for the selling of bonds.

This act would anticipate and prevent the "one step forward, two steps back" effect of allowing the destruction of existing public housing units while financing the construction of a smaller number of new ones. Under this bill, the demolition of public housing would be banned and the annual level of Federal funding made available for the revitalization of existing units would be increased.

No matter how much we tinker with voucher systems and other bureaucratic procedures, we cannot deny the fact that there is not enough public housing available for those who require it. New construction of public housing is a necessity, not a convenience, and the Jessie Gray Housing Act recognizes this fact.●

ROMAINE B. THOMAS—OUTSTANDING EDUCATOR

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. FAUNTROY. Mr. Speaker, at a time when our country is properly preoccupied with the quest for excellence in education, particularly in our public schools, I am pleased to bring to the attention of my colleagues the accomplishments of a talented educator, Ms. Romaine B. Thomas, the principal of Ketchum Elementary School in the District of Columbia.

Ms. Romaine B. Thomas has just been selected as one of the 54 nominees for the first annual National Distinguished Principals Program, jointly sponsored by the National Association of Elementary School Principals, the U.S. Department of Education, and Tandy Corp. This outstanding educator will be participating in a meeting with the Secretary of Education, T.H. Bell, as well as a formal awards banquet. She will also be honored, along with the other nominees, at a White House reception.

Mr. Speaker, I am extremely proud of Ms. Romaine B. Thomas, who is a civic leader in the Washington, DC, community, as well as a long distance runner for educational excellence.●

IN MEMORY OF THOMAS RAY GILMORE

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. EMERSON. Mr. Speaker, on October 3, 1984, Thomas Ray Gilmore died at that age of 45. Mr. Gilmore was a prominent attorney and civic leader in Scott County, MO, and his life was distinguished by his commitment to achievement and service to his community.

Before graduating from high school, Mr. Gilmore served as a page in the U.S. Senate for Senator Stuart Symington. He graduated from Yale University where he was president of his college class. He obtained his law degree from Georgetown University, and while there, he served as a lieutenant in the Navy.

Mr. Gilmore served as assistant prosecuting attorney of Scott County and later as prosecuting attorney and was an active member of the American, Missouri, and Scott County Bar Associations. He was a member of the Missouri Law Enforcement Assistance Council and served as president of the Scott County Young Democrats. In addition, he was a member of the Sikeston Public Library Board, the Boy Scouts Executive Board and received the Boy Scouts of America District Award of Merit and the Silver Beaver Award.

Mr. Gilmore also served as judge of the Sikeston Municipal Court, vice-president of the Sikeston Industrial Development Council, and was a member of the Sikeston Chamber of Commerce, the United Fund Board, and the Silkeston Optimist Club. He was active in the First United Methodist Church of Sikeston and served on its administrative board and pastor-parish relations committee.

Thomas Ray Gilmore leaves behind family and friends who will miss him greatly, but who will remember him for his compassion and his untiring service to his community, his State and his country. The examples he set and the contributions he made will continue to enhance the lives of those who knew him for as long as we live.●

THE CONGRESSIONAL CAPITAL INVESTMENT PROGRAM INFORMATION ACT OF 1984

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. HOWARD. Mr. Speaker, today I am introducing the Congressional

Capital Investment Program Information Act of 1984.

Joining me on this important piece of legislation is the distinguished majority leader, Hon. JIM WRIGHT of Texas, who is to be complimented for his continued commitment to the issue of capital budgeting and the need for obtaining better data on our Nation's capital investments.

In testimony before the Rules Committee on Budget Act reforms, Congressman WRIGHT stated:

It seems to me that we have reached the point where in the United States we need to adopt that very sensible procedure. Here we are confronted, according to one of the news magazines, with a rather urgent necessity to expend some $2.5 trillion, if you believe their figures, in rebuilding, repairing, modernizing, updating the basic public infrastructure of our country, the roads, the bridges, the schools, the libraries, the public services of all kinds, the sewage plants, the water works, the drainage ditches that make up the public infrastructure of our Nation.

Those are our capital assets. They belong to all the public, and yet we are told that 40 percent of the bridges in the United States, and that is more than 200,000 of them, are structurally deficient and obsolete, some of them actually dangerous. At least 40 percent of them are more than 40 years old. They were built before 1940.

We face this necessity. Manifestly we are not going to be able to do an adequate job in rebuilding the infrastructure of our country out of operating expenses without running huge deficits.

Therefore, it seems plausible to me that the first and foremost important amendment to the Budget Act ought to be one which would carry out a recommendation made by the Hoover Commission in 1949, which was that we create a capital budget under which expenditures would be separated from current operating expenses.

Capital and investment type programs would be financed separately from the current expense programs, and would be costed out over a period of time sufficient to amortize the investment and to pay for them before they wear out, but not unrealistically expecting us to pay for everything in a current year. To do so seems to be defrauding ourselves.

It is in this spirit that the Congressional Capital Investment Act was formulated.

This bill addresses one of what I believe are three necessary components of a national infrastructure program: A mechanism for the President to gather budgetary information on capital investments; a national infrastructure initiative to meet program needs; and a mechanism for Congress to determine infrastructure priorities.

The first would be achieved through enactment of the conference report on S. 1330, the so-called capital budgeting bill. That bill requires the President, beginning with fiscal year 1986, to include as part of the annual budget submissions to Congress detailed budget analyses of major capital investments. That bill, which will soon become law, is a necessary first step in giving policymakers a dependable tool for analyzing the best combination of capital investment programs needed to maintain the Nation's infrastructure.

The second and most important component is the formulation of a national infrastructure proposal along the lines of H.R. 5948, the National Infrastructure Act. That bill would create a national infrastructure fund to make 20-year, interest-free loans available to the States and to serve as a depository for their repayment. It would allocate $3 billion per year for 10 years according to a formula based on State population.

The States would be required to spend the loans only on roads, bridges, mass transit facilities and equipment, water supply and distribution systems, and sewerage systems—the core life support systems of our economy. Each State would determine how to allocate its Federal funds with a requirement that at least 30 percent be set aside for municipal and country governments to invest.

Overall, the bill has three purposes: To provide a steady, dependable stream of capital to the States so that local managers can plan for future needs; to leave selection and dedication of projects with State and local governments; and to require that all funds be repaid, thereby containing the cost to the U.S. Treasury.

Legislative action on this bill is expected next Congress.

The third component—a logical extension of the first—is the development of a capital budget within the congressional budget process. That is what the bill I am introducing today does.

Section 2 of the bill requires that annual concurrent resolutions on the budget separately identify and summarize the public civilian and military capital investment expenditures of the United States.

Section 3 requires committees to review and comment on the President's analysis of capital investments, one of the new requirements of the recently passed capital budgeting bill.

Section 4 requires that the report accompanying the budget resolution include an identification and analysis of the principal policy issues and factors that affect capital needs.

Sections 5 and 6 provide for the allocation of the capital budget among respective House and Senate committees and within those committees by subcommittees and/or programs.

Section 7 provides that the definition of "public civilian and military capital investments" shall be the same as in the capital budgeting bill.

In essence, this bill parallels and complements what will be the new capital budgeting requirements of the executive branch. In addition, it provides the means by which Congress can assure that capital expenditures are separated from current operational outlays within the unified Federal budget.

With the enactment of this bill, Congress can then debate and set capital budget priorities clearly and deliberately within the context of overall capital policy objectives.

This is not a new concept, but it has yet to be implemented. Failure to put the Federal budget in a more rational, understandable order, will limit the ability of all levels of government to define and move forward with their own infrastructure strategies.

I encourage and welcome your support for this legislation.●

HONORING PAUL KAPCHAN

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. ACKERMAN. Mr. Speaker, I would like to ask my colleagues in the U.S. House of Representatives to take this moment to join me in honoring Mr. Paul Kapchan, president of the Democratic Club of Flushing-Whitestone-College Point in Queens County, NY.

The Democratic Club is paying tribute to our colleague JAMES SCHEUER and Mr. Kapchan for their many years of dedication and service to the public, at an annual dinner-dance on October 26, 1984.

Mr. Speaker, I know my colleagues in this body are aware of Congressman SCHEUER's vital contributions to the House of Representatives, his constituents, and the citizens of this Nation. But I would like to take a few moments to describe to you what the efforts of someone you may not know have done for the people of Flushing.

Paul Kapchan's ideas, leadership, and spirit of tolerance and understanding have dramatically changed the appearance and the heart of Flushing. Although he is serving his first term as president of the Democratic Club, he has been deeply involved in the club and the community for many years, to the benefit of every citizen in Flushing. As president of the Flushing Merchants Association, Paul has been the catalyst for revolutionalizing the relationships between immigrant and resident merchants, and between the business community and surrounding neighborhoods.

Paul has fought hard, with persistence and diplomacy, for a safer, cleaner, more dynamic Flushing. Through his efforts in negotiating better cooperation between merchants and the police department, every citizen now enjoys better protection and a safer way of life. He led a drive to welcome and support Chinese and Korean immigrant merchants and to break down barriers of prejudice and misunder-

standing among business owners. He has lived in Flushing for many years, built his life, his business and his friendships there. As a cofounder of the Democratic Club in Flushing and proprietor of a men's clothing store, he had a vision for the community—a vision of harmony between businesses and neighborhoods; of people working together for a common goal; of successful business owners extending the hand of friendship to struggling immigrant merchants.

Mr. Speaker, that vision is being realized in Flushing. Some citizens wish for a better, brighter way of life for themselves and their children. Paul Kapchan turns those ideals into reality.

I ask every Member of the U.S. House of Representatives to join with me now in paying tribute to Mr. Paul Kapchan.●

CHILDREN'S TELEVISION—A WASTELAND

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. BRYANT. Mr. Speaker, a major issue of concern to me has been and will continue to be the total lack of quality television programming on commercial networks designed exclusively for children.

I believe that the quantification of programming for children, as well as for elderly, women, and minorities, was the major stumbling block to successful resolution of the debate on legislation to deregulate the broadcast industry. And should this issue become the focus of legislative action in the 99th Congress, I am certain that the quantification of children's programming will again be one of my goals.

Recently, two excellent articles were published which clearly spell out the reasons broadcasters must focus more of their vast resources and allocate more air time to children's programming.

Fred Hechinger, in the October 3, 1984, New York Times article "Forgotten TV Audience: Children," considers a meeting called by Dr. David Hamburg, president of the Carnegie Corp. The discussion, on television and its educational potential for children, brought to light the fact that it is public television which is still providing the only quality programming for children available over the airwaves.

Dr. Hamburg pledged the Carnegie Corp. to pursue some further study and discussion of the state of children's television because "the impact and reach of the medium is such that we can't afford to ignore its educational potential. "I hope this is done soon as I totally agree with Chairman WIRTH's analysis that "the trend is down and children's television is deteriorating rapidly."

Peggy Charren and Cynthia Alperowicz, in an article titled "TV Should Turn on Children's Minds," discuss the enormous potential resource we have in television to educate our children. I am pleased to be an original cosponsor of legislation which would require commercial networks to broadcast 1 hour of programming, Monday through Friday, aimed at educating child viewers. I am appalled that while the average child will watch over 15,000 hours of television before he graduates from high school—so little is educational or even informative.

I commend both these articles to my colleagues for their consideration. The issue of children's television programming is one which I know will be the focus of my attention again in the 99th Congress.

The above mentioned articles follow:

[From the New York Times, Oct. 2, 1984]

FORGOTTEN TV AUDIENCE: CHILDREN

(By Fred M. Hechinger)

Children are television's forgotten audience. The networks have virtually abandoned children's programs, except for Saturday mornings' nonstop cartoon shows and occasional afterschool "special." Public television which continues to offer a few good children's programs suffers from a severe financial drought.

Last week two rays of hope broke through that darkness. The first was a meeting called by Dr. David Hamburg, president of the Carnegie Corporation, on Television and its Education Potential for Children. It served notice that a major foundation has reaffirmed its support of children's television. The second hopeful sign was an announcement by the Chidren's Television Workshop (C.T.W.) that it would present 20 new half-hour episodes as part of "3-2-1 Contact," its science program for 8- to 12-year-olds. In addition, the television workship has received financing to plan a mathematics program.

These were signs that, at least in public television, there is still life in children's programming. A representative of NBC said the network was considering a still secret children's program, rumored to be a news show. While this would suggest some hope that commercial television has not washed out regular programs for children altogether, the consensus among the conferees seemed to be that for the moment, children must depend largely on public television.

News from the television workshop dominates. The workshop is the creator of "Sesame Street," the preschool program that has achieved worldwide fame, and of the "Electric Company," which is intended to improve children's reading and writing skills.

In announcing that the television workshop had received financing to develop a math series, Joan Ganz Cooney, the president of the work-shop, pointed out that "many children come to dislike mathematics by the time they enter the upper elementary grades." She said she was certain that television could help.

The new science segments come at a time when schools face a serious lack of science teachers. The first episode, to be broadcast Oct. 22, shows a visit with astronauts. Later, the programs will cover electricity, the origins of the earth and measurements. Locations range from a junkyard in New Jersey to a walk along the rim of an active volcano. ("We were within about 50 feet of the lava vents, and the soles of my shoes were melting," says Judy Leak, the actress who plays one of the teen-age characters.)

Grants from the National Science Foundation, the Department of Education and the Corporation for Public Broadcasting virtually assure the production of 20 new programs each year through 1989.

The shows are built around three teenagers acting as hosts and an 11-year-old kid brother who asks lots of questions. Dr. Edward G. Atkins, a scientist responsible for much of the content, says the show tried to get youngsters to ask as many "Whys" as possible to allow the program to illustrate the answers. He stresses that the show does not want to replace a classroom curriculum but rather to arouse interest and give youngsters factual knowledge on which teachers can build.

"If kids aren't interested, they won't learn," Dr. Atkins says. "And if they haven't grasped certain basic concepts, they can't progress." He is not ashamed to admit that scientific content and entertainment must blend if the show is to work.

A preview last week showed a teen-age girl skirting the still fiery flow from an active volcano, helping a scientist to scoop up samples of the steaming mass for laboratory purposes. In this case, the scientist is a woman. Whenever possible, the program uses women and members of minority groups as professional role models.

Another segment looks at changes in the earth's surface over the past 450 million years. "Can you predict what things will be like in another 450 million years?" a youngster asks. The scientist smiles and explains the difficulty of such long-range forecasts. Discovering the past is easier.

A little boy's physical examination before he leaves for summer camp leads to the discovery of electricity in the human body or generated by it. "It's everywhere," says the doctor, and the program subsequently shows how body electricity can be used to allow an amputee to move an artificial hand.

The science program reports that it has an audience of well over seven million viewers. It is augmented by 3-2-1 Contact Magazine, and teachers' guides, published by the television workshop and made available free of charge to any teacher on request. So far, more than 650,000 guides have been ordered. (For information, write to C.T.W., One Lincoln Plaza, New York, N.Y. 10023).

Schools are encouraged to videotape the program, without fear of copyright violation, and to build the segments into the curriculum at convenient times. In the past, 26 countries have broadcast the series. West Germany, France and Spain have produced their own versions with native casts.

Despite such hopeful signs, participants at the Carnegie Corporation meeting were not sanguine about the future of children's television. Representative Timothy Wirth, the Colorado Democrat who is chairman of the House Subcommittee on Telecommunication, Consumer Protection and Finance, charged that the networks were pressing for complete deregualtion "so that there will be no check on what they are doing" for children. "The more we know about the power of TV as a teaching tool, the less we use it,"

he said. He favors legislation that would require the networks to reserve one hour a day for children.

The Carnegie Corporation, one of the original financers of "Sesame Street," pledged to pursue the issue after some further study. One of the possibilities, said Dr. Hamburg, is the creation of a fund of public and private resources for the support of independent productions, possibly to be broadcast first on public television and then made available to commercial broadcasters. The initial discussion, Dr. Hamburg said, reinforced his belief that "the impact and reach of the medium is such that we can't afford to ignore its educational potential." But speed, the observers at the meeting agreed, is of the essence. Mr. Wirth warned that "the trend is down" and children's television is deteriorating rapidly."

[From Newsday, July 24, 1984]

TV SHOULD TURN ON CHILDREN'S MINDS

(By Peggy Charren and Cynthia Alperowicz)

Can commercial television programs educate and inform children? Should they even try? Does the government have a right to make them try?

These are a few of the questions likely to be debated by Congress in the coming months. At the heart of the debate are issues crucial to communications policy in the United States: If the public owns the airwaves, can't the federal government mandate that broadcasters give back something to the public, in exchange for their license to use the airwaves? Or would that endanger precious broadcast freedoms?

Sen. Frank Lautenberg (D-N.J.) in August introduced a bill, S. 2909, that would require every television station to air one hour a day, Monday through Friday, of programing "designed to enhance the education of our children." Months earlier, in October, 1983, Rep. Timothy Wirth (D-Colo.) had presented a virtually identical bill, H.R. 4097, in the House.

In introducing his version of The Children's Television Education Act, Wirth said, "America is losing ground in competing with the rest of the world in an increasingly technological age. The place to start to fight back is education: both inside and outside our schools." Television, he explained, is so pervasive that by the time they finish high school, American teenagers have spent more hours in front of a TV—15,000 on the average—than in front of a teacher.

Lautenberg reminded the Senate that other nations have recognized TV's enormous potential. "England, Sweden, Australia and Japan all mandate more than 10 hours a week of educational programing for children," he noted.

Wirth and Lautenberg have commended public television for its role in educating young viewers. But they emphasize that public TV has neither the funds nor the mandate to become an educational children's network, and that it's time for Congress to require commercial stations to help shoulder the responsibility for educating children and teenagers. "The amount of children's programing has dropped from an average of 10.5 hours a week in 1974 to 4.4 hours a week in 1983," Lautenberg observes. "There is no regularly scheduled weekday programing for children on any of the commercial networks." Wirth cites statistics showing that commercial broadcasters now devote an average of three-quarters of 1 percent of their daily airtime to informational children's programs.

Commercial broadcasters, predictably, are cool to any suggestion that they have ignored their responsibilities to children, and lobbying to counteract the proposed regulation is in full force.

Edward Fritts, president of the National Association of Broadcasters, calls The Children's Television Act a "misguided approach." Nevertheless, a broad coalition is building—including Action for Children's Television, the American Academy of Pediatrics, the National Education Association, the National Council of Negro Women and the National PTA—to rally public and legislative support for the measure.

The story of Wirth's and Lautenberg's involvement in mandating informational children's programing is the story of the failure of the Federal Communications Commission to act on behalf of children.

Last December the FCC finally brought to an end a proceeding on children's television initiated in 1970 by Action for Children's Television. ACT had asked the commission to require daily children's programing, and the FCC had agreed to consider the idea.

In 1974, the commission adopted a policy statement emphasizing that "broadcasters have a special obligation to serve children" and "to develop and present programing which will serve the unique needs of the child audience." Leaving the door open to ACT's idea of mandatory children's programing, the commission set minimum standards for the amount and scheduling of children's programing.

Five years later, an FCC task force evaluated industry compliance with the 1974 policy statement and announced that broadcasters still had not met their obligation to improve children's television. Instead of moving to correct that neglect, the Reagan-appointed FCC simply ignored it. The children's television rulemaking sat on the back burner until at last, under a court order to take action one way or another the commission closed the proceeding. Not only did the commission decide not to require daily children's programing, but it chose to weaken its 1974 policy statement, arguing that with so many TV sources (cable, video cassettes, video discs, even adult shows) now available to children, commercial broadcasters need worry no more about children's viewing needs.

Enter Wirth and Lautenberg, asking Congress to step in where the FCC feared to tread by exploring commercial TV's potential for educating and informing young audiences. Sensitive to broadcasters' First Amendment freedoms, neither suggested that the government attempt to judge what makes *good* educational TV; Wirth and Lautenberg asked simply that Congress mandate *quantity*, not *quality*. Competition will keep the quality naturally high, in any case, Lautenberg reasons: "Once broadcasters are required to attend to the children in their audience, market forces will drive them to attract as many young audiences as they can, and they will do that by airing attractive educational programing."

Squire Rushnell, vice president for long-range planning and children's television at ABC, claims that children won't watch so-called educational programing. "If it kind of looks like school, we've lost them," he claims. But public television's "Sesame Street" has dispelled the myth that children can't enjoy TV while they learn. Before Reagan's deregulatory FCC took the heat off broadcasters to serve young audiences, CBS had "30 Minutes," a Saturday morning news magazine modeled after "60 Minutes," that gave children credit for being able to understand—and even enjoy—a discussion of serious topics: the turmoil in the Middle East, the troubles in Northern Ireland.

ABC's "Animals Animals Animals" explored myths, folk tales and facts about animal life. Both series proved popular with young audiences. Yet both were yanked off the TV lineup to make way for more cartoons.

Children's television is a significant money-maker for the commercial networks. According to View magazine, network sources predict that their revenues from advertising in the 1984-85 children's programing year will be a combined total of $190 million. What kinds of programs are the three networks giving children in return?

This fall, as last, the Saturday morning ghetto—the only airtime regularly turned over to young audiences—is filled with cartoons that push the toys on which they are based. It's a neat arrangement for the Big Three: more and more shows that look like ads, making for more and more advertiser satisfaction.

The trend in recent years has been to criticize television. It's called the "plug-in drug," the "boob tube." Wirth, Lautenberg and their supporters disagree. They think of children's television not as Pandora's box, filled with evil curses. Rather, they see children's TV as Aladdin's lamp, a source of hidden good fortune.

Anyone who has ever wished for children's television to be more like a children's library can now make that wish come true: Tell Congress it's time to let the genie out, by passing The Children's Television Education Act.●

HAPPY 20TH BIRTHDAY TO THE LONG WHARF THEATER

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. MORRISON of Connecticut. Mr. Speaker, I would like to pay tribute to the Long Wharf Theater, which is celebrating the opening of its 20th season on October 12, 1984.

The Long Wharf Theater, located in New Haven, CT, is a vital artistic institution, not only to the city of New Haven and my congressional district, but to the theatrical life of Connecticut and the entire Nation.

Begun in the summer of 1965 by two Yale drama students with the enthusiastic cooperation of local professional people, the theater produced its first show in an unusual location: a food market building in the commercial section of New Haven known as Long Wharf. The theater still operates in the original location. Since its debut, the Long Wharf has received two Pulitzer Prizes and three New York Drama Critics Circle Awards, and 12 of its 78 productions have gone on to new York to become major productions.

Under the leadership of Arvin Brown, artistic director, M. Edgar Rosenblum, executive director, and C.

Newton Schenck III, director of the board, Long Wharf has become an institution on our American theatrical scene.

For 20 years the Long Wharf Theater has enriched our lives with imaginative and excellent theater. It's a small theater—but it's the best. I know that all the people of Connecticut's Third Congressional District and theater-lovers all over the world join me in saying, "Happy Birthday, Long Wharf."●

H.H. HARVILL, SR., PIONEERING ARKANSAS COMMUNITY LEADER

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. ALEXANDER. Mr. Speaker, I wish to share with my colleagues the story of one of my States most respected and most effective community leaders.

When H.H. Harvill, Sr., of Humphrey, AR, gave the news that residents of countryside communities and small towns across southeast and south central Arkansas would benefit from the largest rural water project ever backed by the U.S. Farmers Home Administration, grins spread across many faces of his fellow Arkansans.

The Harvill magic had been put to work yet again.

Revered and respected by thousands, the H.H. Harvill, Sr., reputation for achieving results for his fellow Arkansans began building nearly half a century ago. So the success in getting funding for the Grand Prairie Regional Water Distribution System came, not as a surprise, but as one more demonstration of his faith and his dogged determination to help his people achieve a better life for themselves and their families.

Although retired now, H.H. Harvill began his career, like many in his region, as a farmer. He helped pioneer rice, soybean, and fish farming in our State even while growing the traditional crops of cotton and oats. Both the Farm Bureau and the Farmers Union are privileged to count him as a long-time member and supporter. Mr. Harvill was an organizer of the Arkansas County Farm Bureau.

He has served his religious faith as a member, deacon, and Sunday school teacher in Humphrey Baptist Church. H.H. Harvill, Sr., backed his belief in the principles of democratic, representative government with 46 years as a member of the Arkansas County Quorum Court. As a parent and supporter of education, he, for 25 years, put his energies to work for the Humphrey School as a member of the district's board of education.

Recognizing the benefits of electrical service and wanting those for his people, he worked successfully for the establishment of the Riceland Electric Cooperative, Inc., H.H. Harvill, Sr., was an incorporator of the people-owned cooperative, and has been a member of its board of directors since it came into being on July 29, 1940. He is the only president in the organization's 44-year history.

Mr. Harvill's role as incorporator of the rural electric cooperative was the first of a long history of such successes. He has served as an incorporator and member of the board of directors of Arkansas Electric Cooperatives, Inc., the statewide association of rural electric cooperatives. The Arkansas Electric Cooperative Corp., the statewide power supply cooperative of the Arkansas electric cooperatives, has benefited from his service as incorporator, board of directors member and president.

With the innate concern of a person who loves the land and water and believes the ravage of soil erosion is the enemy of all people, H.H. Harvill turned his formidable energies to land and water conservation and erosion prevention. Thus came into being his years as an incorporator, director, and continuous president and chairman of the Arkansas County Soil Conservation District, as well as area vice president of the Soil Conservation Districts of Arkansas, and as chairman of the board of directors of the Arkansas County Soil and Water Conservation Committee.

Mr. Harvill's concern with the availability of water to the people of his region has resulted in his investing his energies in the Tri-County Water Users Association as incorporator, member of the board of directors, president and board chairman, and in the Arkansas Rural Water Association as incorporator, director and chairman. This has been in addition to his work with the Grand Prairie Regional Water Distribution District which intends to provide domestic water supply to Arkansans in parts of Arkansas, Jerferson, Lonoke, Monroe, and Prairie Counties.

Another measure of H.H. Harvill, Sr.'s enthusiastic and unflagging service to his fellow Arkansans, may be found in his work as an incorporator and member of the board of directors of the Southeast Arkansas Economic Development District. As is the case with other community service-oriented organizations he has helped found and guide, SAEDD is a cooperative institution directed at helping Arkansans build better lives for themselves.

A project undertaken by H.H. Harvill, Sr., in the 1940's symbolizes his whole career of community service. At that time he began promoting the Telephone Utility District within Arkansas County. His efforts provided the catalyst which stirred investor-owned telephone service into being in Arkansas County.

H.H. Harvill, Sr., did "reach out and touch someone". He reached out and touched us all, and we are much better for that reaching.●

ANTITRUST REFORM ACT

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. BROOKS. Mr. Speaker, today I am introducing the Antitrust Reform Act. My bill would reform the antitrust laws in two areas. It creates a new right of contribution. This will permit defendants in a price-fixing case to bring into the case parties not sued by the plaintiff, but parties who may have conspired with the defendants to fix prices. A new statutory right of claim reduction is included in my bill. Settlements would not be discouraged under the principle of claim reduction. However, any judgment obtained by plaintiff in a price-fixing case would be reduced by the market share of those who settled.

The contribution and claim reduction principles represent sound policy and needed reform. All, not some, price-fixers will be punished. Those who believe they are innocent can litigate without fear that they will have to pay damages attributable to others.●

LEONARD FUNK: BRADDOCK HILLS DEDICATES MONUMENT TO WINNER OF CONGRESSIONAL MEDAL OF HONOR

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. WALGREN. Mr. Speaker, this September, the community of the Braddock Hills dedicated a monument, in honor of Leonard Funk, who earned the Congressional Medal of Honor in the European Theater during World War II and who recently retired after years of service as the Veterans' Administration division chief in the Pittsburgh region.

My generation can only mark and honor Leonard's bravery in action that saved the lives of many of the young Americans fighting with him.

The Congressional Medal of Honor is the highest award given by our country for military bravery. It is especially appreciated that the most important military honor our country best serves comes from the Congress, because the Congress is the part of

our Government that most closely represents the American people.

And it is to protect the American people that young men like Leonard Funk, have risked their lives completely throughout our history.

Just as importantly, we should take this occasion to honor Leonard's service to our country's veterans through his career with the Veterans' Administration.

Leonard's contribution in the delivery of veterans' services and benefits over the years of work with the Veterans' Administration is as important a contribution to the spirit and values of our country as were his instinctive reactions on the battlefield that earned him the Congressional Medal of Honor.

If our Nation does not honor and service its veterans we will lose our spirit without fail.

There are large challenges ahead of us as more veterans than ever before move into old age. Leonard Funk's service to our country should be our example against which to measure ourselves and our own commitment to the veteran.

What are we willing to contribute? Our commitment to these aging veterans is only beginning to be tested.

We should be grateful that Leonard Funk set such a good example for us to aspire to.●

INCREASING TAXES WOULD THREATEN OUR ECONOMIC RECOVERY

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. LENT. Mr. Speaker, I rise to call to the attention of my colleagues a recent interview in the magazine U.S. News & World Report with Willard Butcher, chairman of Chase Manhattan Bank. Mr. Butcher addresses a number of economic questions and provides us with some thoughtful and very perceptive insights. I was particularly impressed with Mr. Butcher's analysis of the dangers of increasing taxes in an effort to narrow the deficit. I share Mr. Butcher's concern that such a move would cause a downturn in the national economy. As the head of the Nation's third largest bank, Mr. Butcher's views should be given careful study. I urge my colleagues to give thoughtful consideration to Mr. Butcher's comments and I insert the full text of the U.S. News & World Report interview at this point in the RECORD:

WE'VE GOT TO ATTACK HIGH INTEREST RATES

Q. Mr. Butcher, do you look for today's high interest rates to bring a business slowdown, as many forecasters expect?

A. The danger is that we overstay high rates and that this can have a very deleterious effect on sound economic policy. It tends to have more effect on long-term investment than on short-term speculation.

Q. Why the danger?

A. Say you are a business manager and considering a new investment project. You are looking at a basic rate of interest of 15 percent in the U.S. today. That means that if you want to make 15 percent on the investment, you need prospects of a pretax rate of return of about 30 percent to make it worthwhile. There are not too many investments around like that. So what happens? You slow down the investment.

Q. Are you seeing such slowdowns already among clients?

A. We've seen some signs that the buoyancy is subsiding. This recovery was far more buoyant than anyone expected, but it has been very uneven. It has been very fine in some of the high-tech areas; very fine in consumer durables, including automobiles; very fine in other consumer goods; not very good in capital goods, in modernizing plants for the future. That's why we've beginning to see signs that some industries are slowing down.

Q. With inflation cooled off, why are interest rates so high?

A. There are a number of factors. One is an expectation issue: "Once burned, twice shy." The investor has been very, very badly burned by fixed-rate obligations of any length of time. Therefore, it is very hard to float 25 and 30-year fixed-rate money today.

Two, short term, there is the question of budget deficits. There is apprehension that the deficits will heat up inflation and worry that they will mop up some of the credit supply. If the government is floating 180 to 200 billion dollars of debt every year, that's fairly big percentage of our savings.

And you say, "Well, O.K., we'll import the rest of the money." But the rest of the world is not without its deficit spending also.

Clearly, neither we nor the rest of the world have become immune to the level of interest rates.

Q. Looking to 1985, what do you see interest rates doing?

A. I hope we will see rates somewhat lower over the next 12 months, if not in the immediate future. I hope this because it's going to be important to sustain economic development.

I think we get there by dealing with our budget deficit, by dealing with other elements that could be inflationary. I would hope labor settlements will be within a band that would not be inflationary. It also means that we have to add to production facilities to insure we don't run into short capacity.

Q. Are you saying that if interest rates continue at the 15 percent level and the deficit remains in the 180-to-200-billion-dollar level, the economy will slide into a recession?

A. I don't know that I see anything that dire. What I am saying is: I see an economy that long term will not sustain interest rates at this level and be a vital economy, that we risk having a lack of stability. Therefore, we've got to try and attack those things that are causing higher rates.

Q. Would you support a tax increase to narrow the deficit?

A. I don't think that's primarily what got us into trouble. President Kennedy's taxes and spending were approximately 19 percent of gross national product. Even after the famous Reagan tax cuts, taxes are still 19 percent of GNP. The trouble is spending has risen to 24 or 25 percent. The culprit, therefore, is spending.

My concern is that higher taxes will turn the economy back down again. It won't give the incentive to add to productive capacity and competitiveness of the economy. To the extent that politically you have to have some tax increase to go along with spending cuts, I would hope that the tax increases will be primarily on the consumption and not on the income side. This would be the fairest type of taxation. You can exempt the poor from consumption taxes. Food can be exempted. Clothing under a certain price can be exempted.

Q. Does that mean you would support a value-added tax?

A. I would, to the extent that you have to raise additional revenue.

Q. What kind of spending would you cut?

A. First, we've got to recognize that the poor and the disadvantaged need help. Our country should never turn its back on them. But a number of our so-called entitlement programs are entitlements for people who don't need them. They're a terribly expensive way of providing the middle class with a service. For example, I don't see why my future Social Security benefit necessarily should be tax-exempt. Why should it be? It's another form of pension.

I say to the young people in the bank: "Why should you pay for my pension out of your personal funds?" That's what we're talking about here.

Q. What do you think the next administration will do about the deficits?

A. I don't really know. But my impression is that both parties recognize the need for deficit reduction. I share President Reagan's view that much of that effort has to come from a spending cut. I just hope Congress will cooperate.

Q. You sound rather worried about this recovery. Should the Federal Reserve ease up on credit now to help interest rates come down?

A. I don't want to appear too troubled. But the problems require the most excruciatingly careful pursuit of monetary policy on the part of the Fed.

I can't think of any person that I would rather see chairman of the Federal Reserve than Paul Volcker. He has done a very good job. But we have to recognize that it's a high-risk job.

How do you forecast the economy 12 months out with any degree of precision and thereby set interest-rate targets and monetary targets that will result in a desirable mix that won't unduly damage the economy? It's a very narrow and tortuous path.

Q. All in all, the U.S. banking system has been taking quite a battering lately, what with Continental Illinois Bank nearly going under; fears about Financial Corporation of America, the savings and loan firm, and Third World debt problems. Can people still have confidence that their money is safe?

A. Oh, yes. I don't think that's really an issue. If one looks at statistics relative to the system, it is somewhat stronger today than it was a year ago, and considerably stronger than it was in the mid-'70s. Nonperforming loans as a percentage of capital, or as a percentage of loans outstanding, are about half of what they were in the trough of the recession of the mid-'70s.

Capital itself has begun to increase. Our own capital ratios—a bank's capital measured against its loans outstanding—were around 4.8 percent a year and a half ago and are now very close to 6 percent.

Q. But isn't the Third World debt problem still hanging over banks?

A. I don't want to underestimate the Third World debt problem, which is probably the biggest threat to the system. But I also think we ought to recognize that there has been very, very concrete improvement in the Third World situation. Since the nadir in the autumn of 1982, we've seen a strategy put in place among the major players to cause readjustment to occur in the less-developed countries, primarily in Latin America. In Mexico, the progress has really been quite remarkable. Are they out of the woods? No, but they're well along on a path through the woods.

Brazil, with fits and starts, is now beginning to show very positive signs. If you take all of Latin America, the balance-of-trade deficit has now moved into surplus.

Argentina is the one country that seems to be creating most of the problem, but, there again, the fundamental economic issues are improved. Indeed, they've got cash in the Federal Reserve Bank of New York that has secured some obligations.

I am surprised that the perceptions of improvement have not been as real as the improvement itself. I don't think people understand how these countries have moved into surplus, how they are beginning to meet their debts properly and that progress has been made.

Q. Can we expect more bank failures in this country on top of the large number we've already had this year?

A. There will always be bank failures. But I do not expect to see anything as traumatic as the Continental issue.

Q. What's behind the rash of failures?

A. Let's fact it, banks get into trouble primarily for one reason, and that's bad loans. When they reach a crisis, depositors sense it and run out.

Now, are there troubled assets in the banking system? Of course. Are our nonperforming loans up over the last several years? Yes. Why? One reason is obviously the Third World debt issue. Another is that we have some industries that are very, very troubled.

Q. Because of the uneven recovery you referred to?

A. You bet. Though the losses may not be as great as they were, the steel business isn't making any money. The nonferrous-metals business hasn't made any money in four years. The airline business's profitability has been extremely sketchy. The oil companies, even the most powerful and best managed, are earning half of what they were earning three or four years ago. So you have some very fundamental industries that are in trouble. And I don't see any early change.

Clearly, that's going to reflect itself on bank balance sheets. The issue is not whether there are problems. The issue is whether the problems can be dealt with. And I submit they can be.

Q. Has deregulation by Washington Caused the banking system to grow too fast, as some critics contend?

A. Let's talk about where the deregulation is. When I joined the banking industry 37 years ago, banks had approximately two thirds of the financial resources of the county. Today they have less than a third. We've been growing far less rapidly than has the economy as a whole.

There aren't a great many more powers available to banks today than they had 20 years ago. Most of the deregulation to date has simply permitted banks to compete for their traditional funds. The earlier limitations on interest rates applied only to the banking system and meant we couldn't compete for deposits.

What happend was that a Merrill Lynch or another money fund would pay the fair rate, take a skim off the top and turn it over to a bank. That's a fairly inefficient way of mobilizing financial resources.

Q. Many people feel that banks want you only to go to an automatic teller, and if you deposit a check from out of town, you have to wait three weeks to get at the money—

A. We've reduced the time for a check to clear, but there's more to be done. On the automation issue, it's no question but that we're going to automate. Automatic tellers don't take lunch breaks on Friday between 12:30 and 1:30. They also tend to be more accurate. Is that less personal? Yes, it is. but many people don't want to pay for personal service. Discount stores grew because people wouldn't pay. They respond to lower prices.●

DELCO ELECTRONICS: WORLD CLASS COMPUTER MANUFACTURER

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. HILLIS. Mr. Speaker, as cochairman of the congressional automotive caucus I have become acutely aware of the need for our domestic auto manufacturers to develop and apply the very latest technology to their product lines. I am inserting into the RECORD today an article from "Update," a publication of the General Motors Information Systems and Communications Activity, which describes a relatively recent development in the use of computer technology.

I am particularly proud that the Delco plant producing on-board control computers for General Motors automobiles is located in my district in Kokomo, IN. Annual module production is over 5 million units, some of which have life expectancies in excess of 10,000 years.

Clearly the development of this technology represents a distinct advancement in the production of American automobiles.

DELCO ELECTRONICS: WORLD CLASS COMPUTER MANUFACTURER

Is it any coincidence that the city which brought us stainless steel, canned tomato juice, and the gasoline-powered automobile should also be the city which boasts the world's most prolific computer maker along with a talented work force which ensures that the production happens?

Yes. GM's Delco Electronics Division, in the heart of Kokomo, Indiana, is the world's largest producer of on-board control computers.

ONE SMALL STEP FOR DELCO

Without fanfare, the motoring public was introduced to the first major application of computers when computer command controls were added to the 1980 GM cars and microprocessors demonstrated that they could replace mechanical components. The beauty of this introduction was the high degree of transparency—the driver received the same functions as before with no change in required behavior. Even today, many drivers are unaware of the existence of computers under the hood.

From a modest beginning of 400,000 computers in 1980, this year Delco plans production of more than 5 million engine control computers. In addition, plans call for 6.4 million radios, 5 million climate controls, 8 million voltage regulator modules, 8 million ignition modules, and 12 million barometric pressure sensors.

This aggressive production level has earned for Kokomo the nickname of *Silicon Flats.*

HOW DO THEY DO IT?

Making computers involves a series of highly complex, precision manufacturing steps—but Delco seems to do the job with one hand tied behind its back. The process begins with several parallel tasks for the first months of a project. These include: circuit design, circuit board design and production, wafer production, and software development.

Circuit design begins with a team of engineers who create circuits with the aid of sophisticated computer-aided engineering (CAE) and computer-aided design (CAD) computers which support the engineers' need to include various circuits in meaningful relationships to accomplish a given objective.

Computer-generated designs are plotted as large as 6′ x 12′ on paper for subsequent visual checkout. "Some circuit designs represent 10 to 15 man-years of effort in addition to computer support", according to Vince Newsom, CAD supervisor. When approved, the computer generates a magnetic tape which drives a pattern generator to produce a photo mask for printing circuits on silicon wafers using photolithographic techniques.

The process reduces the circuits so that they may be printed on a 4″ or 5″ diameter silicon wafer, in areas as small as 1/10″ square. Wafers may be exposed to as many as 12 masks until the desired integrated circuit is achieved on each tiny area.

After testing, good chips on the wafer are placed on lead frames. The frames then move to a bonding machine, where very fine gold wires are used to connect each chip to a larger component to make a module. Completed modules are enclosed in impact-resistant plastic, making components which are virtually impervious to the outside world. (Accelerated testing indicates that some of the modules have life expectancies in excess of 10,000 years.) The proper components are later soldered onto a printed-circuit board to make a functional control computer.

GROWING A CRYSTAL

Chip production begins by melting processed silicon (essentially refined beach sand) into a "soup" at 1400 °C., into which is introduced a seed (a crystal whose atoms are arranged in a desired structure). As the spike-shaped seed is rotated counterclockwise in the clockwise rotating soup, the silicon atoms begin to assume the same configuration as those in the seed.

A crystal begins to grow in a cylindrical shape as its atoms solidify around the seed. This process takes 16 to 20 hours. Following this, the silicon cylinder is cut into wafer-thin slices, polished to a high gloss, and tested. The chips next move to the clean

room where the photolithographic process occurs. Delco manufactures its own custom-designed integrated circuit chips, which account for 50 percent of its needs. Existing technology is purchased from outside vendors, accounting for the other 50 percent. This allows the division to concentrate its talents in the areas of greatest return on investment.

"After three decades of providing mechanically tuned radios for vehicles," commented Pat Recupito, Chief Engineer, Radios & Controls, "Delco has capitalized on the mushrooming technology of computers in an effort to respond to changing consumer requirements."

Exploitation of the potential inherent in electronics technology has positioned Delco Electronics as a world leader in control computer engineering and production. A new plant currently under construction features a 60,000-square-foot clean room and will increase the capacity for production of integrated circuits by a considerable amount.●

THE TRUTH ABOUT SUPERFUND

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. ECKART. Mr. Speaker, I read with interest a speech given recently by one of the opponents of the Superfund legislation. Not surprisingly, the speech expresses satisfaction that the industry opponents and the administration have killed Superfund for this year.

The speech blames the death of Superfund on the House sponsors of that legislation and its supporters. Someone must have forgotten that the House passed this bill 323–33, and that we have been waiting 2 months for the Senate to act.

Those shortsighted industry lobbyists who oppose reauthorization of Superfund this year, including the insurance industry lobbyist who gave this speech, do their own industries a disservice. Substantial resources must be devoted to cleaning up abandoned hazardous waste sites and delay only makes the problem more difficult.

Instead of passing a bill this year and giving the EPA the time to gear up for a massive cleanup effort, we will now be forced to pass legislation next year without the lead time for EPA. Not only have we lost a year of planning for cleannup, we have lost additional time in fiscal year 1986 while EPA figures out how to respond to the legislation. Every day of delay only increases the cost of cleanup, and most of the cost will eventually be borne by industry.

The speech accuses the House sponsors of the Superfund bill of "overweening pride." As a sponsor of this bipartisan bill I can assure my fellow Members that it was not pride that pushed this bill forward; it was concern for the environmental threat posed by abandoned hazardous waste sites that prompted the House to act.

Because of the opposition of the administration and unenlightened industry lobbyists, we will be back at this issue again next year. Contrary to the opinion of some, H.R. 5640 passed the House overwhelmingly, and I believe the House will pass a strong bill next year.

I urge my colleagues to read the following speech as an example of the misguided view of some in industry which led to the Senate defeat of this vital legislation.

The speech follows:

POLITICAL LESSONS FROM THE 1984 SUPERFUND REAUTHORIZATION FIGHT

(Remarks of Leslie Cheek III, Vice President—Federal Affairs, Crum & Forster Insurance Cos. to the Industry Suppliers Committee of the National Paint & Coatings Association, Washington, DC, Oct. 4, 1984)

Good morning. It is delightful to be with the marketing managers of so many of the fine companies that we have worked side-by-side with during this year's titanic struggle over the reauthorization of the hazardous waste cleanup Superfund. Your organizations, and NPCA in particular, are to be congratulated for the sophisticated and effective way in which you derailed what seemed to many of us to be an unstoppable legislative locomotive.

Barring any last-minute shenanigans with the continuing appropriations resolution, which would invite a Presidential veto, it appears that the 98th Congress will stagger to an end without reauthorizing Superfund, a fact for which your industry and mine must be extremely grateful.

Had either the House bill, with its $10.2 billion five-year price tag, or the Senate measure, with its $7.5 billion revenue target, become law, the international competitive position of your companies would have been severely compromised, if not entirely destroyed.

Had the Federal cause of action in the House Committee bill become law, my industry's ability to furnish or price environmental liability insurance protection for any business handling hazardous substances would have evaporated, and your industry would have faced uninsured legal liabilities that would have made your Superfund tax liabilities look like small change.

And had the "victim assistance demonstration program" in the Senate bill become law, our Nation would have taken the first step toward a gigantic national health and disability income entitlement program financed solely by our vital chemical and oil industries.

What all of us dodged in the collapse of the Superfund reauthorization effort this year was not a bullet, but a thermonuclear bomb. Had that bomb gone off, two of our Nation's most competitive industries would have been crippled, an entire line of insurance would have disappeared, and funds desperately needed for hazardous waste cleanup would have been siphoned off into a thoughtless entitlement program with incalculable future costs.

How did we come so close to being obliterated? Did we win this year's fight, or did the other side lose it? Are there lessons we can learn from this year's struggle that will help us next year? These are the questions that I would like to try to answer in my few minutes with you this morning.

First, how did we come so close to being obliterated? Or, put another way, how could legislative proposals as irrational and irresponsible as elements of both bills were come so close to enactment?

The easy answer to this question is that 1984 is both a Congressional and a Presidential election year, with perhaps the starkest contrasts even between the two major parties in their approach to environmental issues. The Democrats made no secret of their desire to capitalize on the extraordinary public support for higher spending on environmental control by forcing through the Congress a Superfund reauthorization measure that the President would be forced to sign if he didn't want to hand the issue-starved Democrats a golden opportunity.

And just as no Member of Congress in the late 1960's could vote against any measure with a "civil rights" label, so now there are few with the courage to oppose any bill touted as "environmental protection," especially in an election year.

But the more disturbing answer lies in the synergism between the Congressional "reforms" of the post-Watergate era and the growing complexity of the issues with which Congress must grapple in post-industrial America.

Power in the Congress was once vested in the Committee chairman and in the disciplinary authority of the party leadership. The post-Watergate "reforms" have dissipated the power of the Committee chairman among an extraordinary proliferation of Subcommittee chairmen, and the party leadership is incapable of punishing members no longer dependent on the parties for financial support.

At the same time, the issues with which the Congress must deal are progressively more technical and intractable. For example, this year's tax bill was 1,300 pages long, and Jim Florio's initial Superfund reauthorization proposal was 122 pages long. The technicality of the issues within their jurisdiction has compelled the Subcommittee chairman to hire staff experts with highly specialized academic training and, frequently, corresponding narrow political perspective.

The result of these phenomena is that the Subcommittee chairman, backed up, in Jim Florio's case, by a staff of twelve, wield enormous power within the areas of their jurisdiction, because very few other members have either the background or the time to challenge a Subcommittee chairman on matters within his or her expertise.

When the natural power of a Subcommittee chairman's subject matter jurisdiction and expertise is combined with fierce personal and staff partisanship and allied with a potent private sector lobby, the combination becomes a juggernaut. The Subcommittee staff, the sole point of leverage on the substantive aspects of the legislation, can afford to heed or ignore those with whom it disagrees at its whim.

And so it was that H.R. 4813 was born, the product of the collective fantasies of the envrionmental movement, Ralph Nader's Congress Watch, and the bureaucratic activists at the Justice Department and EPA, wholly unleavened by what we would call fairness, practicability, or, ultimately, political reality.

H.R. 4813, to my mind, the apothesosis of what I have come to call the "legislation by attrition" approach to public policy. It was so breathtaking in scope, so punitive in its

approach to every aspect of hazardous waste management, so egregiously conclusive on matters of inherent scientific uncertainty, as to be nearly laughable as a serious expression of Congressional policy.

But its advocates were deadly serious, and the prospect of the bill's adoption so terrified those who would be subject to it as to first immobilize them in disbelief and then to create among them a feeling approaching relief when a measure only marginally less draconian was substituted for it.

And so it was, when H.R. 4813 was rejected by Florio's own Subcommittee, that H.R. 5640 was born. It was, by any objective standard, a terrible bill, but in comparison to its predecessor, it seemed almost benign, and, for a while, had the same numbing effect on its opponents. It easily cleared Subcommittee, breezed largely unscathed through a vaguely unsettled Commerce Committee, and seemed well on its way toward its carefully scheduled enactment. From there it went downhill, for good reason.

So much for how close we came to being obliterated. The next questions is, did we win this year's fight, or did the other side lose it? My answer, which I realize denigrates the tremendous efforts that all of us put into defeating H.R. 5640, is that the other side lost it.

All of us learned early Lord Action's famous aphorism: "Power corrupts; absolute power corrupts absolutely." The advocates of H.R. 5640 forgot about Lord Action. They also fell prey to what the Greeks called "hybris," an overweening form of pride and self-confidence. Their success in the Energy and Commerce Committee led them to believe that they could shortcut the legislative process by stiff-arming the Judiciary Committee's entirely legitimate claim to jurisdiction and crushing the Public Works Committee's careful effort to craft a workable bill.

These decisions were an example of what the Greeks called "'até," an act of blind folly born of a misguided sense of power. They created among the membership of the two affected Committees a deep, and I believe, abiding resentment of what was plainly a grandstand play but was also, and more importantly, a completely gratuitous attack on the fundamental basis of those Committees' power—their jurisdiction.

Let me tell you what happened in the Public Works Committee and then let you imagine how its members must have felt when it was over. On the night before the Committee's one-week review period was to end, it labored for nearly six hours, adopting amendments that, ironically, would have made H.R. 5640 a politically acceptable bill. Seated in the front row were the representatives of the environmental and Naderite organizations, growing progressively more uncomfortable as the bill became more rational. Finally, as the vote to report the bill neared, one of their number penned a note, signed by all of them, to the Chairman of the Committee and the Chairman of its Water Resources Subcommittee. Here is what the note said, in so many words: "We do not like the direction this bill is taking. If it is reported in this form, we will excoriate this Committee, and we will create in Your districts the same outcry that accompanied your votes on (earlier legislation)."

When the roll was called to report the bill, these two men voted against the measure they had helped amend, and H.R. 5640 was left untouched by the Committee, despite its long evening labors.

In the offices of Judiciary Committee members and staff, majority and minority alike, the news that the Committee's request for an opportunity to review and comment on—not amend—the bill had been rejected set off a reaction whose fury was totally unanticipated by the bill's proponents. Every issue the bill raised that was within the Committee's jurisdiction was carefully researched, members were briefed and armed with written arguments.

Then the members of both these Committees, like the good politicians they are, waited quietly for the opportunity, not to get mad, but to get even.

Meanwhile, the proponents of H.R. 5640 committed yet another act of blind folly—they demanded and obtained from the Rules Committee the right to hitch the Superfund bill to another environmental measure—the RCRA reauthorization bill—already passed by both bodies and awaiting conference. This move, clearly aimed at cutting the more deliberate Senate committees entirely out of the Superfund reauthorization process, stunned even the environmental lobby, whose more moderate groups protested vehemently against the linkage ploy.

And so it was that the stage was set for the arrival of Nemesis, the Greek goddess of fate and the punisher of extravagant pride. As the House began floor debate on the afternoon of August 9, Nemesis appeared in the persons of Sam Hall, Tom Kindness, Bill McCollum and Hal Sawyer from the Judiciary Committee, Gene Synder, Arlan Stangeland and Hal Daub from the Public Works Committee.

The bill's sponsors, anticipating a cakewalk, were totally unprepared for the onslaught of arguments, amendments, figures and votes that the disenfranchised committees and their staffs had engineered. They lost the first amendment, defeated one, and accepted several others to Title I.

Then Nemesis struck with full fury. As debate began on the centerpiece of H.R. 5640's brave new world, the Title II Federal cause of action, Hal Sawyer rose to move that it be stricken from the bill. Member after member denounced it, and when the dust had settled, it was gone, by a vote of 208 to 200.

The proponents of the cause of action had a chance to snatch victory from the jaws of defeat when one of their number offered a fallback provision only marginally less irrational than the original. But its sponsor withdrew it after the environmentalists in a final spasm of greed and overreaching, rejected it.

The major factors in the defeat of the cause of action were not, I am loath to say, industry's arguments against it. They were, rather, a series of crucial miscalculations by its advocates, who so successfully walled themselves off from, or alienated, everyone else involved in the process that they could not discern the depth of the resentment they themselves created.

It is a fact that we in the private sector entertained no hope of even moderating, much less of entirely defeating, the cause of action in the House; we had banked on stopping it on the Senate floor. It is a fact that we had prepared no amendments to Title II and had not sought out disaffected members who might have been willing to offer them. It is a fact that none of us knew that Hal Sawyer would move to strike Title II before he rose to do so.

In the light of these facts, it seems clear to me that we didn't win the fight; the other side lost it.

That brings me to my final question: Are there lessons we can learn from this year's struggle that will help us next year? Clearly there are such lessons, and others' lists may be longer than, or different from, mine, which is as follows:

First, do not underestimate the essential decency and fair-mindedness of most Members of Congresss. What stands out in the entire debate on H.R. 5640, both on funding issues and on the cause of action, is that many members, notwithstanding the expertise and arguments of the bill's sponsors, simply didn't think that the bill was fair. This fact suggests to me the future importance of straightforward equitable considerations in the reauthorization of Superfund, and the power that instincts of fair play can exercise over cynical legal formulations aimed only at tapping the deepest pocket.

Second, never underestimate the capacity of the other side to screw up as badly as you do. I think a lot of us in the private sector thought that Jim Florio and the environmentalists (sounds like the name of a rock group, doesn't it?) were unbeatable, and, for a while, they looked like they were. But the history of H.R. 5640 shows, I think, that they were even more inept than we were. The decision to try to cut two House Committees and all the relevent Senate Committees out of the action was, in retrospect, suicide.

I also think that the effects of that misjudgment will be long-lasting, and that the Committees involved will be unusually attentive to the Superfund reauthorization bill next year. Moreover, the image of effectiveness and invincibility that Florio and his allies once had has been badly, perhaps irretrievably tarnished.

Third, your best friends often show up at times and in places where you least expect them to. The real stars of the House floor debate were not the show-horses, but the work-horses of the Congress—quiet, self-effacing, intelligent people like Tom Kindness and Hal Daub, who took the time to dig into the issues, thought about them long and hard, and then, having reached their own conclusions, articulated their views without prompting from the private sector. These men, and women like Nancy Johnson and Marge Roukema, were totally unexpected allies at a crucial hour.

A corrollary lesson here is that events, not our efforts, made these people our friends; it is now incumbent upon us to earn their continued trust and confidence.

Fourth, never underestimate the value of Congressional staff members. The unsung heroes and heroines of the fight against H.R. 5640 were the uniformly dedicated, well-informed and hard-working staffs of the Members and their Committees and Subcommittees. They were the glue that held the effort inside the House together, and a vital link in the communications apparatus between the public and private sectors.

Here are three anonymous examples of how much difference staff work made in the House debate:

A Judiciary Committee Counsel, hearing of the motion to strike the cause of action 1½ hours before it was to be offered, typed up a page of arguments in favor of the motion, duplicated it, and returned to the floor in time to distribute it to Members filing in to vote.

A Public Works Committee Counsel, anticipating the offer of a fallback cause of action proposal, drafted dozens of amendments to it, which a Member showed to the

sponsor of the proposal and threatened to use if the proposal was not withdrawn.

A Judiciary Committee Counsel, laboring for days, prepared arguments in favor of changes in procedural aspects of the bill that were so formidable that its sponsor accepted the changes en bloc.

The cogent arguments that our Congressional friends made were in most instances the product of careful preparation by trusted staff counsel. The lesson here is that staff can greatly enhance the impact of a single communication upon a particular Member, and assure its widespread distribution.

Fifth, the traditional lobbying tools are as good as they ever were. I think a lot of us were convinced that we could never overcome the enormous "grass-roots" power of the environmental lobby. After all, their members can vote; our institutional constituencies can't. But our Washington-postmarked letters and position papers clearly were read by a large number of Members and their staffs, and served to heighten concern about the issues we addressed.

As a former Hill staffer myself, I know the value to staff of having written materials in legislative files, particularly when the bill involved does not originate in the Member's committees.

The lesson here is that letters to every Member's office can and do make a difference, particulary among those Members who are unfamiliar with the issues involved. We should make sure that we articulate our concerns in writing next year.

The same holds for visits with Legislative Assistants. This is a time-honored function of the lobbyist, and one of the most important. These visits open avenues of communication that can become vital two-way streets, providing feedback on the impact of the message, and revealing weaknesses in its argumentation.

Sixth, even the loosest of coalitions is better than none at all. Unlike our adversaries, who had a single, well-defined, close-knit coalition with clear assignments of responsibility, the business community had no formal structure whatsoever within which to organize its opposition to H.R. 5640. This was partly a function of the fact that the bill gave every industry something different to dislike about it, and a reflection of the different priorities each business sector necessarily developed.

Nevertheless, like players in the floating crap game in "Guys and Dolls," we managed to get together in someone's garage often enough to trade important information and argumentation, even if the roster of attendees was never the same!

The lesson here, I think, is that the absence of a formal structure for our coalition made no real difference in our capacity to work together. Indeed, the creation of such a structure would have enabled the other side to focus its energies on overcoming a single "devil," when it was better for us for them to dissipate those energies in swatting at the mosquitoes we were. But we should start the crap game earlier this year, since we now know, more or less, who the players are.

Finally, trust in the political process. One of the clear lessons of this year's fight is that those who abuse the political process end up being beaten by it.

It is one thing to be a strong partisan of a political objective; it is quite another to expect to achieve that objective by short-circuiting the legislative process. From the very beginning, the 1984 Superfund reauthorization effort was the antithesis of the normal consensus-building process that produces legislation: it was adversarial, not consensual; it was closed, not open; its progress was achieved by chicanery and chutzpah, not reason and compromise.

A good bill welcomes scrutiny; a bad bill travels best by night. H.R. 5640 was of the latter variety; it was the creature of a small band of zealots more interested in their own agenda than in getting on with the job of cleaning up hazardous wastes. They were not only afraid of allowing relevant committees to look at it; they were unwilling to accept the changes that are an inevitable part of the legislative process and that, ironically, would have enabled the bill to become law.

A "compromise" in the normal political process is an agreement in which all interested parties participate and to which they all subscribe. In the 1984 Superfund reauthorization process, "compromise" was entirely unilateral, and consisted only of whatever crumbs the bill's advocates decided would be thrown in the direction of its critics. To my knowledge, there was not a single instance in which persons representing both sides of a given issue were parties to a "compromise."

Ultimately, of course, this strategy backfired, and what should have taken place in the orderly environment of the relevant committee markups took place in the chaos of floor debate. The net result of a calculated attempt to subvert the democratic process was the triumph of that process. Equally important, those who were the early victims of this cynical ploy are unlikely to forget the arrogance of its architects.

Superfund will be reauthorized next year, and it is profoundly to be hoped that the lessons of this year's struggle will be learned well by all the parties involved. The goal these parties have in common—the prompt cleanup of hazardous wastes—makes it imperative that we work together, not at cross-purposes to achieve it.●

EROSION OF THE PELL GRANT

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 9, 1984

● Mr. FORD of Michigan. Mr. Speaker. In the New York Times of Saturday, October 6, an excellent article by Chancellor Joseph S. Murphy of the City University of New York appeared. This article presents some very gratifying case studies of young people who have been able to succeed because of the educational opportunities made available to them particularly through Federal student financial aid programs such as the Pell grant. This article also documents the erosion in the purchasing power of the Pell grant and the urgency of reversing that trend. I commend the article to the attention of my colleagues. I would also like to congratulate Chancellor Murphy and the other members of the National Pell Grant Coalition who succeeded in persuading the Appropriations Committees to provide sufficient funds for a maximum Pell grant of $2,100 covering up to 60 percent of educational costs in the next academic year. Their success begins a process or rebuilding the Pell grant so that it can once again serve as a key to the door of educational opportunity for talented students of limited means.

SAVING PELL GRANTS FOR STUDENTS

(By Joseph S. Murphy)

Separated by 3,000 miles, two members of the class of 1984 who graduated with top honors bear a striking resemblance.

Christopher Luu, valedictorian at City College University of New York, is one of the "boat people" who fled from Vietnam less than five years ago. Although he spoke almost no English when he started his education in America, Mr. Luu graduated first in his class and is pursuing graduate work at the Massachusetts Institute of Technology.

David K. Cheung, university medalist (valedictorian) at the University of California at Berkeley, came to the United States in 1969 from Hong Kong. He finished first in his high school class and now is studying medicine at the University of California at San Franscisco.

Both Mr. Luu and Mr. Cheung arrived in this country with little money, but rich in spirit and determination. Beyond the scholarships they won and their own efforts to work their way through college, they both required additional financial assistance in the form of Pell Grants, the major Federal program for needy college students.

Where would Christopher Luu and David Cheung be today without this essential aid? The question is a matter of indifference to the Reagan Administration, which proposed in 1982 to cut the $2.6 billion Pell Grant program by $1 billion. The educational aspirations of 2.8 million students nationwide who depend on Pell Grants—both those headed for graduate and professional schools and those just struggling to get college degrees so that they can become productive citizens in the workforce—are clearly not a priority of this Administration.

The Reagan Administration seems intent on reversing 50 years of social and educational progress by transferring resources from the poor, working-class and middle-class people to the rich and affluent. The result is that the children of poor, working-class and middle-class Americans, whose most effective road for upward mobility has been access to higher education, are seeing opportunities destroyed by skyrocketing tuition and living costs. College education, a dream for many, often is an economic nightmare: students are faced with the choice of dropping out of college or assuming crippling debts.

These men and women cannot hope to make it through college without Pell Grants. Three-fourths of Pell recipients come from families with incomes below $15,000. More than 40 percent are self-supporting. About one-third are members of minorities. Approximately two-thirds attend public two- and four-year colleges and one-third attend private colleges and technical schools.

Thus far, the intervention of Congress has rescued the Pell Grant program from the onslaughts of the Administration. Nonetheless, the effectiveness of the program has been seriously eroded. In 1979, Pell Grants covered 46 percent of college expenses; today, only about 31 percent.

More than 20 national educational associations, teachers' organizations, and civic, religious and community groups have

formed the National Pell Grant Coalition to try to restore the dwindling purchasing power of the grants. Currently, the maximum Pell Grant is $1,900, or 50 percent of college expenses, whichever is lower. The coalition's proposal to raise the maximum grant to $2,100 or 60 percent of covered costs was adopted by the House of Representatives early this summer. With the Senate about to act on similar legislation this fall, the coalition is on the threshold of gaining significant improvements in the program.

The parallel cases of Christopher Luu and David Cheung demonstrate important considerations. To deny support to education is to place the aspirations of our nation's young people in jeopardy. Curtailing the Pell Grant program will achieve one disastrous result. It will mean the end of education's unique ability to elevate capable, hard-working and ambitious Americans to their fullest potential as productive citizens. The legacy of that policy will be a heritage of shame.

With the help of thoughtful and concerned Americans, however, we can assure a more promising future for those eager to realize this nation's promise.●

SENATE—*Wednesday, October 10, 1984*

(Legislative day of Monday, September 24, 1984)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Trust in the Lord with all your heart, and do not rely on your own insight. In all your ways acknowledge Him and he will direct your paths.—Proverbs 3:5, 6 (RSV).

Almighty God of all wisdom and all power, manifest Yourself to us today, demonstrate Your imminence, Your availability, Your relevance, according to the proverb with which this prayer began. Enable the Senators to make God room in their deliberations, their negotiations and decisions. As they struggle for compromise, protect them from personal animosities which alienate and delay resolution. Restrain their tongue from speaking words which will later be regretted and despite all the pressure, Lord, may their thoughts be always issue oriented. Direct their paths in the way of respect and love and peace to just and satisfactory ends. In the name of the Prince of Peace. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE CHAPLAIN'S PRAYER

Mr. BAKER. Mr. President, I am trying hard to restrain myself from saying the impertinent thing I am about to utter about the Chaplain's prayer today; and, that is, the couplet that we would pray for just and satisfactory results. The two are not necessarily consistent always.

SENATE SCHEDULE

Mr. BAKER. Mr. President, I wish to outline the situation as I now see it.

I am afraid today is not certainly sine die day. It may be. But I have enhanced hopes that tomorrow is. I base that on the prospect that finally the conference on the continuing resolution will resolve and the House will act in time to send us that resolution either late today or early tomorrow.

In addition to that, Mr. President, we have a number of things that must be done. We have the debt limit which remains undisposed of on this side. We have the Genocide Convention. It is the intention of the leadership today to call up that matter at some point during the day, probably around 12:30 p.m. We have a highway bill that must be passed. We have other matters, including perhaps an REA bill which many Senators wish to have presented. The leadership on this side will probably try to get up some sort of bill such as S. 1300, and time is short. But in any event, for the time being Senators should be on notice that when we resume consideration of the pending business at 11:30 we will stay on that as long as it seems profitable and practical. But at around 12:30 or 1 o'clock, if we have not made good progress on the debt limit, it is the intention of the leadership on this side to ask the Senate to go into executive session for the purpose of considering the Genocide Convention.

I have no way of predicting, Mr. President, how long we will be in session today because that depends so much on the conferences now underway. But the Senate will be in session as long as necessary to complete our work and to enhance the prospects for early adjournment of this Congress.

Mr. President, I ask unanimous consent that the time I have remaining under the standing order may be reserved for my use during the remainder of this day, as may the time for the minority leader under the standing order. I further ask unanimous consent that I may suggest the absence of a quorum without it charging against special order time which is to follow after the standing order time.

The PRESIDING OFFICER (Mr. HECHT). Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

With those conditions, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. I am advised through staff that the distinguished Senator from Wisconsin, Mr. PROXMIRE, has no need for his special order at this time. I ask unanimous consent that the special order be vitiated and that the Senate proceed to execute the order for morning business without altering the 11:30 a.m. limitation thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 11:30 a.m. with all statements therein, except those by the leaders, to be limited to 5 minutes each.

PRESIDENT DUARTE'S PEACE BID

Mr. DODD. Mr. President, recently Jose Napoleon Duarte, the President of El Salvador, announced his willingness to meet with the commanders of guerrilla forces fighting against his government. As one who has long acknowledged the need for political dialog between the warring factions in El Salvador, I know that many of my colleagues join me in applauding that decision.

That applause is well deserved, Mr. President. The potential significance of President Duarte's announcement should not be underestimated. It brings to mind the kind of political courage displayed by other bold leaders in other difficult times—the courage displayed by Anwar Sadat in going to Jerusalem in 1977, or by Charles de Gaulle in bringing an end to the Algerian crisis in the early 1960's. I believe President Duarte has demonstrated the sincerity of purpose and commitment as those illustrious peacemakers did in their peacetime. Mr. President, however, the success of President Duarte's mission in La Palma will not only depend on his sincerity and his commitment, but also upon the willingness of the various forces within the El Salvadoran Government, certainly the willingness of the insurgents, the willingness of this Government and others, and the international community to support this courageous first step.

Not only is President Duarte's willingness to meet with the rebels a very courageous step, Mr. President, it is a very pragmatic one that should be welcomed by all Members of this body and the people across the country and elsewhere.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The guerrilla groups in El Salvador have long stated their willingness to seek a political settlement to the Salvadoran conflict. During my 4 years in the Senate, Mr. President, many of my distinguished colleagues and I have urged that that willingness be tested. If the rebels are less than sincere, we have argued, why not call their bluff? If the rebels prove to be insincere, the United States always has other options, including that of additional military aid and support to the Salvadoran Government. But if the rebels truly are willing to negotiate a settlement, let us support the negotiating process and avoid the risks of further militarizing the Central American region. President Duarte's decision will test the insurgents' willingness, and potentially pave the way for the peaceful settlement to El Salvador's civil war we all hope to see.

Mr. President, Members of this body frequently disagree on questions of Central American policy, whether those questions involve funding levels, the nature of the threat to the region, or the best way of achieving our policy objectives. But, I think very few Senators disagree about our high regard and our support for President Duarte. Just last week, Mr. President, we expressed that support by adopting unanimously my amendment to stop all funding for El Salvador should President Duarte be deposed.

By making this courageous proposal, President Duarte has shown us once again why he deserves our respect and support. I hope that Mem/ers of this body will continue that support, Mr. President, in the coming days and weeks.

I hope that the administration will back President Duarte's decision with its actions as well as its words. Most of all, Mr. President, I hope the process President Duarte plans to begin next week will succeed. After years of violence and bloodshed, the people of El Salvador deserve nothing less.

Mr. President, I ask unanimous consent that two editorials, one appearing this morning in the New York Times and the other in the Washington Post—the editorial in the New York Times, "An Offer in El Salvador," and the Washington Post editorial, "Next Monday at La Palma"—be printed in the RECORD at this junction.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 10, 1984]

NEXT MONDAY AT LA PALMA

President Jose Napoleon Duarte's peace bid to El Salvador's guerrillas reflects precisely the sort of vision and courage his supporters had hoped for. In a dramatically concrete speech at the United Nations, he offered to meet the commanders of five guerrilla groups next Monday at La Palma, a Salvadoran town sitting on the edge of a guerrilla zone. The commanders responded in a positive way, and it looks as though the first full-fledged opportunity for conciliation in El Salvador's brutal grinding war may soon materialize.

After he was elected last June—in a contest in which the left did not take part—Mr. Duarte put off the attempt at "dialogue" to which he had alluded earlier. The justification for delay was that he needed first to bolster the government's military capacities, with American help, and to demonstrate that he could adequately control the death squads—which had ominously close links with the armed forces. Evidently Mr. Duarte decided he had made enough progress on both fronts to reach out to the guerrillas now. Perhaps he also felt that, with a strong political component now evident in the mist of the battle in Nicaragua, it was time to introduce a similar element in El Salvador.

The Salvadoran guerrillas have long argued, reasonably in our view, that the available security was insufficient for them to take up the Salvadoran government's offer to lay down arms and joint a government-run political process. Mr. Duarte, however, has been moving to meet these objections. A prisoner exchange was recently conducted as a test; it was a success. The La Palma meeting has been further designed as a test of the two sides' readiness to holster their arms in a specific area. Mr. Duarte asks the guerrilla leaders to come unprotected and unarmed and says he will do the same. He has opened up the agenda in a way that finesses the guerrillas' past claim that they were being invited merely to join a government charade.

Memory is long and confidence short in El Savador. Whether the hard right, which has not by a long shot lost all its connections in the armed forces, will stand still for a dialogue is no less a question than whether the Marxists in the guerrilla leadership will dare submit their political fate to the new elections Mr. Duarte has in mind. The wrong kind of signal from either side's foreign patrons could easily upset whatever process may conceivably get under way. It is a moment of great uncertainty, but of great promise, too.

[From the New York Times, Oct. 10, 1984]

AN OFFER IN EL SALVADOR

It's not his political neck that President José Napoleón Duarte risks with the offer to talk to El Salvador's leftist guerrillas. The violent right has slaughtered many Salvadoran democrats for entertaining the same idea. Yet Mr. Duarte, from the forum of the United Nations, says that unconditional discussions can begin next week in La Palma, a town in guerrilla-held territory near the Honduran border. The guerrillas instantly accepted, if a neutral observer attends.

What is going on here? The honest answer is that Mr. Duarte's calculations are not obvious. He may well agree with the Pentagon's assessment that the tide of battle is shifting to his Government's side. Or, less securely, he may be trying to use diplomacy to ward off an expected guerrilla offensive in the autumn dry season. He might even be moving ahead of his American allies, figuring that they will restrain him less during the United States election campaign.

In any case, the State Department says it had no advance warning that Mr. Duarte was going to abandon his recent skepticism about wide-ranging talks with guerrillas.

In a bid to end a civil war that has taken 50,000 lives since 1979, he now offers leftists a new chance not only in local elections, which they've rejected, but perhaps in a national plebiscite. To the leftists' demand for guarantees of safety and participation in the interim, pre-election regime, Mr. Duarte responds with a promise of "safety and security of a political place within a pluralistic, democratic constitutional system"—or a possible role in the Government plus a general amnesty.

Until this speech, Mr. Duarte had been saying he was ready to talk but not yet to negotiate. His new proposals surely sound like an agenda for negotiation. And he has shown some authority over the right-wing death squads.

Mr. Duarte's approach certainly accords with the spirit of the regional peace treaty that has been proposed by the Contadora countries—Mexico, Venezuela, Colombia and Panama—and encouraged by Europeans whose support he has gained in recent months. Nicaragua's acceptance of that treaty may also become a factor in the calculations of Salvadorans.

The obstacles, of course, are awesome. Hardliners in the Salvadoran armed forces, thirsting for victory over the guerrillas, may still be strong enough to thwart Mr. Duarte. Whether the leftists insurgents can settle for much less than their vision of victory also remains to be seen. It's only a small space that has opened in this bramble, but Mr. Duarte deserves applause for venturing forth with an offer to find a way to end the bitter yet deadlocked war.

THE GENOCIDE CONVENTION WILL HELP AMERICA PROTEST SOVIET HUMAN RIGHTS ABUSES

Mr. PROXMIRE. Mr. President, in less than 1 month, on November 7, the Russian Government will hold their annual celebration to commemorate the victory of communism in the Soviet Union. In anticipation of that anniversary, the Congress of Russian-Americans, Inc., wrote to all Members of Congress urging that we take note of the millions of martyrs of communism on that anniversary.

Their points is well taken, Mr. President. From the beginning of the Communist revolution through the Stalin purges and the Gulag of today, the Soviet regime has murdered millions of its own citizens—some, because they were political dissidents; others, because of their ethnic, religious, or racial background; and countless innocents, for no apparent reason. In addition, as the senior Senator from Arizona has pointed out to the Senate in the past, the Soviet regime has engaged in cultural annihilation as well as physical elimination in its efforts to suppress national or religious or ethnic identifications.

The sad reality is that these abuses continue even today. To be sure, the Soviet Government has became more sophisticated and slick in its efforts to suppress dissent and eliminate those who happen to be unlucky enough to be in disfavor. But that patina of sophistication does not mask the cold, cruel reality of Soviet oppression.

It is unfortunate that some find it uncomfortable to raise this fact and confront it head on. But I do not think that we can avoid facing the facts and, as the leading democracy in the world, we have a moral responsibility to press these points in every international forum that we have at our disposal. One of the most appropriate forums in which we can do that is the Helsinki Review Conference. But what have our representatives found when they tried to do just that? They have been faced with the tremendous political mileage—the tremendous propaganda value—that was accrued to the Soviet Union by enabling its representatives to attack the U.S. record on ratification of human rights treaties.

By cunningly shifting the spotlight from their record to our record of failure to ratify basic human rights treaties, the Soviet Government has repeatedly escaped our efforts to hold their feet to the fire for their abuses of the human rights of their own citizens.

Why do we let them do it, Mr. President? Why? This Senator can think of no reason that the American Government should hand such an escape hatch to the Soviet Government. Our domestic record on civil rights and human rights is unsurpassed. It has always been open to inspection by the entire world. And that is the way it should be in a democratic society. But isn't it time that we match that record at home with actions on the international level? Isn't it time that we take away any possible propaganda escape hatches?

I think it is, Mr. President. And the first step which we can take to eliminate those points of Soviet attack is now within reach. With the endorsement of the Genocide Convention by the Reagan administration last month, and the overwhelming recommendation of the Foreign Relations Committee that we act before the end of this Congress, we have an important step we can take. Ambassador Jeane Kirkpatrick has told us how crucial the Genocide Convention is to our national interest and how it will strengthen our efforts to hold the Soviets accountable for their actions. As the Congress of Russian-Americans notes in their resolution, "Let there be light" for those in the darkness of oppression. Let us now act, before the 98th Congress adjourns, to light a candle in that darkness by ratification of the Genocide Convention.

I ask unanimous consent to have the resolution of the Congress of Russian-Americans be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

CONGRESS OF RUSSIAN-AMERICANS, INC.,
Nyack, NY, October 1984.

A DAY OF SORROW AND IRRECONCILABILITY—1984

As we approach November the 7th, the day when the Soviet Union annually celebrates international communism's arrogation of power in Russia, we—Russian-Americans—appeal to the U.S. Government and to freedom-loving citizens of this country to designate it as a Day of Sorrow and Irreconcilability.

Sadly, albeit fittingly, among all the ethnic groups making up the tapestry of these United States of America, only the Russian-Americans persist in annually asking their Government and their fellow Americans to observe this inglorious day. Russian-Americans feel it is their sacred duty to mark with mourning and defiance the day international communism claimed their former countrymen as its first victim. Thus, they honor their brothers living under the Soviet rule.

On this day we express our Sorrow for all the victims of the communist terror, and our Irreconcilability with the theory and practice of communist doctrine.

Moreover, let us not forget that November 7, 1917 marked not only the beginning of immeasurable sufferings for the Russian and other enslaved peoples of the Soviet Union, but also the beginning of a global human tragedy which today endangers the existence of the Free World. Utilizing the threat of a nuclear war, the Soviets have gradually taken over key strategic positions in all parts of the world. Today there hardly a nation on the face of the earth that has not been victimized by communist aggression.

Therefore, we ask the Government of the United States and all other Free World governments to designate November the 7th as a Day of Sorrow and Irreconcilability.

Over the past 67 years the Soviet government has spared no effort in trying to strip the Russian nation of its heritage. Despite the desecration and destruction of over 50,000 churches and monasteries, the persecution and extermination of millions of people in concentration camps and prisons, we witness today in the Soviet Union a revival of faith and awakening of national pride. The determination of the Russian people to live free blazes as never before. Perhaps the Russian soul, having nurtured its people through their long, barren winter of oppression, senses at last spring's hymn of freedom yearning to be sung. How more can we honor our brothers than by lending voices to this chorus? For by proclaiming this day of Sorrow and Irreconcilability, we intone "Let There Be Light" and indeed for all those who hear our voices in their darkness there is light!

BOARD OF DIRECTORS,
CONGRESS OF RUSSIAN-AMERICANS.

NUCLEAR WINTER—A FORGOTTEN RESPONSIBILITY OF NATIONAL LEADERSHIP

Mr. PROXMIRE. Mr. President, a number of the most widely respected American and foreign scientists have agreed that a nuclear war—even a relatively small nuclear war—not involving the United States could create the greatest environmental disaster on the Earth in the past 65 million years. With surprising unanimity, they have concluded that the soot and smoke that would arise from the nuclear firestorms that would engulf large urban areas in the world would shut out the Sun's rays throughout the world for weeks. This would precipitate a period of paralyzing, bone-chilling 13 degrees below zero Fahrenheit cold that would last for months. Plants would die. Animals would die. Even those countries untouched by nuclear bombs and not even remotely involved in the nuclear war would suffer a loss of much, perhaps most, of the population as millions froze to death and many more millions died of starvation.

What has been the response to this nuclear winter revelation? Has it provided a stimulus to action? Has there been any kind of administration or congressional response to find out more about it and what we can do about it? No. The reaction has been the same as Gen. Omar Bradley's characterization of the public reaction to the prospect of a general nuclear war: colossal indifference. Really, Mr. President, a shocking and surprising indifference. Why? If you or I were told by the most competent police experts that we could expect that a gang of arsonists were planning to come up to the Capitol next Wednesday to set this Chamber on fire, you would see some action around this place. But when we are warned that the whole world may be on the verge of being fricasseed like a chicken and then blinded and frozen, and when the warning comes from the world's most respected scientific experts, we yawn, mutter "ho hum," roll over, and go back to sleep.

Mr. President, I have also introduced legislation calling on the Defense Department to study the implications for military strategy and doctrine of the nuclear winter with the specification that the Congress be furnished the report within 1 year. What irony! Here we have made elaborate and immensely expensive plans to fight a nuclear war, to carry on when our weapons and even our cities have been smashed by nuclear weapons. But we have ignored the grim fact that much of our equipment may not function in a soot- and radioactive-filled atmosphere and with temperatures consistently far below freezing. How do we adapt our military strength to that environmental disaster?

Even more fundamental, how do the American survivors of a nuclear war—including a nuclear war that might be fought entirely in Asia or Europe—continue to function economically in a nuclear winter? Can we find ways of swiftly protecting our crops and animals from the weeks of darkness and devastating cold? How do we feed our people? Could our critical transportation still operate? Could trains run? Could planes fly? Could autos travel

on highways? Would utilities be able to provide the essential life-giving heat to our shivering people, For how long would the utilities get the oil and coal they would need? What other sources of heat and energy could we tap? Could factories continue to produce goods? Could emergency police and fire protection continue? How could we assure that we could keep our hospitals open? Obviously, if this country or any country should be hit by an all-out superpower nuclear attack, these questions might all be academic. But such an attack would be the least likely nuclear war development. Far more likely is the kind of localized and limited but still environmentally disastrous nuclear war that could have profound worldwide environmental consequences that have not been discussed or speculated about outside of scientific laboratories. But, Mr. President, this is a real possibility.

None of us enjoys dwelling on the horror of nuclear war. This latest nuclear winter revelation makes the terrible nightmare even worse. Obviously, all of us recognize that we should do everything we can to prevent such a nuclear war from ever occurring. We disagee on how to achieve that. But we should be able to agree that we should have the courage to face the full gamut of nuclear war possibilities. We should recognize that some genuine possibilities growing out of the most likely kind of nuclear war may leave a genuine opportunity for our taking thoughtful measures now that could enable millions of Americans to survive. So what do we need now? We need to study the full implications of a nuclear winter and then determine just what we can and must do about it.

A TRIBUTE TO PAUL TSONGAS

Mr. DOLE. Mr. President, the junior Senator from Massachusetts [Mr. TSONGAS] has announced that he will leave this body at the end of the current session. It is a real loss to the Senate; not only to the members of his party, but to all Americans who desire an intelligent discussion of the issues that face our country.

PAUL TSONGAS is a liberal in the best sense of the word. He is a true believer in the rights of the individual and, most importantly, in protecting the rights of disadvantaged. America has benefited from PAUL TSONGAS' insights into legislation being considered by both Houses of Congress during the past decade.

Mr. President, Senator TSONGAS is an attorney from Massachusetts by trade; but above all, he is a devoted husband and father. He leaves public life—at least temporarily—to spend more time at home with his loving family.

The Senator from Kansas is joined, he is sure, by every Member of the Senate, in offering PAUL TSONGAS best wishes in his new private and public endeavors.

TRIBUTE TO SENATOR PAUL TSONGAS

Mr. KENNEDY. Mr. President, as the 98th Congress prepares to adjourn, I want to take this opportunity to pay tribute to my friend and outstanding colleague from Massachusetts, PAUL TSONGAS, who is retiring from the Senate as this session ends.

All of us respect the decision PAUL has made to leave the Senate after only a single term. But we understand his decision and we respect him all the more for it.

From the day he took his seat in the Senate, PAUL impressed us all with his unusual ability, profound commitment, and quiet passion. His uncommon eloquence in the cause of peace and his principled leadership in the search for arms control have immeasurably enriched our national debate on this all-important issue that will determine the fate of all humanity.

Time and again on the floor of the Senate, we have seen PAUL TSONGAS cut through the confusion of debate, and teach the Senate a new lesson and a new wisdom about the nuclear peril. Always, when the going has been toughest, he has summoned us to stand firm against any strategy that relies on relentless nuclear buildups and mindless nuclear militarism.

In this Chamber, PAUL TSONGAS has also been perhaps the truest and most persistent voice of our time on the issue of human rights. A quarter century ago, John F. Kennedy had the idealism and concern of young Americans like PAUL TSONGAS in mind when he created the Peace Corps. And in all the years since his own days as a volunteer, PAUL TSONGAS has generously fulfilled the dream my brother had for a new generation of American leaders who would dedicate themselves to the cause of hope and progress for all peoples everywhere.

In the Senate, PAUL TSONGAS has been a powerful voice for an end to the conflict in Central America, for freedom for Soviet Jews, for majority rule in South Africa, and for all those on this Earth who suffer from tyranny and oppression.

There was no finer moment in recent years in the U.S. Senate than when PAUL TSONGAS took the floor a few months ago, and in simple words of powerful eloquence made an irrefutable case to halt the flow of American dollars for terrorism against innocent civilians in Nicaragua. By the narrow margin of two votes, PAUL'S position failed. But, I suspect that everyone on the Senate floor who heard that debate understood in their heart—however they may have voted—that PAUL TSONGAS was right.

We will also remember PAUL for his extraordinary facility in dealing with new and complex economic principals, his dedication to education and high technology, and his perseverance in achieving compromises that others had found impossible on deeply divisive issues like the Alaska lands legislation, the rescue of Chrysler, and the future of the auto industry.

But most of all, PAUL TSONGAS left an indelible mark in the Senate through his leadership in urging a new agenda for the Nation that would be equal to the new challenges of the 1980's. And in all of these endeavors, PAUL has sought to point us to the future without losing sight of the values of the past. This is the lesson of his service—that if we seek new ideas—and we do—it is in order to advance the abiding principles of progress and justice, compassion and peace.

Truly, it can be said of PAUL TSONGAS that everything he touched, he left better than he found it. He gave something back to America in return for all it has given him.

Massachussetts will miss him in the Senate, and so will each of us. I am proud to have had him as a colleague and a friend, for he is one of the best Senators Massachusetts has ever had.

TRIBUTE TO JOHN C. DONOVAN

Mr. MITCHELL. Mr. President, the recent and untimely death of one of Maine's most public-spirited and best-loved citizens brought grief to his friends, his former colleagues and his students and readers throughout our State.

John Donovan's career and work spanned the Senate, when he worked for Senator Muskie; the Labor Department, when he headed up the manpower administration office, and Bowdoin College, where he taught and wrote for many years.

Judge Frank Coffin's words on the occasion of John's memorial service express for all of us who knew John Donovan the kind of citizen he was, and the kind of friend he was. I ask unanimous consent that the text of Judge Coffin's remarks be reproduced in the RECORD.

FAREWELL TO OUR FRIEND

(Remarks by Judge Frank M. Coffin at the Memorial Service for John C. Donovan)

To talk to you today of our friend John Donovan is one of the highest honors and saddest duties that I have ever had. We come to pay homage, not to one who has lived the fullness of his expected years, but to one taken when he had so much yet to contribute . . . and to savor. Taken quickly and without warning. So we feel for him everything from anguish to bitterness.

We also feel for ourselves. Each of us in this outpouring of friends from places far and near, positions lofty and humble, is here because we feel a personal loss. Something precious seems suddenly to have gone out of our lives.

In my case I miss the friend I first met on the Bates campus 46 years ago, whose life and mine ever since proceeded in tandem: Bates; Navy; graduate work at Harvard; living on the same street in Lewiston, he professing, I lawyering; then politics with each of us in turn chairing our party's state committee and running for Congress; then Washington, I in the House and he as Senator Muskie's key assistant; then the executive branch, he in the Labor Department and I in the Agency for International Development; finally, home for both of us, he to his beloved Bowdoin and I to my beloved bench. Each of you cherishes your own pattern of relationship and your own agony of loss—as college mates, Navy buddies, students, former students, faculty colleagues, co-authors, political and governmental coworkers, neighbors . . . and most of all as brother, sisters, and especially as devoted wife and loving children.

So this has been a time for grieving—for the bonding of remembrance, restoring with however fitful a light how he was, looked, and talked; for the fabricating of a future we would have liked for him and for us; and for the sorrowing that this cannot be. We cannot and should not wish this away. We are told and believe that grieving is part of the human condition, that it tests, case hardens, and ennobles the human spirit.

But grieving is something each of us will do alone or with others—and, whatever we do or say here, each will grieve deeply and long. Were we, however, to devote our brief time together simply to exchanging and augmenting or griefs, we would, I believe, be faithless to our reason for being together.

In the first place, we would be irritating a certain irrepressible, feisty, congenitally insouciant gentleman, born of formidable stock. As John recently wrote, "Both my parents were born in the Berkshires in the 1800's; one Irish-American; the other an authentic Yankee. In each case the background was Western Massachusetts yeoman-farmer—the folks who are likely to encourage a Shay's Rebellion. On my mother's side the tribe had hacked their way on October Mountain, if you know where that is, before the American Resolution." Add to this heritage the fact that John grew up in the resilient rough and tumble of "the rubber city" of Naugatuck, Connecticut, where the generations had learned to live with death and relish life. Such a gentleman, therefore—armed with a vigorous vocabulary—would be the first to move us to more positive, life-enhancing themes. I do not want to cross such a man.

In the second place, this is the unique occasion to solidify the precious essence that will never leave us, so long as we live—the presence of the man, now no longer to be sustained by new encounters but to be nourished solely by our own efforts.

What kind of a man was this John C. Donovan? When we had him for the asking, we took him for granted. Let's look at him with more care.

The first thing we remember is his relaxed and spontaneous fellowship. He always had time for people at all levels from Senators and Governors to store clerks, janitors, and cleaning ladies. After a chat with him, anyone felt better. The second thing was his penetrating conversation. In every meeting with him there was a nugget, whether it was his own serious thought, or his ardent wit pinioning some pomposity of doctrine or person or exposing the irony in a highly touted public policy, or simply a memorable anecdote. After such a chat, anyone felt a bit wiser.

Part of what John was saying is what he had seen and done. His wisdom and sanity stemmed from living and working in four separate fields of socially relevant action. As college teacher he brought the old fashioned virtue of unflinching analysis to 32 years of Bates and Bowdoin students; as coauthor of textbooks he brought his broad and perceptive views of our government institutions and processes to thousands of secondary school students. As political activist, organizer, a Senator's key assistant, and Congressional candidate, he did more than his share, in what he called "The Golden Years", to enrich and make relevant political life in this old state. As bureaucrat and top administrator initiating our first Manpower program under Secretary Wirtz, he earned the Labor Department's coveted Distinguished Service Award. Finally, as scholar and author, he ranged with rare authority across the three fields of political science, political economy, and history in that great trilogy, The Politics of Poverty, The Policy Makers, and The Cold Warriors. In these books and other writings he addressed the immensity and danger of our problems of poverty and the inadequacies of our ways of dealing with them, the tragedy of our obsession with Vietnam, and the distortions in official talk about national budgets. It was clear that beneath all of John's joviality, with, and irreverence, he was deadly serious about and reverent toward his pantheon of things that matter.

Three themes that he came to see as dominant in his thinking were: first, that American history should be interpreted honestly, that all was not and never had been sweetness, light, virtue, and harmony and that not only liberty and equality were in tension but also property and equality, daring to inject property as a prime American value; second, that a subtle threat to the integrity of the nation as a democracy lay in the effect on foreign policy of an elite, a small group of intimates from a narrow and privileged base, unwilling, as he put it, to "question official, bureaucratic dogma frozen in its own vacuity"; and third, that a similar threat lay in the influence of the meritocracy, whom he called "the new mandarins, the managers and manipulators of technology", whose techniques seem "to be able to solve every problem except the ones that are tearing us apart."

Earlier this year, John ended his valedictory address as President of the New England Association of Political Scientists, by saying, typical of the Shay's Rebellion kind of person he was, "The best advice I have to offer, . . . is to stay true to your own special angle of vision, especially if you share my faith in the importance of having a colony of conscience somewhere within this dear old democratic-republic of ours." Intrepid colonist in this conscience was our friend John.

Well, this is part of John Donovan, the part I call the public man. But he was a whole, an integrated man, illustrating what I am coming to believe, that the best men and women in any era are not necessarily, nor even often, those on whom the bright and evanescant spotlight of fame has shone. John had his own queer genius for friendship; we ourselves are the proof, that we who are all so different could each be the special objects of his friendship. He was a good and caring neighbor, as Federal Street in Burnswick and Potts in South Harpswell know. There, on the highest point of Hurricane Ridge sits his cottage. In his end of the glassed-in porch, he could be seen at his ancient typewriter on any early morn from May to September. There he would be crafting not only his books, articles, letters to the editor, but also, beginning in 1976, "Harpswell Notes", an affectionate journal about the comings and goings of ducks and dogs, family and friends, weather, politics, and other disasters, a journal evocative of a serene and happy man.

Perhaps the trust measure of this man is his finest product, his family: a community consisting of his beloved and equally vibrant partner, Bea, and Carey, Chris, Martha, and John, four affectionate, self-reliant, independent-minded, lovable, generously dedicated children. With more striving than we shall ever know, he, with their help, lived to see all of them complete splendid college educations.

This summer John bought himself a tacky blue and gold yacht captain's hat. But when he donned it, it suited him perfectly; he looked both commanding and jaunty. So, as we take leave of him, for the time being, in this place, let us imagine him in this hat—giving to all of us his memorable, untranslatable farewell of affection and solicitude: "Take it easy going through Bridgeport."

WHO IS TEACHING OUR CHILDREN?

Mrs. HAWKINS. Mr. President, last year, Mark Vogler, a reporter for the Florida Winter Haven News Chief began research into how an admitted child molester could be certified to teach in a Winter Haven School. His original series of articles on the "bad apples" in the Florida school system prompted the Florida State Legislature to enact child protection reforms which require a criminal background check as a prerequisite for teaching in Florida. In an attempt to discover if these teacher certification problems exist in other States, Mr. Vogler spent 6 months, and traveled over 4,000 miles to 14 States to develop this excellent expose on child molesters within the school system.

I ask unanimous consent that the entire series of articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

WHO IS TEACHING OUR CHILDREN?

(By Mark Vogler)

Individuals with criminal backgrounds could easily become classroom teachers throughout the nation because most states don't conduct thorough screening of applicants for teaching certificates.

And even when some of them become teachers and are identified, there is a good chance they will stay in the profession because of wide-spread poor handling of teacher misconduct cases by education administrators across America.

The likelihood of this situation happening appears to be greater in states like Maryland, Arkansas and Louisiana where sex offenders, child molesters, drug peddlers—and even murderers don't have to hide their criminal records because felony convictions haven't been considered grounds for revocation of a teaching certificate in those states.

The problem of policing the teaching profession is compounded by the fact that many local school districts are inclined to allow teachers suspected of misconduct to resign without reporting the case to the state department of education for possible revocation action against the teacher's certificate.

Documentation of teacher misconduct also is hindered by local administrators who often resolve such incidents quietly without involving the police, according to education officials in many states.

Those are the most glaring deficiencies uncovered by The News Chief in a comprehensive study of how state education departments handle teacher misconduct cases and screen the backgrounds of certificate applicants.

The major conclusion: Most states can't guarantee the moral fitness of people who are potential candidates for teaching positions—jobs where they would be looked upon as the ultimate role models of today's youth.

The consequences: An increase in the number of morally unfit teachers may weaken the quality of education overall. In cases where sex offenders go undetected, the mental health and safety of many children could be at stake, say education officials who are concerned about the situation.

"The possibility of having morally unfit teachers in the system is a growing concern and potentially a growing problem for everyone," said Barry Weiss, certificate placement manager of the Illinois State Board of Education.

"And the fact that I can't even say whether we have a problem in Illinois or not is quite disturbing. This is something that needs to be dealt with. It's one of those issues whose time has come," he said.

Weiss and dozens of other education officials interviewed by The News Chief suggest that the serious flaws evident in teacher screening and disciplinary procedures constitute a major problem in the American education system—but one that many officials refuse to acknowledge or would rather not talk about.

That was evident in Wisconsin, the only state where education officials refused to participate in the survey or answer questions as to how the state polices its teaching profession.

"It's not a concern to us. We're not interested in your survey . . . it looks like 12th grade research . . . it's not an issue here," said Lond Rodman, director for the Bureau of Teacher Certification and Education at the Wisconsin Department of Public Instruction.

Most of the officials interviewed by The News Chief disagree with Rodman and say it is an important issue that should be dealt with.

A two-month investigation by the newspaper, which included a nationwide survey of state education department certification officials and a fact-finding tour of 14 states along the eastern seaboard, culminated with these findings:

Officials in most states say they believe the situation reported in the "Bad Apples of Education" series is a problem that is common to many states throughout the nation.

The series, published by The News Chief in March, disclosed that dozens of convicted felons have gained access to the classrooms throughout Florida by keeping their criminal backgrounds hidden from their employers.

In more than three dozen cases during a 5-year period, sex offenders, child molesters, drug peddlers, thieves and other convicted felons were certified as school teachers because they had lied about their criminal backgrounds, the newspaper had learned from a review of state files of teacher disciplinary and revocation cases.

Gov. Bob Graham and other state officials later credited the newspaper with exposing serious flaws in the state's teacher certification program and contributing to the passage of a new law that would require closer scrutiny of school teachers.

There is considerable agreement among states that existing screening methods are inadequate. Four out of five state education officials surveyed say more could be done in conducting criminal background investigations of teacher applicants.

Officials in half of the 50 states acknowledge they are not doing all they can to ensure that only individuals of high moral character—free of criminal backgrounds—are allowed access to the classrooms.

For many states, an applicant's criminal background is not an issue in the granting of a teaching certificate. Fourteen states don't even ask the question on their license application forms.

There are virtually no criminal background checks included in the teacher certification process. Only five states conduct investigations of any kind to determine whether applicants are telling the truth. Only two of the 50 states conduct full state and federal checks through use of fingerprints.

Revocation—the primary means of ridding the teaching profession of unfit teachers—appears to be a seldom-used tool in most states.

In many cases, state education departments don't initiate certificate revocations despite felony convictions of educators. Such action won't be pursued unless requested by local school districts.

There are 10 states that haven't revoked any certificates during the last five years and 17 others that have revoked less than five certificates during that period, according to revocation information obtained from those states.

Those 17 states have an aggregate total of 40 revocations during the last five years—21 fewer than what Florida reported during the past fiscal year alone.

Overall enforcement action in teacher misconduct cases is weak. Several states haven't initiated revocation against teaching certificates in years despite evidence that warrants disciplinary action (including instances of convictions for serious crimes).

Maryland's education department takes the position that certification shouldn't entail scrutiny of a person's moral background—and therefore has no procedure for revoking teaching certificates. This enables individuals with undesirable backgrounds to go elsewhere to teach.

Poor communication among states in exchanging information on disciplinary action allows unfit educators to continue in the profession even though they should be removed.

In some instances, teachers later obtained recommendations from the school district where their separation occurred.

Nine out of 10 states responding to the survey said they believe there could be better cooperation among states in sharing information about individuals who have demonstrated themselves to be unfit as school teachers in other states.

Most states don't have a central reporting system for teacher misconduct cases, largely because most states regard teacher misconduct to be a local, home rule issue.

Certification officers in half of the 50 states say they are lacking agencies and administrative procedures for investigating misconduct allegations involving school teachers.

Some states couldn't provide statistics on the number of teacher revocations they had issued, even though such information was readily available in Florida Department of Education files.

For most states, certification is simply a paper process and an incomplete one.

An average of one out of three states doesn't ask whether the applicant has ever had a teaching certificate revoked. Three out of four states don't state on the application form a penalty for falsification of information.

And in most instances, unless the applicant acknowledges a prior criminal record or revocation or some other problem, no check is made to find out whether the applicant is telling the truth. So, there's a built-in incentive for applicants with questionable pasts to lie, acknowledge many state education officials.

The issue of taking civil or administrative action against an educator in response to a complaint of misconduct unbecoming of a school teacher is a matter of sharp debate.

Many states won't even investigate such allegations unless there is a record of a criminal conviction. Some states—like California and Florida—will take administrative action against a teaching certificate independent of any court disposition.

Powerful teacher unions in some instances make it difficult, if not impossible, for state officials to remove undesirable teachers from the profession. Because of this, quite often, problems get resolved at the local level and state officials are never informed of misconduct which may warrant revocation of a certificate.

A teacher investigator for the Department of Education in Albany, N.Y., complains that no matter how aggressive his agency is in taking action against unfit teachers, efforts can be undermined by teacher unions "who have unbelievable clout in this state."

Anthony E. Signoracci, senior professional conduct investigator, says fingerprinting of educators—similar to what is done in New York City which has its own certification system and operates independently of the state—would significantly improve the state's screening for criminal backgrounds of teacher applicants.

However, "don't ever expect to see fingerprinting in this state (statewide) because the teacher unions are powerful and would never allow it to happen," said Signoracci.

"The teacher unions are pretty powerful here. They own the governor. They own the secretary of education. They own the deputy secretary of education. And they own the Legislature. They carry a lot of clout," he said.

"One of my biggest concerns is a system that permits the school board attorney to enter into a negotiations process without the department's knowledge, which enables them to close the books on the person's character. So we never find out about the situation."

Item: The purchase of teacher contracts in New York is not an unusual method used by school districts to get rid of undesirable teachers.

The file of one such case reviewed by The News Chief showed how a teacher, who faced prosecution and allegations of misconduct for breaking an ammonia capsule under a student's nose which caused burns that required medical treatment, beat the system.

A closed-door negotiations session between the school board and the teacher's attorney culminated in the teacher's contract being "bought out." As a bonus, the board agreed to withdraw its formal charges against the teacher and expunge from his personnel file any reference to the disciplinary proceeding.

"I'm sure this sort of thing happens all the time," said Signoracci, who is the lone teacher investigator in a state that employes 216,000 teachers. His responsibility excludes the cities of Buffalo and New York, which have their own certification procedures.

"To fire a teacher who has tenure, you have to go through a long, drawn-out and expensive proceeding. So, it's not uncommon for teachers to have their certificates suspended for a year. In the long run, it's cheaper."

But is it the responsible action to take?

Signorraci offers a candid "No. Absolutely not" answer to that question.

He expressed considerable dismay that in one instance, state officials opted for a one-year suspension of a teacher convicted on federal charges for selling heroin and cocaine and conspiracy to distribute the illegal drugs. The court awarded five years of probation.

In another case a teacher "walked away" with resignation after sharing marijuana and having sex with a 14-year-old girl.

"It's so darn frustrating that the courts will allow the person, just because he is a teacher, to plea to a reduced charge. So for us to take action, we have to reconstruct the court case," said the New York investigator.

"It just seems the person who commits the worst kinds of acts always has the greatest attorney and gets off lightly."

Signoracci, a former investigator for a district attorney's office, attacks his job aggressively and claims he has "things under control," considering his heavy workload.

But without the ability to conduct extensive background checks on teachers and applicants for teaching certificates, he fears the unknown—the grim possibility that undesirable teachers are hiding in the classrooms.

"The biggest problem is we don't know how big the problem is, and that's pretty scary," he said.

At least New York is trying to do something about the problem, say officials in some states that are hampered by lack of procedures or weak laws.

The fact is New York, even with its obvious shortcomings in the system it uses to detect and remove "bad apple" teachers from the classrooms, ranks among the top 10 states in this area when compared to other education departments across the country.

Officials in several states admit they believe it is a real possibility that persons convicted of offenses that would make them unfit as school teachers are currently in the classrooms.

The systems in effect in some states invite that situation.

"We have teachers in the school system who have been convicted of felonies—drug dealing, armed robbery and other crimes. They're in the classroom right now and there's nothing we can do about it," said a Department of Education employee in Louisiana who agreed to be interviewed by The News Chief, providing he be granted anonymity, for fear that he could lose his job.

"The situation here is a tragedy at best. It's a crime at worst. And I'm not talking about a problem that's just restricted to Florida or Louisiana. I'm willing to bet that it happens a lot more than people think. As far as I'm concerned, it's a national problem," said the education department employee.

At least one Louisiana state education official is willing to talk on the record about the problem.

Robert Crew, director of teacher certification for the Louisiana Department of Education, said he's unaware of convicted felons actually teaching in the classrooms, But he said he thinks there is a strong possibility that convicted felons have teaching certificates.

"I know there are convicted felons with certificates, but I don't think they're in the classrooms . . . But, the problem is, right now, the only way to revoke a teaching certificate in this state is if it were obtained by fraud," Crew said in a July interview.

"We also have an attorney general's opinion that we can't revoke a teaching certificate unless the individual is employed," he said.

"There's nothing to prohibit us from certifying a person who is convicted of a felony. But we hope to resolve that problem soon."

The state's Department of Education has proposed a rule that would allow the Board of Elementary and Secondary Education to revoke the teaching certificate of teachers who are convicted of murder, rape or sexual or physical abuse of children. Crew said he expected the rule, which was tentatively approved by the Board of Education in August, could go into effect in Louisiana later this year, barring any last-minute opposition from teacher unions.

But under Louisiana Education Department regulations, any new rule adopted would only apply to teachers who are not employed. Until they are fired or quit a job, the state can't take away their right to teach, according to education officials.

Louisiana's situation is not unique, by any means. In Arkansas and several other states, a prior felony conviction doesn't constitute automatic grounds for revocation of a teaching certificate.

And in Maryland, anything goes.

The state issues teaching certificates, but doesn't take them away.

You can be fired for gross misconduct unbecoming of a teacher in Maryland. You can even be convicted of murder.

But because of a state philosophy that refers evaluation of moral character of teaching candidates to consideration by local school districts in the hiring process, notorious convicted killers like Florida's Ted Bundy would have no problem receiving a teaching certificate from Maryland, providing he fulfilled all the academic requirements.

As bad as that sounds, it's a fact that not even Maryland state education officials will deny.

Maine to Hawaii—How Are Teachers Checked?

Editor's note: Since late March, The News Chief has published numerous stories chronicling flaws in Florida's teacher certification program which enabled dozens of convicted felons to be certified as school teachers.

The newspaper also reported on lax disciplinary measures taken against educators who were involved in misconduct warranting revocation of their teaching certificates.

State officials later credited the newspaper's findings with contributing to the passage of a new state law that will require first-time educators to undergo more thorough criminal background checks in the future.

The editors of The News Chief decided to take a look and see how the Florida situation compares to other states throughout the nation.

During more than two months of research from June through August, News Chief staff writer Mark Vogler, the author of "The Bad Apples of Education" series, conducted a survey of state education departments throughout the nation on their policies for handling teacher misconduct cases and how they conduct criminal background checks of applicants for teaching certificates.

Here are some of the highlights of Vogler's survey and summary comments from officials he interviewed:

ALABAMA

"This has not proved to be a problem area at the present time," according to a response to The News Chief survey by this state's Department of Education. "This ('Bad Apples of Education') is not common in Alabama," claim state education officials.

Alabama is one of 14 states that doesn't request information about an individual's criminal background. It doesn't request information about revocation from other states. And officials say there is no agency and procedure for investigating teacher misconduct. "This is done at the local level," say officials. The state reports three revocations over the last five years.

ALASKA

"The state doesn't fingerprint teachers, but three of our school districts do that. We see it as a local responsibility," said Charlie Mae Moore, teacher certification administrator for Alaska's Department of Education.

The state does request information about criminal background and prior certificate revocations, but has no background check at the state level. There is a Professional Teaching Practices Commission which reviews misconduct allegations involving teachers. The state didn't provide statistics on revocations, although Florida files show Alaska has revoked four certificates over the last five years.

ARIZONA

"The Bad Apples of Education is common to all states. However, not to the degree as in Florida," said officials at the Arizona Department of Education who acknowledge the state is not doing enough in conducting criminal background checks of teacher applicants.

The certificate application does request information about criminal background and whether an applicant has ever had a teaching certificate revoked. But there are no checks. And officials recommend that an FBI criminal background check be required as part of the application process. Arizona reports the revocation of 14 certificates over the last five years, and that information is avilable in Florida files.

ARKANSAS

"Convicted felons could be school teachers in Arkansas because we don't investigate criminal background information as part of the teacher certification process," said Austin Hanner, coordinator of the Office of Teacher Education and Certification. "There's no question that convicted felons can get teaching certificates, because it's not an issue here," said Hanner.

Arkansas' teacher certificate application does request information about revocations of teacher certificates. But there is no request for information about an applicant's criminal background. Hanner says his state doesn't have an agency and procedure for investigating teacher misconduct cases. Arkansas was unable to provide statistics on revocations, although Florida records show the state has never revoked a certificate.

CALIFORNIA

"The Florida situation is very similar to the California situation in 1979-80. Our agency undertook and with the aid of the Legislature, enacted a series of reforms since that time," said Dr. John F. Brown, executive secretary of California's Commission on Teacher Credentialing.

California is one of two states that routinely fingerprints every teaching applicant. The state requests information about criminal background and revocation. It conducts a very thorough background check, which is considered by many states to be the best in the nation. There is an agency which conducts very aggressive investigations of misconduct allegations involving teachers. California reports 315 revocations over the last five years, and that information is available in Florida files.

COLORADO

"(State) Statute requires persons with criminal backgrounds not to be discriminated against if rehabilitation occurs," responded officials of Colorado's Department of Education, alluding to problems the state may have even if it discovers an applicant has criminal past.

Colorado does request in its application information about prior criminal background and whether a certificate has ever been revoked. There is an agency and procedure for investigating teacher misconduct cases. No criminal background checks. Officials acknowledge Florida's problem is "common" throughout the nation and admit more could be done in Colorado, where the state reports 10 revocations of teaching certificates over the last five years, four more than the revocation notices received by Florida.

CONNECTICUT

"The state probably could do more, but we really haven't thought about it as an issue," said Nicholas M. Rascati, of the Teacher Certification Unit of Connecticut's Department of Education. "It's a matter that has really been left up to the local districts."

The state requests criminal background information, but doesn't conduct a check of applicants. No information is sought on prior certificate revocations. There is no agency and procedure to investigate teacher misconduct allegations. The state attorney general has recommended that teachers be fingerprinted, although the education department has not been the need for such a proposal. Connecticut reports one certificate revocation over the last five years, although Florida files show no receipt of a revocation notice from the state since 1972.

DELAWARE

"Being a very small state, the State of Delaware has a strong belief in local autonomy. And if the administrators do their job, this shouldn't be a problem," said Ervin Marsh, state supervisor of the Delaware Department of Instructions certification and personnel division.

But Marsh says he recognizes the need to do more. The state does request information about criminal background and prior certificate revocations. But there is no check of applicant's background. There is no agency to investigate teacher misconduct allegations. Delaware reports no revocations over the past five years, and Florida files show no receipt of a revocation notice from that state since 1965.

FLORIDA

"We have recognized the problem in Florida and are doing all we can to improve the situation," said Garfield Wilson, director of teacher education, certification and staff development for the Florida Department of Education.

Beginning in October, Florida will become only the third state to fingerprint teacher applicants. The state requests information on its application regarding criminal background, but doesn't conduct a check. There is no request for information concerning prior revocations. The state has an aggressive agency and procedure for investigating teacher misconduct allegations. And the 61 revocations in Florida during the fiscal year which ended June 30 is more than any state—except California—has reported over the last five years. The state has revoked more than 200 certificates over the last five years.

GEORGIA

"I have this grandiose idea of wanting to see educators become the epitome of professionalism, and fingerprinting is just a part of that step, said James J. Carter, associate executive director of Georgia's Professional Practices Commission."I anticipate the commission will take a position on the issue this year."

The state requests information about criminal background and previous certificate revocations but there is no background check. Georgia's Professional Practices Commission was modeled 10 years ago after the commission in Florida, and it executive director was recruited from Florida. The commission has an aggressive reputation for investigating teacher misconduct cases. Georgia reports 26 revocations over the last five years, and that information has been provided to Florida.

HAWAII

"More could be done in prechecking (criminal background of teacher applicants) prior to certification," said Kathleen Jones, public relations officer for the Hawaii Department of Education. The problem experienced by Florida is "probably common to many states, but so far, has not been a problem in Hawaii, probably due to our isolation from the other 49 states, our structure as a single school district and in recent years, the fact that Hawaii has an oversupply of qualified teachers and has done very little hiring from other states."

Hawaii reports no revocations over the last five years. The application for teacher certification doesn't request information about criminal background or previous certificate revocations. There are no criminal background checks initiated at the state level, although there is an agency and procedure for investigating teacher misconduct allegations.

IDAHO

"What we do is adequate for our state," said officials of the Idaho Department of Education. The officials say they are doing all they can to screen out undesirable teachers. They request information related to criminal background and teaching certificate revocations. But there is no criminal background check to determine whether the applicant is telling the truth.

Idaho does have an agency and procedure for investigating misconduct allegations involving teachers. The state reports 30 revocations of teaching certificates over the last five years, although Florida files show only 10 revocations.

ILLINOIS

"It is indeed possible that we have people with undesirable criminal background in our classrooms because we don't have any procedures to check these people out, said Barry Weiss, certificate placement manager for the Illinois State Board of Education. "And I think it's about time we did something about it. I for one am going to discuss this issue with our legal department."

The state does request information about prior revocations and criminal background of applicant. But there is no check conducted at the state level and there is no agency and procedure for investigating misconduct allegations involving teachers. Illinois didn't furnish any statistics on revocations. But Florida files show the state hasn't revoked a certificate since 1973.

INDIANA

"We can't guarantee that there are no teachers with criminal backgrounds in the classrooms because we don't conduct any such checks," said Linda Cummins, a spokesperson for the Indiana Department of Education. "We could do more in this area."

The state doesn't request any information on criminal background or ask whether an applicant has ever had a certificate revoked. There is no agency and procedure for investigating teacher misconduct. Indiana reports no revocations over the last five years. Florida hasn't received a revocation notice from this state since 1976. "Our revocation authority is limited to conviction of a felony directly related to ability to teach," said Ms. Cummins.

IOWA

"We're apparently not doing enough in this area and certainly could be doing something about it," said Dr. Orrin Nearhoof, director of Teacher Education and Certification for the Iowa Department of Public Instruction.

The state doesn't request information about criminal background or prior revocation of teaching certificates. There is no check at the state level. There is an agency and procedure for investigating teacher misconduct allegations. The state didn't provide information on revocations, although Florida files say they are aware of eight revocations in Iowa over the past five years.

KANSAS

"I do feel that Kansas could do more in conducting criminal background investigations of teaching applicants," said Kathleen A. Homlish, director of Certification, Teacher Education and Accreditation for the Kansas Department of Education. "A procedures/system could be developed at the state level regarding criminal security

hecks of applicants for teaching certifiates."

She said the state has no agency and administrative procedure for investigating misonduct allegations involving teachers, although such a concept is under study. Kansas does request criminal background nd teacher certificate revocation informaion, but conducts no criminal background nvestigation of its applicants. The state reorts seven revocations, although Florida ecords show none.

KENTUCKY

Problems with unfit teachers encountered by Florida are "common throughout the nation," according to William C. Sanders Jr., unit director for certification at the Kentucky Department of Education.

Sanders said his state is not doing enough to keep undersirable teachers with criminal backgrounds out of the classroom. He said he can't recall any revocations of teaching certificates in the last 28 years. The state requests criminal background information from the applicant but doesn't ask whether a teaching certificate has ever been revoked. There is no statewide criminal background check on school teachers. Sanders' recommendation: When the state learns of a criminal conviction of a teacher, "take action and revoke certificate."

LOUISIANA

"I think it's time. We need this (background checks) desperately," said Robert Crew, director of teacher certification for the Louisiana Department of Education.

The state doesn't request information about criminal background or revocation of teaching certificates. There is no background check. There is no agency and procedure for investigating teacher misconduct allegations because the governor recently disbanded the professional practices commission. "I know there are convicted felons with certificates," says Crew, pointing out weaknesses in the state's revocation policies which don't restrict a convicted felon from holding a certificate. Louisiana didn't provide revocation information, although Florida files show receipt of three revocation notices from that state over the last five years.

MAINE

"Obviously, there's a great deal more we could do if the time, personnel and finances were available. As it stands right now, we assume that anybody who applies for a teaching certificate is of good moral character, and we don't check it out," said Steven R. Hamblin, director of certification and placement at the Maine Department of Educational and Cultural Services.

The state requests criminal background and revocation information from applicants, but no background check is conducted. There is an agency and process to investigate misconduct allegations involving teachers. Maine reports three revocations over the last five years, although Florida hasn't received a revocation notice from the state since 1963.

MARYLAND

"Our job is to review academic credentials, not moral character or whether an applicant has a criminal background. That's an employment issue which can best be addressed by the local school districts," said Herman E. Behling Jr., assistant state superintendent in certification and accreditation at the Maryland State Department of Education.

Criminal background and revocation information is not an issue in the certification process in this state. There is no background check of any kind. There is no revocation process. There is no agency and procedure to investigate teacher misconduct allegations.

MASSACHUSETTS

"Massachusetts agrees with you (Florida) about the problem—but not about the remedy," said Jim Case, associate commissioner of education at the Massachusetts Department of Education. "It does not seem to me we have a practical responsibility to carry out police investigations of our own, independent of the police. Because of privacy laws, you have to show me a conviction before we can take action against a certificate."

The state requests information about an applicant's criminal background or prior revocation of a teaching certificate. But there is no background check. There is no agency and procedure for investigating allegations of misconduct involving school teachers. Massachusetts reports two certificate revocations over the last five years. And that information is available in Florida files.

MICHIGAN

"We do check on people from out-of-state, but why should we advertise what checks we're running? What you're doing by publishing what states do, is making it easy for the guy who is the bad apple to find the weaknesses and take advantage of them," said Tom Farrell, assistant superintendent for public affairs of Michigan's Department of Education.

Although the state doesn't fingerprint teacher applicants, it does check the records of out-of-state applicants, according to Farrell, who declined to elaborate. The state requests information from an applicant on criminal background and prior teaching certificate revocations. There is an agency to investigate teacher misconduct allegations. Michigan reports 20 revocations over the last five years, 10 more than what Florida officials are aware of.

MINNESOTA

"There's no need to do any more. We're doing a fine job, and it's not a problem for us," said Ken Peatross, of the Minnesota Department of Education.

The state requests information about criminal background and prior certification revocations, but conducts no background checks on its teaching applicants. The attorney general investigates teacher misconduct allegations. Minnesota reports 30 revocations over the last five years, 18 more than what Florida files show.

MISSISSIPPI

"We've got a very strong weakness in this area. We are concerned about it and hope to do something to improve the situation in the future," said Dr. Robert H. Cheeseman, staff consultant to the Office of Teacher Certification at Mississippi's Department of Education.

The state application doesn't request information about prior criminal record or certificate revocations. There is no background check. There is no agency to investigate teacher misconduct allegations, although officials are studying the creation of a professional practices commission. Mississippi reports the revocation of three certificates over a 5-year period, although Florida files show no record of a revocation notice from that state since 1962.

MISSOURI

Officials at the Missouri Department of Elementary and Secondary Education acknowledge their certification program is not doing enough in screening out teacher applicants with undesirable criminal backgrounds. The certificate application requests information about prior revocation of teaching certificate, but doesn't ask the question of the applicant's criminal background. There is no criminal background check.

Officials say they believe problems experienced by Florida are common. There is no state agency and procedure to investigate teacher misconduct allegations unless a request comes from the local district. Missouri reports the revocation of 20 teaching certificates over the last five years, information that has been reported to Florida.

MONTANA

"It's not a problem for us and we don't need to do any more than what we're already doing," said Dr. John Voorhis, director of Teacher Certification and Education. Voorhis said he doesn't consider it the responsibility of the state or the local school boards to conduct criminal background checks of teacher applicants.

The state does request criminal background information and ask each applicant whether a certificate has ever been revoked. But no criminal background check. There is no agency to investigate teacher misconduct. Montana reports it has revoked 15 teaching certificates over the last five years, 12 more than what are reported in Florida files.

NEBRASKA

"I definitely do think we can do more. I just think a routine check through the FBI and state criminal justice system should be conducted prior to the issuance of a license," says Robert Wagner, executive director for the Nebraska Professional Practices Commission, the agency which investigates misconduct allegations in that state.

The state seeks criminal background and revocation information on each applicant, but conducts no formal check. Nebraska officials were unable to provide statistics on revocation, although Florida records show the state has not revoked a certificate since 1978. "I have been concerned in Nebraska about the state leaving this matter up to the local districts. I'm sure we should have six to eight revocations a year, maybe more," says Wagner.

NEVADA

"Our system is rather thorough. I would think that it would be a great deterrent to a lot of undesirable people who would want to get in," says Doug Stoker, director of certification for the Nevada Department of Education. His state is one of two in the nation that routinely fingerprints educators to determine whether they have a criminal background that would make them unfit to teach.

Improvements in that system are "not necessary," according to Stoker. Nevada reports six revocations over the last five years, two more than what it has reported to Florida. Stoker said it takes an average of three weeks for his state to receive criminal background information about applicants.

NEW HAMPSHIRE

"I doubt it's a major problem for us. But if it were, we probably wouldn't know about it because that kind of thing is usually handled at the local level," said George Lewis,

director of teacher certfication at the New Hampshire State Department of Education.

The state doesn't request any criminal background or revocation information. There is no background check. There is no agency and procedure for investigating misconduct allegations involving teachers. New Hampshire reports the revocation of four certificates over the past five years, and that information was made available to Florida.

NEW JERSEY

"There's no question about the level of interest in this area. When we learn of something, we leave no stone unturned. But, perhaps more could be done in screening teacher applicants," according to Dr. Celeste M. Rorro, director of teacher certification for the New Jersey Department of Education.

"The state doesn't request criminal background information and conducts no check of its teacher applicants. It does request information on previous revocations. There is an agency and procedure for investigating misconduct allegations involving teachers. New Jersey reports 28 revocations over the last five years, and that information has been received by Florida.

NEW MEXICO

"It has not been a big issue. I don't see where there's a responsibility for the state to do this (criminal background checks)," says Jim Pierce, director of certification for the New Mexico State Department of Education.

The state does not request information and prior certificate revocations and criminal background, but conducts no check to determine whether a teaching applicant is telling the truth. Pierce says there is no agency and procedure for investigating teacher misconduct allegations. New Mexico didn't provide revocation information, although Florida files has received one revocation notice from New Mexico over the last five years.

NEW YORK

"My major concern is the willingness on the part of attorneys to enter into deals with unions and school boards to squash a revocation and hide the record so that for all practical purposes—the guy resigns on his own volition, and his record is clean," says Charles C. Mackey Jr., supervisor of teacher education for the New York State Education Department.

The state requests criminal background and revocation information, but conducts no check. New York City does fingerprint school teachers, but operates independently of the state. There is an aggressive agency and procedure for investigating misconduct allegations involving teachers. New York reports 53 revocations over the last five years, 33 more than Florida is aware of.

NORTH CAROLINA

"We would be opposed to fingerprinting (school teachers) in our state because we don't see the problem as substantial as in Florida. It would be sort of like using a 16 inch gun to shoot a fly," said J. Arthur Taylor, director of the Division of Certification for the North Carolina Department of Public Instruction. "But certainly it's not an issue to be ignored."

The state requests criminal background and revocation information but conducts no background checks of its applicants. There is no agency and procedure to investigate misconduct allegations involving teachers. North Carolina reports eight revocations over the past five years—three more than the number of revocation notices than Florida has received from the state.

NORTH DAKOTA

"The problem isn't that great here. There's no need to do any more than we already have been doing," said Ordean Lindermann, director of teacher certification for the North Dakota Department of Public Instruction.

The state does request information about criminal background and prior certificate revocations, but conducts no background checks on its applicants. There is a professional practices commission which investigates misconduct complaints against teachers. North Dakota has revoked three certificates over the last five years, and that information is available in Florida files.

OHIO

"We don't have any indication that it's a problem. If it were a problem, we'd certainly know about it," said Dr. Robert Bowers, assistant superintendent of public instruction at Ohio's Department of Education.

The state requests information about criminal background and prior revocations, but conducts no background check on each applicant. There is an agency that investigates misconduct allegations involving teachers. Ohio reports 60 revocations over the last five years, although Florida files show no receipt of a revocation notice from that state since 1976.

OKLAHOMA

"We rely on other states to notify us when they revoke a certificate," said officials of Oklahoma's Department of Education. Yet, the application for teacher certification doesn't even ask whether an applicant has had a previous teaching revoked. The application does request infomation about criminal background. But the state doesn't conduct a check to see whether an applicant is telling the truth about prior arrest or conviction information. Officials say more could be done in this area and recommends that the state obtain access to the FBI's crime information system.

State officials say they have no agency and administrative procedure to investigate misconduct allegations involving teachers. The state reports two revocations of teaching certificates over the last five years.

OREGON

"There's a growing trend across this country in expunging things, and that includes some very serious sex-related matters. That ought to be part of your package," said Dick Jones, executive secretary of Oregon's Teacher Standards and Practices Commission, which reviews teacher misconduct allegations. "How many states can have people pleading guilty to sex-related offenses and have the record wiped clean? We got very liberal on these things 10 years ago and have done a number of things that protect the offender more than the victim."

The state requests information on criminal background and prior revocations. A small percentage of teacher applicants are subjected to a random criminal background check that doesn't involve fingerprinting. "We're not pleased with the system, it could be improved," says Jones. Oregon reports 50 revocations over the last five years, although Florida files show it hasn't received a revocation notice from that state since 1973.

PENNSYLVANIA

"Yes," more could be done by Pennsylvania. "Yes," the situation experienced by Florida with "Bad Apple" teachers is a common problem that exists by many states throughout the nation. "No," the state isn't doing enough to ensure that only individuals of high moral character—free of undesirable criminal backgrounds—are allowed access to the classrooms. That's how officials of the Pennsylvania Department of Education responded to the survey.

Applicants are required to furnish criminal background information. No information is sought on previous revocations. The state doesn't conduct criminal backgrounds of teaching applicants, but education officials have recommend that all applications be checked against police records. The state reports the revocation of 13 teaching certificates over the last five years—six more than what Florida records show.

RHODE ISLAND

"I think we do need some enabling legislation to conduct criminal background checks of certificate applicants. But I don't think it's as big a problem here as in your larger states. I'm not saying Rhode Island is lily white either," said Ed Dambruch, director of teacher certification for the state's Department of Education.

The state doesn't request information related to criminal background or previous certificate revocations. There is no background check. There is no agency and procedure to investigate teacher misconduct allegations. Rhode Island reports no revocations in the last five years, and Florida has never received a revocation notice from the state. But education officials plan improvements in the revocation process.

SOUTH CAROLINA

"At this point, because the school district is the employing agency, that's where the burden lies," said James H. Turner, chief of the state Education Department's Office of Teacher Education and Certification. "My personal view is that perhaps this is the one thing that's missing."

The state requests information about criminal background, but conducts no background check. An applicant is not required to produce information about prior revocations. There is no agency and procedure to investigate misconduct allegations involving teachers. South Carolina reports one certificate revocation over the last five years, although Florida files show no receipt of a revocation notice since 1951.

SOUTH DAKOTA

"No," South Dakota is not doing enough in conducting criminal background checks of its teaching applicants, according to James O. Hansen, state superintendent of the South Dakota Department of Education and Cultural Affairs. Hansen was the only official to answer the survey within a week of its mailout to education departments on June 5, and he responded within three days, suggesting that his state conduct "computer cross checks" as a remedy to its problems.

The state has revoked four teaching certificates over the last five years, identical to information available in Florida files. Although the state requests criminal background information, no request is made for prior revocation of teaching certificates. There are no criminal background checks at the state level.

TENNESSEE

"(We) Do not have enough information at this time to make a judgment," said officials of the Tennessee Department of Education over the need for better background checks of school teachers.

The state seeks no information as to whether an applicant has a criminal past or has had a certificate revoked. There is no criminal background check at the state level and no agency or procedure to investigate misconduct allegations involving teachers. Teachers are required by law to report to their employing school boards any criminal background information. Tennessee officials say the state has revoked "possibly one, by court order" over the last five years, although Florida files show no record of any certificate revocation.

TEXAS

"I think this is a common problem that we all share," said M. Starks McCullough, director of the Division of Teacher Certification for the Texas Education Agency, suggesting that Florida's experience with undesirable teachers is a national problem. Texas could do more, she says, adding "Having access to FBI crime information would greatly assist us in screening out-of-state applicants."

Applicants are asked about criminal background and whether they have ever had a certificate revoked. State education officials and local school districts have authority to obtain information on any record of a felony or misdemeanor conviction through the Texas Department of Public Safety. But this check is limited to state offenses. Texas reports three revocations over the past five years, and that information is noted in Florida files.

UTAH

"Yes, I do think we can do more to improve the system," said Anna Jeanne Lund, supervisor of teacher certification for the Utah State Office of Education.

Although the state requests criminal background information and asks whether an applicant has ever had a teaching certificate revoked, the certification process doesn't include a background check. Utah is recognized as having an excellent Professional Practices Advisory Commission which investigates teacher misconduct allegations. The state didn't provide revocation information. Florida records show Utah has revoked nine certificates over the last five years.

VERMONT

"We have one school board member for every four teachers. That's a lot of surveillance. Our state is so small and rural, it hasn't been an issue . . . and if it were, it would be a political issue and get resolved. The Legislature watches us very closely and is very sensitive to the issue of child abuse," said Donn McCafferty, chief of Educational Resources and Basic Education in the state's Department of Education.

The state doesn't request criminal background or revocation information. There are no background checks. There is no agency and procedure for investigating teacher misconduct allegations. Vermont reports one revocation over the last five years. But Florida has never received a revocation notice from the state.

VIRGINIA

"I hate to admit the problem could be that bad that we need to change things. But it's worth it even if it prevents just one child molesting," said Byrd G. Latham, senior certification specialist for Virginia's Department of Education. "As a parent, I'm disturbed at what school administrators may not do in this state because of their hands being tied by the civil libertarians."

The state requests information about criminal background, but does not check. No information is sought on prior revocations. There is an agency and system for investigating teacher misconduct allegations, although the state doesn't appear to be aggressive in this area. Virginia reports one revocation over the past five years, and that information has been received by Florida.

WASHINGTON

"We could utilize some more things like getting checks through the FBI and state judicial system—using fingerprints as California has done—these are things that can be done," said Don Hair, director of certification for Washington's Superintendent of Public Instruction office. Hair says he perceives Florida's situation with unfit teachers as a common problem throughout the nation.

The state requests criminal background information and asks whether an applicant has ever had a teaching certificate revoked. But there is no criminal background check conducted at the state level. The state has an agency and procedure for investigating misconduct allegations involving teachers. Washington reports 35 revocations over a 5-year period, 12 more than what it has reported to Florida.

WEST VIRGINIA

"Yes," more could be done by the state in conducting criminal security checks of applicants for teaching certificates, said officials of the West Virginia Department of Education. The state seeks information about an applicant's criminal background and whether a teaching certificate has ever been revoked. But that's the extent of the background check.

Officials say West Virginia is lacking an agency and procedure to investigate misconduct allegations involving teachers. The state reports the revocation of 40 teaching certificates over the last five years, although Florida Department of Education files contained no information on revocations.

WISCONSIN

"It's not a concern to us. We're not interested in your survey . . . it looks like 12th grade research . . . it's not an issue here," said Lond Rodman, director for the Bureau of Teacher Certification and Education at the Wisconsin Department of Public Instruction. His state was the only one that refused to participate in the survey.

The certificate application does request criminal background information and does ask whether the applicant has ever had a certificate revoked. Fingerprinting is not required, so there appears to be no thorough criminal background check at the state level. Florida files show Wisconsin revoked six certificates over the last five years.

WYOMING

"It really hasn't been an issue here," said Gary Lane, an official at the Wyoming Department of Education. Wyoming reports no revocations over the last five years. And according to Florida files, it hasn't received a revocation notice from Wyoming since 1976.

The certificate application seeks criminal background information and asks whether the applicant has ever had a certificate revoked. But there is no formal criminal background check conducted at the state level. Lane said the state has no agency and procedure for investigating misconduct allegations involving teachers.

FLORIDA CRACKING DOWN ON UNDESIRABLES

TALLAHASSEE.—When it comes to attracting the nation's most undersirable collection of candidates for educators, Florida has the reputation for being the East Coast magnet.

At least no other state west of California can take credit for employing dozens of convicted felons in its classrooms.

But next month, Florida should begin to shed its nasty image of being the ideal hideway spot for bad apple teachers when it becomes the third state in the nation—the first in the East—to fingerprint applicants for teaching certificates.

On Oct. 1, a state and criminal background check will be a requirement for first-time certification, as the result of a new law passed by the 1984 Florida Legislature.

"It certainly should help us to weed some of the bad ones out of the profession," said Rod Davis, administrator of teacher certification for the state Department of Education.

"I don't know whether we're going to track down a lot of criminals trying to get jobs as teachers. But I think it will be a big deterrent more than anything," he said.

"I think the overall effect will be that once the finger-print card shows up in the mail, anyone with something to hide is going to think twice before seeking that certificate."

Davis' office had 20,000 fingerprint cards on hand to accommodate the projected number of new certificate applications during the first year of the program.

California and Nevada have used fingerprints to conduct state and federal criminal background checks on their teaching applicants for several years.

This is how the new law will work:

Certification fees will be increased by $18 to cover the costs of the background check.

A complete set of fingerprint cards taken by any sworn law enforcement officer will be filed by each applicant.

The Florida Department of Law Enforcement will be able to determine within a one-to-four day period whether an individual has a criminal background record.

It will take 10 to 21 days for the Federal Bureau of Investigation to conduct a national background check.

"This is a part of the war we've declared on the child molester," said Rep. Fred Lippman in an interview following the passage of the fingerprinting bill he had authored as part of a child protection legislative package.

"It's going to strengthen our efforts to break the cycle of violence that has been committed by a small minority in the education field," said the Hollywood Democrat.

"We've seen too many cases of child molestation in the schools that could have been avoided by conducting background checks. Florida has said it's time to end this, and I hope other states will follow our path."

Lippman, a short man who has been recognized as a legislative giant in child protection reforms, is chairman of a House panel that is scheduled next year to review the performance of Florida's teacher disciplinary process.

The Education Practices Commission, the agency which determines whether an educator's certificate should be revoked or suspended is up for Sunset Review.

Because of the commission's aggressive record over its four years of existence, capitol observers say the question is not whether the commission should continue—but how it can be improved.

Five administrators, an equal number of teachers and three lay (of whom two are school board members) sit on the panel.

The commission has revoked 186 teaching certificates during its life—more than all states on the East Coast combined over the last five years.

A News Chief analysis of state education departments in East Coast states shows that Florida appears to be the most aggressive when it comes to policing the teaching ranks.

Item: Florida education officials are investigating possible misconduct in the case of a band instructor who had been hired by a Louisiana school district on the basis of a favorable recommendation from the same school district that fired him. Although Louisiana school officials terminated the man's contract after they learned of his revoked teaching certificate in Florida, it is doubtful that the teacher's misconduct would have cost him his certificate in most East Coast states.

The teacher lost his license in Florida for "gross immorality." He was cited for misconduct that involved the use of drugs and romantic relationships with minor female students.

As serious as the allegations appear, few states would be in a position to take disciplinary action.

Why?

(1) No criminal charges were ever filed in connection with the case. Even with allegations of an immoral nature, most state education departments on the eastern seaboard wouldn't act without a court conviction in such cases.

(2) Even if the states had an administrative hearing procedure similar to Florida that would allow disciplinary action in this case, they would have had difficulty because of the lack of an agency to investigate teacher misconduct cases.

The teacher was initially suspended after he was observed in a motel with a minor female student.

An investigation by one of the four teacher consultants for the Edcuation Department's Professional Practices Services later turned up allegations of drug use and other relations with female students over a two-year period.

"It's interesting that here in Florida we are investigating a subsidiary matter of a case that perhaps wouldn't result in a revocation in other states," said Donald Griesheimer, exectuvie director of the Education Practices Commission.

In Massachusetts where civil libertarian views seem to thrive, the idea of fingerprinting a school teacher is especially repulsive. And some officials say such a policy would clash with state privacy laws.

Furthermore, the money and effort needed for criminal background checks—even if possible—would hardly seem justified economically in light of the fact that a handful of unfit teachers would be screened out at the expense of imposing hardships on the vast majority of good teachers, suggested one Massachusetts official.

Massachusetts education officials, who have barely begun working with a revocation procedure adopted in 1982, subscribe to an attitude of "show me a conviction" before they disbar a teacher from the profession.

And that means individuals who agree to resign in order to avoid prosecution of sex-related crimes involving students can still maintain their teaching certificates.

But that position—which appears to be a common stance taken by many states—is not the philosophy of officials in Maine, including Ms. George, who points out the value of having procedures for civil administrative action.

"When we move against a certificate, we do not say pending the outcome of a criminal conviction," she said.

"I think the challenge is to have an overall process which is as effective as possible, but does not hinge on the outcome of what goes on in the courts. The criminal process is not the same as the employment process. They should be played out separately."

In the state of Rhode Island, where no teaching certificates have been revoked during the last five years, attempts by the state attorney general's office to prosecute allegations of sexual misconduct involving school teachers has developed into a political issue.

Denny Roberts, the Democrat incumbent attorney general, came under criticism from his Republican challenger in June after his office, for the second straight month, lost a jury trial involving the prosecution of Rhode Island educators facing sex crimes allegations.

A petition signed by educators called "Teachers For Violet," organized a seminar in which candidate Arlene Violet, a former educator and nun, gave advice to educators on how to defend themselves from the kinds of unwarranted prosecutions which "happen to educators every day."

One of Roberts' prosecutors remarked following the second acquittal: "I feel badly because I know what these families went through. It's unfortunate, they'll be a lot less people willing to come forward to report this kind of thing in the future."

But Roberts' re-election staff also offered an observation about the potential political overtones while defending its prosecution of the educators.

"Is Miss Violet saying that if she is elected Rhode Island's chief prosecutor, she will not vigorously investigate and prosecute criminal allegations lodged against teachers by children and their parents?," asked Paul E. Hanaway, the attorney general's campaign manager.

"As long as Dennis Roberts is attorney general, parents of Rhode Island school children and all Rhode Islanders can be assured that allegations of sexual assault and other misconduct by school teachers will be taken very seriously by police and prosecuted whenever the evidence dictates a teacher's guilt or innocence should be determined by a jury."

But some education and political observers in Rhode Island wondered whether Roberts' statements were purely campaign rhetoric and whether the two trial setbacks might discourage the attorney general's office from taking teachers to court in the future.

"Certainly the situation has been politicized by the other side and by some teachers who feel this was malicious prosecution," said Daniel Hackett, a spokesman for Roberts' office.

"Our losing the cases certainly doesn't help to enhance the credibility of the criminal justice system. Hopefully, the damage is not irreparable. Hopefully, people will still come forward. They should come forward."

In Concord, N.H., George Lewis said he doesn't consider criminal background screening of teacher applicants to be a problem even though the state's teacher certificate application doesn't concern itself with criminal background information.

Vermont, Rhode Island, New Jersey, and Maryland are the other eastern states that don't ask whether a prospective teacher has ever been convicted of a crime other than a routine traffic violation.

"It hasn't really been an issue with us and that's because of the relative infrequency of cases that have been brought to our attention," said Lewis, who is director of the New Hampshire Education Department's Office of Teacher Certification.

"What is a bigger issue and concern to me is the instances of individuals who engage in inappropriate activity such as child molesting," he said.

"Perhaps we aren't doing enough screening. But certainly we could do more monitoring of some unprofessional acts involving teachers."

New Hampshire has revoked four teaching certificates during the last four years—the most of any New England state. But like most of the states in the region, it has no agency and procedure for investigating allegations of teacher misconduct.

"I honestly don't know what would happen if some allegations came to the attention of this office. By the time we hear about it, there's already prosecution. And we generally wait and see what the court proceedings are," said Lewis.

"If I had a complaint, I would probably refer it to the attorney general's office for investigation or advice," he said.

In Hartford, Conn. Attorney General Joseph Lieberman appears to be better briefed on the need to screen criminal backgrounds than officials of the state's Department of Education.

He has proposed legislation that would require the fingerprinting of school teachers.

But in Connecticut, where only two teaching certificates have been revoked during the past dozen years, education officials don't recognize the problem or the need.

Ronald Harris, an attorney in the Education Department's legal affairs office, offers a candid explanation as to why the Hartford Courant newsroom library chronicles a batch of morals cases involving educators—while no action is taken on teaching certificates.

"If there is a problem with child molestation involving a teacher, the cases are usually handled locally. And some people do the laundry better than others. What can I say," said Harris.

"We have studies that show that superintendents throughout Connecticut are reluctant to report instances of violence and vandalism in the schools," he said.

"Unfortunately, the bottom line is this: the professional reputations of superintendents are at stake. They're not going to allow their reputations to be smirched by rampant reports by violence, vandalism and sexual abuse in their own schools. That perhaps is a more realistic problem than anything else—the outright reluctance to acknowledge a problem."

There are other states that are just as lax in dealing with teacher misconduct.

Records show that the state Department of Public Instruction in Delaware hasn't initiated revocation proceedings against a teaching certificate since 1965.

Yet, the state has been hit with several sex scandals involving educators in recent years, including one case where a Dover music teacher had pleaded guilty to a charge of second-degree sodomy involving a 14-year-old male student.

If he decided to seek another job in the teaching profession, there will be no record of revocation action.

Delaware regards the criminal background checks and teacher disciplinary action to be

a local, home rule matter, according to Ervin Marsh, state supervisor of the Delaware Department of Public Instruction's certification and personnel division.

"Being a small state, the state of Delaware has a strong belief in local autonomy," said Marsh.

"And if administrators do their job, this shouldn't be a problem. I think the most important thing a personnel director can do is check out the references thoroughly and ask the right questions at the interview."

One Delaware school administrator said he asked the right questions, but didn't obtain adequate information which could have "saved us some embarrassment."

The official said a questionable past of a former band instructor his school district hired came to light only after similar problems involving morals allegations resulted in the band instructor's resignation.

A Maryland school district concealed the band instructor's past.

"I don't think the revocation process in Delaware is very dependable, and perhaps it could be tightened up," said the offical, who allowed the band instructor to leave the school system with dignity.

The conditions which made possible the certification of dozens of convicted felons—child molesters, sex offenders, drug peddlers and thieves—as school teachers are unique to Florida and just don't exist in their states, some say.

But despite well-publicized problems that led to Florida enacting a law to require fingerprinting of first-time teaching applicants, Florida sizes up as the most aggressive state on the East Coast when it comes to policing the ranks of the education profession.

Beginning in October, Florida will have the most thorough criminal background check of any East Coast state when it becomes only the third state in the nation to adopt fingerprinting as a statewide policy for teacher certification.

In late March, The News Chief published a special report revealing flaws in Florida's teacher certification program which enabled convicted felons, in more than three dozen cases, to gain access to the classroom by lying about their criminal backgrounds.

Are things really so bad in Florida that it's so easy for child molesters and drug peddlers to gain access to the classrooms?

Or could such a thing happen in other states?

During a month-long tour of 14 states from June to July, the newspaper was unable to document evidence of dozens of convicted felons because most states don't maintain detailed records on teacher misconduct. And most states seldom revoke teaching certificates.

But, this fact-finding mission revealed a host of flaws—some more serious than what existed in Florida—which could enable undesirable job applicants to be certified as teachers.

And an overall lack of enforcement policies for policing the teaching ranks appear to make it easier for teachers who have been identified as "bad apples" to move on to jobs in other school districts or other states.

Item: Education Departments in eight states on the East Coast have revoked the same number or fewer teacher certificates as Vermont during the last five years, although there is evidence of teachers involved in acts of misconduct which would have warranted removal from the teaching profession in Florida.

As far as state departments of education go, Maryland has a bigger claim to fame than Vermont in that its officials hold a perfect record in the area of teacher misconduct: there have been no revocations of teaching certificates.

Herman E. Behling Jr., assistant state superintendent in certification and accreditation, said he sees no reason for that to change either.

Factors as to whether a teacher has a criminal background which could make him unsuitable for the classroom is not a matter to be considered when Maryland issues a teaching certificate, he said.

"The certificate only means you have completed the courses and the proper programs which would qualify one to teach in the classroom. And you shouldn't read any more into it than that," said Behling.

"Our job is to review academic credentials, not moral character or whether an applicant has a criminal record. That's an employment issue which can best be addressed by the local school districts," he said.

"And we have confidence that the local school districts can properly do the job. They are very responsible, concerned people. We have one of the finest educatonal systems in the country," said Behling.

Some education officials in other states say they are shocked that Maryland doesn't revoke teaching certificates and argue that such a policy is a disservice to states which attempt to police the teaching ranks.

"Tell the gentleman in Maryland—'Don't send them (unfit teachers) here,' because we don't want their problems," said John F. Brown, executive secretary of California's Commission on Teacher Credentialing.

"I think that kind of situation (Maryland) is appalling. I never realized that kind of thing is going on. I might recommend that we won't hire teachers from Maryland and other states which fail to take responsible action to remove bad teachers from the profession," he said.

"Without a doubt, licensing of school teachers is a statewide responsibility and employment is a local matter. If we left the responsibility of weeding out bad teachers to the local (agencies), somebody who is unfit could go on to the next 10 school districts. And that's no way to police the profession."

Some teacher certification officials in states on the East Coast take the position that because they haven't detected any evidence of a problem with undesirable teachers being certified, there's no need to tighten up screening methods.

State officials in Maine acknowledge that it took a sex scandal involving administrators and staff at the Baxter School for the Deaf before it became apparent that laws and regulations for handling teacher misconduct cases had to be changed.

Allegations that students at the school were sexually and physically abused throughout a period of several years dating back to the mid-1970s first surfaced in early 1982 and sparked a five-month criminal investigation by state Attorney General James Tierney's office which later criticized inaction by education officials.

The attorney general's final report concluded that "inexcusable abdication" by the state Education Department in probing past allegations at the school "contributed to the atmosphere of intimidation" and prevented prosecution of most incidents because the statute of limitations had run out.

Ellen Egan George, an attorney for Maine's Department of Education, said there has been a greater awareness in Maine since the Baxter School scandal rocked the state, noting that "we've had about a dozen cases of sexual misconduct involving guidance counselors or teachers over the past two years—and six or seven of them have wound up going to jail.

"Just because we are a rural state doesn't mean we don't have a problem. It may not be quite as big as what you have in other states, but it's not the kind of thing that should be measured in numbers or percentages," she said.

"Numbers are absolutely irrelevant. If you have just one of these cases a year, it's a concern, or at least it should be."

Ms. George said the Baxter school controversy put a focus on the shortcomings of the state's teacher certificate revocation procedures as well as the need for background checks of screening applicants.

Officials at the Florida Department of Education's Professional Practices Services, the agency's investigative arm are puzzled as to why Maine education officials never pursued revocation action against a former Baxter School academic dean who quit the post before being implicated in an attorney general's report with allegations of sexual abuse involving male students.

The administrator later acquired work in a South Florida school district. He left that job after his Maine past was discovered and faces possible revocation of his Florida teaching certificate.

"For years we had a mechanism to revoke, but no standards. I think the Baxter school situation made that pretty clear to the Legislature, said Ms. George.

"We hope to make more reforms in this area and also develop a meaningful system for checking backgrounds. We also need to develop guidelines for the handling of these cases—making it clear to school administrators that these cases are no longer their own dirty little secrets—that they need to report it to the police and notify the state authorities," she said.

While Massachusetts schools employ about 59,000 teachers—nearly six times the number of educators working in its northern neighbor, New Hampshire—the two teacher certificate revocations reported in the bay State during the last five years is only half the total claimed by New Hampshire.

"Florida is very pro-active in this area," said Thomas O'Connor, director of the Bureau of Teacher Certification at the Massachusetts Department of Education, referring to the way his state handles teacher misconduct cases.

He admits Massachusetts could do considerably more to strengthen its background screening and disciplinary action, but said there are limitations because of existing state laws and the philosophy of government.

"It's just a darn shame that other states don't revoke certificates because they have the same kinds of problems that we do," he said.

"It's kind of ridiculous that they won't revoke without a criminal conviction because a lot of parent's won't prosecute. And that just gives the bad teacher an opportunity to cause harm to more students," he said.

"It just points out a broad, pervasive problem in the educational community throughout the nation. In Louisiana, if they didn't check out the fact that the man had a teaching certificate revoked in Florida, he

would probably still be teaching there today."

School officials in the Jefferson Davis Parish (La.) School District terminated the teaching contract of Charles H. Fugate Jr. as band instructor at Lake Arthur High School last week following a News Chief article detailing the educator's problems in Florida.

Few states would have had the capability of conducting an investigation of Fugate's misconduct.

New York's Education Department has one full-time investigator to review teacher misconduct cases, although the Empire State has more than twice the number of teachers employed in Florida schools.

Only Georgia has as many investigators in a special agency that was modeled after the Florida System.

"I have always perceived Florida and Georgia as leaders in the nation in the area of scrutinizing the professional conduct of educators," said James J. Carter, executive director of Georgia's Professional Practices Commission.

"There was a fundamental belief and commitment on the part of Georgia officials 10 years ago when the commission was formed. And that commitment is still there today," he said.

"In March of 1973 before the Georgia commission got anywhere, we had to get an executive director. We knew Florida was very active in this area, and that's where we went to recruit our executive director."

CHILD MOLESTATION IN OUR SCHOOLS

MONTEPELIER, VT.—"Child molesting in our schools? This has not been an issue. It's not a problem in our state.

"Even if it were, it would become a political issue, and it would be resolved. We just don't see any evidence of it happening here."

Donn McCafferty appears confident when he makes that claim about Vermont.

As chief of Educational Resources and Basic Education in the state's Department of Education, he said he sees no reason to be concerned about the likelihood that any of the state's 6,000 teachers could be molesting students.

In fact, he boasts that the Vermont people do such a good job in screening their teachers that they have only revoked one certificate in the 200-year history of the department—and that was for a criminal conviction of forgery several months ago.

"We're such a small state—just a little over 500,000 people. The people here are very intimate and have a great deal of knowledge about who is being hired in their schools. There aren't very many secrets we could hide," he said during a June interview.

"In Vermont, we don't have a violent climate. We don't have the role models of crime. This state is much more like the 50s. We have no metropolitan area. People call us a state, but we're 240 villages," he said.

What McCafferty's office and the general population may not know could hurt them—and damage the lives of many young children.

About 15 minutes up the highway from the capital city, officials in the office of Social and Rehabilitation Services don't paint such a pristine picture of the schools in the lovely Green Mountain state.

A computer operator documents for an inquiring reporter three "confirmed" cases of child molestation involving school teachers during a 17-month period: two 12-year-old girls: one 13-year-old boy—the victims of sexual abuse at the hands of their teachers.

One of the female victims is receiving mental health counseling.

"I don't know how much it happens, but I suspect that teachers have been traditionally under-reporting this kind of thing," says Cheryl Glaser, a social services consultant for the agency.

"It does happen, and I don't think we are any different than any other state. My guess is that when it does happen, most communities would rather cut a deal and get rid of a teacher in the most informal way."

The informal way is a quiet resignation. No prosecution. No publicity. No revocation. No record that a cardinal sin of the teaching profession was ever committed.

McCafferty said his office was unaware of any sexual misconduct cases involving Vermont teachers. It will take a conviction in order for his office to initiate revocation action against a certificate.

Meanwhile, he boasts that Vermont has never revoked a certificate for sexual misconduct involving a teacher.

But his attitude appears to be typical of most teacher certification officers in states along the East Coast, from Maine to Florida.

But it is in Florida where recognition of a problem is visibly the strongest.

Many officials cite "the sun, fun and the beaches" as conditions which lure undesirable transient types to the teaching profession in the Sunshine State.

Education officials in states surveyed by The News Chief reported a total of 843 revocations during the last five years. Records kept at the Florida Education's certification office showed receipt of 556 revocations from the 49 other states through June of this year, dating back to 1979.

Garfield Wilson, director of teacher education, certification and staff development in the Florida Department of Education Department, said he is disturbed by the discrepancies between the revocation totals.

Florida is among more than 30 states participating in an interstate agreement for sharing revocation information. Most of the states not involved in the pact cooperate by sending information, according to Wilson.

"I'm very concerned if somebody's not reporting to us. I'd certainly like to know about it. I thought we had agreed to notify each other of all the revocations," said Wilson.

"This situation does trouble me and is something I intend to look into," he said.

Taylor said he also is concerned about the apparent lack of cooperation in exchanging revocation information, but is especially critical of the lack of aggressive policing action in various states.

He said he plans to recommend to the National Association of State Directors of Teacher Education and Certification that "some kind of action needs to be taken to address this kind of weakness in our system."

"Not to revoke certificates where there are adequate grounds; not to report instances of gross misconduct involving educators is a serious omission on the part of the states," said Taylor.

"And it does leave the type of gap that I'd like to see closed because the undesirable person is still wide open and free to seek certification in other states. This should be a concern to the association," he said.

Herman E. Behling, Jr., director of certification for Maryland and active president of the certification officers group, said he doesn't see it as an important issue and is not concerned about the problem.

"The Maryland State Department of Education does not gather information about such factors as a person's physical health, mental health, or past work experiences. These factors are within the province of local school systems to be considered in their final employment decisions but do not relate to whether the person has completed the necessary courses or programs," Behling wrote in a letter to The News Chief in June.

"Since Maryland believes in local control of schools and local school boards retaining as many decisions as possible, we are not proposing any changes in the data gathering functions to be carried out by the local school systems and the State Department of Education."

But Taylor pledged to "press this as an important issue when the association meets next year."

"Who is being remiss in taking responsible action in this area is a question that needs to be addressed. And failure to do so by our association would be a big mistake," he said.

Florida education officials like to point to one of the classic examples of irresponsible policing action by a school district: a case where a school administrator from Ellenville, N.Y. gave a good recommendation for a librarian he had fired for sexual misconduct involving elementary school girls.

The ex-librarian is now serving a 15-year prison term in Avon Park Correctional Institution following his conviction on six counts of lewd, lascivious or indecent assault on elementary school girls in St. Lucy County.

"We encourage our local school districts not to sweep the dirt under the rug for someone else to find," said Taylor.

And if North Carolina learns of the revocation of a teaching certificate in another state, it will not issue a certificate until the problems in the other state have been cleared up, he said.

"One of the obvious problems that exists when any state doesn't take a stand is that we are in the position of receiving that state's castoff. And that's a chicken or a coward's way out," he said.

"It is a little more difficult; a little more unpleasant for a school board to take the step of recommending that a person's certificate be revoked. But it's certainly a responsible step that will save a lot of grief for someone else," he said.

Taylor questions whether revocation totals tell the true story of teacher misconduct.

"What we see as a problem is really the tip of the iceberg. There's a lot more that goes undetected than reported, simply because nobody steps forward," he said.

BAD TEACHERS BEING SWEPT UNDER CARPET

(By Mark Vogler)

RALEIGH, NC.—Many school districts and state education departments are "too chicken to clean their own carpets the right way," complains J. Arthur Taylor.

They find it easier to sweep the dirt onto somebody else's rug, according to the North Carolina education official who says his state has received some of that dirt in the form of teacher "castoffs" who have proven themselves to be unfit in classrooms of other states.

Of the eight revocations of teaching certificates that Taylor's office reported during the last five years, he claims that in at least three cases, the teachers should have been

emoved from the profession for misconduct n other states:

In Virginia, a person involved in embezzlement of school funds was dismissed, but no action taken against the certificate. A similar situation in North Carolina later resulted in the revocation of that person's teaching license.

Another former teacher from Virginia was fired after he was reported to have had sexual relations with a minor. There was no revocation. But the man became a driver's education teacher in North Carolina and lost his certificate after having sex with a student in a driver's education vehicle.

Taylor's office learned that a teacher suspected of homosexual activity several years ago in a North Carolina school district resigned and left for employment in Florida where he later quit a teaching position amid similar allegations.

There was no revocation action in either case. But North Carolina finally revoked the teaching certificate when similar allegations came to light last year at the same North Carolina district that initially employed him.

"The situation came to light because the person's picture appeared in the local paper, and an employee recognized the photo and recalled the incident years earlier," said Taylor.

"The teacher finally resigned under some highly suspicious circumstances and didn't contest the revocation action. The initial force behind it was an investigative reporter for a newspaper which tracked down some things which made the person unsuitable," he said.

"No question that our state was probably remiss as any others in not taking action, especially the case of the school district which failed to document in their records where they had problems with this individual before," he said.

"I think all three cases indicate the mutual advantages of states taking a more active role in sweeping the dirt away. No state wants to receive the castoffs of other states."

What about the certificates that are revoked?

Do states cooperate as much as they should in sharing information about those documented "bad apples" teachers?

Probably not.

Nine out of 10 certification officers responding to The News Chief survey said they thought there could be greater cooperation among states in sharing information about individuals who have demonstrated themselves unfit as school teachers.

Item: A News Chief analysis of revocation notices received from 49 states by the Florida Department of Education throughout a five-year period shows Florida officials are not informed about as many as 35 percent of the certificates the other states claimed to have revoked.

CONGRESS GAINS INTEREST IN "BAD APPLES"

(By Mark Vogler)

WASHINGTON, DC.—Several members of Congress who already have drafted legislation providing for criminal background checks of teachers say the findings of a News Chief survey will spur greater interest in the issue on Capitol Hill.

"It's a sad commentary," U.S. Rep. Ralph Regula, R-Ohio, said, responding to findings of a News Chief survey which reveal major flaws in education certification programs throughout the nation that could enable child molesters and other convicted felons to become employed as school teachers.

"This is the type of thing that illustrates the need for federal legislation. But a public awareness established by research such as yours will do far more than any legislation," Regula said in an interview with The News Chief.

The Ohio Republican has introduced The Children's Defense Act of 1984 (H.R. 5486), legislation that would require certain youth-oriented organizations to make adequate inquiry to ensure that no individual, who has a prior conviction for a sexual offense of which the victim was a child, shall be hired by the organization.

Regula's proposed bill is one of several bills that will be debated in Congress next year that focus on the issue of criminal background checks of teachers, day-care center workers and others who work with children.

Sen. Charles E. Grassley, R-Iowa, has filed a measure that would create a central federal file which would be known as the "Child Care Protection and Employee Responsibility File." This would maintain records of all arrests and convictions in state and federal courts for all offenses involving sexual abuse of children.

The data back would allow businesses and organizations who hire persons whose employment brings them into regular contact with children to have access to criminal history information for the purpose of determining the suitability of job applicants.

Under Senate Bill 1924, hiring agencies could be tipped off as to whether job applicants have been involved in such offenses as child molesting, sexual abuse of a child or child pornography.

"I think they're (state education departments) taking the wrong approach," Grassley said in response to the newspaper's finding that more than 60 percent of the states operate under the philosophy that criminal background checks should be left up to the employing school districts.

"We have to be more thorough. The evidence is so overwhelming—pedophiles gravitate to a profession where they have easy access to children. And what you're telling me is that being a teacher makes that easy," he said.

Grassley said he was disturbed at a report that violence by students against teachers is more publicized in some states than crimes by teachers against children.

A News Chief inspection of newspaper morgues in East Coast capital cities revealed that violence against teachers appeared to be a greater public concern.

"It's about time we started considering a child's welfare just as much as we do the protection of the teacher," said the senator.

Sen. Arlen Specter, R-Pa., chairman of the Judiciary Committee's Subcommittee on Juvenile Justice, has introduced related legislation, referred to as the "Juvenile Detention Employees Clearance Act of 1983."

That measure stipulates that "no person shall be employed at a facility maintained for the detention, correction, care or treatment of juveniles unless a nationwide criminal record check has been conducted to ascertain whether the individual has engaged in criminal acts that have specific relationship to job performance and whether he poses a significant danger of abuse or mistreatment of the juveniles."

Although the Specter proposal deals specifically with employees of juvenile facilities, its procedures are similar to screening methods outlined in the legislation covering teacher background checks.

Specter says a crucial aspect of the child protection legislation under study by his committee is the ability to obtain all arrest information which is related to offenses against children and juveniles.

Regulations adopted by the Justice Department in 1974 prohibit the release of arrest data to state and local governments for purposes of employment and licensing when the arrest information is more than one year old and not accompanied by dispositional data.

"In order to protect our children from physical abuse and sexual exploitation by those entrusted with their care, we must ensure that employers have access to all available criminal record information on prospective employees which may have some bearing on their competence to properly care for children," Specter wrote U.S. Attorney General William French Smith in a letter dated April 26, 1984.

"Accordingly, I hereby request that the aforementioned regulations be revised to authorize the release of all arrest information with or without dispositional date, for employment and licensing purposes, as is currently the practice for law enforcement," the senator said.

That issue is under study by the Justice Department.

Regula, whose bill provides for consideration of convictions only, said he agrees that there should be access to arrest information, noting that perhaps as many as 90 percent of child molestation and sex offense cases are never prosecuted.

"Even though there's not a criminal conviction, I think the existence of arrest information would be important for crimes like this," he said.

If Regula's proposal were to become law, failure for youth-oriented organizations to conduct criminal background checks of any employees who work with children could jeopardize federal financial assistance.

The state attorney general and the director of the state agency having access to the federal crime information would have the option of requiring all other youth-oriented organizations and agencies not receiving federal assistance to also have access to the criminal information.

Once the FBI receives the record check request from the state funneling agency, on behalf of the youth-oriented organization, the bureau's identification division will search fingerprint card submissions against its criminal file and furnish to the state agency the information found.

The state agency would then inform the youth-oriented organization whether or not the prospective employee or volunteer has a past conviction of sexual offenses, according to Regula's bill.

"Banks, the securities and exchange commission and various other financial institutions already use the services of the FBI to conduct this very same type of check for prospective employees. These institutions are allowed to refuse employment for persons who were arrested for crimes ranging from shoplifting to murder to ensure that their money is safe," Regula testified during an April hearing before Specter's subcommittee.

"Can we do any less for the safety of our children? We must stop this travesty which maims the physical, emotional and psychological well being of the child," said the former Ohio school teacher.

Any qualified child care organization seeking criminal background information on a job applicant could submit the name to the

Department of Justice for an arrest and conviction search, according to Grassley's bill.

If the prospective employee has any combination of three or more arrests or any conviction on record, the Department of Justice will, within 48 hours of receiving the request for information, notify the requesting organization.

JOHN WALSH: EDUCATIONAL SYSTEM COVERING UP FOR CHILD ABUSERS

WASHINGTON.—Child protection advocate John Walsh says he is outraged by what he sees as a "cover-up" of child abuse and exploitation involving the highest levels of America's educational system.

He castigates school administrators and state officials throughout the nation as "accomplices" to crimes committed against children by unfit teachers.

"Thousands of children's lives have been destroyed," says Walsh, because the education profession has shirked the responsibility to screen and police its own ranks.

Walsh, who was appointed by President Reagan as a special consultant to the National Center of Missing and Exploited Children, has been instrumental in pushing significant state and federal child protection legislation.

He and his wife, Reve, focused national attention on the problems of missing and exploited children following the 1981 disappearance and murder of their 6-year-old son, Adam, who was abducted from a Hollywood, Fla., Shopping mall.

The South Florida man claims one of the most neglected areas of child abuse and exploitation is in the classrooms of America.

As part of his crusade to pass more child protection laws, Walsh is actively lobbying for legislation in several states that would require criminal background checks of teachers and others who come into close contact with children in the schools.

He also advocates more aggressive action by school administrators and law enforcement officials in prosecuting those teachers who are involved in child molestation and other crimes against children.

Walsh considers the teaching profession to be an ideal place for child molesters to seek employment because of the close access to children and because little is done to screen job applicants.

"And the most revolting of all the issues is the cover-up—the constant cover-up: the superintendent who is afraid to be brought down or criticized by the media . . . by his school board for bringing to bear the problem," Walsh said during an interview with The News Chief in July.

"It is a felony to assist someone in a crime . . . to be an accomplice. In essence, these superintendents and principals are accomplices to the crime of sexual battery by not reporting it," he said.

"They are allowing a person to commit a serious crime against a helpless, trusting adolescent; and for that person in order to save face to go to another state and perpetrate the crime again . . . they are actually giving them carte blanche saying I almost condone your conduct because 'I am not going to report it,' " he said.

"Would they not report it if it was a female teacher that was raped in the parking lot? Would the principal not report it if he was beaten severely on the school grounds and put in the hospital or if he was the victim of sexual abuse or sexual molestation on the school grounds? No . . . they would report it."

Walsh received a good reception in June as a keynote speaker before the national Parent-Teacher Association convention in Las Vegas.

He discussed the need for state legislation similar to the new law enacted in Florida this year that will require fingerprinting of first-time teacher applicants.

Walsh said "it's almost a fait accompli" that the national board of directors of the PTA will endorse the fingerprinting proposal as model legislation because of the overwhelming support expressed by rank and file members at the convention.

He had initially proposed the fingerprinting legislation introduced by Rep. Fred Lippman, D-Hollywood, which the 1984 Florida Legislature approved overwhelmingly.

In October, Florida will become only the third state requiring fingerprinting and federal criminal background checks of teacher applicants.

Although fingerprinting school teachers is a politically unpopular concept throughout the country, Walsh believes the public would accept it if the facts were known about the lack of background screening of teacher applicants.

"How do I think that people would react if they knew what was going on? . . . the cover-up, the lack of reporting (teacher misconduct), the lack of a centralized system, the lack of revocation of the (teacher) licenses . . . they will be as incensed as I am because they've got to realize one thing: their child could be next," said Walsh.

"The teacher that was not prosecuted in Massachusetts; the teacher whose license was not revoked in Massachusetts could come to your state and get a license and your child could be the next victim," he said.

By not addressing the sensitive problem of molestation and other crimes perpetrated by school teachers, society is actually contributing to future crime, he maintains.

"Teachers are turning out new molesters and new criminals . . . people have never considered that," said Walsh.

"The children are the ones who are going to grow up and run the country. They are the future of the country. They are the future teachers . . . If they are molested in the classroom . . . let's put it this way—80 percent of the convicted violent felons in prisons were either sexually molested or abused children."

For years, society has placed unlimited trust in members of the teacher profession and has conditioned young people to look up to their educators as the ultimate role models.

Many people would never suspect that teachers could be involved in such atrocious crimes as child molesting, sexual assault, pornography and other morals offenses. So, there's an acute lack of awareness by the public about the problem, according to Walsh.

Meanwhile, pedophiles—individuals who have a sexual preference for children—seek employment in professions where they can have easy access to children and gain their confidence. Teaching is an ideal job.

"Teachers have so much of an edge on children. First of all, we are taught all our lives to respect adults. And whom are we constantly taught to respect? . . . our teacher, the teacher that has us for seven hours a day," Walsh said.

"And children aren't as canny as adults are about strangers. You may take the bus every day, and the bus driver may take your toll, but you never consider him not a stranger or have a conversation with him . . .," he said.

"For a child . . . as trusting as they are, if they see someone three or four times or in a situation with the parent where the parent discusses something with that person, that person is no longer a stranger . . . so we disadvantage our children.

"Look at the advantage a teacher has . . . not only are they (children) taught and disciplined to respect the teacher . . . they're taught the teacher is a friend . . . the teacher is a trusted person . . . the teacher is not a stranger . . . the teacher is a figure of authority. . . . When that teacher says 'stay after school, I need to talk to you and go into the cloak room and take your pants down,' . . . a small person not only would believe that person, but is taught to respect that adult, taught that 'the teacher is teaching me' and this is a trusted authority figure—a trusted authority figure . . .".

Walsh said he is "abhorred" when he hears the argument offered by some school administrators that to conduct more thorough criminal background checks of educators isn't worth the bother because of costs and because of the hardships it would impose on the vast majority of honest teachers in the profession.

"That kind of attitude is totally irresponsible," he said.

"How about if I went to that superintendent or that principal and said, 'Listen, you're in a high crime area . . . it will probably happen that your wife is going to be raped . . . it will probably happen that your wife may be murdered . . . but it's not worth instituting more laws, physical costs . . . etc.' . . . I'd like to see what his response is."

While teacher groups and civil libertarians argue that fingerprinting constitutes an invasion of privacy and an affront on the rights of teachers, Walsh said nobody seems to be concerned about the rights of the children.

The horror stories widely publicized from the McMartin Pre-School in Manhattan Beach, Calif., where 200 counts of child molestation have already been alleged is a classic example as to why background checks of teachers and day-care center workers should be a routine policy, he said.

"Do try to put yourself in the case of the McMartin School . . . you've got 6- and 7-year-old girls who have been violated . . . you've got to deal with that sexual trauma . . . you've got to deal with that psychiatric counseling . . . the expense . . . the long, long expense of the psychiatric counseling," he said.

"It would be a lot easier if we qualified our teachers up front rather than that to happen . . . and it has happened to thousands of children . . . don't assume it couldn't happen to you . . ."

Walsh said he is optimistic that other states will adopt teacher fingerprinting legislation next year. He has discussed the legislation with governors and attorney generals during his speaking trips throughout the country.

In mid-July, Connecticut Attorney General Joseph Lieberman pledged his help to pass child protection laws, including background checks for educators following a meeting with Walsh.

But the powerful teacher unions appear to be a major obstacle to enactment of such laws.

Walsh says that the teaching profession looms as "a sacred cow" as far as child protection measures go because of the tremen-

dous lobbying clout they have. Teacher unions contribute heavily to political campaigns.

"I think people have to realize that the teachers unions are organized. They're powerful . . . and they have one intent—very pure, simple intent: to protect the teacher at all costs so the teacher will belong to the union and pay their dues," said Walsh.

"My question is . . . where is the union for children? Who pays the dues for the children . . . Who represents the children? If it isn't the legislators, if it isn't the parents, then no one represents the children . . . and children don't have a voice," he said.

"I'd like to have a child testify before a state legislature about a teacher that was a previously convicted child molester or a teacher who had been asked to leave a state and how that child felt on the fact that society, and adults, lawmakers, board of supervisors, superintendents of school had let that child down and allowed this teacher to continue."

Newspaper morgues of many East Coast capital cities visited by The News Chief show student violence against teachers to be a well-publicized issue, and apparently a more important concern than teacher violence inflicted upon students.

That bothers Walsh.

"Its proof positive to me how selfish most adults are. We are responsible as adults for the quality of children's lives," said Walsh.

"Teachers are lobbying to change state laws to protect them from violence inflicted by teenagers . . . but who is lobbying for the children to protect them from teachers? That's my point," he said.

"No adult female would want to go to a gynecologist that was a convicted rapist of women . . . But we allow our children to go to schools to teachers that have been convicted rapists and child molesters. Adults set a different standard for themselves . . . That's the saddest thing about this . . . There's a real double standard here . . . The laws apply to adults and are strong for adults, and the laws hardly apply to children at all."

Walsh said he developed an awareness of the potential problem of child abuse in the schools from reading press accounts and interviewing police officers.

From subscribing to a press clip service during a three-month period, he was able to document more than 750 cases of sexual or physical abuse of children in Florida alone. And some of the headlines involving school teachers jumped out at him.

But it was the talks with police officers that actually sharpened his awareness, he recalled.

"Police . . . that's were I almost got my first indication of the extent of it . . . I interviewed lots of police because I felt their response to the problem of missing and exploited children was poor," said Walsh.

"They showed me books and books of child molesters . . . and they said to me . . . society doesn't do anything about it . . . They were the first ones who gave me the clue of it . . . and they felt society was very negligent in dealing with the problem . . . all along the way it's just adults not wanting to deal with the problem," he said.

"People who have preyed upon children have always counted on society's aversion for dealing with the problem . . . these teachers have counted on the aversion of other teachers, principals and superintendents to bring the problem to bear . . . it's always been the ostrich in the sand syndrome . . . It can't happen to me . . . or it's too uncomfortable to deal with . . . or it's too disgusting," he said.

PEDOPHILES: SPECIAL BREED OF CHILD ABUSERS

It only takes the lewd acts of one pedophile to pervert the good name of the teaching profession.

And all it takes is that one pedophile on the prowl in the classroom to prey on the lives of hundreds—perhaps thousands—of defenseless children before he completes his repulsive deeds.

That's the grim, but expert opinion of FBI special gent Kenneth V. Lanning, a man who is considered one of the nation's leading authority's on the topic of the pedophile—a breed of child molester who has an impulsive desire for children.

"As far as I'm concerned, it's a problem facing every school district in America. And I hope the American public is waking up to the fact that a teacher can do this," Lanning said in a recent interview.

"But I want to emphasize that I think it would be a terrible injustice if the American public was led to believe that a bunch of people in the teaching profession are pedophiles," he said.

"Only a very small percentage of school teachers are pedophiles. It's not a quantity problem. There are not lots of them. But one teacher like this can cause unbelieveable harm and damage," he said.

"I don't think there should be a witch hunt against the teaching profession by school administrators. But I think they have an obligation to deal with this problem head-on."

Lanning, a special agent at the Behavioral Science Unit of the FBI Academy in Quantico, Va., makes a careful distinction between "pedophile" and "child molester."

A child molester has sex with children. A pedophile is a peculiar type of child molester. But not all child molesters are pedophiles, he says.

But a pedophile may be the most dangerous form of child molester because of the strong inner drive for his or her child victims.

"His behavior is persistent and compulsive. He is likely to assault 30 to 40 to several thousand children in his lifetime. He is good at what he does," said Lanning.

"What I generally tell police officers, if you've got a school teacher—a guy who has been in education for 30 years who is a pedophile . . . every year for 30 years, you can go back to every class he's taught and find victims in his class," he said.

These are the primary characteristics of the pedophile, as described by Lanning: He must gain easy access to children. This can be done by the neighborhood in which he lives, through marriage—marry a woman and adopt children. One of the most common ways of gaining access to children is through employment: a day-care center worker, a camp counselor, a school teacher, a guidance counselor and even a school administrator.

Lanning's expertise is sought by Congressional panels, reporters throughout the country and attorneys who prosecute child molestation cases. He has testified in the sentencing phases of several trials involving school teachers.

The teaching profession is an easy outlet for the pedophile, he says.

"If somebody tells me a school teacher is arrested of molesting kids, I'd say there's a high percentage of odds that he's going to be pedophile," said Lanning.

"An individual who becomes a school teacher so he can gain access to kids is a true pedophile," he said.

"Another individual could be a teacher who became a school teacher for all the right reasons . . . then one day maybe he's having problems under stress . . . starting to drink a little . . . the marriage has gone sour . . . so he turns to the child as a substitute. This kind of individual is not a pedophile. But it doesn't make it any better. If a school teacher has sex with any student, that's a serious violation of trust."

There is no set age for the pedophile's victims.

Each pedophile generally has his own age and sexual preference, according to Lanning.

If he likes young victims, he will teach in the lower grades. The pedophile teacher's preference can range all the way from preschool to high school, said the FBI agent.

Many pedophiles go undetected. But even when discovered, they can manage to escape prosecution and continue with their sexual exploitation of children.

Why?

It's a combination of "public naivety" or misconception about the pedophile, "bureaucratic irresponsibility," or an apprehension to deal with the problem, according to Lanning.

"Quite simply, the fact of the matter is that some schools would rather cover it up. Why? For a variety of reasons—there's legal liability . . . and bad publicity over something like this could destroy business in the case of private schools. That's the monetary angle," said the FBI agent.

"One of the problems you have in cases like this is the public holdover to the myth that the pedophile is the dirty old man in the rain coat—the scum of the earth. Then, it turns out in many cases that the teacher is a real nice guy," he said.

"The truth is they're just like anybody else. They're probably a little better than average teachers. They identify well with the students. Very frequently, they are outstanding teachers. Kids enjoy going to their class," he said.

"One of the things that concerns me is the public naivety. Many people have this belief that to commit such a crime, it has to be an evil individual. But the pedophile is a nice guy. He goes to church every Sunday. He mows his lawn. I just can't believe the naivety."

When a pedophile has been identified by law enforcement officials, it is a very unpleasant, unpopular task to prosecute these individuals.

Lanning said he tells police officers not to expect support, but anticipate some public resistance.

"I've seen cases where students will be out picketing after the arrest of a popular teacher," he said.

Parents feel guilt when their child has been abused. So there can be a tendency to deny that it happened, suggested Lanning.

"It's a tough ego shot to say 'I didn't adequately protect my child, therefore I'm a lousy parent.' So, the one way to defend the ego is to deny it," he said.

When pedophiles get together and organize, that presents another set of problems for law enforcement officials. Quite often, organized pedophile groups will engage in the child pornography business.

And there are some radical organizations such as the North American Man-Boy Love Association or Rene Guyon Society—the group that boasts the motto "Sex by eight

or else it's too late"—which publish material promoting pedophilia.

Lanning said there's a big difference between "the disgusting and repulsive literature" published by groups such as NAMBLA and the role of those groups, compared to the child pornography rings.

"I make a distinction between this kind of stuff (NAMBLA literature) and the pornography. The pornography has a tragic, personal impact on a person. The audio-visual sexually explicit stuff becomes a permanent record of the ultimate form of sexual abuse," said Lanning.

"The promotional stuff just fuels the pedophile's fantasy. You and I may think it's distasteful. But it's not quite as bad as the pornography," he said.

"I've known pedophiles who watch 'Leave it to Beaver' and get turned on. There are other pedophiles who get their kicks clipping underwear ads out of Sears & Roebuck catalogues."

NAMBLA, because of its racy publication and bold style of promoting pedophilia, has attracted considerable national attention.

Lanning said he believes the American public has a misconception about the role of groups like NAMBLA, largely because of the outrageous notoriety they have received.

"I personally feel these groups are stupid to go public. But when all this publicity came out about NAMBLA, many people called to see if they had NAMBLA chapters in their community," said Lanning.

"Some people got the idea that if they didn't have a NAMBLA chapter, they didn't have a problem. Simply because you don't have a NAMBLA chapter has nothing to do with whether you have a problem," he said.

"Groups like NAMBLA are an information network for pedophiles all over the country. They are very effective. They are actually a support network for those who aren't members."

While improved criminal background checks will increase the level of detecting pedophiles who seek employment in the schools, Lanning said that kind of defense alone is an inadequate way to deal with the problem.

He advocates that school administrators seek a greater public awareness, rather than attempt to downplay the problem—like in the case where one individual worked at eight different school districts, being dismissed for child molesting offenses at numerous jobs, before his conduct was finally reported.

"Bear in mind that most of these individuals don't have an arrest record, so you have to have a second line of defense," said Lanning.

"That second line of defense is awareness programs for students, parents and educators. That child should be trained to report sexually offensive behavior by a teacher, understanding the difference between a good touch and a bad touch and touching in the wrong places—and the idea that it's not the child's fault," he said.

"And when the child tells, you have to have somebody who is trained to believe that child. Too often, nobody bothers to listen to the child. Nobody believes the child, so we ignore the abuse that may be taking place. Quite often, adults feel it was the child's fault—that the child was the seducer. Parents and educators have got to become sensitized to listen to what a child may be saying," he said.

"But ultimately, we need to be more aggressive in reporting and prosecuting child molestation cases. What we need to do is have a system where everybody who is identified, make a record of it. When we catch these individuals, we need to make sure that there is a record."

When Lanning testifies at sentencing hearings, he tells the court he believes there is no cure for the pedophile.

"Is it a sickness or illness? Maybe. But that's not a defense in these crimes. The guy knew what he was doing was wrong."

SOCIAL SECURITY AND BUDGET DEFICITS

(By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

Mr. CHILES. Mr. President, President Reagan was completely wrong when he said during Sunday night's debate that his cuts in Social Security do not reduce the Federal deficit.

Social Security is part of the unified Federal budget which the President himself submits to Congress each year. I ask unanimous consent to insert in the RECORD at this point, a copy of page 5-114 from the President's budget for fiscal year 1984 which shows that the President's legislative proposals to cut Social Security reduce outlays in the Federal budget. Since any cuts in outlays reduce the Federal deficit dollar-for-dollar, these Social Security cuts do, in fact, lower the budget deficit. Indeed, the President has already used cuts in Social Security to try to lower the deficit on any number of occasions in his first term.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

THE BUDGET FOR FISCAL YEAR 1984

[Functional code 600; in millions of dollars]

Major missions and programs	1982 actual	1983 estimate	1984 estimate	1985 estimate	1986 estimate
OUTLAYS					
General retirement and disability insurance:					
Social Security (OASDI):					
Existing law	154,144	170,324	182,388	196,326	210,719
Proposed legislation		−2,056	−4,140	−4,548	−4,811
Railroad retirement	5,717	6,127	5,786	5,177	6,093
Benefits for disabled coal miners:					
Existing law	1,980	1,816	1,780	1,771	1,798
Proposed legislation			−37	−45	−52
Pension Benefit Guaranty Corporation:					
Existing law	−67	−32	−26	−18	−15
Proposed legislation			−132	−180	−202
Other	31	37	42	48	55
Subtotal, general retirement and disability insurance	161,805	176,216	185,661	198,531	213,585
Federal employee retirement and disability:					
Retirement and disability program:					
Existing law	19,616	21,250	22,941	24,720	27,000
Proposed legislation			−362	−1,116	−1,525
Federal employees workers' compensation:					
Existing law	264	218	228	217	201
Proposed legislation			−17	−30	−31
Federal employees life insurance fund	−492	−612	−636	−662	−688
Subtotal, Federal employee retirement and disability	19,388	20,856	22,153	23,129	24,956

THE BUDGET FOR FISCAL YEAR 1984—Continued

[Functional code 600; in millions of dollars]

Major missions and programs	1982 actual	1983 estimate	1984 estimate	1985 estimate	1986 estimate
Unemployment compensation:					
Existing law	23,756	35,020	28,774	25,867	24,707
Proposed legislation		1,850			
Subtotal, unemployment compensation	23,756	36,870	28,774	25,867	24,707
Housing assistance:					
Subsidized housing	6,880	7,774	8,532	9,235	9,690
Public housing operating subsidies	1,008	1,551	1,520	1,581	1,503
Indian housing (proposed legislation)			40	43	45
Rural housing block grant (proposed legislation)			280	561	850
Other housing assistance	155	257	450	454	459
Subtotal, housing assistance	8,043	9,582	10,823	11,874	12,547
Food and nutrition assistance:					
Food stamps and aid to Puerto Rico:					
Existing law	11,014	12,825	12,496	12,648	12,903
Proposed legislation			−757	−1,049	−1,101
Child nutrition and other programs:					
Existing law	4,565	5,008	4,878	5,042	5,273
Proposed legislation			−2	−295	−383	−456
Subtotal, food and nutrition assistance	15,579	17,831	16,322	16,258	16,619
Other income security:					
Supplemental security income:					
Existing law	7,677	8,760	7,509	8,252	8,404

Mr. CHILES. In 1981, the President's first round of budget cuts included $24 billion in Social Security cutbacks—measured over a 6-year period. These cuts were submitted to Congress as part of a plan to reduce the deficit and to balance the Federal budget by 1984. The first-round package of cuts also included a "magic asterisk"; that is, $111 billion of cuts that were to be specified later—page 5 of the President's Budget reform plan in "A Program for Economic Recovery," February 18, 1981. As 1981 progressed, concern mounted that deficits would be too high under the Reagan program and the new cuts were brought forward. The administration submitted $17 billion in cuts over 3 years for domestic discretionary programs. Similarly, in May, the President made a series of draconian proposals which would have cut Social Security spending by more than $40 billion over 5 years. As an example, a person retiring at the age 62 in 1987 would have had his benefits reduced by 40 percent relative to what they otherwise would have been. The Senate rejected all of these second-round Social Security proposals by a vote of 96 to 0.

Finally, the President included the recommendations of the National Commission on Social Security Reform in his budget request for fiscal year 1984. These changes lowered Federal deficits by over $15 billion over 4 years, according to the President's budget request which was sent to the

Congress. The President appears to be unaware of this fact.

The President also claimed on Sunday night that the draconian cuts he proposed for Social Security in May 1981 were necessary in order to preserve the solvency of the system. This claim is blatantly false. According to the administration's own press release at that time, those cuts were more than twice as large as would have been necessary to preserve the solvency of the Social Security system. The President would undoubtedly like to forget this fact, but the historical record will not let him.

I ask unanimous consent that table 2 from "A Program for Economic Recovery" be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 2.—BUDGET SAVINGS PLAN

[Outlays in billions of dollars]

	1981	1982	1983	1984	1985	1986
Existing budget status:						
Current policy base	657.8	729.7	792.1	849.0	911.4	972.8
Added defense funds [1]	1.3	7.2	20.7	27.0	50.2	63.1
Current policy base with adequate defense	659.1	736.9	812.8	876.0	961.6	1,035.9
President's budget plan:						
Proposed spending ceiling	654.7	695.5	733.1	771.6	844.0	912.1
Budget savings target	4.4	41.4	79.7	104.4	117.6	123.8
President's budget savings proposals:						
Actions recommended now or to be included in March revisions:						
Budget outlay reductions	4.8	41.4	58.5	73.7	86.6	95.8
Off-budget outlay reductions	(.7)	(5.7)	(7.4)	(9.2)	(11.1)	(13.1)
User charges (receipts)	(. . . .)	(2.0)	(2.6)	(3.0)	(3.5)	(3.9)
Subtotal	(5.5)	(49.1)	(68.5)	(85.9)	(101.2)	(112.8)
*Budget savings to be presented subsequently			21.2	30.7	31.0	28.0

[1] These increased amounts do not include the savings for defense specified later in this document. They represent an outside estimate of potentially necessary defense increases after taking savings into account. These amounts will be fully reviewed and may be revised for the March budget submission.

THE PRESIDENT'S SECRET PLAN

(By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

Mr. CHILES. Mr. President, President Reagan conceded during the first debate that he has a plan to reduce Federal deficits. It is marked, "Do Not Open Until Christmas." Yet through the political wrapping paper, you can still feel the shape of the surprise.

The President suggested the deficits can be reduced by holding the growth in Federal spending to 5 percent each year. What he neglected to say is that, by 1989, the surprise package would require across-the-board cuts of 45 percent in programs like medicare, veteran's benefits, agricultural price supports, the space shuttle, the FBI, drug enforcement, and student loans. Under the President's plan exempting some programs from these cuts would require even deeper cuts in the programs that remain.

Holding spending growth to 5 percent a year sounds easy, but we need to keep in mind that during President Reagan's 4 years in office, total spending has grown by more than 10 percent per year. Under the policies that are now in place as a result of President Reagan's first term in office, spending is projected to grow at more than 9 percent per year through 1989 (see table 1). Therefore, the President would have to cut his own growth rates in half in order to achieve his plan. The President, however has requested huge defense increases averaging 12.4 percent over the next 5 years, and large increases in foreign military assistance as well. These excesses would have to be balanced by cutting deeper into domestic programs.

When we consider the domestic budget, we note that the President has indicated he would exempt Social Security—which is about one-fifth of the budget and which is projected to grow at about 7 percent per year over the next 5 years—from any further cuts.

Therefore, the burden of reducing spending to 5-percent growth would fall on only one-third of the budget, necessitating massive cuts in the affected programs. For example, by fiscal year 1989, the President's "secret plan" would allow for about $230 billion for all domestic spending—other than Social Security. Since the Congressional Budget Office estimates that $420 billion is needed to maintain current services in these programs, the President's plan would require an across-the-board cut of 45 percent for each of them (see table 2). If any of these programs were exempted from being cut, the percentage reduction in the other programs would be even greater. In the years before 1989, the cuts would also be gargantuan. In fiscal year 1985, $50 billion in cuts would be required, necessitating a 16-percent across-the-board reduction—see table 3 for a listing of current services outlays for major programs in fiscal year 1985. In fiscal year 1986, $90 billion in cuts would be required to execute the President's plan. Similarly, in fiscal year 1987, $130 billion in cuts would be required together with additional cuts of $170 billion in fiscal 1988.

This analysis is based on economic assumptions from the nonpartisan Congressional Budget Office which is headed now by a conservative Republican. The President said during the debate that he doesn't believe the Congressional Budget Office numbers. However, even utilizing budget numbers from the President's own Budget Office, we still find that huge domestic spending cuts would be needed in order to implement the Reagan plan. In fiscal year 1989 $100 billion would have to be cut above and beyond the $5 billion in cuts already called for in the President's midsession review of the fiscal year 1985 budget. This amounts to a 25-percent across-the-board cut for programs such as medicare, veterans' benefits, student loans, agricultural price supports, the space shuttle, drug enforcement, and the FBI.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—GROWTH RATES IN OUTLAY SPENDING

	Outlays (billions)	Percent increase over previous year
Fiscal year:		
1981	$657	13.8
1982	728	10.8
1983	796	9.3
1984	845	6.2
1985[1]	942	11.5
1986[1]	1,031	9.4
1987[1]	1,127	9.3
1988[1]	1,229	9.1
1989[1]	1,321	7.5

[1] Estimates for 1985–89 are based on Congressional Budget Office August baseline, except for defense and foreign assistance. For these accounts, figures from the President's budget request for fiscal year 1985 are used.

Note.—Average growth rate: 1980 to 1984 equals 10 percent; 1985 to 1989 equals 9.4 percent.

TABLE 2.—SPENDING CUTS NEEDED TO LIMIT GROWTH IN OUTLAYS TO 5 PERCENT PER YEAR

	Fiscal year—				
	1985	1986	1987	1988	1989
Total outlays with 5 percent growth	$887	$932	$978	$1,027	$1,078
Spending exempt from cuts:					
Defense and Foreign assistance	$289	$331	$370	$406	$437
Social Security	$188	$201	$215	$231	$248
Net interest	$132	$142	$151	$161	$161
Subtotal, exemptions	$609	$674	$736	$798	$846
Remaining outlays available	$278	$258	$242	$229	$232
Outlays needed to maintain current services in nonexempted programs	$331	$349	$373	$398	$422
Cuts below current services needed to limit total outlay growth to 5 percent	−$53	−$91	−$131	−$169	−$190
Across-the-board percentage cut needed for 5 percent growth	−16	−26	−35	−42	−45

Note.—Defense and foreign assistance figures are from President's budget request for fiscal year 1985. Other items are from Congressional Budget office August baseline. Net interest has been adjusted to reflect debt service savings resulting from limiting outlay growth to 5 percent per year.

TABLE 3.—SPENDING NEEDED TO MAINTAIN CURRENT SERVICES IN MAJOR PROGRAMS IN FISCAL YEAR 1985

	Outlays (millions)
Programs:	
Highways	$12,985
Urban Mass Transit	1,577
Amtrak	762
FAA	3,173
Airports	830
Coast Guard	2,354

TABLE 3.—SPENDING NEEDED TO MAINTAIN CURRENT SERVICES IN MAJOR PROGRAMS IN FISCAL YEAR 1985—Continued

	Outlays (millions)
Elderly Housing	856
Community Development Block Grants	3,858
Urban Development Action Grants	550
Postal Service (Federal payment)	1,158
Compensatory Education for the Disadvantaged	3,466
Pell Grants (low-income college student aid)	2,792
Job Training and Employment Services [JTPA]	3,698
Head Start	1,024
Administration on Aging	702
National Science Foundation	1,180
National Forest System	924
NASA	5,081
National Park System	622
Environmental Protection Agency	4,055
Agriculture Price Supports	12,454
Agricultural Credit Insurance Fund	1,557
Energy Conservation Water Projects	2,979
FBI	1,083
Immigration and Naturalization Service	544
Customs Service	606
IRS	3,390
General Revenue Sharing	4,574

Special Benefits for Disabled Coal Miners	1,029
Railroad Retirement	5,697
Civil Service Retirement	22,980
Military Retirement	15,728
Unemployment Compensation	19,717
Food Stamps	11,448
Women, Infants and Children Supplemental Feeding Program	1,462
Child Nutrition Programs	3,720
Supplemental Income Security for Low Income Elderly and Disabled	9,270
Aid to Families with Dependent Children	7,880
Low-Income Home Energy Assistance	1,932
Child Support Enforcement	618
Veterans Compensation	10,285
Veterans Pensions	3,954
Veterans Readjustment Benefits	1,176
Veterans' Medical Care	8,356
Veterans' Hospital Construction	577
Veterans' Administration Operating Costs	739
Medicare	65,419
Civilian Agency Pay Raises	1,191
Medicaid	22,282
Health Block Grants to States	814
National Institute of Health	4,576

TRIBUTE TO SENATOR PAUL TSONGAS

Mr. EXON. Mr. President, I hope that the retirement of PAUL TSONGAS from the U.S. Senate will not quiet PAUL'S voice in the debate of America's future. I have been proud to serve with Senator TSONGAS, a man of great vision and insight. More than anyone else, I think Senator TSONGAS represents the future of the Democratic Party. He is a man of compassion, but is aware of the limitations of government; he is a friend of the working man but also realizes that a healthy business environment brings jobs to the working people; he combines the strength of the Democratic Party's past with the new ideas of the future. Like many of the Members of our class of 1978, Senator TSONGAS defies the traditional labels of liberal or conservative.

The junior Senator from Massachusetts can take great pride in the economic strength of his home State. His work as the Congressman from the Fifth Congressional District is directly responsible for the hightech revolution now taking place in Massachusetts. As a former small businessman, I have been very impressed with the Senator's work on the Senate Small Business Committee. He has worked diligently to assure that the millions of small business owners are given a fair chance.

Over the years, I have been impressed with the Senator's efforts to control deficit financing. The Senator's victory on the Senate floor this last Friday, serves as a reminder of the Senator's commitment to bring fiscal discipline back to the Federal Government. His support of the bipartisan freeze and his most recent effort to make a spending freeze the first order of business upon the next consideration of a debt ceiling illustrate the Senator's strong sense of responsibility. The value of his efforts will not expire with the conclusion of his term. Repeatedly, the Senator has shown leadership rather than mere concern in addressing budget issues.

I will certainly miss the insight the junior Senator has brought to this body. The Senator's years in the Peace Corps brought a unique and much needed perspective to the foreign policy deliberations of this body. We need to be reminded that geopolitical considerations are more than extravagant games of strategy and that the decisions made in this body affect the lives of people across the globe.

I hope that we will be hearing from Senator TSONGAS often after he enters the private sector. The completion of his term in the Senate marks another significant accomplishment in a lifetime of public service. From the villages of Ethiopia to the plush offices of the most deliberative body in the world, Senator PAUL TSONGAS has left his mark. It is a mark of excellence and a clear vision of the future. I look forward to following the career of one of the Senate's brightest young stars. I wish the good Senator well in his new endeavors and consider myself fortunate to have worked with him over the years.

THE RETIREMENT OF SENATOR JOHN TOWER

Mr. EXON. Mr. President, since I became a member of the Senate Armed Services Committee in 1979, I have had the pleasure of working closely with Senator JOHN TOWER. I am saddened that this relationship will end with his decision to retire at the end of this Congress.

While there have been times when he and I disagreed on some specific issues as we worked toward our mutual goal of insuring a strong national defense, I have always found Senator TOWER to be an admirable colleague. As the chairman of the Senate Armed Services Committee, he has been extremely effective in insuring a proper and comprehensive addressal of those critical issues related to our Nation's security. His knowledge of defense issues is impressive and has been instrumental to the continuing influence and effectiveness of the Armed Services Committee. Senator TOWER's ability to comprehend and relate so many complex issues is a rare and admirable skill. Displaying firm but fair leadership, he has guided the committee through many difficult times and has always striven to act in the best interests of our great Nation.

I will miss his leadership, encouragement, and insight as the Senate goes on to face new challenges in the future. The Senate and the Nation have benefited immensely from Senator TOWER's efforts and experience. I know that I speak for all my colleagues on the Armed Services Committee when I wish Senator TOWER both farewell and best wishes for continued success in all his future endeavors.

IN HONOR OF SENATOR JENNINGS RANDOLPH

Mr. EXON. Mr. President, my good friend JENNINGS RANDOLPH is going home to West Virginia. He leaves Washington with a legacy which we all envy and will continue to learn from despite his absence. As JENNINGS RANDOLPH returns to the narrow, twisting roads which wind through the mountains and hollows of his beloved State he carries memories of Franklin Roosevelt's 100 days and the triumphs and tragedies of the Nation's history these past 52 years since his election to Congress. JENNINGS RANDOLPH has seen and has made much history during those 52 years of service to West Virginia and the Nation.

My good friend JENNINGS RANDOLPH has taught his colleagues the meaning of courtesy in the Senate. A body which functions by unanimous consent cannot function long without a sense of order and judicious self-restraint. JENNINGS RANDOLPH has taught us all that the Senate functions well only when its Members respect each other and recognize that each Member deserves to be heard. The world's greatest deliberative body can only be effective when its Members respect each other.

My good friend JENNINGS RANDOLPH has left monuments to his career around the Nation in the form of public works projects which he has shepherded through the Congress. He leaves his mark as a man who demonstrates that a State which is totally dependent upon natural resources can develolp in harmony with the environment and offer opportunities for individuals. He leaves his mark as a man who recognizes the important example we here in this body set for future generations of voters. Our actions directly motivate young Americans to participate or not participate in the political process.

My good friend JENNINGS RANDOLPH has made great efforts to remind each of us of the responsibility we bear for tomorrow's American citizens.

On behalf of all Nebraskans, I thank you for your 52 years of service and contributions to the Nation and its legacy which we are passing on to our children and their children. You have made a difference. You have made the world a better place than it was before you came here. That is all that we can hope for in our brief time here.

JENNINGS, you have succeeded in making a difference in people's lives and for that we are grateful and we will miss you here in the Senate.

LARGE BUDGET DEFICIT CAN LEAD TO HIGH INTEREST RATE

Mr. EXON. Mr. President, I was not only shocked but saddened, in listening to the debate between the two Presidential candidates Sunday last, to hear the President of the United States state that there is no connection between high deficits and interest rates. The President did not mention the skyrocketing national debt, but I think there is a relationship, as most of the people do, between the high deficit which at the end of each year is transferred over to the national debt, and which broke through the $1 trillion for the first time in the history of this Nation in 1981, and interest rates.

If the majority has its will, it will be raised to approximately $1.8 trillion at the request of the President of the United States sometime before we adjourn sine die.

I just want to point out that in the opinion of this Senator, who has had a great deal of experience both in business and in Government in balancing budgets, I think it is absolute folly to carry on any pretense that interest rates are not affected by the amount of debt that we continue to accumulate at an alarming rate in the United States.

I cite this record and the following article by Mr. Stockman, the Director of the Office of Management and Budget, to buttress my remarks that indeed, despite what the President of the United States believes, I think most Americans would agree that there is a significant connection between interest rates and excessive Government debt.

Madam President, I ask unanimous consent that immediately following my remarks there be printed in the RECORD an article from the Washington Post of June 12, 1984, entitled "Stockman Links Deficits, High Interest Rates."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 12, 1984]

STOCKMAN LINKS DEFICITS, HIGH INTEREST RATES

(By Jane Seaberry)

Office of Management and Budget Director David A. Stockman deftly departed from the position of other Reagan administration officials yesterday and said that large federal budget deficits can lead to high interest rates, because the deficits can affect the psychology of the financial markets.

Stockman, addressing an American Stock Exchange conference, said his view of deficits and interest rates isn't different from that of President Reagan or Treasury Secretary Donald T. Regan, who say there is no direct link between budget deficits and interest rates.

Many economists insist that continuous, large budget deficits help push up interest rates or keep them high, particularly when demand for credit by businesses and consumers is strong. At the seven-nation economic summit in London last week, some foreign critics complained that large U.S. deficits push up interest rates and attract savings from their countries into U.S. assets, forcing them to keep their rates high.

"I think most people recognize that the climate in the financial markets affects interest rates, the course of monetary policy affects interest rates and that the deficits may well have much to do with the climate, the psychology and the expectations of the market and with the options that are available to the Federal Reserve on a daily, monthly and quarterly basis to conduct monetary policy," Stockman said.

He said that, in sum, "If you boil it all down to the common-sense proposition, it is clear that chronic, massive deficit financing affects the financial system, monetary policy and, therefore, the course of interest rates."

Stockman was asked whether he meant that deficits and interest rates were linked. "The answer is yes," he responded, "but it has to be qualified in order not to create any disunity of view that doesn't actually exist."

Stockman also said that inflation may be low because of artificial factors such as a strong U.S. dollar, which "perhaps" could be temporarily suppressing inflation.

At the same conference, Congressional Budget Office Director Rudolph Penner said that Congress $140 billion "down payment" on the federal budget deficit will not be sufficient to stop the upward spiral in interest rates.

The package, although having no immediate effect on rates, will be "pretty impressive," Penner said, because it will reduce over time the percentage of gross national product consumed by the deficit. However, the down payment will not be sufficient to reduce the proportion of gross national product taken up by interest payments, Penner said.

Nevertheless, the down payment "deserves more attention than it is getting and is more important than the investment community gives it credit for being," Penner said.

AMERICAN AGRICULTURE AND FOREIGN POLICY

Mr. MELCHER. Mr. President, there are several reasons why people say that Walter Mondale won the debate with President Reagan Sunday night. For instance, the President indicated that farmers were better off under his administration because he had ended the Carter grain embargo and that interest rates had gone down.

The President may not know it, but he should know that American agriculture receives lower prices with less purchasing power than at any time since the Great Depression. The President should also know that agricultural debt and the number of liquidations and foreclosures is also the worst since the Great Depression.

Farmers and ranchers are in desperate situations. Part of their suffering is from continuing high interest and other production costs. Then the lack of sales of agricultural products abroad is compounded by a series of very inept decisions by the President's administration which ignored the basic problems and attempted to make everything right by a $12 billion payment-in-kind program which moved in exactly the wrong direction. That program [PIK] paid to idle 80 million acres of farm production rather than use American agriculture abundance for the hungry. The $12 billion neither cured farm prices nor served the broader goals of U.S. food policies. U.S. agriculture production can meet the needs of our people and the food shortages of the world.

The Sunday debate between the two Presidential candidates did not dwell on these matters, but Walter Mondale did correct the President that farmer and rancher income had dropped off more than 50 percent. They should both address these matters in detail in the October 21 debate on foreign policy because American agriculture has been decimated by bad trade policy and our foreign policy can be better predicated on using the inherent strength of American agriculture production in a manner that enhances not just the United States but our friends around the world. We need not just talk about guns and the threat of Communism when we deal with foreign policy. We have food, and the world needs it.

We should open our doors to the conditions that will establish that our food is available. For those who have the cash, such as Russia and China, sell it to them without embargoing U.S. materials for a natural gas pipeline from Russia to other countries, as the President did, or the President's mishandling of the Chinese textile imports, which is preventing grain sales to China from the United States.

For those who do not have cash, such as Mexico, the Philippines, or starving African nations, we can set the conditions for sending them food through Public Law 480 or section 416, to relieve their food shortages.

American farmers and ranchers know two basic facts: First, the prices they receive for their production are so low they are going broke; second,

they know that what they produce is needed for the hungry here and abroad.

The importance of using American food abundance as a vital, positive part of our foreign policy—both in the normal trade channels and for humanitarian uses for the hungry, malnourished, and starving—cannot be ignored. It is a more positive part of foreign policy than grants or sales of military equipment. Its strength as a part of our foreign policy lies in the world's need for life-nourishing food.

Presidential elections bring out in the campaign the strong feelings of the people. President Reagan's administration and campaign have not addressed both the blessing of American agriculture and the losing position of the producers on our farms and ranches.

Walter Mondale should address American agriculture much more than he has. This is not just a matter for farmers and ranchers and agribusiness; it is the business of all Americans. We should hear from both Presidential candidates on these matters during their October 21 debate.

SENATOR HOWARD H. BAKER, JR.

Mr. WALLOP. Mr. President, I am honored today to stand with my colleagues in recognition of my friend, and Tennessee's favorite son, the Honorable HOWARD H. BAKER, JR. It has truly been my privilege to serve under Senator BAKER's leadership since my freshman year in the Senate when be became its minority leader.

Over the years, he has proven to be an extremely capable leader of first the minority and then the majority party. Senator BAKER is a leader who has commanded the respect of both sides of the aisle. Perhaps the only person to question HOWARD's political leadership is his grandmother Ladd, a former sheriff back in Tennessee. Grandmother Ladd, an astute politician in her own right, told our then minority leader to get out of politics and go where the real power was—the sheriff's office. Well, I cannot speak for HOWARD; but I believe I speak for the entire U.S. Senate when I say how grateful we are that he forsook the sheriff's office for his political office.

In many respects, this advice of Grandmother Ladd's never had a chance of being carried out; for the life of HOWARD BAKER has always been intertwined with politics. Born in the small east Tennessee town of Huntsville, he grew up in fertile political soil. HOWARD's father served the Second Congressional District of Tennessee as its Representative in Washington, DC. While attending law school at the University of Tennessee, HOWARD was elected the student body president of that institution. In addition, he is married to Joy Dirksen, the daughter of his mentor, former minority leader Everett Dirksen of Illinois. In 1966, the people of Tennessee chose HOWARD BAKER to be the first popularly elected Republican to the U.S. Senate in that State's history. As a legislator, HOWARD demonstrated the qualities of intelligence, tact, and foresight which he has so successfully called upon in his role as majority leader. During his early days in the Senate, the Senator from Tennessee promoted legislation enhancing basic American values; granting greater responsibility to the individual in the Revenue Sharing Act of 1972, assuring equal rights under law for all citizens in the extension of the Voting Rights Act, and underpinning the Nation's strength to counter external threats through his strong support for the national defense. In 1973, Senator BAKER rose to national prominence in his role as the ranking Republican on the Senate Watergate Committee. Through his search for the truth on that committee, HOWARD BAKER holds much of the responsibility for the Republican Party's reversal of fortune over the past decade. The Republican Senators wisely voted him their leader in 1976.

With the ascendancy of those Republicans in 1980, HOWARD BAKER became our majority leader in a move heralded today by both Republican and Democratic Senators alike. Not only has Senator BAKER taken an eclectic group of Republican Senators and woven them into a solid majority; but also he has managed the Senate with such fairness and understanding that he has won the respect and admiration of the Democratic Senators serving with him as well. This respect further extends to the other House of Congress and the White House.

The President knows HOWARD BAKER as a loyal supporter and able fighter in a Congress where the Senator took a inexperienced opposition and transformed it into a capable legislature responsible for passing many of the administration's bills into law.

HOWARD BAKER will go down in history as one of the greatest Senate majority leaders because of the trust other Members of Congress and the President and executive branch have in him. He has fostered this trust by getting to know his colleagues as individuals and respecting their opinions and interests. HOWARD BAKER truly exemplifies the best in what we call a politician.

HOWARD, I salute you on your achievements and am grateful to have served both as your colleague and friend in the U.S. Senate.

SENATOR JOHN TOWER

Mr. WALLOP. Mr. President, 23 years have passed since Senator JOHN TOWER won in a special election held to fill Lyndon Johnson's seat. Today, on the brink of his departure from this esteemed body, I think we all realize just how special that election was. JOHN TOWER is not just the first Republican Senator from Texas since the Reconstruction, he is also a man of foresight, of vision. He knew the meaning of the words "peace through strength" long before they became popular. More importantly, he acted on that philosophy by committing himself to foreign policy and defense initiatives that served to fortify the United States.

JOHN TOWER's commitment to the protection of the United States and its ideals probably has its roots in World War II where he saw firsthand the threat that foreign powers can pose. During this time he served for 3 years aboard a landing support ship in the western Pacific. It has been said that the kamikaze planes swarmed as thick as bees, but I think these events only strengthened his resolve that he must do everything in his power to safeguard the United States.

And, that he did. As chairman of the Armed Services Committee and throughout his term, JOHN TOWER has insightfully analyzed our defense needs. He has accepted the fact that America has some catching up to do. Consequently, he has supported measures to upgrade our military capability in all areas, including strategic, conventional, nuclear and maritime.

As a member of the Naval Reserve since World War II, and I might add the only enlisted reservist in Congress, he has provided a strong link with the rank-and-file military personnel. He has recognized the importance of meeting their needs and maintaining their morale.

In foreign policy areas he has gained a reputation for wisdom and prudence. Over the past 8 years during which I have served as his colleague, I have watched him battle with the toughest. I remember hearing one time that his mother has a picture of him in his Navy outfit with cowboy boots. Now, some people might find that combination pretty strange, but I think it epitomizes the Senator from Texas. JOHN TOWER is all toughness, determination and patriotism. When he leaves the Senate, his colleagues, friends and Texans will have a difficult time finding someone to fill those cowboy boots.

SENATOR JENNINGS RANDOLPH

Mr. WALLOP. Mr. President, I am pleased to have the opportunity today to express my deep appreciation of, and admiration for, the Honorable JENNINGS RANDOLPH at the conclusion of his 38 years of service in the House of Representatives and the Senate. His

legislative craftsmanship and humanitarianism have left an indelible stamp on the people of West Virginia and the Nation.

Anyone taking the time to review Senator RANDOLPH's lengthy history as a statesman cannot help but feel a sense of awe. The wealth of historical figures he has encountered and his unique experiences make him a virtual compendium of our century. Senator RANDOLPH has memories of sitting on his father's knee at the 1912 Democratic Convention in Baltimore while watching Woodrow Wilson's nomination. He was a primary force in helping President Franklin Delano Roosevelt enact the New Deal. He has served under nine Presidents and lived through four wars and the Great Depression. And, the list continues.

Yet, more importantly on this particular occasion, we must honor the fact that Senator RANDOLPH has served seven consecutive terms in the House of Representatives and four terms in the Senate. When one tries to explain such enduring popularity, the answer inevitably lies not in what he did, but in how he did it. When describing life in his hometown of Salem, WV, Senator RANDOLPH often says, "I grew up in a town where Main Street was something, people stopped and talked." In my mind that one sentence really sums him up. He will always be remembered as the Senator who stopped to talk. Members of his staff complain that he often buries them with tiny scraps of paper he collects during trips home. These bits of paper record the concerns and needs of various people he encounters throughout the State. If his office cannot solve their specific problems, he promises to find the office that can. In other words, Senator RANDOLPH has converted the whole Nation into his Main Street. Everyone is his neighbor.

The kinds of legislation for which he has been responsible reflect this concern for State and country. While it would be impossible to sum up 38 years of service in a couple paragraphs, Senator RANDOLPH has constructed some pieces of legislation that we now call landmark legislation. He sponsored the Randolph-Sheppard Act, the Synthetic Liquid Fuel Act, the Appalachian Regional Development Act, the first black lung legislation and the 26th amendment to the Constitution. In addition, he was responsible for legislation that brought about the establishment of the U.S. Interstate Highway System, a separate U.S. Air Force, a network of nationwide airports, and the Air and Space Museum.

The motto of Senator RANDOLPH'S graduating class at Salem College was: "From Possibility to Actuality." Obviously Senator RANDOLPH took that phrase to heart throughout his career dedicated to public service. Although Senator RANDOLPH will not be with us in the 99th Congress, his wisdom, guidance, and example will be strongly felt for years and years to come.

THE COURAGE AND COMMITMENT OF JACOB JAVITS

Mr. KENNEDY. Mr. President, last month, the Washington Post published a remarkable and inspiring article about the many current interests and activities of our former colleague from the State of New York, Senator Jacob Javits.

As the article makes clear, Lou Gehrig's disease may have met its match in Jacob Javits. The effects of the disease have slowed him down a little—but only from 100 miles an hour to 95 miles an hour. All of us who knew and loved Jack Javits in the Senate know that the disease has not dimmed his enormous intellect nor diminished his passionate dedication to the great causes of his life in public service.

Many of us had the opportunity to renew our friendship with Jack when he returned to Washington last month for the ceremony marking the 10th anniversary of one of his greatest Senate achievements, the Employee Retirement Income Security Act. And the commemoration of the act also turned out to be a celebration of Jack Javits and his extraordinarily wide-ranging current activities. Few in the Senate could keep up with him then, and few can do so today.

Mr. President, all of us in Congress who served with Jack Javits and who admire his courage and commitment today will be interested in the article I have mentioned, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 14, 1984]

THE PUBLIC TWILIGHT OF JACOB JAVITS: LIVING WITH INFIRMITY BUT NEVER LETTING UP

(By David Remnick)

STONY BROOK, NY.—Jacob Koppel Javits sits in a wheelchair behind his old Senate desk, an 80-year-old public man.

A form of Lou Gehrig's disease has left his body a husk. He cannot lift a hand to sign his name or greet a visitor. A stiff collar keeps his head from slumping onto his chest. A portable respirator pumps life through a hole in his throat and into his lungs. A nurse feeds him clear soup through a straw, a solicitous aide sets a piece of correspondence before him for his inspection and approval.

The afternoon light in the Javits Room of the library is a bit weary and wan and so is the senator. Javits was a fiery orator in his 24 years in the Senate, one born to the soapboxes of political New York and, in his prime, a match for the likes of Hubert Humphrey. The accent is still that familiar blend of Lower East Side edge and Senate élan, but the phrases last just a short breath. After each bundle of words, Javits waits for the respirator to fill him with the strength to speak:

"I was an active man, strong and in close touch with the world. Illness, you never think of those things. You just go on for years, working, taking life for granted. My illness is considered terminal. I had to think about what to do, what it means. And I decided I had to keep on as long as I could."

Javits still has the same clear and restless mind that distinguished his years in the Senate. Lou Gehrig's disease, or amyotrophic lateral sclerosis, is a devastating condition. Because of his illness, it takes Javits nearly three hours to prepare for the day, but what he does with the remaining hours is extraordinary.

He has given commencement addresses and testified before congressional committees. He is in regular contact with his colleagues and may soon write a book about his illness. This week Javits has been in Washington to help celebrate the 10th anniversary of one of his many achievements in the Senate, the Employees Retirement Income Security Act.

This late-summer day a week ago on Long Island is also typically vigorous. Already Javits has reviewed portions of his papers, which he is collecting for the library of the State University of New York at Stony Brook, given a 90-minute speech on foreign policy before an audience of 250 students, held a news conference and appeared at a reception.

"I had to take a boxing course when I was a student and the instructor told me to put up my hands. The next thing I knew I was on my behind. He told me, 'There, that's the first lesson. Hit them from where you are.' And that's what I'm doing. I'm sick. Maybe I won't live much longer, but I'm hitting 'em from where I am. I'm not giving up a thing."

* * * * *

"Absolutely."

Jacob Javits knows the question is coming, and when he answers, his voice lifts and blue eyes sparkle. He is absolutely sure, he says, that he could be an effective senator now if he had the chance. Although both he and the public knew he was sick, Javits ran for a fifth term in 1980. After losing the Republican nomination to his right-wing challenger, Alfonse D'Amato, Javits campaigned under the Liberal Party banner. D'Amato did not hesitate to mention Javits' age and illness, and the supporters of Democrat Elizabeth Holtzman wanted him to bolt the race and leave the liberal constituencies undivided.

Javits had once been an avid tennis player, but now he could offer only mental vigor to his job. "The people of New York will have to decide if they want a tennis player or a brain," he said at the time. The electorate was unconvinced, and the formula of one conservative and two liberals cast the election in D'Amato's favor. Holtzman finished a close second, Javits a distant third.

Now, there seem to be 1,001 subjects he would rather discuss than Alfonse D'Amato.

"I haven't examined his Senate career with any particularity," Javits says. "He is a conservative. He's followed what he told the voters he would do. I have no comment on it. He hasn't done anything that particularly excites me. If he runs again, and I'm still alive, I'll see what I'll do."

But if he had won, could Javits have served?

"Absolutely," he says. "I told the people I would and, considering the schedule I've kept up, I've certainly shown it to be the case.

"I would have been chairman of the Committee on Foreign Relations. I had unbelievable seniority for a New Yorker. I had a great opportunity to be of influence with senators of my own party and with the Democrats. And justly so. I never let them down. When I told them I'd do something, I did it.

"I served a very useful role in the Senate and I felt it was my duty to the people of New York, who had brought me to such a high position, not to fire myself. There was no reason for it. But the campaign against me, the exploitation of my age and health combined with the appeal of the right wing of the Republican Party was obviously more than I could handle."

His wife, Marion, puts it this way: "For all his [health problems], my husband certainly would have done a better job than the man that replaced him. I know you'll think I'm biased, but I believe the world is starving for men like [Javits]. He would have functioned almost as well during his illness as he did before. . . . I spoke to Senator McGovern recently, and told him, 'George, he's still working like he's in the Senate. The only difference is, he can't vote.' "

Throughout his Senate career Javits and his wife lived quite distinct lives. His devotion to the Senate was primary and consuming. As a liberal Republican, Javits was deeply involved in creating the Legal Services Corp., the War Powers Act, the Comprehensive Employment and Training Act and educational funding for both the gifted and mentally handicapped. He was a key supporter of Israel, the arts and the bailout of New York during the city's financial crisis in the mid '70s.

Marion Javits found Washington life intolerable and rarely spent time in the capital. Though friends say their marriage has been complicated and even tempestuous at times, Richard Clurman, a writer and one of Javits' closest friends, says, "Marion is doing her loving, marital duty as well as anyone could now."

"My husband has never really had a personal life. And I was the one that always got blamed for it," Marion Javits says. "But his public spiritedness is total for him. It's just like other people regard their families or vacations. He wants us to be there for him, but it was never first for him. He chose that public life and that has always prevailed. The personal doesn't rank with the public. It never has. There's no use complaining now, but it's not easy to live with when you're another kind of person."

Jacob Javits nearly died two years ago. He was brought from Florida to Bethesda, where he was treated for severe respiratory problems.

"When he was in Bethesda, he was hooked up to all sorts of machines and respirators," says a friend who asks not to be identified. "He was out of it. We thought it was the end. There was even discussion of pulling the plug. And Marion started to laugh and cry at the same time. I remember she said, 'What a time to fall in love with him.' "

Those who come now to Stony Brook or Manhattan to meet Javits typically expect to find a man whose mind is as wasted as his body. They are prepared to honor him and patronize him, to pay homage to him before he dies. Javits will not allow it. He immediately commands his listener's attention and respect.

"It's the most valiant dying, I've ever seen," says Clurman. "I remember he made me feel foolish once. I'd made plans to visit him but I had to call and say that my back was bothering me and I couldn't make it. He said, 'No problem, I'll come to you.' And he did. He's acquired a scope and grandeur. He's put his accomplishments into a very human frame of intelligence and courage."

"He is as sharp as he's ever been," says John Trubin, Javits' law partner and closest confidant. "He's always been a driven person and he's still got that fire in him. His thing is living."

Javits has always been relentlessly public and he has found a new cause in his infirmity, "Jack looks at his own illness from a distance," says Clurman. "It's as if it were somebody else and he had to think about it on a political scale."

Several months ago, Javits was a patient at New York Hospital. At the hospital's weekly medical conference, the patient lectured 150 doctors. Javits said the most important thing in his life is to "keep my brain in order and functioning. . . . This is the essence of life.

"If there is anything I can leave with you in terms of the treatment of patients with a terminal illness, it is this: We are all terminal—we all die sometime—so why should a terminal illness be different from terminal life? There is no difference."

Javits' impulse to think in terms of legislation has waned very little since leaving the Senate, and he urged the doctors to help develop a test "to enable us to determine socially who should live and who should die." He spent much of the summer thinking about that "test" and how it principal barometer should be the individual's mind. If that is gone, says Javits, then there is a question whether that life should be sustained.

"The more I thought about such a test, the more I believe it has worth for serious consideration," he says. "You must remember, my own philosophy is that you don't belong only to yourself. You have an obligation to the society which protected you when you were brought into the world, which taught you, which supported you and nurtured you. You have an obligation to repay it."

Those closest to Jacob Javits are not surprised by the way he has led his "retirement." His autobiography, published three years ago, was given the title "Javits: The Autobiography of a Public Man," and the last chapter of his life will not do anything to alter its appropriateness.

"It was poverty that made me this way," says Javits, the son of Jewish immigrants from eastern Europe. "Poverty made me see the importance of a public life. It's also talent. I could always speak and get people to listen. It's a certain gregarious quality. You like a crowd and you evaluate your deeds in terms of their worth and how many people they affect. And I'm sure, too, it's ego. It's a glorious feeling any time you have the power to persuade people toward a justifiable purpose."

When he was a boy, Javits learned a lesson about justifiable purposes from his father. Morris Javits had been a Talmudic scholar in the Ukraine but was forced to work endless hours as a janitor on the Lower East Side. To make a few extra dollars, Morris bought votes for the Tammany machine at $2 apiece.

The Democratic Party in New York in 1932 was the party of Tammany Hall and Jimmy Walker and corruption. Javits turned to a steady diet of progressive politics as a youth—even supporting the Socialists for a time—and so it seemed logical for him to join the party of reform and Fiorello La Guardia. Javits jointed a Republican club on Third Avenue and 72nd Street and has resisted entreaties to switch parties ever since, even as he has become that increasingly rare political animal—the liberal Republican.

"I never can forget that my party's basic roots are in equality," he says. "I am, in philosophy and ideology, a liberal. As Lincoln said, government should do for the people what they cannot do, or do as well, for themselves. . . . When people like John Lindsay and Wayne Morse switched to the Democrats, I thought about it and had discussions about it, but I never really considered it too seriously."

In 1964, Javits supported Nelson Rockefeller for the presidency, but when Barry Goldwater won the Republican nomination, Javits could not support the party ticket. But he says he will vote for Ronald Reagan this year. His public explanation is vague, perhaps deliberately so. Those close to him say that Javits is unenthusiastic about both presidential candidates, but regards himself a "party man." Javits clearly feels he can be most useful as a critic-from-within. In his speech at the university earlier in the day, he supported the nuclear freeze movement and a nonmilitary approach to the conflicts in El Salvador and Nicaragua.

"I've never been inhibited about criticizing presidents before," he says, "and I won't hesitate now."

* * * * *

Javits did not go to Dallas this summer, but he did watch the Republican convention on television. He found his wing of the party in eclipse, if only temporarily. There was Sen. Lowell Weicker of Connecticut battling the Rev. Jerry Falwell and the evangelical right wing, but few liberals and fewer liberal mavericks could be heard above the nearly unanimous voice of the conservative movement.

"The progressive wing of the party must be represented," Javits says. "I'll do all I can to help develop the ideas and the leadership to help that along.

"But right now there is a big middle-class revolution going on. It still commands the majority and has Reagan way ahead in the polls. The revolt was against what was considered to be inadequately monitored or evaluated welfare programs and entitlements. The theory is that those who were enjoying the entitlements were doing so fraudulently. And the ones paying the bills weren't getting what they wanted.

"The whole thesis has been dressed up in patriotism and more military strength. I feel the premise in untrue. Yes, there was undoubtedly some waste and fraud and probably more experimentation than the public was interested in. . . . But this revolution won't extend to 1988. I think you'll see a very different candidate for the Republicans."

Javits has strong ties with liberal and moderate Senate Republicans such as Charles McC. Mathias (Md.), John Chafee (R.I.) and Charles Percy (Ill.) and believes figures like George Bush, Howard Baker or even Jack Kemp may emerge as surprisingly moderate candidates for national office four years from now.

"These things come in cycles," Javits says. "I've seen it all my life."

* * * * *

The room is getting darker and Jacob Javits' words are now almost pure breath.

Javits once told an aide, "I am more than a senator. I am an institution." The remark was neither humble nor false.

"I meant that I'd established an institutional character," Jacob Javits says at the end of a long, long day. "What I stood for was institutional in the sense that probably my greatest ambition was the prestige, the capability, the authority of a senator. Mike Mansfield coined the term, 'a Senate man.' He was one. I believe I was another."

TRIBUTE TO SENATOR HOWARD BAKER

Mr. PRESSLER. Mr. President, I wish to join in the chorus of personal tributes being paid to HOWARD BAKER of Tennessee in these final days of his service as our distinguished majority leader. The Senate will lose one of the most respected and capable Senators ever to serve in this Chamber when HOWARD BAKER retires at the end of this 98th Congress. I am personally saddened by the realization that Senator BAKER will not be here when the 99th Congress convenes next January.

Senator BAKER has been an inspiration to me and to all of his colleagues on both sides of the aisle. A skilled legislator and an able leader, he has shown logic, reason, and compassion in steering this body through its day-to-day operations, as well as through many rough and tough disputes. He has earned a reputation as a champion of fairness, a politician's politician, and a leader who gets things done in a calm, cool, and collected manner.

Serving beside him in the Senate has been a privilege and a priceless learning experience for me, as I know it has been for so many other Senators. Despite the high pressure nature of his job and the many demands on his time, Senator BAKER has always stayed in close tough with the needs of his State—and of his colleagues. He campaigned for me when I was a freshmen Congressman. After I became Senator, HOWARD BAKER visited my State of South Dakota both as a campaigner and as a legislator interested in the problems of South Dakotans. I am deeply indebted to him for his guidance, encouragement, and friendship.

It has been my pleasure to visit with Senator BAKER and his wife, Joy, in their Washington home on many occasions. I have the greatest admiration for the entire Baker family.

Senator BAKER has often joked that when he first came to the U.S. Senate 18 years ago, he was invariably introduced as the son of Congressman Howard Baker, Sr., and the son-in-law of Senator Everett Dirksen. HOWARD BAKER is returning to public life with a unique and enviable reputation of his own as a tremendously powerful and popular political leader.

I wish him the best of success in his new role in private life. At the same time, I hope and expect that we shall hear from HOWARD BAKER again, in other important political roles.

TRIBUTE TO SENATOR JENNINGS RANDOLPH

Mr. CRANSTON. Mr. President, the time is too quickly approaching when we will sadly have to bid fond farewell to one of the finest members this body, and indeed, the Congress, has ever known—the so very distinguished and so very able senior Senator from West Virginia, JENNINGS RANDOLPH.

Mr. President, JENNINGS RANDOLPH is a tireless, dedicated public servant and an advocate for those who are underprivileged, unemployed, or underrepresented. His more than 38 years of service to this Nation in the Congress are strewn with landmark legislation in which he played key roles. Over the years in which I've been privileged to serve with him in the Senate, I've witnessed instance after instance illustrating his fine ability, his keen insights, his great wisdom, and his humane approach to every issue.

I first came to know JENNINGS in 1969 when I was honored to assume the position he had held a year before as the chairman of the Subcommittee on Veterans' Affairs of what was then the Committee on Labor and Public Welfare. Since then, we've served together on the full Committee on Veterans' Affairs for the last 14 years. His record on veterans' issues is unmatched, and his concern and dedication is not only deep, but also very, very real. JENNINGS views each issue, each provision, each problem, from a personal perspective. And those of us who have served with Senator RANDOLPH in this area can readily attest to what we have learned from him.

Throughout the almost 16 years we have worked together on veterans' issues, Senator RANDOLPH has never failed to be anything less than a totally active participant. In the Veterans' Affairs Committee, he has always been there. When quorums were needed, when votes were to be taken, when issues were to be discussed, there was never any question that JENNINGS RANDOLPH would be there—and would be there right in the thick of it. That exemplifies his sense of responsibility to the position he has held and the manner in which he views the public trust he has so steadfastly upheld.

His record in the area of rights and benefits for Americans who suffer from disabilities is equally outstanding. To leave this body, after any number of years of service with one's name inscribed upon a major law is itself a great achievement. But for JENNINGS RANDOLPH, this feat marked just the beginning of his enduring record of service and achievement in this vital field. His record in the disability area began in 1936—nearly 50 years ago—when his efforts resulted in the enactment of what we know as the Randolph-Sheppard Act. This act established a program which became the vanguard of subsequent legislative efforts to promote the rehabilitation of handicapped individuals. As the first chairman of the Labor Committee's Subcommittee on the Handicapped, where I was privileged to serve with him for so many years, his leadership, compassion, and foresight contributed to virtually all legislation for disabled persons enacted during his career in the Congress, including programs to assist disabled children, and blind, and other handicapped persons, and to ensure for each handicapped child a free and appropriate public education.

Throughout his more than two decades on the Senate Labor and Human Resources Committee—during 12 years of which I was privileged to serve with him—JENNINGS left his mark on hundreds of legislative items dealing with health, education, and other human needs. He introduced the first black lung legislation in the Senate in 1969. His great concern for middle-age and older Americans was reflected in numerous pieces of legislation developed in the Labor Committee over the last 20 years.

As a member of the Committee on Environment and Public Works since 1958—and the chairman of that committee from 1966 through 1980—Senator RANDOLPH has been intimately involved with legislative issues concerning air and water pollution control, solid waste disposal, highways, environmental protection, aviation, and transportation. His expertise in these areas is enormous and his record is clear evidence of his effectiveness. He has guided the development of a variety of legislation in transportation, environment, economic development, and water resources. He authored the Appalachian Regional Development Act and the Public Works and Economic Development Act. He was the author of the Solid Waste Disposal Act and a major contributor to other basic environmental statutes, including the Clean Air Act, Clean Water Act, Endangered Species Act, and Superfund Act.

Page upon page of the CONGRESSIONAL RECORD would be needed to list all of his accomplishments including those related to the early New Deal legislation which created such landmark programs as Social Security, the Soil Conservation Service, the Fair Labor Standards Act, and so many, many more. Certainly no listing would be complete without reference to his efforts—beginning in 1942—which led to the ratification of the 26th amendment to the Constitution giving young Americans the right to vote.

And now, JENNINGS RANDOLPH is about to see the fulfillment of one of his oldest goals—the establishment of

a National Peace Academy. The President's signature on the Defense Authorization Act will mean that Senator RANDOLPH's efforts—begun in 1943 when he introduced a bill to create a Department of Peace—will have finally been successful. The establishment of the U.S. Institute of Peace is a fitting crowning achievement for a career marked with such brilliance, humanity, and commitment. The creation, within the Institute, of the Jennings Randolph Program for International Peace, through which scholars and leaders from the United States and abroad will pursue scholarly inquiry and other forms of communication on international peace, will forever bear witness to the Senator's commitment to the cause of world peace.

Mr. President, there is no question that Senator JENNINGS RANDOLPH will be sorely missed—both here in the Congress and as a dedicated, effective representative of and advocate for his beloved native West Virginia. His contributions have been legend and his achievements great.

But I know that his efforts to serve his fellow men and women are far from over. As he told us in the Veterans' Affairs Committee several weeks ago, he isn't retiring; he's just looking for a new line of work.

JENNINGS, I want to take this opportunity to wish you just as much success and happiness in the future as you've had so far. You leave behind a record and a reputation that will not soon be matched.

TRIBUTE TO HOWARD BAKER

Mr. DECONCINI. Mr. President, while all Members of the Senate are waiting impatiently for the adjournment of the 98th Congress, there is nevertheless a pall of sadness accompanying that day for the Senate will be losing, through retirement, some of the ablest and most distinguished Members this body has ever known.

At the top of that list is HOWARD BAKER. All Members, on both sides of the aisle, feel a deep sense of loss that the distinguished majority leader will not be here to guide this body through the next and succeeding Congresses. HOWARD BAKER will be sorely missed for his integrity, his patience, his compassion, his eloquence, and for his wit and engaging personality. Above all, he will be missed for his ability to forge the compromises that are crucial for the Senate to forge ahead with the work of the Republic. Henry Clay once said: "Do not despise compromise, for it is the cement that holds the Union together." It is also the cement that holds this institution together, and HOWARD BAKER has raised the art of political compromise to a level rarely known in this body.

The unique blend of talents embodied in HOWARD BAKER will be difficult, if not impossible, to replicate in another legislator. He has given his last full measure to the responsibilities of his job as majority leader and as the Senator from Tennessee. His patience and untiring efforts to accommodate the wishes of every Senator have earned him the respect of all his colleagues. Never, even under the most difficult of circumstances, has he failed to honor a commitment he has made to this Senator or to any other Members. In the final analysis, HOWARD BAKER epitomizes the very best in the term "public servant." This Nation, this body, and the State of Tennessee will be losing one of the ablest legislators and the most decent human being who has ever served in public office.

HOWARD BAKER is leaving this Chamber at the peak of his career, and I know he is looking forward to pursuing other endeavors. Whatever HOWARD BAKER does in the future, I am certain he will continue to serve and bless this Nation with his creative and constructive service.

It has been an honor and privilege for me to serve with HOWARD BAKER, and I shall miss him. But HOWARD BAKER can leave knowing he has left a lasting impression on the institution he loves so dearly and has served so well.

I wish HOWARD BAKER, his wife, Joy, and their family every happiness and success in the months and years ahead.

TRIBUTE TO SENATOR JENNINGS RANDOLPH

Mr. DECONCINI. Mr. President, it is with deep sadness that I bid farewell to my distinguished colleague from West Virginia, JENNINGS RANDOLPH, with whom I have had the great privilege to serve. I had heard of JENNINGS RANDOLPH for many years before being elected to this body and admit to surprise upon discovering that this politician with such a formidable reputation was such a kind, gentle, and humble man. I came to know JENNINGS RANDOLPH in a more personal way as a fellow member of the Senate Veterans' Affairs Committee, and feel enriched by that experience. JENNINGS RANDOLPH's dedication to the veterans of this Nation are a reflection of the deep commitment which accompanied all his legislative endeavors.

JENNINGS RANDOLPH's long and illustrious congressional career has spanned four decades. He was not only a witness to, but an active participant in, the great political events of this century—the New Deal, World War II, the New Frontier, the Great Society, Korea, and Vietnam. But it is my belief that the New Deal, and its commitment to creating opportunities for the poor and disadvantaged of our society, has been the underpinning of JENNINGS RANDOLPH's remarkable career.

Time does not permit a long recitation of JENNINGS RANDOLPH's legislative accomplishments. Suffice it to say that his contributions to improving educational opportunities for the handicapped, to creating an Interstate Highway System unparalleled in the history of modern civilization, to providing quality health care for the Nation's veterans and for the coal miners and steelworkers of his beloved State, and to establishing, through dogged determination, a national entity dedicated to the study and pursuit of peace are now embedded in the laws of the land.

JENNINGS RANDOLPH's stature as a skilled legislator is more than equaled by his stature as a human being. He is a man of enormous compassion, unequaled integrity, and an indomitable spirit. Throughout his career, JENNINGS RANDOLPH has never lost his enthusiasm for public service. And his love for the institution he has served so well for so many years has never diminished. It is this body that will be diminished without his presence.

I wish JENNINGS RANDOLPH good luck and Godspeed as he embarks on a new career remains a model for all legislators to emulate and he leaves this body with the profound respect of all his colleagues.

Mr. President, Senator BAKER and Senator RANDOLPH are two outstanding people whom we have heard a lot about and who will be dearly missed by this body. Although the Republic will continue, it will have lost two very great assets, in this Senator's judgment. I sincerely thank them for their friendship, aid, and assistance to me.

RETIREMENT OF REPRESENTATIVE JACK EDWARDS

Mr. STEVENS. Mr. President, when the Senate adjourns sine die for the 2d session of the 98th Congress it will mark the end of a very distinguished career in public service by Representative JACK EDWARDS of Alabama who is retiring.

Mr. President, it is not a regular practice that Members of one body pay tribute to retiring Members of the other body. Representative EDWARDS has distinguished himself by representing the First District of Alabama in a fair and commendable way. He is a tough negotiator and staunch defender of the interest of his district, State, and country. I have firsthand experience in knowing the extent of his skills as a legislator. As chairman of the Subcommittee on Defense Appropriations in the Senate, I have faced Representative EDWARDS at many defense conferences. From expe-

rience let me tell you, I feel much better when we are on the same side than I do when we have differing views.

Mr. President, it is with regret I note that next year when we go to the conference table, Representative JACK EDWARDS will not be there. His contributions will be missed by us all.

Although the Congress will lose the service of a skilled legislator, his accomplishments will long be remembered. The insight and dedication that JACK EDWARDS has demonstrated during the 20 years of his service to which all of us should aspire.

Mr. BAKER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there are a few items that appear to be cleared for routine action. The minority leader and I have discussed it in a general way. Let me go through the list now and see if we can make some progress.

CIVIL SERVICE RETIREMENT SPOUSE EQUITY ACT

Mr. BAKER. Mr. President, I wish to call up H.R. 2300 if the minority leader does not object.

Mr. BYRD. Mr. President, there will be no objection.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. BYRD. I yield.

Mr. CRANSTON. Mr. President, on Wednesday night of last week, we engaged in rather intense procedural maneuvers regarding the amendment—amendment No. 7010—I had sought to add to the continuing resolution regarding the House-passed measure, title I of S. 958, requiring a study of the Federal workforce to determine whether job classification held predominantly by female workers were underpaid in contrast to job classification held predominantly by male workers although the job qualifications, working conditions, and requirements were comparable. This amendment, referred to as the Federal pay-equity or comparable-worth study, would simply give us some information on this issue. It is similar to studies going on in some 20 States with respect to public employees.

Mr. President, the reason I was forced to resort to offering this amendment to the continuing resolution was because the Senate Committee on Governmental Affairs has for over 3 months refused to go to conference on S. 958. The pay-equity study was added by the House as a new title I to S. 958. The Senate-passed version of S. 958 contained only provisions dealing with merit pay for Federal managers. The House-passed version of S. 958 has been held at the desk in the Senate since July 3 because of this unwillingness to deal with the pay-equity study issue.

This persistent desire to avoid dealing with the merits of the pay-equity study amendment manifested itself last week when the leadership went to great lengths to avoid an up or down vote on my amendment, despite the fact that it had been drafted in such a form that it would not constitute legislation on an appropriations measure. I am quite certain that these strenuous efforts were made because the opponents of this amendment, like myself, believe it would be passed by the Senate, as it was by the House, if we were ever afforded the opportunity to vote on the amendment.

Mr. President, at the time the leadership blocked an up or down vote on the pay-equity study amendment, I indicated that I intended to continue to press for such a vote at another time. When it became apparent that an effort was going to be undertaken to move onto another vehicle the part of S. 958 unrelated to the pay-equity study, I indicated that I would offer the pay-equity study amendment to such an amendment. Unfortunately, since other Senators did not want to face my amendment at this time, the result was that another important bill affecting women, H.R. 2300, relating to pension rights of divorced spouses of civil service retirees, was jeopardized. This pitted one women's issue against another. Despite my strenuous efforts to reach an agreement to let H.R. 2300 pass without any amendments, those efforts proved futile. It became quite clear that the opponents of the pay-equity study amendment were quite willing to kill both the divorced spouse bill and the merit pay bill rather than allow the pay-equity study amendment to come to a vote this year.

Mr. President, over the past several days, the Senator from Alaska [Mr. STEVENS], who is the chairman of the Subcommittee on Civil Service, Post Office, and General Services of the Senate Committee on Governmental Affairs, and I have entered into extensive discussions on how to resolve this impasse in a manner which would allow these other measures to move forward while at the same time ensuring that a pay-equity study would be conducted.

As a result, the Senator from Alaska has assured me of his personal interest in and commitment to seeing that a pay-equity study of the Federal workforce is carried out. Accordingly, we have reached agreement on a series of events that will take place over the next 8 months to bring about this type of review.

First, in order to lay the groundwork for the actual pay-equity study, the Senator from Alaska has agreed to join with me and the chairman of the House Committee on Post Office and Civil Service [Mr. FORD] and the chairman of the House Subcommittee on Compensation and Employee Benefits [Ms. OAKAR]—who also are parties to our agreement—and perhaps other Senators as well in a letter to the Comptroller General of the United States. That letter will request that the General Accounting Office provide, not later than March 1, 1985, to the House Committee on Post Office and Civil Service and the Senate Committee on Governmental Affairs a detailed report on options for carrying out a pay-equity study of the type which would have been mandated under my amendment and the House-passed title I of S. 958. GAO will thus develop a design for the actual study, including the scope of the work contemplated, the timeframe, an evaluation of the various methodologies that could be utilized, the costs if done by contract or directly, and the advantages and disadvantages of having the study done by a private contractor selected by OPM, by a private contractor selected by GAO, by GAO itself, or by OPM, or under some other suitable arrangement. The GAO will be requested to consult with the employee organizations and experts in the area of job-evaluation techniques as well as OPM in developing its report. The report will include a description of the studies and followup activities underway in the States and a discussion of the extent to which the various State studies—completed or currently underway—might provide appropriate models for the methodology selected for the Federal work force study.

Mr. President, in short, GAO will be asked to perform much of the preliminary work which would have taken place, under the legislation we proposed, through the Pay Equity Study Council, which would have assisted in designing the scope of the work and the methodologies to be used by the contractor.

Second, the Senator from Alaska has agreed that, not later than the week after the Easter recess, he will convene subcommittee hearings on the GAO report and the outline for the study to be conducted.

Third, following that hearing, the Senator from Alaska will consult closely with me, his subcommittee members, and others—such as the Senator from Washington [Mr. EVANS]—interested in the merit pay issue in an

effort to develop legislation to facilitate carrying out such a study, unless a decision has been reached that GAO itself should carry out the study, and will seek to have such legislation considered in committee and on the floor in a timely fashion.

Fourth, and finally, in the event that efforts to reach agreement on such legislation following the GAO report are unsuccessful, the Senator from Alaska has given me his personal assurances that he will do his best to provide us with an opportunity next year on an appropriate vehicle to have a vote on the merits of the issue.

Mr. STEVENS. Mr. President, the Senator from California has correctly stated the agreement we have reached regarding a plan and timetable for moving forward with a study of the type which would have been mandated by the amendment offered by the Senator from California. I believe that the issue of pay equity, or comparable worth is one which the Federal Government is going to have to deal with directly with respect to the Federal work force, and I believe that our agreement will lead to the carrying out of a review of the Federal wage system of the type sought by the Senator from California. I recognize that many of the States have already undertaken this type of effort, and the Federal Government ought to press ahead in a similar fashion regarding its own employees. If I am chairman of the Senate Post Office and Civil Service Subcommittee next year, I will pursue this understanding. If I am leader on our side of the aisle, I am certain my successor will honor my commitment.

Mr. CRANSTON. With those assurances, I will withhold offering the pay-equity study legislation as an amendment to the merit pay amendment to be added to H.R. 2300 and will interpose no further objection to consideration of H.R. 2300 as a vehicle for the merit pay amendment.

I thank the distinguished assistant majority leader for his cooperation on this matter.

Mr. President, let me say in conclusion that there are some who have wondered why I have insisted on pressing this issue so hard. The answer is that pay equity is probably the most important economic issue affecting American women that we will confront in the next decade. I was the first Member of Congress to introduce, having done so over 1 year ago, legislation, S. 1900, focused upon the pay equity problem. Much of the language contained in S. 1900 was incorporated into the House-passed measure. Shortly after the other body passed the pay equity amendment, I made a statement which appeared at 20775–76 in the RECORD of July 25, 1984, urging the Senate conferees to accept the House amendment.

We are already way behind State and local governments in looking at our antiquated personnel policies and practices; we are equally far behind many private employers. It is high time that the Federal Government caught up to the rest of the country on this issue. I intend to devote considerable time and effort during the next Congress to making sure it does.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 2300.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 2300) to provide retirement equity for former spouses of civil service retirees and for other purposes.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed immediately to the consideration of the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider H.R. 2300.

AMENDMENT NO. 7087

(Purpose: To amend title 5, United States Code, to reform and improve the performance management and recognition of certain Federal employees and the management of senior executives)

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senators from Virginia, Senators TRIBLE and WARNER, and I ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Tennessee [Mr. BAKER] for Mr. TRIBLE, Mr. WARNER and Mr. STEVENS proposes amendment No. 7087.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new title:

TITLE II—PERFORMANCE MANAGEMENT AND RECOGNITION SYSTEM

ESTABLISHMENT OF PERFORMANCE MANAGEMENT AND RECOGNITION SYSTEM

SEC. 201. (a) Chapter 54 of title 5, United States Code, is amended to read as follows:

"CHAPTER 54—PERFORMANCE MANAGEMENT AND RECOGNITION SYSTEM

"Sec.
"5401. Purpose.
"5402. Coverage.
"5403. General pay increases.
"5404. Merit increases.
"5405. Pay administration.
"5406. Performance awards.
"5407. Cash award program.
"5408. Report.
"5409. Regulations.
"5410. Termination.

"§ 5401. Purpose

"It is the purpose of this chapter to provide for a performance management and recognition system which shall—

"(1) use performance appraisals as the basis for—a) determining adjustments in basic pay by general pay increases and merit increases, and b) making performance award determinations;

"(2) within available funds, recognize and reward quality performance by varying amounts of performance and cash awards;

"(3) within available funds, provide for training to improve accuracy, objectivity, and fairness in the evaluation of performance;

"(4) regulate the costs of performance awards by establishing funding level requirements; and

"(5) provide the means to reduce or withhold certain pay increases for less than fully successful performance.

"§ 5402. Coverage

"(a) Except as provided in subsection (b) or (c) of this section, this chapter shall apply to any supervisor or management official (as defined in paragraphs (10) and (11) of section 7103(a) of this title, respectively) who is in a position within grade GS–13, GS–14, or GS–15 of the General Schedule described in section 5104 of this title.

"(b)(1) Upon request filed under paragraph (3) of this subsection, the President may, in writing, exclude an agency, any unit of an agency, or any class of employees within any such unit, from the application of this chapter, if the President considers such exclusion to be required as a result of conditions arising from—

"(A) the recent establishment of the agency, unit, or class, or the implementation of a new program;

"(B) an emergency situation; or

"(C) any other situation or circumstance.

"(2) Any exclusion under this subsection shall not take effect earlier than 30 calendar days after the President transmits to each House of the Congress a report describing the agency, unit, or class to be excluded and the reasons therefor.

"(3) A request for exclusion of an agency, any unit of an agency, or any class of employees within any such unit, under this subsection shall be filed by the head of the agency with the Office of Personnel Management, and shall set forth reasons why the agency, unit, or class should be should be excluded from the application of this chapter. The Office shall review the request and reasons therefor, undertake such other review as it considers appropriate to determine whether the agency, unit, or class should be excluded from the application of this chapter and, upon completion of its review, recommend to the President whether the agency, unit, or class should be so excluded.

"(4) Any agency, unit, or class which is excluded pursuant to this subsection shall, insofar as practicable, make a sustained effort to eliminate the conditions on which the exclusion is based.

"(5) The Office shall periodically review any exclusion from coverage and may at any time recommend to the President that an exclusion under this subsection be revoked. The President may at any time revoke, in writing, any exclusion under this subsection.

"(6) The Office shall prescribe regulations under which an employee may be excluded from the application of this chapter other than as part of an agency, unit, or class so excluded under the preceding para-

graphs of this subsection. To the extent practicable, the regulations shall be based on the provisions of such paragraphs.

"(c) This chapter shall not apply to individuals employed under the Office of the Architect of the Capitol, the Library of Congress, the Botanic Garden, or the Administrative Office of the United States Courts.

"§ 5403. General pay increases

"(a) For purposes of this section, a pay adjustment period, in the case of an employee covered by this chapter, shall be the period beginning on the first day of the first pay period applicable to such employee commencing on or after the first day of the month in which an adjustment takes effect under section 5305 of this title and ending at the close of the day before the beginning of the following pay adjustment period.

"(b) A determination concerning a general pay increase under this section shall, for any pay adjustment period, be made based on the level of performance of the employee involved, as determined for the latest appraisal period under section 4302a of this title (or an equivalent rating system) before the beginning of such pay adjustment period.

"(c) Subject to section 5405(a)(1)(A) of this title, if the employee's performance is rated—

"(1) at the fully successful level or either of the 2 levels above the fully successful level, the rate of basic pay of the employee shall be increased by the full general pay increase, effective as of the beginning of the pay adjustment period;

"(2) at the level 1 level below the fully successful level, the rate of basic pay of the employee shall be increased by one-half of the full general pay increase, effective as of the beginning of the pay adjustment period; or

"(3) at the level 2 level below the fully successful level, the rate of basic pay of the employee shall not be increased under this section.

"(d) A full general pay increase for any pay adjustment period under this section shall be determined by multiplying the rate of basic pay of the employee involved on the day immediately preceding the pay adjustment period by the percentage corresponding to the percentage generally applicable under section 5305 of this title to positions not covered by this chapter which are in the same grade as the position held by such employee.

"(e)(1) The basic pay of an employee for whom a determination under section 4302a of this title (or an equivalent rating system) for the latest appraisal period is not available shall be adjusted under this subsection in such circumstances as the Office of Personnel Management shall be regulation prescribe.

"(2) Any adjustment made under this subsection shall be equal to an adjustment under subsection (c)(1) of this section.

"§ 5404. Merit increases

"(a) For purposes of this section—

"(1) the term 'applicable reference rate', as used with respect to the rate of basic pay of an employee, means the rate equal to the sum of—

"(A) the minimum rate of basic pay provided under section 5332 of this title for the grade of the position held by such employee; and

"(B) one-third of the difference between the maximum rate of basic pay provided for such grade under such section and the minimum rate of basic pay so provided;

"(2) the term 'merit increase' means, with respect to a grade, an increase equal to one-ninth of the difference between the maximum rate of basic pay provided for such grade under section 5332 of this title and the minimum rate of basic pay so provided; and

"(3) a reference to the performance rating of an employee shall, for purposes of any increase which may take effect under this section in a year, be considered to be a reference to the level of performance of such employee, as determined for the latest appraisal period under section 4302a of this title (or an equivalent rating system) before the effective date of such increase.

"(b) Subject to section 5405(a)(1)(A) of this title, under regulations prescribed by the Office of Personnel Management, the rate of basic pay of an employee covered by this chapter shall be increased each year in accordance with the applicable provisions of subsection (c) of this section, effective as of the beginning of the first applicable pay period commencing on or after October 1 of such year.

"(c)(1)(A) If the rate of basic pay of the employee does not equal or exceed the applicable reference rate on the day before the effective date of an increase under this section, and the performance of such employee is rated at the fully successful level or either of the 2 levels above the fully successful level, the rate of basic pay of the employee shall be increased by an amount equivalent to a merit increase.

"(B) If the rate of basic pay of the employee equals or exceeds the applicable reference rate on the day before the effective date of an increase under this section, and the performance of such employee is rated—

"(i) at the level 2 levels above the fully successful level, the rate of basic pay of the employee shall be increased by an amount equivalent to a merit increase;

"(ii) at the level 1 level above the fully successful level, the rate of basic pay of the employee shall be increased by an amount equivalent to one-half of a merit increase; or

"(iii) at the fully successful level, the rate of basic pay of the employee shall be increased by an amount equivalent to one-third of a merit increase.

"(2) The rate of basic pay of an employee whose performance is rated at either of the 2 levels below the fully successful level shall not be increased under this section for the year involved.

"(d) The Office of Personnel Management shall prescribe regulations under which this section shall be applied in the case of an employee for whom a determination under section 4302a of this title (or an equivalent rating system) for the latest appraisal period is not available.

"§ 5405. Pay administration

"(a)(1) An employee covered by this chapter—

"(A) may not be paid at a rate greater than the maximum rate of basic pay for the grade of the employee's position, as set forth in section 5332 of this title; and

"(B) except as provided in paragraph (2) of this subsection, may not be paid at a rate less than the minimum rate of basic pay for such grade, as set forth in section 5332 of this title.

"(2) An employee may be paid at a rate less than the minimum rate of basic pay for the grade of such employee's position to the extent that payment of the lesser rate is the result of the employee having received less than a full general pay increase under section 5403 of this title.

"(b) An employee whose position is brought under this chapter shall, as long as the employee continues to occupy the position, be entitled to receive basic pay at a rate of basic pay not less than the rate the employee was receiving when the position was brought under this chapter, plus any subsequent increases under sections 5403 and 5404 of this title.

"(c) The Office of Personnel Management shall prescribe regulations governing the method by which an increase under section 5403 of this title and an increase under section 5404 of this title shall be made in any case in which both of those increases are to take effect beginning on the same date.

"(d) Under regulations which the Office shall prescribe, the benefit of advancement through the range of basic pay for a grade shall be preserved for any employee who is covered by this chapter and whose continuous service is interrupted in the public interest by service in the Armed Forces, or by service in essential non-Government civilian employment during a period of war or national emergency.

"(e) For the purpose of section 5941 of this title, rates of basic pay of employees covered by this chapter shall be considered rates of basic pay fixed by statute.

"(f) In the case of an employee covered by this chapter for whose position a higher rate of basic pay has been established under section 5303 of this title, any reference in this chapter to a rate of basic pay provided under or set forth in section 5332 of this title shall be deemed to be a reference to the corresponding rate of basic pay established under such section 5303.

"§ 5406. Performance awards

"(a)(1) Any employee who is covered by this chapter, and whose performance for an appraisal period is rated under section 4302a of this title (or an equivalent rating system) at the level 2 levels above the fully successful level, shall be paid a performance award under this section for such period.

"(2)(A) The amount of a performance award referred to in paragraph (1) of this subsection shall be determined by the appropriate agency head, except that any such award shall be not more than 10 percent of the employee's annual rate of basic pay and, effective after fiscal year 1985, shall be not less than 2 percent of such annual rate.

"(B) Notwithstanding subparagraph (A) of this paragraph, a performance award exceeding 10 percent but not exceeding 20 percent of the employee's annual rate of basic pay may be paid if the agency head determines that such award is warranted by unusually outstanding performance.

"(b)(1) Any employee who is covered by this chapter, and whose performance for an appraisal period is rated under section 4302a of this title (or an equivalent rating system) at the level 1 level above the fully successful level or at the fully successful level, may be paid a performance award under this section for such period.

"(2) The amount of a performance award referred to in paragraph (1) of this subsection shall be determined by the appropriate agency head, except that any such award shall be not more than 10 percent of the employee's annual rate of basic pay.

"(c)(1) Subject to subsections (a)(2) and (b)(2) of this section, the aggregate amount of performance awards paid under this section by an agency during any fiscal year shall be—

"(A) not less than the product of—

"(i) the applicable minimum percentage for such year under paragraph (2) of this subsection, multiplied by

"(ii) the estimated aggregate amount of basic pay which will be payable to employees of the agency covered by the performance management and recognition system during such year, as determined by the head of the agency, taking into consideration the number of employees who were covered by such system during the preceding fiscal year (or by the merit pay system in the case of fiscal year 1984) and the applicable rates of basic pay in such preceding year; and

"(B) not more than the product of—

"(i) the applicable maximum percentage for such year under paragraph (2) of this subsection, multiplied by

"(ii) the amount under subparagraph (A)(ii) of this paragraph for such year.

"(2)(A)(i) The applicable minimum percentage—

"(I) shall be .75 percent for fiscal year 1985;

"(II) shall, for each of the 4 fiscal years thereafter, be adjusted incrementally (by equal increments or otherwise) over the percentage for the preceding fiscal year by the appropriate agency head in accordance with regulations which the Office of Personnel Management shall prescribe; and

"(III) shall, as a result of the final adjustment, be increased to 1.15 percent for fiscal year 1989.

"(ii) The applicable maximum percentage for each of the 5 fiscal years during which this chapter is in effect shall be 1.5 percent.

"(B)(i) Notwithstanding subparagraph (A) of this paragraph, in the case of an agency described in clause (ii) of this subparagraph the applicable minimum percentage for any fiscal year during which this chapter is in effect shall be a percentage, not less than the minimum percentage described in subsection (2)(A)(i) and not to exceed 10 percent, which the Office shall by regulation prescribe.

"(ii) This subparagraph applies to an agency in a fiscal year if the average number of employees employed under such agency during the immediately preceding fiscal year was equal to or less than the equivalent of 20 full-time employees.".

"(d) A failure to pay a performance award authorized by subsection (b) of this section may not be appealed.

"(e) A performance award paid to an employee under this section shall be in addition to the basic pay of the employee and any cash award paid under section 5407 of this title.

"§ 5407. Cash award program

"(a) The head of an agency may pay a cash award to, and incur necessary expenses for the honorary recognition of, any employee who is covered by this chapter, and who—

"(1) by the employee's suggestion, invention, superior accomplishment, or other personal effort, contributes to the efficiency, economy, or other improvement of Government operations, or achieves a significant reduction in paperwork; or

"(2) performs a special act or service in the public interest in connection with or related to the employee's Federal employment.

"(b) The President may pay a cash award to, and incur necessary expenses for the honorary recognition of, any employee who is covered by this chapter, and who—

"(1) by the employee's suggestion, invention, superior accomplishment, or other personal effort, contributes to the efficiency, economy, or other improvement of Government operations, or achieves a significant reduction in paperwork; or

"(2) performs an exceptionally meritorious special act or service in the public interest in connection with or related to the employee's Federal employment.

A Presidential cash award may be in addition to an agency cash award under subsection (a) of this section.

"(c) A cash award paid to an employee under this section shall be in addition to the basic pay of the employee and any performance award paid under section 5406 of this title. Acceptance of a cash award under this section constitutes an agreement that the use by the government of any idea, method, or device for which the award is made does not form the basis of any claim of any nature against the Government by the employee accepting the award, or the employee's heirs or assigns.

"(d) A cash award to, and expenses for the honorary recognition of, any employee who is covered by this chapter may be paid from the fund or appropriation available to the activity primarily benefiting, or the various activities benefiting, from the suggestion, invention, superior accomplishment, or other meritorious effort of the employee. The head of the agency concerned shall determine the amount to be contributed by each activity to any agency cash award under subsection (a) of this section. The President shall determine the amount to be contributed by each activity to a Presidential award under subsection (b) of this section.

"(e)(1) Except as provided in paragraph (2) of this subsection, a cash award under this section may not exceed $10,000.

"(2) If the head of an agency certifies to the Office of Personnel Management that the suggestion, invention, superior accomplishment or other meritorious effort of an employee for which a cash award is proposed is highly exceptional and unusually outstanding, a cash award in excess of $10,000 but not in excess of $25,000 may be awarded to the employee on the approval of the Office.

"(f) The President or the head of an agency may pay a cash award under this section notwithstanding the death or separation from the service of an employee, if the suggestion, invention, superior accomplishment, or other meritorious effort of the employee for which the award is proposed was made or performed while the employee was covered by this chapter.

"§ 5408. Report

"The Office of Personnel Management shall submit an annual report to the President and each House of the Congress evaluating the effectiveness of the performance management and recognition system established by this chapter. Each such report shall be prepared after consultation with the respective heads of a sufficient range of agencies so as to permit an adequate basis for making a meaningful evaluation.

"§ 5409. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out this chapter.

"§ 5410. Termination

"This chapter and any regulations prescribed under this chapter shall cease to be effective after September 30, 1989.".

(b) The table of chapters at the beginning of part III of title 5, United States Code, is amended by striking out the item relating to chapter 54 and inserting in lieu thereof the following:

"54. Performance Management and Recognition System..... 5401".

PERFORMANCE APPRAISAL SYSTEMS

SEC. 202. (a) Chapter 43 of title 5, United States Code, is amended by inserting after section 4302 the following new section:

"§ 4302a. Establishment of performance appraisal systems for performance management and recognition system employees

"(a) Each agency shall develop 1 or more performance appraisal systems for employees covered by chapter 54 of this title which—

"(1) provide for periodic appraisals of job performance of such employees;

"(2) require the joint participation of the supervising official and the employee in developing performance standards with authority for establishing such standards resting with the supervising official; and

"(3) use the results of performance appraisals as a basis—

"(A) for adjusting the base pay and making performance award decisions with respect to any such employee in accordance with the applicable provisions of such chapter 54; and

"(B) for training, rewarding, reassigning, promoting, reducing in grade, retaining, and removing any such employee.

"(b) Under regulations which the Office of Personnel Management shall prescribe, each performance appraisal system under this section shall provide for—

"(1) 5 levels of summary performance ratings as follows:

"(A) 2 levels which are above the fully successful level;

"(B) a fully successful level; and

"(C) 2 levels which are below the fully successful level;

"(2) establishing, in writing, the critical elements of each employee's position and the performance standards for the fully successful level for each such element which will, to the maximum extent feasible, permit accurate evaluation of job performance on the basis of objective criteria related to the job in question;

"(3) communicating, at the beginning of each appraisal period and in writing, to each employee who is covered by chapter 54 of this title the performance standards and critical elements of the employee's position;

"(4) evaluating each such employee during the appraisal period on the basis of such standards;

"(5) assisting any such employee in improving performance rated at a level below the fully successful level; and

"(6) reassigning, reducing in grade, or removing any employee who continues to perform at the level which is 2 levels below the fully successful level, after such employee has been provided with written notice of such employee's rating and afforded reasonable opportunity to raise such employee's level of performance to the fully successful level or higher.

"(c)(1) Appraisals of performance under this section—

"(A) shall take into account individual performance and may take into account organizational accomplishment;

"(B) shall be based on factors such as—

"(i) any improvement in efficiency, productivity, and quality of work or service, including any significant reduction in paperwork;

"(ii) cost efficient;

"(iii) timeliness of performance;

"(iv) other indications of the effectiveness, productivity, and quality of performance of the employees for whom the employee is responsible; and

"(v) meeting affirmative action goals and achievement of equal employment opportunity requirements;

"(C) may be reviewed by an employee of the agency in accordance with procedures established by the Office of Personnel Management;

"(D) shall, on request of the employee whose performance is appraised, be reconsidered by an employee of the agency in accordance with procedures established by the Office; and

"(E) may not be appealed outside the agency.

"(2) Reconsideration of an appraisal under paragraph (1)(D) of this subsection may be made only by an employee who is in a higher position in the agency than each employee who made, reviewed, or approved the appraisal.

"(d)(1) In order to promote the purposes of this section, there shall be established within each agency a performance standards review board (hereinafter in this subsection referred to as the 'board'), consisting of at least 6 members, all of whom shall be chosen by the agency head from individuals employed in or under such agency. Of the members, at least one-half shall be employees who are covered by chapter 54 of this title and who are in the competitive service. A board shall be chaired by the member of the board designated for that purpose by the agency head.

"(2) It shall be the function of each board—

"(A) to assess, by the use of representative sampling techniques, the appropriateness of performance standards developed and used by the agency under this section;

"(B) to study the feasibility of an awards program based on the collective performance of units or other groups of employees who are covered by chapter 54 of this title, and to submit as part of its annual report under paragraph (3) of this subsection recommendations for any actions which the board considers appropriate with respect to any such program; and

"(C) to provide technique assistance with respect to any demonstration projects which may relate to performance standards of the agency under this section.

"(3) A board shall report to the head of the agency on its activities under this subsection annually.

"(e) In carrying out this section, neither the Office nor any other agency may prescribe a distribution of levels of performance ratings for employees covered by chapter 54 of this title.

"(f) The Office may not prescribe, or require an agency to prescribe, any specific performance standard or element for purposes of this section.

"(g) This section and any regulations prescribed under this section shall cease to be effective as of the date on which chapter 54 of this title ceases to be effective.".

(b) The table of sections for chapter 43 of title 5, United States Code, is amended by inserting after the item relating to section 4302 the following new item:

"4302a. Establishment of performance appraisal systems for performance management and recognition system employees.".

MERIT INCREASES AS EQUIVALENT INCREASES IN PAY

SEC. 203. Section 5335 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(f) Notwithstanding subsection (d) or (e) of this section, an increase in pay granted under section 5404 of this title is an equivalent increase in pay within the meaning of subsection (a) of this section and shall be taken into account in the case of any employee who, before becoming subject to this section, was granted such an increase while covered by the performance management and recognition system established under chapter 54 of this title.".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 204. (a) Title 5, United States Code, is amended—

(1) in sections 4501(2)(A), 5332(a), 5334(c)(2), 5334(f), 5335(e), 5336(c), and 5362(c)(3), by striking out "the merit pay system established under section 5402" each place it appears and inserting in lieu thereof "the performance management and recognition system established under chapter 54";

(2) in section 5361(5), by striking out "merit pay system" and inserting in lieu thereof "performance management and recognition system"; and

(3) in section 5948(g)(1)(C), by striking out "Merit Pay System" and inserting "performance management and recognition system".

(b) Section 1602 of title 10, United States Code, and section 731(b) of title 31, United States Code, are each amended by striking out "5401(a)" and inserting in lieu thereof "5401".

EFFECTIVE DATE; TRANSITION PROVISIONS

SEC. 205. (a) The amendments made by this title shall be effective as of October 1, 1984, and shall apply with respect to pay periods commencing on or after that date.

(b) The rate of basic pay for any individual serving in a position—

(1) which is in the merit pay system before the date on which the amendments made by this title take effect, but

(2) which does not become covered by the performance management and recognition system,

shall not be reduced on account of such position not becoming so covered.

(c) The rate of basic pay for any individual serving in a position which ceases to be covered by the performance management and recognition system as a result of the termination of such system under section 5410 of title 5, United States Code, as amended by this title, shall not be reduced on account of such termination.

(d)(1) Except as provided in paragraph (2), any agency or unit of an agency which, immediately before the date of enactment of this Act, was excluded from coverage under the merit pay system shall be excluded from coverage under the performance management and recognition system for the 12-month period beginning on such date of enactment.

(2) An exclusion under paragraph (1) may be revoked at any time in accordance with section 5402(b)(5) of title 5, United States Code, as amended by this Act.

TITLE III—SENIOR EXECUTIVE SERVICE

CONGRESSIONAL FINDINGS

SEC. 301. The Congress finds that the Senior Executive Service should be continued indefinitely.

PERFORMANCE AWARDS

SEC. 302. Subsection (b) of section 5384 of title 5, United States Code, is amended—

(1) in paragraph (2), by striking out "exceed" and inserting in lieu thereof "be less than 5 percent nor more than"; and

(2) by amending paragraph (3) of such subsection to read as follows:

"(3) The aggregate amount of performance awards paid under this section by an agency during any fiscal year may not exceed the greater of—

"(A) an amount equal to 3 percent of the aggregate amount of basic pay paid to career appointees in such agency during the preceding fiscal year; or

"(B) an amount equal to 15 percent of the average of the annual rates of basic pay paid to career appointees in such agency during the preceding fiscal year.".

REDUCTIONS IN FORCE

SEC. 303. (a) Section 3593(c)(1)(B) of title 5, United States Code, is amended by inserting "before October 1, 1984," after "title".

(b) Section 3594(b) of such title is amended to read as follows:

(b) A career appointee who has completed the probationary period under section 3393(d) of this title, and who—

"(1) is removed from the Senior Executive Service for less than fully successful executive performance as determined under subchapter II of chapter 43 of this title; or

"(2) is removed from the Senior Executive Service under paragraph (4) or (5) of section 3595(b) of this title;

shall be entitled to be placed in a civil service position (other than a Senior Executive Service position) in any agency.".

(c) Section 3595(b) of such title is amended—

(1) in paragraph (3)(B), by striking out "is entitled" and all that follows thereafter through "position." and inserting in lieu thereof "shall be placed by the Office in any agency in any vacant Senior Executive Service position unless the head of that agency determines that the career appointee is not qualified for that position."; and

(2) by striking out paragraphs (4) and (5) and inserting in lieu thereof the following:

"(4) A career appointee who is not assigned under paragraph (3)(A) may be removed from the Senior Executive Service due to a reduction in force if the career appointee declines a reasonable offer for placement in a Senior Executive Service position under paragraph (3)(B).

"(5) A career appointee who is not assigned under paragraph (3)(A) may be removed from the Senior Executive Service due to a reduction in force if the career appointee is not placed in another Senior Executive Service position under paragraph (3)(B) within 45 days after the Office receives certification regarding that appointee under paragraph (3)(B).".

(d) Section 3595(c) of such title is amended to read as follows:

"(c) A career appointee is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title whether the reduction in force complies with the competitive procedures required under subsection (a).".

DIRECTED REASSIGNMENT; TRANSFER OF FUNCTION

SEC. 304. (a) Section 3395(a)(2) of title 5, United States Code, is amended to read as follows:

"(2)(A) Except as provided in subparagraph (B) of this paragraph, a career ap-

pointee may be reassigned to any Senior Executive Service position only if the career appointee receives written notice of the reassignment at least 15 days before the effective date of such reassignment.

"(B)(i) A career appointee may not be reassigned to a Senior Executive Service position outside the career appointee's commuting area unless—

"(I) before providing notice under subclause (II) of this clause (or seeking or obtaining the consent of the career appointee under clause (ii) of this subparagraph to waive such notice), the agency consults with the career appointee on the reasons for, and the appointee's preferences with respect to, the proposed reassignment; and

"(II) the career appointee receives written notice of the reassignment, including a statement of the reasons for the reassignment, at least 60 days before the effective date of the reassignment.

"(ii) Notice of reassignment under clause (i)(II) of this subparagraph may be waived with the written consent of the career appointee involved.".

(b) Section 3595 of such title is amended by adding at the end thereof the following new subsection:

"(e) The Office shall prescribe regulations under which the rights accorded to a career appointee in the event of a transfer of function are comparable to the rights accorded to a competing employee under section 3503 of this title in the event of such a transfer.".

(c) Section 7543(a) of such title is amended by striking out "or malfeasance." and inserting in lieu thereof "malfeasance, or failure to accept a directed reassignment or to accompany a position in a transfer of function.".

(d) Section 8336(d) of such title is amended by inserting after the first sentence the following new sentence: "For purposes of paragraph (1) of this subsection, separation for failure to accept a directed reassignment to a position outside the commuting area of the employee concerned or to accompany a position outside of such area pursuant to a transfer of function shall not be considered to be a removal for cause on charges of misconduct or delinquency.".

PAY LIMITATION

SEC. 305. Section 5383(b) of title 5, United States Code, is amended to read as follows:

"(b)(1) In no event may the aggregate amount paid to a senior executive during any fiscal year under sections 4507, 5382, 5384, and 5948 of this title exceed the annual rate payable for positions at level I of the Executive Schedule in effect at the end of such fiscal year.

"(2)(A) Any amount which is not paid to a senior executive during a fiscal year because of the limitation under paragraph (1) of this subsection shall be paid to that individual in a lump sum at the beginning of the following fiscal year.

"(B) Any amount paid under this paragraph during a fiscal year shall be taken into account for purposes of applying the limitation under paragraph (1) of this subsection with respect to such fiscal year.

"(C) The Office of Personnel Management shall prescribe regulations, consistent with section 5582 of this title, under which payment under this paragraph shall be made in the case of any individual whose death precludes payment under subparagraph (A) of this paragraph.".

MISCELLANEOUS SENIOR EXECUTIVE SERVICE AMENDMENTS

SEC. 306. (a) Section 3135(a) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (8);

(2) by redesignating paragraph (9) as paragraph (10); and

(3) by inserting after paragraph (8) the following new paragraph:

"(9) the number of career appointees who have been placed in positions outside the Senior Executive Service under section 3594 of this title as a result of a removal under section 3595 of this title; and".

(b)(1) The first sentence of section 3393(b) of such title is amended by inserting before the period the following: "or commissioned officers of the uniformed services serving on active duty in such agency".

(2) Section 4312(b)(3) of such title is amended by inserting ", or (with the consent of the senior executive) a commissioned officer in the uniformed services serving on active duty," after "employee", and by striking out "executive".

(c)(1) Such title is amended by adding after section 3595 the following new section:

"§ 3595a. Furlough in the Senior Executive Service

"(a) For the purposes of this section, 'furlough' means the placement of a senior executive in a temporary status in which the senior executive has no duties and is not paid when the placement in such status is by reason of insufficient work or funds or for other nondisciplinary reasons.

"(b) An agency may furlough a career appointee only in accordance with regulations issued by the Office of Personnel Management.

"(c) A career appointee who is furloughed is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title.".

(2) The table of sections for chapter 35 of such title is amended by inserting after the item relating to section 3595 the following new item:

"3595a. Furlough in the Senior Executive Service.".

EFFECTIVE DATE

SEC. 307. The amendments made by this title shall be effective following the expiration of the 90-day period beginning on the date of enactment of this Act, except that the amendments made by section 304 shall be effective as of such date of enactment.

Mr. TRIBLE. Mr. President, I ask unanimous consent to have printed in the RECORD a section-by-section analysis of this bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

II. SECTION-BY-SECTION ANALYSIS

Section 201. (a) amends Chapter 54 of title 5, United States Code and is entitled "Performance Management and Recognition System" (PMRS).

Section 5401 of such title provides for the purpose of the legislation. The purposes delineated are similar to those listed in current law, namely using performance appraisals to determine pay and awards, recognize and reward quality performance, train employees to improve the appraisal process, and to regulate the costs of awards. A new objective is to reduce or withhold pay increases for poor performance.

Subsection (a) of section 5402 of such title provides that coverage of the PMRS be the same as those covered under the Merit Pay System, i.e., supervisors and management officials employed in GS-13, 14 or 15 positions.

Subsection (b) grants the President similar authority as in current law to exclude various groups from the PMRS. The President may additionally exclude a class of employees within a unit from participating in the system.

Section 5403 of such title provides for comparability increases.

Subsection (a) provides that comparability adjustments be provided at the same time the rest of the General Schedule employees receive them.

Subsection (b) provides that the increases shall be based on performance ratings.

Subsection (c) provides that comparability adjustments shall be granted to those who receive fully successful ratings or better. The employee who receives a rating two levels below fully successful will not receive a comparability adjustment. An employee who receives a rating one level below fully successful will not receive full comparability but will receive one-half the full comparability at the time they are provided to everyone else.

Subsection (d) defines the comparability percentage increase to be calculated based on OPM regulations. Such regulations shall provide for maintaining the relationships between relative positions of the rates of pay paid under the performance management and recognition system and the corresponding General Schedule pay ranges for employees rated fully successful or above.

Subsection (e) provides that where employees cannot be rated, they may be give the full comparability increase.

Section 5404 provides for the schedule of merit increases equivalent to periodic step increases. An employee in the lower third of the pay range who receives a fully successful rating or above for the latest appraisal period shall receive the full equivalent of a step increase. An employee in the upper two-thirds of the pay range who receives the top level rating shall receive the full equivalent of a step increase. These merit increases are limited by the maximum rate of pay within each grade. An employee in the upper two-thirds who receives a rating one level above fully successful shall receive one-half of an equivalent of a periodic step increase. An employee in the same pay range who receives a fully successful rating shall receive one-third of an equivalent of a periodic step increase. An employee with a rating at either of the two levels below the fully successful shall not receive a merit increase.

Section 5405 provides guidelines for setting pay.

Subsection (a) provides that salaries are limited to the maximum and minimum of the pay range except that an employee can be paid less than the minimum rate of basic pay in the employee's grade as a result of a performance evaluation less than fully successful.

Subsection (b) provides that employees brought under the PMRS shall not be subject to a reduction in pay as long as the employee continues to occupy the same position.

Subsection (c) provides that OPM will prescribe, through regulation, methods used to make certain adjustments to base pay.

Subsection (d) preserves the benefits of the PMRS for employees who serve in the Armed Forces or serve in essential nongovernment civilian employment during a war or a national emergency.

Subsection (e) clarifies that cost of living allowances payable to employees stationed outside of the contiguous 48 States are not

part of basic pay for the purpose of the PMRS.

Section 5406 provides that an employee receiving a top level rating shall receive a performance award. An employee receiving a rating of fully successful or one level above fully successful may receive such an award as determined by the agency head. The awards shall be in addition to comparability and merit increases but will not be added to basic pay. Performance awards shall not be more than 10 percent of basic pay of any PMRS employee for any year and not less than 2 percent beginning in fiscal year 1986 for employees rated 2 levels above the FS level. An agency head may make a special exception and provide an award up to 20 percent for unusually outstanding performance.

Agencies are encouraged to use pay awards to a greater degree than had been used in the past. To accomplish this end, agencies are required to expend at least .75 percent of estimated aggregate salaries for performance awards in fiscal year 1985 and are required to the maximum extent feasible, in accordance with regulatory authority of the OPM, to increase that level of funding to at least 1.15 percent of aggregate salaries in fiscal year 1989. Agencies are encouraged to increase award funding to the maximum of 1.5 percent in any fiscal year. OPM may approve exceptions to these funding requirements for small agencies.

Failure to pay a performance award is not appealable.

Section 5407 of such title is identical to section 5403 of the current law providing a cash award program.

Section 5408 of such title requires that OPM submit an annual report to the President and the Congress evaluating the effectiveness of the PMRS. Each report shall be prepared after consultation with a range of agency heads.

Section 5409 of such title authorizes OPM to issue regulations for the PMRS.

Section 5410 of such title sunsets the performance management and recognition system 5 years after the date of enactment of this legislation.

Section 202. (a) of this Act amends title 5, United States Code by adding a new section 4302a establishing a new statutory performance appraisal system for PMRS employees.

Subsection (a) requires agencies to develop one or more performance appraisal systems for employees covered by the PMRS. Such systems shall provide for periodic appraisals of job performance the results of which shall be used in adjusting base pay, making award determinations and as a basis of other personnel actions. The responsibility for assigning work and establishing standards rests with the supervisor.

Subsection (b) requires OPM to issue regulations regarding the appraisal systems. Each system shall have five summary levels of performance with the middle level of performance termed the fully successful level. The system also shall assure accurate evaluation of job performance, communication with employees regarding the requirements of the job prior to each appraisal period, evaluation of the employee based upon the standards, assistance to employees performing below the fully successful level, reduction in grade or removal of employees who continually perform at the lowest level.

Subsection (c) lists a sampling of factors to be taken into account during a performance appraisal.

The employee is provided the right to have the performance appraisal rating reviewed by an officer or supervisor at a level within the agency above those participating in the original rating. Although the appraisal rating may not be appealed outside of the agency, the employee may appeal any resulting removal or downgrade action being taken because of poor performance.

Subsection (d)(1) provides for the use of an agency Performance Standard Review Board to assist agency heads in assessing the appropriateness of performance standards and looking at the possible use of group or unit performance awards. Such boards may provide technical assistance to the agency head in establishing performance based demonstration projects.

Subsection (e) prohibits OPM and an agency from directing a specific distribution or curve of ratings in an agency.

Subsection (f) prohibits OPM from directing agencies to include a specific performance standard or element in an agency's system. This is not intended to prevent OPM or an agency from examining the system where there appears to be extremes in the distributions of performance and questions.

Section 203 of the Act amends section 5335 of title 5, United States Code, to apply to employees moving from the performance management and recognition system to the general schedule and prevents dual pay adjustments for individuals who move from that PMRS to the General Schedule.

Section 301 is a congressional finding that the Senior Executive Service should be continued indefinitely.

Section 302 provides that a performance award to a senior executive cannot be less than 5 percent of the SES employees basic pay. The section also replaces the limitation on the SES employee's in an agency eligible for an award by limiting the amount of funding authorized for awards. Performance awards in an agency may not exceed 3 percent of the payroll of all career appointees in an agency, or an amount equal to 15 percent of the average annual rates of pay to career appointees in an agency during the preceding fiscal year, whichever is greater. This makes more SES career appointees eligible for an award. The 15 percent limitation provides flexibility to smaller agencies to assure there is sufficient funding available to pay awards. It is hoped, however, that with the increased flexibility in the award program, agencies will use the program prudently to grant larger awards to the superior performers.

Subsection (a) of section 303 limits the reinstatement rights to vacant SES positions to those SESers removed from the Senior Executive Service before October 1, 1984.

Subsection (b) amends section 3594 title 5 by entitling an SES employee who is removed from the SES as a result of a reduction in force to be placed in a Civil Service position in any agency. This means, in effect, any SES employee so removed cannot be removed from the civil service. The employee must be placed in a position in any agency. Such protections do not apply to such an employee for subsequent reductions in force.

Subsection (c) amends section 3595 title 5 which reforms the convoluted procedure of reductions in force of SES employees. This provision is replaced by a requirement to place a SES employee in a vacant SES position for which he is qualified in the employee's agency. If no such vacancy exists, he is then referred to OPM for a 45 day placement process. OPM must attempt to place the SES employee in the SES in any agency for which he is qualified. An agency head may certify that the SES employee is not qualified for such a position. If after 45 days the SES employee is not placed in a vacant SES position, then he may be removed from the SES and placed in a civil service position in any agency no less than a GS-15. If the SES employee is offered a SES position during the 45 day placement period, he may either accept that position or by declining it he would automatically be assigned to a GS-15 position in any agency. It is hoped the new placement program would be more of a cooperative effort than the current placement program. OPM is to design this placement program to minimize the disruption of recruitment of SES vacancies in other agencies.

Subsection (d) limits the number of appeals currently available to displaced SES employees to simply appeal whether a reduction in force complies with competitive procedures.

Subsection (a) of section 304 provides that a reassignment of a SES employee outside of the employee's commuting area must be prefaced by a 60 day notice period plus a statement of reasons for the reassignment plus consultation with the employee as to the reasons for the reassignment and the employees preferences with respect to a proposed reassignment. An employee may waive in writing the 60 day notice requirement. It is intended that in certain hardship cases the agency may grant additional time.

Subsection (b) guarantees that for the transfer of functions between agencies, the employee will be afforded similar rights to those in the competitive service when transferring from one agency to another.

Subsection (c) amends section 7543 of title 5 by clarifying the law with respect to the consequences for failing to accept a directed reassignment. Current law provides that a suspension or removal from the civil service of an SES employee may occur as a result of the employee's misconduct, neglect of duty or malfeasance. To suspend or remove an SES employee, an agency must find a failure to accept a reassignment meets one of the above definitions. The basic premise of the SES is to foster position and geographic movement when in the best interest of the agency. This subsection makes it absolutely clear that failure to accept the directed reassignment or to accompany a position in a transfer of function is grounds for suspension or removal.

Subsection (d) amends section 8336 of title 5 to clarify that an SES employee who is separated from the government due to failure to accept a directed reassignment or to accompany a position in a transfer of function will not jeopardize the employees eligibility to receive an annuity based upon an involuntary separation. Failure to accept a reassignment must be one outside of an employee's commuting area to not be considered misconduct or delinquency. Current law prohibits an employee that is removed for misconduct or delinquency from receiving benefits if eligible through involuntary separation.

Section 305 modifies the Executive Level I pay limitations for SES employees. If a performance bonus or a rank award paid to an employee would exceed the Executive Level I pay limitation, then that amount of money in excess of the limitation would be rolled over and granted to the employee in the following fiscal year in a lump sum.

OPM shall regulate the disbursement of such bonuses in the event of an employee's death.

Section 306 requires that OPM report to the Congress the number of career appointees who have been removed from the SES as a result of a reduction in force.

Subsection (b) of such section amends section 3393 of title 5 to permit commissioned officers in the uniformed services who are commanding officers, executive officers program managers and the like and who supervise SES personnel to serve as members of agency Executive Resources Boards. The change will allow higher levels of management in the Department of Defense as well as those civilian agencies with a commissioned corp to participate in the recruitment and executive development program utilized for the SES. In addition, the section permits commissioned officers in the uniformed services who are at executive levels above senior executives to review the executive performance appraisal under section 4312(b)(3) when requested by the executive.

Subsection (c) of such section grants furlough authority of senior executives to the Federal Government. An SES employee may appeal a furlough to the Merit Systems Board.

Section 307 provides that the effective date of this title shall be 90 days of enactment of this act except that section 304 shall be effective as of the date of the enactment.

Mr. STEVENS. Mr. President, I thank the distinguished chairman of the Governmental Affairs Committee, Senator ROTH, for his willingness to call up this bill. I also commend our distinguished Virginia delegation—Senators TRIBLE and WARNER and Congressman WOLF—for their commitment to Federal employees in securing passage of what must be termed the Trible/Warner/Wolf merit pay bill. Finally, I commend the distinguished Senator from Maryland, Senator MATHIAS, for his leadership on the spouse equity bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 7087) was agreed to.

AMENDMENT NO. 7088

(Purpose: To require payment of interest on certain deposits authorized to be made for the benefit of former spouses)

Mr. BAKER. Mr. President, there are four technical amendments which I offer on behalf of Senator STEVENS with the request that they be considered en bloc and adopted en bloc, which I now send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. STEVENS, proposes an amendment numbered 7088.

(Purpose: To require payment of interest on certain deposits authorized to be made for the benefit of former spouses)

On page 4, line 24, strike out the period, and insert in lieu thereof the following: ", plus interest. For the purposes of the preceding sentence, the annual rate of interest for each year during which the annuity would have been reduced if the election had been in effect since the date the annuity commenced shall be six percent.".

On page 8, line 19, strike out the period, and insert in lieu thereof the following: ", plus interest. For the purposes of the preceding sentence, the annual rate of interest for each year during which an annuity would have been reduced if the election had been in effect on and after the applicable date referred to in such sentence shall be six percent.".

On page 10, line 17, strike out the period, and insert in lieu thereof the following: ", plus interest. For the purposes of the preceding sentence, the annual rate of interest for each year during which the annuity would have been reduced if the election had been in effect since the date the annuity commenced shall be six percent.".

On page 27, line 14, strike out "commenced;", and insert in lieu thereof "commenced, plus interest computed at the annual rate of six percent for each year during which the annuity would have been reduced if the election had been in effect on and after the date the annuity commenced".

On page 31, line 4, strike out the period and insert in lieu thereof the following: ", plus interest. For the purposes of the preceding sentence, the annual rate of interest for each year during which the annuity would have been reduced if the election had been in effect on and after the date the annuity commenced shall be six percent.".

(Purpose: To authorize an election to continue a reduction in the annuity of a retired employee or Member, after the reduction woud otherwise terminate, in order to provide a survivor annuity or an increased survivor annuity for a former spouse of the employee or Member)

On page 6, after line 3, insert the following:

"In the case of a retired employee or Member whose annuity is being reduced in order to provide a survivor annuity for a former spouse, an election to provide or increase a survivor annuity for any other former spouse (and to continue an appropriate reduction) may be made within the same period that, and subject to the same conditions under which, an election could be made under paragraph (5)(B) of this subsection for a current spouse (subject to the provisions of this paragraph relating to consent of a current spouse, if the retired employee or Member is then married). The opportunity to make an election under the preceding sentence is in addition to any opportunity otherwise afforded under this paragraph.".

(Purpose: To revise the remarriage limitation relating to the eligibility requirements for participation in the Federal employees health benefits program by former spouses)

On page 20, line 23, strike out "an unremarried" and insert in lieu thereof "a".

On page 20, after line 25, insert the following:

"(A) who has not remarried before age 55 after the marriage to the employee, former employee, or annuitant was dissolved,

On page 21, line 1, strike out "(A)" and insert in lieu thereof "(B)".

On page 21, line 7, strike out "(B)" and insert in lieu thereof "(C)".

(Purpose: To modify the documentation requirements relating to certain elections by certain retired Federal employees, for the purposes of the Civil Service Retirement and Disability System, who remarry after retirement)

On page 31, line 13, beginning with "original", strike out all through "other" or line 14, and insert in lieu thereof "such".

Mr. BAKER. Mr. President, has the clerk reported all four amendments in one amendment?

The PRESIDING OFFICER. There are four amendments, which the clerk has reported in one amendment.

Mr. BAKER. Yes, very well.

Mr. President, I ask unanimous consent that the four amendments be considered en bloc, and I assume that all four amendments have now been reported; is that correct?

The PRESIDING OFFICER. All four amendments have now been reported.

The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (No. 7088) was agreed to.

Mr. TRIBLE. Mr. President, when Congress passed the Civil Service Reform Act of 1978, it was viewed as the most sweeping reform of the Civil Service since its creation in 1883. That act was intended to improve Federal job efficiency, productivity, and quality by making pay adjustments contingent on job performance rather than on length of service. The merit pay system, used for managers and supervisors in GS grades 13-15, and the senior executive service [SES], which includes GS grades 16-18 and certain positions in executive levels IV and V, are performance-based pay systems implemented in the 1978 Reform Act.

Nearly 6 years after enactment of the Civil Service Reform Act, the inescapable conclusion is that the merit pay system and portions of the SES do not work. Everyone agrees: The Senate, the House of Representatives, the administration, merit pay employees and their associations, and this argument is supported by an analysis done by the General Accounting Office. The merit pay system, once a key element in Federal personnel management reform, is now widely regarded as poorly implemented, inconsistent, and arbitrary.

Mr. President, both the House and the Senate have expressed strong support for legislation urgently needed to correct these deficiencies and to promote the concept of merit based pay. On March 1, the Senate unanimously passed S. 958, the Civil Service Amendments of 1984, legislation I introduced to reform the merit pay system and revise provisions of the SES. Led by Representative FRANK WOLF who worked with me throughout development of this reform measure, the House overwhelmingly approved legislation on June 28, calling for merit pay system reforms and SES revisions which are nearly identical to those in the Senate version.

Let me briefly outline the provisions of the proposed reforms:

The current merit pay system is replaced by a performance management

and recognition system. Under this system, job performance will be appraised based on a standardized, five-point performance appraisal system—ranging from unsuccessful, and minimally successful, to fully successful, exceeds fully successful, and outstanding. An employee's performance appraisal will be used as the basis for all pay decisions including comparability, merit increases, and cash awards.

This system is established as a 5-year experiment subject to reauthorization by Congress. This period of time will provide us with adequate data to determine the effectiveness of the system and to make modifications, if they are required.

Modifications are also made in the SES. The provisions would provide fallback rights for employees in the event of a reduction-in-force. Increased funding is provided for the cash bonus program and reassignment obligations and procedures are clarified.

Mr. President, these reform provisions have been the subject to extensive hearings and discussions, in the Senate and in the House. Managers and management organizations have been involved in the development of this legislation from the beginning. The comments of nearly every personnel director in the Federal Government regarding this proposal were solicited. Administrative officials, both appointees and careerists, were also consulted at all phases of the development process.

As a result of these efforts, the reform provisions are supported by the managers and their organizations, by the agency personnel directors, by the administration, and by the Senate and the House, as evidenced by their action earlier in this session. Clearly, we have wide support for the proposed changes.

The amendment that I am offering today will allow agencies to immediately implement the proposed changes in the merit pay system and the senior executive service.

Mr. President, we are very close to providing what Congress intended nearly 6 years ago—a true merit based pay system for key managers and supervisors and an enhanced SES. We should not permit another disastrous payout under the current merit pay system. Failure to enact reform legislation would be a shame.

I commend my distinguished colleague Senator STEVENS for his hard work and leadership in this matter.

I urge my colleagues to adopt this amendment.

Mr. STEVENS. Mr. President, the first amendment would require the payment of annual interest of 6 percent on certain deposits authorized to be made for the benefit of former spouses;

The second amendment would authorize an election to continue a reduction in a retiree's annuity to provide a survivor annuity or increased survivor annuity for a former spouse;

The third amendment would revise the remarriage limitation relating to the eligibility requirements for participation in the Federal Employees Health Benefits Program by former spouses, and;

The fourth amendment would modify the documentation requirements relating to certain elections by certain retired Federal employees who remarry after retirement.

Mr. WARNER. Mr. President, I join my Virginia colleague in cosponsoring this long-needed measure of relief for the Federal Government's merit pay personnel and members of the Senior Executive Service.

I was proud to be an original cosponsor of this legislation when it was first introduced in the Senate on March 24, 1983.

Having been favorably reported by the Senate Committee on Governmental Affairs on February 3, 1984, the measure was unanimously approved by this body on March 1, 1984.

The provisions contained in this amendment have won the approval of the full House of Representatives and have the backing of the Office of Personnel Management.

Furthermore, such notable organizations as the Senior Executives Association and the Federal Managers Association have also provided their endorsement.

Mr. President, this amendment provides an important resolution to a longstanding problem.

Morale in both the Merit Pay Program and the Senior Executive Service has been greatly boosted by the progress we have made thus far, and I call on all of my colleagues to join me in their support.

Let us keep the faith with our top level Federal managers and supervisors who are relying on us to finish the job we have started.

I cannot close without acknowledging the support provided to this effort by the distinguished chairman of the Senate Governmental Affairs Committee, Senator ROTH.

Furthermore, the leadership provided by the chairman of the Civil Service Subcommittee, Senator STEVENS, has been absolutely essential.

This legislation represents the culmination of 3 years of effort to bring about these reforms, and I, for one, am extremely grateful to all parties concerned, in both Houses of Congress and on both sides of the aisle.

Mr. MATHIAS. Mr. President, as we begin consideration of H.R. 2300, the Civil Service Retirement Spouse Equity Act, it is important to note that this piece of legislation has gone through a long, arduous process that involved extensive negotiations with the administration, the Senate, and the House. The result is a piece of legislation that is not entirely perfect, but that takes a great step toward correcting an intolerable inequity in present civil service retirement law.

Representatives SCHROEDER and OAKAR started the ball rolling when they introduced H.R. 2300 last March. Senator STEVENS and I took their good idea and added a few new twists—namely, permitting former spouses to obtain health benefits at group rates under the Federal employee health benefit plan, providing retroactive survivor benefits to certain former spouses, and allowing retiring annuitants to voluntarily designate a former spouse as a survivor. This version of H.R. 2300, the bill before the Senate today, incorporates the best features of the House and the Senate bills. I must also point out that the legislative and policy experts at the Office of Personnel Management were particularly helpful in drafting this legislation, and certainly the administration can be proud of its part in helping to get this measure enacted.

Briefly, H.R. 2300 changes civil service retirement law to permit former spouses of civil service employees to obtain survivor benefits by court order or by voluntary designation from the retired employee. In addition, a former spouse would be able to retain Government group health insurance after divorce provided that he or she met certain criteria. At present, former spouses cannot receive survivor benefits or health benefits at group rates.

The changes made by H.R. 2300 are long overdue. In recognizing that marriage is an economic partnership in which each spouse shares and enjoys the fruits of the other's labor, Congress has enacted various measures to protect each spouse's investment. In each instance, special attention was paid to pension rights and the notion that a pension is earned by both spouses and should therefore be considered as marital property. For example, significant strides have been made in this regard affecting Foreign Service and military spouses, Social Security beneficiaries, and more recently, spouses of those receiving private pension benefits. Spouses and former spouses of civil service employees and retirees would share these protection with enactment of this proposal.

While I strongly support this legislation and encourage my colleagues to vote in favor of its passage, I do have reservations about certain provisions. Most of the difficulties relate to technical deficiencies in the bill, which do not affect it substantively. However, I am concerned about one provision in the retroactive benefit section. Section 4(b)(1)(B)(iii) of H.R. 2300 states that a former spouse is not eligible to re-

ceive retroactive survivor benefits if he or she is receiving a retirement or survivor annuity, other than Social Security, from previous employment of the former spouse or employee. This section should be read narrowly.

This provision of section 4 is not intended to preclude a former spouse from receiving a retroactive survivor benefit if he or she is receiving any form of deferred compensation or retirement income. The only purpose of this section is to assure that a former spouse's survivor benefit is the primary annuity that he or she will receive from an employer. Thus, receipt of benefits from a profit sharing, stock option, deferred compensation plan or the like, or from a life insurance company, would not be considered an annuity for the purposes of this section. To be ineligible for a retroactive survivor benefit, the former spouse must be receiving a substantial retirement or survivor annuity directly from an employer's pension program.

In closing, again I want to stress the importance of enacting this legislation. Further delay only breeds further inequities. If we recognize this, as I am sure all of my colleagues in the Senate do, it is our responsibility to take positive action on H.R. 2300.

Mr. DURENBERGER. Mr. President, I support this legislation and applaud the Congress for its continuing efforts to provide equity in our civil service system. The Civil Service Retirement Spouse Equity Act of 1984 makes great strides toward providing equitable treatment for spouses and former spouses of Federal employees.

Unfortunately, the widows and former spouses of civil service retirees have found themselves among the increasing numbers of elderly women living in poverty. The median income of women between the ages of 55 and 65 is approximately $4,500 a year; 85 percent of all single persons living below the poverty level today are women. I have been urging and working Congress for some time now to enact legislation addressing this deplorable situation. I am a cosponsor of the Senate version of this legislation and I have introduced additional legislation to provide pension equity for spouses of civil servants.

Because of public pension laws, widows and former spouses of Federal employees have not fully received the benefits that they believed were provided for them. Widows have found themselves without survivor's benefits, with no advance notice. Former spouses, most with long-term marriages, have found themselves without survivor benefits even though such benefits were provided for them in a divorce decree. Most of these women were at home during their marriages and therefore are not eligible for Social Security or private pensions. Access to survivor's benefits is vital to them. The lack of these benefits has left many of these women with little or no income in their old age.

Further exasperating the situation, these women also are left with no health insurance coverage. With little or no income, attempting to purchase private health insurance is impossible because they cannot afford to pay the premium.

The plight of the displaced homemaker is becoming well recognized in a society where nearly 50 percent of all marriages end in divorce. Divorced women who had dedicated themselves to maintaining a home and a family for many years are left in dire financial straits. Family commitments during marriage has meant little work experience and consequently, no retirement benefits based on their own work records. Upon divorce, many cannot find work because of their lack of job experience, because they are considered too old by employers, or because their health does not permit them to hold regular jobs. Those who are fortunate enough to find work must take low-paying positions with few fringe benefits.

Clearly, elderly women have had to bear the economic costs of divorce. Taxpayers also have had to pick up the cost of this inequity in the form of food stamps, welfare and medicaid.

Congress began to address this issue by amending the Social Security Act in 1977 to provide pension benefits to divorced spouses married 10 years or longer. In 1980, Congress passed legislation allowing divorced spouses of Foreign Service personnel to receive a pro rata share of their former spouse's retirement annuity and survivor's benefits. In 1982, additional legislation was enacted separately to provide similar protections for CIA spouses and military wives.

With the passage of the Civil Service Retirement Spouse Equity Act of 1984, we finally have provided some of these much needed protections for the widows and former spouses of Federal employees. This legislation recognizes court orders granting survivor's benefits to former spouses of civil service employees; it permits a Federal employee or annuitant to voluntarily elect to provide survivor benefits to any former spouse; it provides for a joint waiver of survivor's benefits at the time of retirement; and, it allows Federal Employee Health Benefit coverage to certain former spouses of Federal employees.

I believe this legislation is progress toward effectively dealing with this very serious problem. I believe just as strongly however, that Congress must take further action in order to provide the same pension rights for divorced and widowed spouses of Federal employees that have been provided for spouses of those in the CIA, Foreign Service, military, and under Social Security. I will reintroduce legislation to provide these protections in the 99th Congress and will continue to urge Congress to address these remaining inequities. Congress cannot allow the plight of these women to continue to exist.

Mr. BINGAMAN. Mr. President, I support passage of H.R. 2300, as amended. It provides important new protections for former spouses of Federal employees and makes needed changes in the survivor benefit portions of the civil service retirement law.

The major provisions of the bill would: permit a retiring employee or annuitant to voluntarily designate a former spouse to receive survivor benefits; allow the Office of Personnel Management to recognize court orders awarding survivor benefits to a former spouse; change various provisions of current law regarding survivor annuities, more specifically, requiring a joint waiver of election at retirement, permitting certain annuitants to reelect survivor annuities upon remarriage, and prohibiting lump sum withdrawals by Federal employees when OPM determines that a former spouse has a present or future entitlement to a survivor annuity; provide retroactive survivor benefits to certain former spouses of deceased Federal retirees; and extend Federal employee health benefit coverage to certain former spouses of Federal employees and retirees.

I regret that the Committee on Governmental Affairs was unable to complete action on an amendment which I had offered during committee consideration. My amendment would have insured that all married retirees would be given the same opportunity to provide survivor benefits to their current spouses as this bill allows divorced retirees to provide to their former spouses. However, given the opposition of the administration to my amendment and the lateness of the hour, I was forced to drop this amendment.

As currently drafted the legislation allows any divorced retiree to voluntarily provide survivor benefits to a former spouse. There are no restrictions placed on these individuals except that, in fairness, they must pay a certain amount of money back into the retirement system and accept reduced annuities for the remainder of their lifetimes.

However, in cases where individuals remarried after retirement, only those who fall into two limited categories are provided this opportunity. In certain circumstances these individuals would be forced to demonstrate, by providing extensive documentation, that they fit into one of the acceptable categories.

I cannot understand why we would provide a clear path to people who

became divorced yet devise obstacles to confront those who remarried. My amendment would have eliminated those obstacles for remarried annuitants. I believe, they should be provided with an open route to provide survivor benefits as are divorced retirees, if they are willing to pay the price of the required redeposit. I regret this amendment was not adopted.

Mr. President, I am concerned with one other aspect of this legislation which I feel compelled to comment on. The retirement laws and procedures are one of the most complex areas of our law. There is enormous difficulty both with respect to making the procedures and regulations simple and understandable to the retirees for whom they are intended to protect, and to make them simple to administer. I have great fear that given the track record of claims processing difficulties, lost requests of retirees, and difficulty among retirees in receiving timely information on options, that this legislation may well present even greater administrative difficulty or confusion to retirees. I hope that every effort will be made by the Office of Personnel Management to administer this area of law in the least confusing manner possible.

With this assurance I am pleased to support this needed legislation. I urge my colleagues to approve the House-passed bill, as amended by the Senate.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 2300), as amended, was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INTERNATIONAL FISHERY AGREEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 6342, which is at the desk.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 6342) approving the governing international fishery agreements with Iceland and the European Economic Community.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider H.R. 6342.

Mr. HUDDLESTON. Mr. President, H.R. 6342 is fisheries and marine resources legislation containing a wide variety of provisions.

The bill will give congressional approval to two bilateral agreements entered into by the United States—one with the European Economic Community and the other with Iceland—relating to foreign fishing in U.S. waters.

The bill will provide authorizations for appropriations to cover activities of the National Marine Fisheries Service and to support the National Sea Grant College Program. It also contains a number of other provisions relating to marine resource management.

Further, H.R. 6342 covers two areas within the jurisdiction of the Agriculture Committee, on which I serve as ranking Democrat.

First, the bill will authorize appropriations for fiscal years 1984 and 1985 under the National Aquaculture Act of 1980.

The Aquaculture Act is designed to encourage the development of aquaculture in the United States. It requires the establishment, and periodic revision, of a national aquaculture development plan and provides for improved coordination among Federal agencies.

Aquaculture includes catfish and trout farming, as well as the propagation of other fresh and saltwater fish and aquatic species. Aquaculture has great potential as a way to strengthen the fisheries industry and help meet the Nation's food needs. The aquaculture industry should be fostered, as provided in the Aquaculture Act.

The levels of appropriations authorized for fiscal years 1984 and 1985 in H.R. 6342 are the same as those set by S. 1101, a bill favorably reported by the Agriculture Committee on July 20, 1983.

Second, H.R. 6342 will amend the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480) and the Food for Peace Act of 1966 to include fish and fish products in the definition of "agricultural commodity," as that term is used in those acts. Public Law 480 already authorizes the provision of domestically produced fishery products under the Public Law 480 programs. The amendment to Public Law 480 in H.R. 6342 will include all U.S. fish and fish products in the programs. The bill will also amend the Commodity Credit Corporation Charter Act to make Commodity Credit Corporation facilities and authorities available for export promotion efforts relating to fish and fish products, as well as agricultural commodities.

The effect of the amendments will be to enable the Department of Agriculture, at its option, to include fish and fish products in its export development programs. This is consistent with the purposes and policies underlying the National Aquaculture Act.

I would state, however, that it is important that the Department of Agriculture increase its efforts to develop and expand exports of agricultural commodities. Export markets are essential to U.S. producers of tobacco, corn, soybeans, wheat, cotton, rice, and other major agricultural commodities.

I expect the Secretary of Agriculture to use the new authorities provided by H.R. 6342 judiciously, in a manner consistent with his responsibility to stabilize and strengthen U.S. agriculture. Projects to promote exports of fish and fish products should not be entered into at the expense of programs to promote exports of agricultural commodities.

Mr. GORTON. Mr. President, I support passage of H.R. 6342, which provides congressional approval to the governing international fishery agreement between the United States and the European Economic Community and a similar agreement between the United States and Iceland.

This bill contains the following important provision: Title II establishes an artificial reefs program; title III provides the necessary legislative authority to implement the convention on conservation of Antarctic marine resources; and title IV authorizes several marine fisheries programs within the National Ocean and Atmospheric Administration [NOAA]. Title V of the bill reauthorizes the National Sea Grant College Program; title VI reauthorizes the Ocean Thermal Energy Conversion Act; and title VII requires certain vessels to carry exposure suits for their crews.

I would particularly like to focus on the provisions contained in sections 404 and 405 of this bill relating to the Magnuson Fishery Conservation and Management Act [MFCMA] and the Commodity Credit Corporation [CCC] respectively. The amendments of the MFCMA are intended to expand foreign trade opportunites for our American fishing industry and to ensure that our own fishing industry receives the maximum obtainable benefits whenever the Federal Government allocates surplus fish in our 200-mile zone to foreign nations.

The fish and chips policy embodied in the MFCMA is a sound, fundamental premise of our fishery management process, and it has provided substantial benefits to many sectors of our fishing industry. Strengthening of the act's provisions governing allocations, however, should bring those

practices more into line with the act's purpose.

Allocations of fish from our fishery conservation zone [FCZ] to foreign nations is not a right on which foreign nations should rely. It is a privilege—a privilege that is only conferred in return for cooperation on their part. To date, that cooperation has not been fully satisfactory.

The provisions in section 404 of H.R. 6342 would accomplish three principle objectives. First, it would more sharply define our fish and chips policy by explicitly stating that purchases of processed fishery products, particularly bottomfish, and not just purchases of unprocessed fish, are expected in return for allocations. This does not mean that joint venture over-the-side purchases from U.S. fishermen are not desirable or beneficial to our industry. They are. It simply means that purchases of fish by themselves are not all we're trying to accomplish—that by themselves, they are not enough. The purpose of the allocation criteria is to stimulate purchase of American processed fish. The benefits to our fish processing industry are to be given importance, equivalent to that of the fish-harvesting industry.

Second, this section clarifies the Magnuson Act so that there is no doubt that allocations to a foreign nation occur when we are satisfied with that foreign nation's arrangements to purchase U.S. fish and fish products—and clarifies that full allocation of the total allowable level of foreign fishing, or TALFF, is not required by law.

Third, H.R. 6342 sharpens the focus of fish and chips to require an evaluation of what the foreign nation seeking an allocation is doing for our domestic industry in the fishery for which an allocation of pollock must show what it is doing to open its market to American exports for pollock and cannot merely gain an allocation credit by purchasing other species of fish.

These reforms to the allocation provisions of the Magnuson Fishery Conservation and Management Act should provide a significant boost to our fishing industry's efforts to expand and improve its utilization of our FCZ's fishery resources. These reforms should also make it clearer to foreign nations wishing to fish in our FCZ that the privilege of access carries the responsibility of cooperation and reciprocal market access.

With respect to section 405, this provision would facilitate the export of American fish and fish products by providing the U.S. Department of Agriculture [USDA] and the Commodity Credit Corporation with the authority to include all fish and fish products in their existing export assistance programs. Current CCC and USDA export assistance programs extend to fish products if they are caught in freshwater streams or raised in fish ponds. It makes good sense to include all American caught and/or processed fish in our export assistance programs. I would note that this change creates no new programs and requires no additional appropriations.

These provisions in H.R. 6342 will do a lot to expand and enhance trade in American fish and fish products. For these and other reasons, I urge my colleagues to join me in passing this important legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 6342) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING CHANGES IN ENROLLMENT OF H.R. 6163

Mr. BAKER. Mr. President, this matter has been cleared, I believe, on both sides. I send to the desk a concurrent resolution on behalf of the Senator from Kansas [Mr. DOLE] and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object.

Mr. President, I remove my reservation.

The PRESIDING OFFICER. The concurrent resolution will be stated.

The bill clerk read as follows:

A concurrent resolution (S. Con. Res. 154) authorizing changes in the enrollment of H.R. 6163.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 154) was considered and agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

369TH VETERANS' ASSOCIATION FEDERAL CHARTER

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 1341.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 1095) to grant a Federal charter to the 369th Veterans' Association.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider H.R. 1095.

AMENDMENT NO. 7089

(Purpose: To make a technical correction)

Mr. BAKER. Mr. President, on behalf of Senator THURMOND I send a technical amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. THURMOND, proposes an amendment numbered 7089.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 9, delete "(60)" and insert in lieu thereof "(65)".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (No. 7089) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTING THE ENROLLMENT OF H.R. 2790

Mr. BAKER. Mr. President, I now ask the Chair to lay before the Senate House Concurrent Resolution 371, which is a concurrent resolution correcting the enrollment of H.R. 2790, and I believe that measure is at the desk.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The bill clerk read as follows:

A concurrent resolution (H. Con. Res. 371) directing the clerk of the House of Representatives to make a correction in the enrollment of the bill H.R. 2790.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of the concurrent resolution.

There being no objection, the concurrent resolution was considered and agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FISHERMEN'S PROTECTIVE ACT AMENDMENTS

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 1036, H.R. 5051.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A bill (H.R. 5051) to improve the operation of the Fishermen's Protective Act of 1967.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation with amendments; as follows:

(The parts intended to be stricken are shown in boldface brackets and the parts intended to be inserted are shown in italic.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, [That subsection (e) of section 7 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1977(e)) is amended by striking out "The provisions of this section shall be effective until October 1, 1984; except that payments" and inserting in lieu thereof "Payments".]

That section 7(e) of the Fishermen's Protective Act of 1967 (22 U.S.C. 1977(e)) is amended by striking "October 1, 1984" and inserting in lieu thereof "October 1, 1987".

SEC. 2. (a) Section 3 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1973) is amended—

(1) by striking out "Secretary of the Treasury in the amount certified to him by the Secretary of State" in the first sentence of subsection (a) and inserting in lieu thereof "Secretary of State in the amount determined and certified by him"; and

(2) by amending subsection (b)—

(A) by inserting "determination and" immediately before "certification" in the first sentence thereof, and

(B) by striking out "the Treasury" in the second and third sentences and inserting in lieu thereof "State".

(b) Section 5(a)(1)(A) of such Act of 1967 (22 U.S.C. 1975(a)(1)(A)) is amended by striking out "the Secretary of the Treasury" and inserting in lieu thereof "him".

(c) The first sentence of section 9 of such Act of 1967 (22 U.S.C. 1979) is amended by striking out "Secretary of the Treasury" and inserting in lieu thereof "Secretary of [the] State"; and by striking out "certified to him by the Secretary of State" and inserting in lieu thereof "determined and certified by him".

SEC. 3. (a) Section 2 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1972) is amended—

(1) by amending paragraph (1) to read as follows:

"(1) any vessel of the United States is seized by a foreign country on the basis of claims to jurisdiction that are not recognized by the United States, or on the basis of claims to jurisdiction recognized by the United States but exercised in a manner inconsistent with international law as recognized by the United States;"; and

(2) by amending the matter appearing between subparagraph (D) and clause (i) of paragraph (2) to read as follows:

"the Secretary of State, unless there is clear and convincing credible evidence that the seizure did not meet the requirements under paragraph (1) or (2), as the case may be, shall immediately take such steps as are necessary—".

(b) Section 4 of such Act of 1967 (22 U.S.C. 1974) is amended by striking out "any fishery convention or treaty to which the United States is a party." and inserting in lieu thereof "any applicable convention or treaty, if that treaty or convention was made with advice and consent of the Senate and was in force and effect for the United States and the seizing country at the time of the seizure.".

(c) The amendments made by subsections (a) and (b) apply with respect to seizures made after April 1, 1983, by foreign countries of vessels of the United States.

Mr. BAKER. Mr. President, I ask unanimous consent that the amendments be considered en bloc and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to.

AMENDMENT NO. 7090

Mr. BAKER. Mr. President, on behalf of Senator PACKWOOD, I send to the desk an amendment in the nature of a substitute.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Tennessee [Mr. BAKER] on behalf of Mr. Packwood proposes an amendment numbered 7090.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "National Fisheries Marketing Council Act of 1984".

FINDINGS

SEC. 2. The Congress finds that—

(1) the commercial fishing industry of the United States significantly contributes to the national economy, and could make a greater contribution if fish resources within the United States Exclusive Economic Zone were more fully utilized;

(2) the commercial fisheries of the United States provide significant employment in coastal areas and in processing and distribution centers;

(3) fish contribute an important nutritional component to the American diet;

(4) due to the small and independent nature of the fishing industry, and the regional diversification of harvesting and production, no one entity in the industry is capable of securing the level of effort necessary to provide an effective generic marketing program for fish;

(5) Federally-supported development programs for commercial fisheries are unable to meet present and future marketing needs;

(6) many fish species are underutilized by the United States fishing industry because of underdeveloped markets; and

(7) the United States fishing industry has the potential to greatly expand its contribution to interstate and foreign commerce, favorably affecting the balance of trade.

PURPOSE

SEC. 3. The purpose of this Act is to—

(1) strengthen the competitive position of the United States commercial fishing industry in the domestic and international marketplace;

(2) encourage the development and utilization of all species of fish available for harvest by the United States industry;

(3) encourage the utilization of domestically-produced fish through enhancement of markets, promotion, and public relations;

(4) help the United States fishing industry develop methods to improve quality and efficiency in the marketplace;

(5) educate and inform consumers on the use of fish;

(6) develop better coordination of fisheries marketing and promotion activities with commercial fisheries research and development programs; and

(7) educate and inform the public about the nutritional value of fish in the diet.

DEFINITIONS

SEC. 4. As used in this Act, the term—

(1) "Administrator" means the Administrator of the National Oceanic and Atmospheric Administration;

(2) "Council" means the National Fisheries Marketing Council established by section 5;

(3) "consumer education" means actions undertaken to inform consumers on matters related to the consumption of fish;

(4) "fish" means finfish, mollusks, crustaceans, and all other forms of marine and freshwater animal life used for human consumption, and products derived therefrom;

(5) "Fund" means the Fisheries Marketing Fund established by section 10;

(6) "harvester" means any individual who is in the business of catching fish for purposes of sale;

(7) "importer" means any person who imports fish into the United States from another country for commercial purposes;

(8) "marketing and promotion" means an activity aimed at encouraging the consumption of fish or expanding or maintaining commercial markets for fish;

(9) "marketer" means any individual who is in the business of selling fish in wholesale, retail, or restaurant trade, but whose primary business function is not the processing or packaging of fish in preparation for sale;

(10) "member" means any person serving on the Council;

(11) "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any private entity organized or existing under the laws of the United States or any State, commonwealth, territory or possession of the United States;

(12) "processor" means any individual who is in the business of receiving or otherwise acquiring fish from a harvester, and of pre-

paring or packaging such fish (including fish of the processor's own harvesting) for sale;

(13) "receiver" means any person who acquires fish for sale directly from a harvester;

(14) "research" means research activities related to the marketing of fish; and

(15) "United States" means the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands and any other territory, possession, or commonwealth of the United States.

ESTABLISHMENT OF THE NATIONAL FISHERIES MARKETING COUNCIL

SEC. 5. (a) There is established the National Fisheries Marketing Council.

(b)(1) The Council shall be composed of the Administrator (or the Administrator's designee), who shall be a nonvoting member, and fifteen voting members appointed by the Administrator.

(2) Nominations for appointees shall be submitted in a manner prescribed by the Administrator.

(c) The Council shall be comprised of regional representation from the Northeast, Southeast, Pacific, and Alaska regions. The Northeast region shall consist of the States of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, Maryland, and Virginia. The Southeast region shall consist of the States of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas, the Commonwealth of Puerto Rico, and the territory of the Virgin Islands. The Pacific region shall consist of the States of Idaho, Washington, Oregon, California, and Hawaii, the territories of Guam and American Samoa, and the Commonwealth of the Northern Mariana Islands. The Alaska region shall consist of the State of Alaska.

(d)(1) The voting members of the Council shall be—

(A) three members who reside in or do substantial fishing industry business in the Northeast region;

(B) three members who reside in or do substantial fishing industry business in the Southeast region;

(C) three members who reside in or do substantial fishing industry business in the Pacific region;

(D) three members who reside in or do substantial fishing industry business in the Alaska region;

(E) one member-at-large from an organized labor union, with demonstrated expertise in the United States fishing industry;

(F) one member-at-large with demonstrated expertise in the consumer and retail phases of the food industry; and

(G) one member-at-large with demonstrated expertise in freshwater and inland commercial fisheries.

(2) Of the members appointed pursuant to each of paragraphs (1)(A) through (D) of this subsection, one shall be a harvester, one shall be a processor, and one shall be a marketer.

(e)(1) Of the three members first appointed under each of subsections (d)(1)(A) through (D) and under subsections (d)(1)(E) through (G), one shall be appointed for a term of one year, one for a term of two years, and one for a term of three years. Thereafter, such appointments shall be for a term of three years.

(2) The tenure of a voting member may not exceed two successive terms.

(f) The Council shall annually elect a Chairman by a majority of those voting, if a quorum is present. Eleven members of the Council shall constitute a quorum, but a lesser number may hold hearings. A vacancy in the Council shall not affect its ability to function. The Administrator shall appoint a new member within sixty days to fill a vacancy in an unexpired term. Any member may remain on the Council beyond that member's term until a successor is appointed.

(g) The Council shall first meet within one hundred and eighty days after the date of enactment of this Act.

(h) Members of the Council shall serve without compensation, but shall be reimbursed in accordance with section 5703 of title 5, United States Code, for reasonable travel costs and expenses incurred in performing their duties as members of the Council.

FUNCTIONS AND DUTIES OF THE COUNCIL

SEC. 6. (a) The Council shall—

(1) prepare and submit to the Administrator, for the Administrator's review and approval, an annual marketing and promotion plan which contains descriptions of consumer education, research, and other marketing and promotion activities of the Council for the successive year, including activities related specifically to fish of each region, and shall implement such annual plan as approved by the Administrator;

(2) prepare and submit to the Administrator, for the Administrator's review and approval, an annual budget of the anticipated expenses and disbursements of the Council, including probable costs of a consumer education, research, and other marketing and promotion plans or projects, and of the collection and enforcement of assessments;

(3) maintain accounting records of the receipt and disbursement of all funds entrusted to the Council;

(4) maintain such books and records as the Administrator determines appropriate;

(5) receive, and report to the Administrator, complaints of violations of orders or rules relating to assessment requirements;

(6) reimburse the Administrator for the actual costs of the collection and enforcement of assessments;

(7) prepare and submit to the Administrator from time to time such reports or proposals as the Administrator or the Council determines appropriate for furthering the purposes and policies of this Act.

(b) Each annual marketing and promotion plan shall be directed at—

(1) increasing the general demand for fish;

(2) encouraging, expanding, or improving the marketing and promotion and utilization of fish; and

(3) improving the dissemination of data collected by consumer education, research, and other marketing and promotion activities.

(c) Consumer education and other marketing and promotion activities of the Council shall contain no reference to a private brand or trade name and shall avoid use of deceptive acts or practices in behalf of fish or with respect to the quality, value, or use of any competing product or group of products.

(d) The annual budget of the Council shall allocate operating funds in such a manner that—

(1) prior to January 1, 1989—

(A) an amount equal to 50 percent of such funds is allocated equally among each of the regions described in section 5(c) for the marketing and promotion of fish of each such region, which may include funds to regional development foundations or regional trade associations; and

(B) the remainder of such funds is allocated for national marketing and promotion and administration of the Council; and

(2) on and after January 1, 1989—

(A) an amount equal to 50 percent of the total amount collected from assessments in the previous year from each such region is allocated for the marketing and promotion of fish of each such region, which may include funds to regional development foundations or regional trade associations; and

(B) the remainder of the funds is allocated for national marketing and promotion and administration of the Council.

(e) The Council may employ and determine the salary of an executive director not to exceed Senior Executives Service Level 6. The executive director shall have demonstrated expertise in the marketing and promotion of food products and may, without regard to the provisions of title 5, United States Code, with the approval of the Council, select and employ additional staff as necessary.

(f) The Council may enter into agreements to develop and carry out activities authorized under this Act.

DUTIES OF THE ADMINISTRATION

SEC. 7. (a) The Administrator shall—

(1) review and approve the annual marketing and promotion plan and budget within sixty days after submission by the Council;

(2) administer the Fund and withdraw from the Fund such sums as are necessary to carry out the Council's approved marketing and promotion plan and budget, including reimbursement to the Administrator for the collection and enforcement of assessments;

(3) collect and enforce the payment of the assessments required under section 8(a) and issue such orders and amendments to such orders as are necessary to carry out the requirements for the payment of such assessments;

(4) promulgate regulations necessary to carry out the purposes and policies of this Act;

(5) provide such administrative assistance as the Council may require for purposes of its initial organization and operation; and

(6) make all appointments to the Council within ninety days after the date of enactment of this Act.

(b)(1) Except as provided in paragraphs (2) and (3), any information obtained pursuant to subsection (a)(3) shall be kept confidential by all officers and employees of the National Oceanic and Atmospheric Administration, and independent accountants and other persons who have access to such information.

(2) If the Administrator or an employee of the United States Government is party to a suit or administrative action involving an order issued under this section, the Administrator may disclose information obtained under subsection (a)(3) to the extent allowed by the judicial or administrative officer presiding over such suit or action.

(3) This subsection shall not prohibit—

(A) the issuance of general statements based upon—

(i) reports of the number of persons subject to an order which do not identify the information furnished by any person; or

(ii) statistical data based on such statements; or

(B) the publication by direction of the Administrator of the name of any person vio-

lating an order relating to the assessments required under section 8(a), and a statement of the particular provisions of such order violated by such person.

(4) Any individual who is required to keep information confidential under this subsection and who violates this subsection shall, upon conviction, be—

(A) subjected to a fine of not more than $1,000 or, if the violation was intentional, to imprisonment for not more than one year, or both; and

(B) removed from office if an officer or employee of the Council or the National Oceanic and Atmospheric Administration.

INDUSTRY PAYMENTS

SEC. 8. (a)(1) For those receivers and importers whose fish purchases in the twelve-month period immediately prior to the assessment date amount to $500,000 or more, the Administrator shall issue an order to pay, beginning October 1, 1987, an assessment equal to 0.2 per centum of the price of fish—

(A) sold by a harvester to a receiver; or

(B) imported into the United States by an importer.

(2) For transactions where the price of fish sold by a harvester to a receiver cannot be determined, the Administrator, with the concurrence of the Council, shall develop and promulgate regulations prescribing a means for determining such sale price.

(3) Notwithstanding paragraph (1), the Administrator (upon the request of the Council) may set an upper limit on the total assessment which a receiver or importer must pay during any twelve-month period.

(4) Receivers and importers shall make their books and records available for inspection solely for the purpose of determining the correct assessment as described in paragraph (1).

(5) The assessments shall, in the manner prescribed by an order issued by the administrator, be—

(A) paid and transmitted to the Administrator by a receiver and an importer; and

(B) deposited by the Administrator into the Fund.

(6) To facilitate the collection of assessments, the Administrator, upon the request of the Council, may vary assessment collection procedures among different types of receivers to reflect differences in marketing and promotion practices or procedures utilized in the industry.

(b) The Council may prepare and submit orders to the Administrator, which the administrator shall promulgate, that increase or decrease the rate of assessment to such level as the Council determines necessary to effectuate the purposes of this Act, except that such orders may not raise or lower the rate in any year by more than 0.1 percent over the rate during the previous fiscal year.

(c) Within one year after the date of enactment of this Act, a petition may be filed with the Administrator by persons engaged in a segment of the fishing industry, requesting exemption from any assessment requirement under this Act. If the Administrator determines that any such petition is signed by receivers and importers who handle over 50 percent of the volume of fish in a segment of the fishing industry, the Administrator shall exempt any such receiver or importer from the payment of the assessment. If a segment of the fishing industry is exempted pursuant to this subsection, no representative of that segment shall be appointed to or serve on the Council, and the Council shall undertake no activities under this Act for the specific benefit of that segment.

(d) Any receiver or importer who has paid an assessment under this section shall be entitled to demand and receive from the administrator a refund of such assessment. The demand for a refund shall be made within the time and in the manner prescribed by the Council and approved by the Administrator.

(e) Any person may make voluntary payments to help the council carry out its annual marketing and promotion plan and annual budget, and the Administrator shall deposit such payments into the Fund.

PETITION AND REVIEW

SEC. 9. (a) Any person subject to an assessment order under section 7 may file a written petition with the Administrator, stating that such order or any provision of such order or any obligation imposed under such order is not in accordance with law and requesting a modification of the order or an exemption for such person from such order. Such petition shall be filed within a period prescribed by the Administrator. Such person shall be given an opportunity for a hearing upon such petition, in accordance with regulations issued by the Administrator. After such hearing, the Administrator shall make a ruling upon the petition, and such ruling shall be final, if in accordance with law.

(b) The district courts of the United States, in any district in which such person is an inhabitant or carries on business, shall have jurisdiction to review such ruling. Any request for such review shall be filed within twenty days after the date of the entry of such ruling. Service of process in such proceedings may be had upon the Administrator by delivering to the Administrator a copy of the request. If the court determines that such ruling is arbitrary and capricious, an abuse of discretion, or not in accordance with law, it shall remand such proceedings to the Administrator with directions either (1) to make such ruling as the court determines to be in accordance with law, or (2) to take such further proceedings as, in the court's opinion, are required by law. The pendency of proceedings instituted pursuant to subsection (a) of this section shall not impede, hinder, or delay the United States or the Administrator from obtaining relief pursuant to section 12 of this Act.

ESTABLISHMENT OF MARKETING FUND

SEC. 10. (a) There is established in the Treasury of the United States a Fisheries Marketing Fund. The Fund shall be available to the Administrator and the Council as a revolving fund for the purpose of making payments to carry out the annual marketing and promotion plan and annual budget of the Council under this Act.

(b) There shall be deposited in the Fund—

(1) subject to appropriations, from the fisheries loan fund established pursuant to section 4(c) of the Fish and Wildlife Act of 1956 (16 U.S.C. 742(c))—

(A) $10,000,000, on October 1, 1984;

(B) $10,000,000, on October 1, 1985;

(C) $4,000,000, on October 1, 1986; and

(D) $4,000,000, on the first day of each fiscal year beginning on October 1, 1987, subject to the availability of funds;

(2) subject to appropriations, from the fund used by the Administrator pursuant to section 2(b) of the Act entitled "An Act to authorize the Federal Surplus Commodities Corporation to purchase and distribute surplus products of the fishing industry", approved August 11, 1939, as amended (commonly referred to as the Saltonstall-Kennedy Act, 15 U.S.C. 713c-3(b))—

(A) $4,000,000, on October 1, 1984;

(B) $4,000,000, on October 1, 1985;

(C) $4,000,000, on October 1, 1986; and

(D) $4,000,000, on October 1, 1987;

(3) assessments paid pursuant to section 8(a);

(4) amounts paid voluntarily and collected pursuant to section 8(e); and

(5) revenues received from investments made under subsection (d).

(c) No sum received from a private source paid pursuant to section 7 shall be subject to annual appropriations.

(d) Sums in the Fund that are not currently needed for the purposes of the Fund shall be kept on deposit in appropriate interest-bearing accounts that shall be established by the Secretary of the Treasury or invested in obligations of, or guaranteed by, the United States. Any revenue accruing from such deposits and investments shall be deposited in the Fund.

(e) Sums in the Fund shall be expended without further appropriations and without fiscal year limitation.

CONTINUATION OF THE COUNCIL

SEC. 11. (a)(1) Within ninety days before October 1, 1987, the Administrator shall—

(A) identify any importer or receiver with fish purchases of $500,000 or more for the twelve-month period ending thirty days prior to the date on which the survey under subparagraph (C) is initiated;

(B) identify any person who qualifies under paragraph (3) for inclusion in such survey; and

(C) initiate a survey of the persons identified under subparagraphs (A) and (B) who have not been exempted from assessment payments pursuant to section 8(c), to determine whether the Council shall continue.

(2) The survey shall be based upon the relative value of the fish imported by importers, purchased by receivers, and sold by persons qualified under paragraph (3), during the twelve-month period ending thirty days prior to the date on which such survey is initiated.

(3) Any person who is in the business of catching fish for purposes of sale shall be included in the survey if, no later than thirty days prior to the date on which such survey is to be initiated, that person—

(A) registers with the Administrator; and

(B) submits to the Administrator business records and other evidence which the Administrator determines to be sufficient proof of fish sales of $100,000 or more during the twelve-month period ending thirty days prior to the date on which such survey is to be initiated.

The Administrator's determination of the value of such fish for purposes of paragraph (2) shall be made solely on the basis of business records and other evidence submitted voluntarily by such person.

(b) The Council shall be terminated within ninety days after the date of the survey conducted pursuant to subsection (a)(1), if the continuation of the Council is disapproved by—

(1) importers whose relative value of fish imported;

(2) persons qualified under subsection (a)(3) whose relative value of fish sold; and

(3) receivers whose relative value of fish purchased,

collectively, equals or exceeds 35 percent of the total value of fish imported, sold, and purchased, by all persons included in such survey, during the period ending thirty days

prior to the date on which such survey is initiated.

(c) If the Council is not terminated pursuant to subsection (b), the Council shall continue until the total unrefunded contributions into the Fund for the previous twelve-month period are less than $1,000,000, or until a survey pursuant to subsection (d) determines that the Council shall be terminated.

(d) Any time after October 1, 1989, a survey on the continuation of the Council shall be undertaken by the Administrator within ninety days after its receipt of a petition for such a survey, signed by persons whose annual assessment payments are collectively at least 10 percent of the total annual assessments ordered, except that such a survey shall not be conducted earlier than two years after the completion of a previous survey under subsection (c) or this subsection. If a survey under this subsection determines that the continuation of the Council is disapproved by persons whose annual assessment payments are collectively at least 35 percent of the total annual assessments paid, the Council shall be terminated within ninety days after the date of such survey.

(e) If the Council is terminated, assessment moneys remaining in the Fund on the date of termination shall be transferred to their original sources, in proportion to assessment payments made.

ENFORCEMENT

SEC. 12. (a)(1) The district courts of the United States shall have jurisdiction specifically to enforce, and to prevent and restrain any person from violating, any order or regulation made or issued pursuant to this Act.

(2)(A) Except as provided in subparagraph (B), any civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action.

(B) If the Administrator believes that the administration and enforcement of the provisions of this Act would be adequately served by taking administrative action pursuant to subsection (c) or providing written notice or warning to any person committing a violation of this Act, the Administrator is not required to refer such violation to the Attorney General.

(c)(1)(A) Any person who violates any provisions of any order or regulation issued by the Administrator pursuant to this Act, or who fails or refuses to pay, collect, or remit any assessment required under this Act, may be assessed a civil penalty by the Administrator of not less than $500 or more than $5,000 for each such violation. Each violation shall be a separate offense.

(B) In addition to or in lieu of such civil penalty, the Administrator may issue an order requiring such person to cease and desist from continuing such violation.

(C) No penalty shall be assessed or cease and desist order issued under this paragraph unless such person is given notice and opportunity for a hearing before the Administrator with respect to such violation.

(D) Any order of the Administrator under this paragraph assessing a penalty or imposing a cease and desist order shall be final and conclusive, unless the affected person files an appeal from the Administrator's order with the appropriate United States court of appeals.

(2)(A) Any person against whom a violation is found and a civil penalty assessed or cease and desist order issued under paragraph (1) may obtain review of such action in the United States court of appeals for the circuit in which such person resides or has his place of business or in the United States Court of Appeals for the District of Columbia Circuit by filing a notice of appeal in such court within thirty days after the date of such order and by simultaneously sending a copy of such notice by certified mail to the Administrator.

(B) The Administrator shall promptly file in such court a certified copy of the record upon which such violation was found.

(C) The findings of the Administrator shall be set aside only if found to be unsupported by substantial evidence or if not in accordance with law.

(3) Any person who fails to obey a cease and desist order after it has become final shall be subject to a civil penalty assessed by the Administrator of not more than $500 for each offense. Each day during which such failure continues shall be a separate offense.

(4)(A) If any person fails to pay an assessment of a civil penalty after it has become final, the Administrator shall refer the matter to the Attorney General.

(B) The Attorney General shall recover the amount assessed in a district court of the United States.

(C) In such action, the validity and appropriateness of the final order imposing a civil penalty shall not be subject to review.

INVESTIGATIONS

SEC. 13. (a) The Administrator may make such investigations as the Administrator determines necessary to—

(1) carry out the Administrator's responsibilities under this Act; and

(2) determine whether any person has engaged or is about to engage in any acts or practices which constitute a violation of this Act.

(b) For the purpose of such investigation, the Administrator may administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents which are relevant to the inquiry.

(c) Such attendance of witnesses and the production of any such records may be required from any place in the United States.

(d) In case of contumacy or refusal to obey a subpoena by any person, the Administrator may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, to require the attendance and testimony of witnesses and the production of books, papers, and documents. Such court may issue an order requiring such person to appear before the Administrator to produce records or to give testimony relating to the matter under investigation.

AUTHORIZATION

SEC. 14. There are authorized to be appropriated such sums as are necessary for the Administrator to carry out this Act.

COMPLIANCE

SEC. 15. Section 204(b)(7) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1824(b)(7)) is amended—

(1) by redesignating subparagraph (F) as subparagraph (G); and

(2) by inserting immediately after subparagraph (E) the following:

"(F) In any case in which the Secretary, in consultation with the Secretary of State and the Secretary of the department in which the Coast Guard is operating, determines that the vessels of a foreign nation have exhibited a consistent pattern of serious violations of United States fishery laws, the requirement that—

"(i) any vessel of such foreign nation which has been cited for a serious violation, and is seeking a permit to harvest fish in the fishery conservation zone, be boarded and inspected by an authorized United States fishery enforcement officer prior to commencing such fishing;

"(ii) each such vessel have on board a United States observer while engaging in fishing within the fishery conservation zone; and

"(iii) each such vessel be boarded and inspected by an authorized United States fishery enforcement officer upon completion of fishing in the fishery conservation zone.

The requirements specified in clauses (i), (ii) and (iii) of this subparagraph may be rescinded at such time as the Secretary, in consultation with the Secretary of State and the Secretary of the department in which the Coast Guard is operating, determines to be appropriate, taking into account the compliance of such foreign vessels with United States fishery laws.".

AMENDMENT TO THE NORTH PACIFIC FISHERIES ACT OF 1954

SEC. 16. (a)(1) In the administration of the North Pacific Fisheries Act of 1954 (16 U.S.C. 1021 et seq.), the United States Section may—

(A) in consultation with the National Marine Fisheries Service, initiate multinational symposia and provide other forums, including all nations, as determined by the United States Section in consultation with the National Marine Fisheries Service, that have a significant interest in North Pacific fishery matters, for the purpose of exchanging scientific information concerning all fishery stocks of the North Pacific; and

(B) initiate, in consultation with the National Marine Fisheries Service, a review of multinational cooperative development plans for North Pacific fishery stocks.

(2) The United States Section may employ and determine the salary of a professional administrator having scientific expertise and training in fisheries to ensure that the activities described in paragraph (1) are initiated on a timely basis.

(b) There are authorized to be appropriated such sums as are necessary to fund the expanded activities of the United States Section provided for in this section.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the amendment in the nature of a substitute.

The amendment in the nature of a substitute (No. 7090) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 5051) was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I have an amendment to the title which I now send to the desk and ask that it be reported.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

Amend the title so as to read:

An Act to establish a National Fisheries Marketing Council to enable the United States fish industry to conduct a coordinated program of research, education, and marketing and promotion to expand markets for fisheries products, and for other purposes.

The PRESIDING OFFICER. Without objection, the title amendment is agreed to.

THE CALENDAR

Mr. BAKER. Mr. President, there are now several items that appear to be cleared for action by unanimous consent that I would like to identify for the consideration of the minority leader. If he has no objection, I would ask that these measures be considered en bloc and disposed of en bloc. They are Calendar Order Nos. 1310, 1331, 1332, 1335, 1337, 1338, 1342, 1343, 1344, and 1345.

Mr. BYRD. Reserving the right to object, Mr. President, momentarily.

Mr. President, I thank the majority leader for his indulgence. I have no objection.

Mr. BAKER. I thank the minority leader. I make that unanimous-consent request, Mr. President.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

COOPERATIVE EAST-WEST VENTURES IN SPACE

The Senate proceeded to consider the joint resolution (S.J. Res. 236) relating to cooperative East-West ventures in space as an alternative to a space arms race, which had been reported from the Committee on Foreign Relations, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President should—

(1) [renew] *endeavor, at the earliest practicable date, to renew* the 1972-1977 agreement between the United States and the Soviet Union on space cooperation for peaceful purposes;

(2) continue energetically to gain Soviet agreement to the recent United States proposal for a joint simulated space rescue mission;

[(2)] *(3) seek to* initiate talks with the Government of the Soviet Union, and with other governments interested in space activities, to explore [the] *further* opportunities for cooperative East-West ventures in space [as an alternative to an arms race in space,] including cooperative ventures in such areas as space medicine and space biology, [space rescue,] planetary science, manned and unmanned space exploration; and

[(3)] *(4)* submit to the Congress at the earliest possible date, but not later than [October 1, 1984,] *March 1, 1985,* a report detailing the steps taken in carrying out paragraphs (1) [and] (2) *and (3).*

Mr. MATSUNAGA. Mr. President, it is with a deep sense of personal satisfaction that I rise today to speak in favor of Senate Joint Resolution 236, calling for renewed United States-Soviet cooperation in space. I would like to thank my two colleagues who have joined me as original cosponsors of this legislation, the distinguished Senator from Rhode Island, Senator PELL, and the distinguished Senator from Maryland, Senator MATHIAS, for the keen attention paid to Senate Joint Resolution 236 during its consideration by the Foreign Relations Committee, and also for permitting me, although not a member of the committee, to join them in questioning witnesses during hearings chaired by Senator MATHIAS on September 13. I am also grateful to the distinguished chairman of the Foreign Relations Committee, Senator PERCY, for adding his wisdom to our efforts; I wholeheartedly concur with the amendments prepared under his judicious direction.

Mr. President, our resolution urges President Reagan to do four things:

First, endeavor to renew the 1972 United States-Soviet space cooperation agreement, which terminated in 1982, at the earliest practicable date; second, press forward with his effort to join with the Soviets in a simulated space rescue mission; third, seek to initiate talks with the Government of the Soviet Union, and with governments of other spacefaring nations, regarding further cooperative ventures in such areas as space medicine and space biology, planetary science, manned and unmanned space exploration; and fourth, report to the Congress no later than March 1, 1985, on the steps taken in carrying out the preceding steps.

But beyond that, Mr. President, our resolution opens up a whole new context for relating to the Soviets that could have a profound effect on humanity's destiny in space, and here on Earth as well. At present, the trend in space is toward confrontation, toward sending the arms race into orbit, literally and figuratively. Our resolution seeks to set a parallel trend in motion, toward cooperation, joint action, the unified approach to our future that the space age demands of our imperfect species and that, I am convinced, all of us, in our hearts, fervently desire.

Mr. President, I spoke of deep personal satisfaction with regard to this resolution because I have been seeking to encode its objectives for more than 2 years. Initially, it seemed as if I was talking to an empty room. In July 1982, I wrote an article for the Washington Post stating that, if events continued along their present course, we would one day look up to competing weapons platforms in space. As one means of correcting that ominous trend, I proposed that the first permanently-manned facility in space be an international project.

Weapons in space? "Senator," I was told, "you must be dreaming." Nonetheless, in September 1982, I introduced a resolution urging international cooperation in space, with initial emphasis on the first permanent facility. I had no cosponsors at the time, but I felt we had to begin somewhere, and at least place the issue of the record for further consideration. That was Senate Resolution 488. It subsequently evolved into Senate Concurrent Resolution 16, introduced in February 1983 with the distinguished Senator from Rhode Island [Mr. PELL] and in close consultation with the Nation's leading space scientists. Then, in March 1983, my so-called fantasy became national policy. We embarked upon an accelerated space weapons program, that, if it proceeds unchecked on both sides, will render the human race obsolete. Still, support for our resolution was limited by concerns on the one hand that it might unilaterally dilute space weapons development; and, on the other hand, that it might dilute the effort to promote space arms control negotiations.

So we tried again in 1984, this time with the most welcome support of the distinguished Senator from Maryland [Mr. MATHIAS] and this time, finally, we began to make headway. There are a number of reasons for our progress, but the most important, I think, is the underlying logic of our proposal. It is conceit carried to the point of sheer absurdity, if not madness, to assume that the cold war will simply march out from our tiny microbe of a planet into the infinite reaches of the cosmos. That sort of video game vision of the future has no place in mature councils. If we want to talk about vision, then let's be serious about it, or admit that space is really too much for us, because, no matter how futuristic our costumes and our machines, civilization is doomed if its advance into space is to be guided by tribal drumbeats.

I believe the people of the United States and the Soviet Union recognize that. So do their leaders. What is missing is some practical means for transcending our differences before it's too late, something more than what is provided either by weapons buildup or

formal negotiations to limit weapons buildup. We need the added dimension cited by Freud in his famous letter to Einstein on the subject of war, and here I quote:

> Anything that creates emotional ties between human beings must inevitably counteract war. Everything that leads to important shared action creates such common feelings. On them the structure of human society in good measure rests.

Shared action, Mr. President, is the saving dimension that cries out for new exploration. Mr. Herman Wouk, author of "The Winds of War," made a sage observation, worth the full attention of this body, in his letter to me in support of Senate Joint Resolution 236. He wrote:

> We joined forces with the Russians in the Second World War to eliminate the Axis menace to civilized life on earth. We achieved that aim without resolving our ideological differences or even discussing them. The menace confronting us was enough to make us cooperate. Now Americans and Soviets alike are confronted with a menace even more grave than Hilter's Axis. The menace is ourselves; our worser selves, frozen in suspicion, mistrust and ideological antagonisms.

Mr. President, Mr. Wouk is, of course, correct. The two superpowers cannot ever hope to halt their lockstep march toward oblivion, unless they first deal with the suspicion and mistrust which have infected their relationship at its core. Any belief that they can, has no place in the so-called real world where policies are made, and which the American people have entrusted us to administer.

And that, Mr. President, is where space comes in. If the superpowers are ever to break out of the hopeless maze in which they are presently entrapped, it will happen in space. For only space offers an arena, a theme and an organizing principle grand enough to permit us to transcend our differences and set humanity on a new and more hopeful course. I have attempted to chart the outlines of that course in a number of speeches and articles over the past 2 years. I ask unanimous consent to include in the RECORD at the conclusion of these remarks three brief articles belonging to that effort.

In these articles, I develop a rationale and a proposal for a joint program consisting of missions of gradually increasing complexity, linked to a moratorium on space weapons testing, building toward an international manned mission to Mars in the 21st century—the most stirring undertaking in human history. I have offered this program as a far less costly and more promising alternative to Star Wars, which is scheduled to be developed within the same timeframe. Unlike Star Wars, every aspect of it is within reach of existing technology. Indeed, Mr. President, a manned mission mission to Mars was the initial first choice of American space planners in the 1950's; NASA let out more than 60 design contract for manned Mars missions in the 1960's; Wernher Von Braun and others testified at length before committees of the U.S. Congress, and elsewhere, on how we could land on Mars in the 1970's. But at that time, we were too preoccupied with events in a remote corner of Southeast Asia. We had not yet realized then that we would find peace not through demonstration of military might, but through inspired application of the intellect, in alliance with the imagination, in pursuit of the one goal that we had overlooked—unity dynamically conceived.

Mr. President, we can begin to chart that new and more hopeful course right now, today. The Soviets have scheduled a scientific mission for 1988 to the Mars moon called Phobos. We have scheduled a scientific mission to Mars for 1990. Instruments for both missions are already under design. It makes no sense not to coordinate the two missions so as to permit maximum scientific return. Everyone in the world scientific community knows that. What's missing is the political will. We should, as a first priority, seek the establishment of an East-West Mars Working Group for the 1988 and 1990 missions that might subsequently prepare joint followup missions on a gradually expanding scale, based upon strict reciprocity, building toward a joint manned mission early in the 21st century.

Would a program of cooperation on that scale legitimize Soviet policies of repression toward Andrei Sakharov and other courageous Soviet dissidents? On the contrary, it would constitute the strongest and most effective rejection of those policies should it be developed as part of an American policy of aggressive cooperation, which would replace prevailing vacillation between no contacts with the Soviets and an uncritical pursuit of contacts on our part. It would set strict standards for cooperation and press them hard, into the teeth of Soviet repression, pushing the Soviets toward ever greater democratic openness.

Similarly, the belief that such a mission, or others like it, would result in one-way technology transfer, is based on pure myth. Insofar as Mars is concerned, the Soviets are already way ahead of us in essential areas. Just a few days ago, three Soviet cosmonauts landed after a record 237 consecutive days in orbit, nearly 8 months, breaking the old record of 205 days, also set by a Soviet crew, and further establishing Soviet preeminence in long duration spaceflight, including such related activities as closed-cycle life support systems. As policymakers, we might ask: Why are the Soviets devoting so much time and persistent energy to long duration space flight? The first generation of permanent space stations will be placed in low-Earth orbit and will be manned by comparatively short duration rotating crews employing easy-access vehicles, such as the shuttle or the Soviet Soyuz spacecraft. Similarly, the Moon is within easy reach. So why are the Soviets obsessed with long duration space flight? I posed that question to each of the four expert witnesses at the September 13 hearing on Senate Joint Resolution 236 and received the same answer in each case, an answer I had also received from other knowledgeable observers. Soviet absorption with long duration spaceflight only makes sense in the context of preparations for a manned mission to Mars, which would take about 7 months each way. Since a Mars crew would adjust for the return flight by spending a period of time on Mars, we can say that the Soviets' just-completed space flight—a record 8 months in duration—amounted, in important respects, to a journey to Mars.

When we add to that information recent reports that the Soviets are developing a heavy-lift launch vehicle, comparable to our discontinued Saturn 5 used for the Apollo program, and several times more capable than the shuttle for lifting large objects into space, we have two critical components for the assembly and launching of a manned mission to Mars. While we pursue a trillion-dollar crash program for weapons systems that will reach barely above the atmosphere, before turning and pointing their deadly cargo back down upon the Earth, the Soviets appear to be aiming much, much higher. Are we setting ourselves up for another sputnik? Many experts believe so. Should we respond, then, by launching a crash program aimed at beating the Soviets to Mars? And after that, Neptune? Pluto? The next galaxy? Or should we recognize the increasing absurdity of the whole process and try something creative for a change, that future generations, endless future generations, can build upon, guided by a unifying vision invoked by their forbears in the 20th century, even as they stood on the brink.

If we want a vision of the future worth pursuing, this is it. If we want small steps that will set us moving toward it, we have them. The stage is set. All we need is the courage to do what political leaders are supposed to do: Act.

Mr. President, I ask unanimous consent also to include in the RECORD written endorsements for Senate Joint Resolution 236 that I have received from Dr. Thomas O. Paine, former Administrator of NASA and chairman of the Northrop Corp.; Dr. Hubert Curien, former head of the French space program and recently elevated to a position in the French cabinet as

Minister of Science and Technology; and Mr. James Michener, the author, who has become a leading voice in space affairs; plus the transcript of a videotape prepared by Dr. Arthur C. Clarke and rushed here by courier from his residence in Sri Lanka, in response to my request for his views on this subject, in which he contrasts technological obscenities and technological decency in space. I have numerous other letters of support from prominent scientists that I will be happy to make available to my colleagues. I also call my colleagues' attention to the testimony at the September 13 hearing, which included the findings of a symposium attended by 13 of the Nation's leading space scientists, organized by the Office of Technology Assessment at the request of the original cosponsors of Senate Joint Resolution 236.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 4, 1982]

FIND PEACE WITH RUSSIA IN SPACE: CHANGE THE RULES: JOINT SPACE STATIONS WOULD WORK WONDERS

(By Spark M. Matsunaga)

Our best—and perhaps last—opportunity to reach a workable accommodation with the Soviets appears on the verge of being lost before it is properly recognized.

While disarmament talks and negotiations must necessarily continue, the greatest opportunity appears to lie not in the narrow confines of a conference room but in the reaches of space. Within this decade, the United States and the Soviet Union plan to build permanent manned space stations. The age of space colonization, which scientists say will be comparable to the time when life emerged from the sea to colonize the land, will have begun.

But why two hostile space stations? Space—the last and most expansive frontier—will be what we make it. Must we make it into another "real world" living on the brink of self-annihilation? Must we play the same old unwinnable game in space, too?

A more appealing alternative, it seems to me, is to seek to make the first orbiting space station a weapons-free international project involving the United States and the Soviet Union, as well as other interested nations having a space capability.

Reaching agreement with the Soviets on this won't be easy, but as a policy objective it is probably far more attainable than any tension-reducing alternative available here on earth.

Space is virgin territory, insofar as weapons are concerned.

By converting what must otherwise inevitably become the first space weapons platforms into a joint project, the Americans and the Soviets would, for the first time, decisively interrupt the suicidal process that has captured them. Even more significantly, we would begin turning that process around, by learning to work together in a challenging environment, as is perhaps only now possible in space. In that context, the dramatically successful Apollo-Soyuz mission of 1975 is worth recalling.

The project was sealed by a space cooperation agreement signed by President Nixon and Premier Kosygin in Moscow on May 24, 1972. Two days later, Nixon and Kosygin signed a strategic arms pact.

The two documents bore an instructive difference.

Whereas the strategic arms pact called for open-ended discussion in gilded conference rooms, the space agreement involved a nonsense design and construction timetable targeted toward a specific objective—a joint docking in space in 1975.

That tangible objective locked both sides into a train of technical imperatives which, in turn, influenced the basic character of their relations.

For instance, initial American requests for information ran up against compulsive Soviet secretiveness. Had they been negotiating over language and analyzing force strengths on the basis of contested definitions, the effort surely would have ended in stalemate. But they had spacecraft to design and build, communications systems to integrate, astronauts to train, joint docking systems, joint tracking systems, joint life-support systems.

As the timetable ticked off, the Soviets opened up to an unprecedented extent. Scientists and technicians from both nations became wholly absorbed in the project, integrating distinctly different operational styles under the pressure of a shared deadline and a shared professional commitment to make the project work.

Thus, in mid-1973, an American delegation was admitted to the previously top secret Soviet mission control center—again, for the technically-required purpose of coordinating communications and tracking. Looking out across the consoles, world maps, wall clocks, they saw, typed on the giant center screen: "Welcome American Colleagues."

The following year, American astronauts lived and trained at the Soviet space center outside Moscow, Soviet cosmonauts trained in Houston, and American public affairs officials successfully sold the Russians on live TV coverage for the event. All were firsts.

Before the project concluded on July 17, 1975, with a successful docking in space the Soviets and Americans had negotiated and signed 133 working documents—an unprecedented achievement.

Neil Hutchinson, the U.S. flight director of Apollo-Soyuz, summed up what was probably the project's most important contribution and what also turned out to be its greatest frustration for those involved:

"I wish there was another one of these flights. We've gone to all this trouble to learn how to work with these people. . . . I could run another Apollo-Soyuz with a heck of a lot less fuss than it took to get this one going."

So no one can say it can't be done. Not only that, but the stage is already set: In the seven years since Apollo-Soyuz, U.S. and Soviet space activities have followed strikingly complementary paths.

The Soviets have concentrated on long-duration space flights aboard orbiting house-trailer Salyut space stations (like our short-lived Skylab) serviced by manned Soyuz spacecraft and unmanned Progress resupply vehicles. Soviet cosmonauts have logged a solid two years of spaceflight, including a world record stint of six months.

The U.S. meanwhile, has concentrated on quick, easy access with a reusable space vehicle. As the first takeoff-and-landing space vehicle, the shuttle is more sophisticated than anything the Soviets have developed. But flight duration for the shuttle is limited to seven days with present power systems and a maximum of 30 days with adjustments.

Clearly, the Soviet and American space programs are in synch. From the perspectives of science, engineering and economics, both nations would benefit immensely from combining their efforts at this point.

Inevitably, there is the question of politics. The political drawbacks include concern about technology transfer (we are ahead in micro-electronics and computer technology) and the related policy of using cooperation itself as a bargaining chip, like the cruise missile. But in full perspective, the political drawbacks are far outweighed by the advantage of an opportunity to rein in the arms race and redirect its latent energies to meet a new, more inspiring and far more demanding challenge.

A joint project in space would add a refreshingly expansive dimension to life on a planet edging toward self-annihilation.

The arms buildup on planet earth could continue—Trident, MX, CX, BI, RDF, whatever our hearts desire. Arms control negotiation could continue. We might even continue antisatellite weapons testing, since that involves a ground-based Soviet weapon and an American weapon launched in the suborbital atmosphere from an F-16. So we would be protected.

But meanwhile, we also would be working on something with the Soviets. Something big. Something daring, bearing hope for the future.

And if it catches on, if we actually build some common ground up there, begin seeding it, wouldn't it be worth a try?

Tom Stafford, American flight commander for Apollo-Soyuz, said that when he opened the Apollo hatch to greet his Soviet counterpart, Alexei Leonov, as they spun in orbit 100 miles above the earth, he believed "we were opening back on Earth a new era in the history of man."

We need to give the Staffords and Leonovs of this world a chance.

[From the Washington Post-Los Angeles Times News Service, Apr. 13, 1984]

SENATOR MATSUNAGA: "COOPERATION, NOT WAR, IN SPACE"

(By Senator Spark M. Matsunaga)

When President Reagan told Congress April 2 that space arms-control agreements cannot be verified, he opened the way for an all-out effort to develop a new generation of "Star Wars" weaponry.

But cooperation in space, rather than confrontation, may offer the best opportunity for preventing nuclear war and for exploring and developing the next frontier as the president also wants.

Spare presents humankind with the greatest challenge in history. In seeking ways to approach that cosmic vastness together, Earth's superpowers would discover their common humanity. New possibilities for mutually beneficial interaction would multiply.

The process could be initiated quickly by inviting the Soviets to join in a moratorium on weapons testing in space, coupled with talks on joint activity in space.

The talks, which would be attended by other interested nations, would be aimed at developing a coordinated international space effort. This would begin modestly and move toward shared action of steadily increasing complexity.

So long as the process continued, weapons testing in space would be held in abeyance by the great powers. The longer the process continued, the greater the stake of each

participant in it, and the less likelihood of regression.

The Soviets are showing a growing interest in space cooperation. Their cosmonauts have been joined in orbit by "spaceanauts" from Mongolia, Eastern Europe, France and, most recently, India. And they recently offered to share all the data they collect during their upcoming probe of Halley's comet—the first time they have ever promised full disclosure for a space mission.

Among the many possibilities for joint action:

VENUS, UNMANNED MISSION

We are scheduling an orbiting radar mapping mission to Venus in 1988. The Soviets are the leading experts on Venus, having dispatched 16 probes since 1961, including two currently in orbit.

If they also are planning a Venus mission the same year as ours, as expected, the two activities might be designed for mutually beneficial interaction.

MOON, UNMANNED MISSION

The Soviets have a roving remote-controlled collector of ground samples that we lack. We are their superior in satellite communications capabilities.

Many American space scientists would like to use the Soviet collector, called Lunakhod, to gather samples from the as-yet unexplored back side of the moon. An American orbiter could serve as the communications relay for the roving Lunakhod. We would benefit from their technology, they from ours, without any giveaways on either side. And scientists of all nations would obtain important lunar materials not otherwise available.

MARS, UNMANNED MISSION

The American planetary science program includes a Mars orbiting mapper for 1990, leading to a return of a soil sample from Mars in 1996, funds permitting. The Soviets have been less successful with their unmanned Mars program, but they appear to be readying a new start.

Joint action would permit an expanded program at reduced costs, including an orbiter, a network of unmanned scientific stations and roving landers and a sample return. All this is preparation for a manned mission and eventually a permanent base in the 21st century.

PROJECT SPACEWATCH

In 1980, a NASA advisory group of prominent space scientists recommended a program, called Project Spacewatch, to develop a defense against a possible asteroid collision with our planet. The danger is real and at the moment we are helpless before it. Only 75 years ago, a 75-foot asteroid struck a remote area in Siberia with the force of a 15-megaton hydrogen bomb.

That same asteroid could have flattened New York City. Because so many hundreds of asteroids must be catalogued, and so many probed, the more nations involved in a Project Spacewatch the better. The project could lead to the testing of equipment to divert an incoming asteroid.

SHUTTLE-SALYUT PROJECT

The historic U.S.-Soviet space cooperation agreement negotiated by President Nixon and Soviet leader Leonid Brezhnev in 1972, renewed and expanded in 1977, then allowed to lapse by the U.S. in 1982, mapped out a series of U.S.-Soviet space activities leading to a Shuttle-Salyut program and an international space platform program.

Indeed, the 1975 Apollo-Soyuz joint docking in space only made sense as a shakedown for future activities, as called for but never implemented for foreign-policy reasons. Another objective was to develop compatibilities in equipment and procedures that would permit space rescue missions. It is irresponsible to deny astronauts and cosmonauts maximum capability to assist one another in distress.

In a related vein, Soviet space expert James Oberg has proposed a truly international convergence in space for 1985, when only minor modifications in the orbit of an American shuttle carrying a European Spacelab would permit a rendezvous with a Soviet Salyut.

That would be an ideal time to test emergency evacuation procedures. If we all sat down and talked in advance, other scientifically significant activities could be planned as well, for a dramatic European-Soviet-U.S. meeting in space in 1985.

MANNED LUNAR BASE

Many space scientists favor a research laboratory on the moon that would be used for materials processing, mining, developing life-support systems, space robotics. The base also might serve as a launch pad for exploration and possible colonization of other planets in the solar system and beyond.

Again, the construction of a lunar base requires no breakthroughs, only allocation of resources. Making it an international project, involving the United States, Soviet Union, Europe, Canada, Japan, China, India and others, would, among other things, reduce costs to mutually manageable levels.

MANNED MISSION TO MARS

Mars was the primary target of American space planners until President Kennedy ordered a man mission because it gave a better chance of beating out the Russians.

In 1978, the National Aeronautics and Space Authority updated a 1969 proposal by Werner von Braun for a Mars mission in the 1980's. The 1978 update forecast a 16-month mission to Mars in 1999 at a total cost of $25 billion spread out over 20 years. By comparison, the administration projects spending $27 billion on Star Wars research in 1985–89 alone.

Meanwhile, the Soviets have made no secret of their Mars aspirations. The Red Planet is the prime target of their space program. They intend to build toward it methodically from their space station base.

An international Mars project—a 16-month space voyage—would be history's most stirring undertaking.

The entire space-exploration program outlined above could be initiated for less than half the amount of the recently directed 1985–89 increase of $13 billion in space-weapons funding.

And all the above projects combined would, if developed in an international mode, cost us far less than the full-blown Star Wars scenario. We could thus proceed with Star Wars research and development—even increase it substantially—and still initiate a world-inspiring space-exploration program. Then, when operational decision points are reached in 1990, we would have two clearcut options to choose from. Isn't a policy of two choices for the price of one worth pursuing?

By the end of the 21st century, unmanned international scientific missions could be sailing to all the planets in the solar system and to the moons of Jupiter and Saturn. Manned spaceship traffic could steadily flow to scientific outposts and mining facilities on several asteroids, the moon and Mars.

Our children would look up to a fever of activity in space, moving toward the outer limits of the solar system, aiming for the stars. Compared to that inspiring prospect, a "high-ground" space-weapons program looks like an anthill.

[From the Washington Post, Sept. 9, 1984]

WITH MOSCOW TO MARS

(By Spark Matsunaga)

The case of Andrei Sakharov and Yelena Bonner dramatizes the central question of our nuclear age:

How are two nations which hold the fate of the world in their hands to relate to one another when their ruling value systems stand at diametrically opposing poles?

During the past 15 years, two sharply contrasting U.S. policies have emerged. The Nixon-Ford-Kissinger administration practiced with Richard Nixon aptly called "hardheaded détente." Its tools were trade and other forms of cooperation, combined with discreet pressure applied as part of a process of continuing negotiation.

Although it produced considerable flexibility for lateral movement, "hardheaded détente" could not last as an American policy for the same reason it held so much appeal to the Soviet leadership: it lacked moral content. Its goal was world order in the classic European sense. It was suspicious of internal forces for change that threatened established ruling elites—in the Soviet Union, Chile, wherever.

Jimmy Carter remedied that defect with a vengeance. He placed human rights at the center of his policy toward the Soviet Union and repeatedly "punished" (a word he favored) the Soviets for morally unacceptable behavior. The tools employed by Carter to administer punishment were, to a considerable extent, the various components of the web of interdependencies developed by Nixon-Ford-Kissinger.

Under Ronald Reagan, that moralistic emphasis reached an apex with the description of the Soviet Union as the "focus of evil," as relations between the superpowers deteriorated and the arms race accelerated.

Which approach is preferable? Each, in my view, contains serious deficiences. A policy in tune with American values and interests requires both moral concern and tactical flexibility, both calculation compassion.

One way to serve American values and interests at once would be to establish cooperative activity as an overriding national objective to be pursued with calculated sophistication and moral determination. This policy would replace the prevailing vacillation between no contacts and an uncritical pursuit of contacts, which the Soviets exploit by limiting their participation to party hacks. It would set strict standards for cooperation and push them hard.

A policy of aggressive cooperation would recognize that the chief enemy is less world communist ideology, which takes many evolving forms (China, Hungary, Yugoslavia), than it is the repressive Soviet police state, which is compulsively hostile to any evolution at all, communist or otherwise.

Instead of responding to repugnant Soviet behavior by cutting off contacts as "punishment" (which actually makes work easier for the police state apparatus), we would keep up the pressure, constantly pushing for new and expanded contacts of substance in the teeth of Soviet repression. Our principal target would be the emerging scientific and technical elite, the most sophisticated

and cosmopolitan segment of Soviet society, who enjoy the highest status, upon whom the totalitarian power structure depends for running the system.

In pursuing that target, we could expect much more support than now from our European and Japanese allies, who already favor increased cooperation and greater flexibility in dealing with the Soviets.

Would such a policy legitimize Soviet policies of repression toward Sakharov, Bonner and others? On the contrary, it would constitute the strongest and most effective rejection of those policies. The Soviet police apparatus thrives on insolation. Why assist its efforts? Under present conditions, whenever they want to tighten the screws at home, they need only create an incident. We have handed them flexibility at our expense. In an important sense, American policy has made itself hostage to the KGB.

A policy of aggressive cooperation might best be launched with a proposal to do something big with the Soviets. It must be a long-term undertaking that locks them into an expanding program of joint activity. Soviet policy makers must find it sufficiently appealing to stay in, although it places their reactionary system of internal controls increasingly at risk.

One promising possibility is an international manned mission to Mars in the 21st century. It could be put forward as an alternative to competing Star Wars space weapons systems, which would otherwise be developed in the same time frame.

Unlike Star Wars, it requires no technology breakthroughs and thus would be far less costly. Unlike Star Wars, which would polarize scientific inquiry on the greater frontier of space, it would mobilize the world's best scientists and engineers in a common endeavor on behalf of all humanity. Unlike Star Wars, it would mandate ever greater openness across an expanding front, to the thriving benefit of democratic values and interests. And unlike Star Wars, our allies would welcome it with relief and excitement, for it would be a response to the greatest problem of our time that is wholly in tune with the best in the American character.

Joint activity on a grand scale would respond to the deepest aspirations of Andrei Sakharov. In the late 1960s and early 1970s, Sakharov sought to nudge the Soviet Union in precisely that direction. Then the police apparatus moved in and re-established the "us" versus "them" condition upon which it thrives.

"Any action increasing the division of mankind, any preaching of the incompatibility of world ideologies and nations is madness and a crime," Sakharov wrote. With such utterances, his descent from official favor began, until, alone and isolated, he could retain his integrity only by lashing back at his captors.

But we should not confuse his entrapped response with the deep uiversal spirit that moved him to seek the intellectual freedom which must inevitably ensue from expanded communication and joint activity on an international scale. We have it in our power to resurrect that noble spirit. All we need is the will and determination—and the leadership.

THOMAS PAINE ASSOCIATES,
HIGH TECHNOLOGY ENTERPRISES,
Los Angeles, CA, September 6, 1984.

Senator SPARK M. MATSUNAGA,
Chief Democratic Party Whip, U.S. Senate, Hart Building, Washington, DC.

DEAR SENATOR MATSUNAGA: Arthur Clarke sent me a copy of your letter to him of August 13th on U.S.-U.S.S.R. Space Cooperation, and his response dated September 13th: A Martian Odyssey—Statement to the Committee on Foreign Relations, United States Senate. Since his response contained a quotation from a recent paper of mine, I thought you might like to have the enclosed whole paper: A Timeline for Martian Pioneers, presented at the Planetary Society's "Case for Mars II" conference at the university of Colorado.

Arthur refers to the Apollo-Soyuz joint space flight. The attached history describes how I initiated this program with the late President of the Soviet Academy of Sciences, Academician Mstislav Vsevolodovich Keldysh. As you can see, we started with NASA's plans for the future exploration of space, and asked the Soviets whether they saw areas where cooperative programs might be of mutual benefit. The initial response was suspicious, slow and cautious, but with persistence and patience significant success was finally achieved. I believe that the result was a more open Soviet program, a dramatic demonstration to both nations of the practicality and benefits of detente, and, for a while at least, a somewhat safer world for us all.

The coming Extraterrestrial Century, as outlined in my paper on the settlement of Mars, will present leaders of the United States and the Soviet Union with many opportunities for cooperative enterprises. Not all programs should be international, but many space ventures, like the Intelsat communication satellite network, are inherently global. Unlike terrestrial conquests, the conquest of Mars is not a "zerosum game" in which my victories are your defeats; victories on the space frontier are victories for all mankind.

With best personal regards,

Dr. THOMAS O. PAINE.

CENTRE NATIONAL
D'ÉTUDES SPATIALES,
Paris, le Juin 26, 1984.

Mr. SPARK M. MATSUNAGA:
U.S. Senator, Washington, DC.

DEAR SENATOR MATSUNAGA: I appreciate your informing me of your efforts to have the space cooperation agreement between the Soviet Union and the United States renewed and a fresh lease of life given to cooperation between the scientists of those two countries.

In the pursuit of its space programme, France is privileged to have close ongoing relationships with both the United States and the Soviet Union which have proved richly rewarding for us.

First of all, because they afford us an opportunity of participating in very worthwhile missions, but also because we are able thereby to establish closer and more open human relationships between scientists, regardless of national barriers. Despite the vagaries of the political climate, relationships between scientists remain deep and strong. To sever them on the pretext that Governments may be at odds on other issues is, to my mind, a mistake. Discarding what does or what can work is no way of improving what doesn't.

Scientists all over the world long for the free international exchange of ideas. Such exchange, when it is based on a pooling of programmes chosen from amongst the most ambitious of their kind, should be of particular benefit to mankind.

For instance, a joint initiative taken recently by the U.S. National Academy of Sciences and the European Science Foundation is a very promising one: the best specialists on both sides of the Atlantic met together in order to define what seemed to them the most desirable planetary missions for the years ahead. If, in future, such cooperation could also involve the Soviet Union still greater benefits would accrue.

I therefore congratulate you, Senator, on your initiative and I hope you may be heard by your country's authorities. I express this hope without reservation, convinced as I am that striving to promote better understanding between scientists throughout the world can in no way be regarded as interfering in the specific politics of each of our nations, matters which are, of course, outside my competence.

Yours sincerely,

H. CURIEN.

THE UNIVERSITY OF TEXAS,
THE GENERAL LIBRARIES,
Austin, TX, Sept. 14, 1984.

Senator SPARK M. MATSUNAGA,
U.S. Senate, Washington, DC.

DEAR SENATOR MATSUNAGA: All persons interested in the development of outer space follow with keen attention your attempts to guide its use into constructive channels. For some years now the proper utilization of space has been a major concern of mine, and I constantly hope that ways may be found to bring international order into this vital arena. Each year that passes, each new invention alters the old rules and presents new challenges. I hope the nations may be capable of adjusting to these changes and accepting the new possibilities.

I think you ought to stress with your people that the rate change is now so rapid that neither you nor I can possibly imagine what the capacities will be by the year 2000, and if through fear we are caught hibernating in some wintry cave of limited vision we shall be overrun by facts and outdistanced by others who have adjusted to those facts.

Manned travel to the planets is now practical. Permanent settlements on the Moon can be established at any time we wish. Low-orbiting space stations are already in existence to a degree and their proliferation is limited only by budget. I have acknowledged for some time of the ability of any major nation which wishes to spend the money and ingenuity to put into orbit vehicles of powerful military might. And unmanned exploration of the farthest reaches of our galaxy are possible.

Senator, I am speaking only of what we can do right now with the inventions we already have in hand. If we project our present rate of development ahead fifty years, only the most imaginative mind would come close to what will be possible. Some time ago I spent a summer listening to great experts theorize on what the world of space was going to look like by the year 2010, and they conceded that they could not extrapolate much beyond the next ten years. Nor would they speak with confidence even within that narrow perimeter, for they conceded that things might develop of which they had at that moment no cognizance.

If the speed of invention is so great, I think it incumbent upon us to spend careful thought on what we ought to be doing right now to utilize present capacity and then to pave the way for greater experimentation and achievement later on. That, it seems to me, is the obligation of any major nation.

I am peculiarly involved in such thinking, because I serve on a board whose responsibility it is to combat attempts by the Soviet Union to discolor the truth insofar as international politics are concerned, and I work diligently to protect the reputation of my nation. So I can certainly not be charged with any sentimental favoritism toward the Soviet Union. My job is to monitor her misbehaviors.

But when it comes to the long haul of science and the accomplishments of the future in space, I find myself ardently hoping that the fruitful bi-national cooperation which started with Apollo-Soyuz can be revived, because at some future time, perhaps before the end of this century, such international ventures will be commonplace and we might as well get started correctly now.

I do not see anything contradictory in this recommendation. Of course we are at odds with the Soviet Union on many basic points, and we must protect ourselves for to do otherwise would be irresponsible or worse. But we must also inhabit the Earth with the Russians and share in whatever forward steps are taken. This is a tricky co-responsibility, but I believe the United States is alert enough to manage it. I have always been guided by the military principle that when the first gun is fired in warfare, advisors should start holding consultations regarding the terms under which peace can be restored.

Now as to the specific targets of co-operation, my imagination cannot be as free-wheeling as that of scientists who are experts in these fields, but three possibilities dominate my attention: (1) Further exploration of the Moon, with the reminder that the Soviets got there first with their cameras and their rovers and thus had the privilege of naming most of the features on the far side; (2) manned exploration of Mars, which would be a major effort requiring enormous planning and much more than a year of absence from the Earth; and (3) extensive further exploration of the solar system, including concentration of problems relating to the Sun whose power ensures our existence on Earth.

I am sure there are other possibilities which would yield equally signficant results, but I must leave their identification to others, as I am not qualified to give advice.

I am, however, informed on the role of exploration in human existence. Once a frontier is negotiated there becomes, I believe, a categorical imperative to pursue its exploration to logical limits. People who follow this path acquire understanding and a control of their environment. Universities which behave in this manner become great. Nations which have this as a guiding principle develop new skills, aptitudes and mind-sets which enable them to prosper in comparison with other nations which lag behind. People and nations are not obligated to adopt every innovation, and prudent ones choose wisely lest they lose their historic headings; but they are obligated to know what's happening.

Conversely, those people, universities and nations which shy away from investigation of possibilities condemn themselves to a second-rate existence which can be satisfying in some respects but which misses the great challenges of their time. I am awed by the heavy penalties organizations pay when they fail to keep abreast of what is happening, and in my work I see the remains of many nations which failed. I do not want to see this happen to the United States.

A final difficult question remains. Could the United States conduct these space explorations alone? Yes, but it would be more fruitful, I believe, if we cooperated with the Soviet Union and with other space-competent nations in joint enterprises where scientific enlightenment is the goal. We shall be driven to isolated experimentation in those cases where military competency is at stake, but I do not believe that we should allow that necessity to dominate the world's behavior in space.

I therefore endorse heartily Senate Joint Resolution 236 and pray that it will become a guiding policy statement for our nation.

Sincerely,

JAMES A. MICHENER.

A MARTIAN ODYSSEY[1]

(By Arthur C. Clarke)

Chairman Matsunaga, distinguished Senators—I very much wish I could appear in person before your Committee. Despite my well-known slogan "Don't commute—communicate!" I would have gladly made the long journey from Sri Lanka to be with you; but in a little over two weeks I also have to address the Pontifical Academy of Science on "The Impact of Space Exploration on Mankind." On the very day of your SJR 236 deadline, 1 October, I hope to raise many of its points with the leading Russian (and Chinese) scientists who will also be present at the Vatican.

May I first, Mr. Chairman, deal briefly with space weapons—a subject which has concerned me ever since the *Royal Air Force Quarterly* published my essay "The Rocket and the Future of Warfare" in 1946 (1). Somewhat later, in August 1982, I presented an updated version, "War and Peace in the Space Age", to the UN Committee on Disarmament in Geneva. The following month it was inserted into the *Congressional Record* by Representative George Brown (2), and I refer you to what I devoutly hope is the final version in *1984: Spring.* I have also read a large fraction of the megawordage generated on the subject—including the unclassified summaries of the Fletcher Report, and its fascinating Soviet counterpart (3). I have also talked with many of the experts involved—hawks, doves, and those who, like myself, might be classified as anxious falcons.

There can be no doubt that ICBM's could be intercepted and destroyed, even at ranges of several thousand kilometers, by projectile or beam weapons. But it could only be done at gigantic expense, by dedicated crews of highly trained scientists and engineers. A 50% success rate against a modest salvo would be impressive; a 90% one would be astonishing, and I doubt if any informed person really believes that such a figure is possible.

Even if a 90% kill rate could be achieved, what would that imply? It has been pointed out that a full-scale thermonuclear exchange would be equivalent to "World War Two once a second, for the length of a lazy afternoon." (4) So if a ballistic missile defence system was a brilliant success, it might merely give you World War Two—every ten seconds. Either way, the result would make "The Day After" look like an optimistic exercise in wishful thinking.

Though these are of course only personal guesses, I do have some relevant experience. Forty years ago I was in charge of the most advanced radar system then in existence (2). It took the best brains of MIT—one went on to win a Nobel Prize—to keep it running. The Star Warriors are talking about systems hundreds of times more complex, whose failure would be immeasurably more catastrophic.[2]

For a critique of the more far-fetched schemes of "orbital fortresses" I would like to put on record a letter I wrote to the AIAA's *Astronautics*, ironically praising an article entitled "The Coming Weapons" for "catching to perfection the authentic Strangelovian delight in technological obscenities" (Annex A).

Let us now talk about technological decency. Fifteen years ago at the Cape, when we had finished cheering the first men on their way to the Moon, I saw the Vice-President of the United States turn to Walter Cronkite and say that we could put a man on Mars by the end of the century—and "we should do it . . . because the people want something to look forward to as an exciting objective." That sentence echoes a much more ancient saying that might well serve as a motto for your Committee: "Without vision, the people perish."

Could we put a man on Mars by the end of the century—now only one year further away than the launch of Apollo 11? Let me give the views of a man who, perhaps better than anyone, can answer that question.

With appropriate serendipity, Dr. Tom Paine, NASA Administrator for the critical years 1968–1970, has just sent me the paper "A timeline for Martian Pioneers" he delivered at the University of Colorado in July. Here is his prediction for the period beginning 1995—repeat, 1995:

"The decade opens with a triumphant Soviet expedition to Mars, including docking scenes at Phobos with spectacular extravehicular activities . . . that dominate TV. The President of the United States receives a Golden Fleece from an elderly senator for relinquishing America's scientific pre-eminence to the Soviet Union. In response he orders the Vice President to overhaul the American space program; she begins by firing the NASA Administrator for lack of boldness."

Dr. Paine has his tongue in his cheek, of course, but he is also deadly serious. When it is ready, the USSR will go to Mars. Why are its cosmonauts making space endurance records with times approaching those required for the Earth-Mars round trip? You don't need that capability, for missions this side of the Moon!

Sooner than they imagine, Americans will have to ask themselves: "Do we stand aside, when the Soviet Union heads for Mars? Do we go it alone? Or do we go with them?"

I admit my bias—indeed, my interest—in this area. As you doubtless know, the novel *2010: Odyssey Two* describes a joint US-USSR mission—though to Jupiter, not Mars!—and at this very moment Peter

---

[1] I have proudly borrowed this title from the classic short story by Stanley Weinbaum (1902-35), whose other memorial is an 80 kilometer-wide crater, lying between Wells and Burroughs, at 245 degrees West, 66 degrees South. (NASA *Atlas of Mars.*)

[2] For some ominous lessons about the reliability of sophisticated military equipment—and its human operators—under actual combat conditions, see the record of the Falklands War.

Hyams is filming it at MGM/UA. The novel is dedicated to Cosmonaut General Alexei Leonov, the first man to walk in space, and commander on the Apollo-Soyuz rendezvous. He was delighted to know that the ship is named after him: "Then it will be a good ship!" he exclaimed, when I told him this, in his apartment at 'Star village' (5). He was not quite so happy at sharing the dedication with Academician Sakharov; indeed, I am currently in disgrace in the Soviet Union, now that someone has noted the extraordinary coincidence that all seven Russians in *2010* are named after well-known dissidents.[3]

I am not so naive as to imagine that this could be achieved without excruciating difficulty, and major changes in the present political climate. But those changes have to be made, sooner or later, and I commend your Committee for its courage in recognising this fact.

Most of those changes will have to be made in Moscow, and may have to await the long-overdue extinction of the Kremlin dinosaurs. But not all the fault lies in the USSR; painful adjustments will also be required nearer home. In this context, please see my letter to General Graham (Annex B), answering a circular sent out by his High Frontier organisation after the shooting down of Korean Flight 007.

Now, to quote one of Stanley Kubrick's favorite remarks: "The only important question is what to do next." In this case, what we must do next is to strengthen and extend any existing space agreements. For example, the combined US-USSR-Canadian-French "Search and Rescue Satellite" (SARSAT) has already saved scores of lives, on the high seas and in the Arctic. It has received nothing like the recognition it should have done; if the public knew more about it, there would be a demand for more programs of this kind.

One might be—when its implications are fully explored—the International Monitoring Satellite (6), which could help to dispel the present poisonous political atmosphere by at last achieving President Eisenhower's dream of "Open Skies." I was happy to see a step in this direction with the release of the satellite photographs of the Soviet aircraft carrier under construction, and have a motto for the IMS—"Peace Through Truth." Of course, many nations would object to Big Brother watching them from space—but here on the ground most law-abiding citizens are quite happy to have TV cameras surveying high-crime areas. And let's face it—Planet Earth is a high-crime area.

Unfortunately, the United States has missed the opportunity to join the international fleet of space probes that will soon encounter Halley's Comet. Perhaps the storm of criticism that will then ensue—there may be a Golden Fleece awarded to the President well in advance of Tom Paine's scenario!—may have the salutary effect of focussing attention on this failure of nerve. Spring 1986 may be Sputnik time again.

But though unmanned space missions are essential and often highly cost-effective, they do not fire the imagination. And, contrary to what some scientists may have told you, in the long run it is the manned missions that will be the more important. Unfortunately, no-one can predict whether that run will last for centuries, or mere decades. Almost certainly it will exceed the attention span of even the most enlightened Administration.

I have just been listening to an historic and inspiring sound from the past—the applause of Congress as President Kennedy cried "We choose to go to the Moon!" One day the United States will return to the Moon. That will be exciting and important; but it will no longer be pioneering. The Moon, though an essential stepping stone to space, is only the offshore island of Earth. But Mars—a planet as large as our own, in terms of land area, is the first of the New Worlds.

Only eight years from now it will be exactly half a millenium, since three tiny ships sailed forth from Spain, to change the history of our species. And three is about right for the smallest practical Mars expedition—one unmanned cargo vessel, and two manned ships, either able to carry both crews in an emergency. The cost would be less than that proposed merely for research into anti-ICBM systems—let alone the bill for their actual deployment, which would be orders of magnitude greater. Even those who think, that such expenditure is necessary will surely deplore such a tragic diversion of resources.[4]

So is it absurdly optimistic to hope that, by Columbus Day 1992, the United States and the Soviet Union will have emerged from their long winter of sterile confrontation? That would be none to soon to start talking seriously about Mankind's next, and greatest, adventure.

When we said goodbye in Star Village, Alexei Leonov—who is a very good artist—gave me a copy of his book *Life Among Stars*. In it are the sketches he made during the Apollo-Soyuz mission, including excellent likenesses of his American colleagues—two of whom, I am happy to see, are testifying before your Committee.

The portrait of Tom Stafford is autographed as follows: "To my dear friend Alexei Leonov—many thanks for your friendship and wonderful co-operation—we have opened a new Era in the history of man. Tom Stafford, 18 July 1975."

General Stafford—over to you.

Mr. PELL. Mr. President, I am an original sponsor with the Senators from Hawaii [Mr. MATSUNAGA] and Maryland [Mr. MATHIAS] of Senate Joint Resolution 236. This resolution, which could open the way to renewed East-West space cooperation, well merits the strong support and endorsement of the Senate.

Senate Joint Resolution 236 has attracted substantial support in the Senate and widespread and enthusiastic support in the scientific community. The resolution was approved unanimously by the Committee on Foreign Relations on October 2 and ordered favorably reported with amendments.

The resolution calls for:

Renewal of a 1972 Nixon-Kosygin space cooperation agreement, which was subsequently renewed in a 1977 Vance-Gromyko agreement and allowed to lapse in 1982;

Initiation of talks with the Soviets and other governments to explore opportunities for cooperative ventures in space; and,

A report on actions taken pursuant to the resolution.

As amended in committee, the resolution's wording was altered slightly to emphasize the value of renewed co-operation on it own merits, more than as an alternative to a space arms race. As amended, the resolution urges the President to "endeavor, at the earliest practicable date, to renew" the agreement to allow the administration legitimate negotiating leeway. Finally, the resolution, reflects congressional support for the United States-Soviet simulated space rescue mission proposed by the President in June by calling upon him to "continue energetically to seek Soviet agreement" to his proposal.

Mr. President, according to the Congressional Office of Technology Assessment [OTA] two primary areas of scientific cooperation were first, space biology and medicine and second, the Moon, planets, and near-Earth space. In the first category, three areas were particularly fruitful, including exchanges of flight data on human response to spaceflight conditions, joint ground-based simulations of spaceflight conditions, and biomedical experiments done at U.S. request in Soviet spacecraft. In regard to planetary activities, OTA reports the strongest cooperation was in lunar studies, the exploration of Venus, and solar-terrestrial physics.

At its hearing on September 13, the committee received testimony from a

[3] Though perhaps not well-known enough. Despite my warnings, and his cheerful claim to have 'sanitised' the text, my Moscow friend and editor failed to spot these curious coincidences—and has accordingly lost his job. I feel both embarrassed and guilty. You may not remember that the Apollo-Soyuz mission was itself directly inspired by a Hollywood movie, "Marooned". Frankly, one of my purposes in writing *2010* was to start people thinking seriously once again about such co-operation.

[4] Of course, some research into ballistic missile defense is obviously essential to prevent—or perhaps discover—technological surprises; 50 years ago a situation arose which has a striking lesson for today. On 18 January 1935 the British Air Ministry's Director of Scientific Research asked Dr. Robert Watson-Watt if it was practical to develop a 'death ray' against German bombers. Whilst proving that this was beyond current technology, Watson-Watt discovered something much more useful—radar. "History never repeats itself—but historical situations recur."

panel of experts in the area of space activities and cooperation, including Dr. Carl Sagan, David Duncan professor of astronomy and space sciences and director, laboratory for planetary studies, Cornell University; Mr. Louis Friedman, executive director, the Planetary Society; Dr. Bernard Burke, William A.M. Burden professor of astrophysics, Massachusetts Institutes of Technology; and, Dr. Harold Masursky, senior scientist, U.S. Geological Survey. The administration was represented by Mr. Charles Horner, Deputy Assistant Secretary for Bureau of Oceans, Environment and Science, Department of State, and Mr. James Morrison, Deputy Assistant Administrator, International Affairs, National Aeronautics and Space Administration.

All four panelists strongly supported renewal of the 1972 umbrella agreement.

Mr. Masursky told the committee in answer to my question: "I favor a joint resolution, because they watch us very carefully, and I think this will help us in observing their program. Second, that we can avoid wasteful noncoordination, so our own exploration will be expedited, and we are sure we are not duplicating unnecessary work. And third, we may be able to engender more effective cooperation and do things that we cannot now do ourselves."

When I asked what would be the consequences of a failure to renew the agreement, Dr. Burke said: "In my view, the principal loss is likely to be the initiative in international scientific cooperation. The Soviets are moving aggressively. They have a number of cooperative space projects with the European scientists that are very good projects indeed. If they conduct their affairs well, I think that they will probably occupy the central position in international science eventually."

I asked whether the Soviets would respond favorably to a new United States initiative. Dr. Sagan told the Committee: "Yes; I think there is very convincing evidence, at least by the testimony of virtually every Soviet senior space scientist that we talk to, that such an American initiative would be greeted with a great sigh of relief over there."

In discussions of United States-Soviet cooperation in space and other areas, the concern of possible technology transfer has been raised. All four expert panelists assured committee members that, in their view, there is essentially no risk.

Mr. Morrison, speaking for NASA, to the committee that, throughout the course of cooperation, "the United States has sought to identify science applications and development projects which contribute to United States space objectives and utilize complementary Soviet space capabilities without incurring United States technology loss. We believe that the record shows that this can be done successfully."

In regard to future cooperation, Mr. Morrison said: "The projects should be scientifically justified, technically feasible, conducive to safeguards against technology transfer, and have at least comparable benefit to cost ratios as alternative projects on which the money could be spent."

Mr. President, space—the last frontier—is, for now, a nuclear weapons-free zone. Unfortunately, the administration so far has given no indication it appreciates the importance of keeping space free of weapons. There is no negotiation to control space-based or space-directed weapons in prospect, and the emphasis clearly is upon preparing to fight space wars. Undoubtedly, the Soviets are prepared to do the same.

Before it is too late, we must ask whether our own self-interest is space in which cataclysmic war is a looming threat, or is space in which an exemplary peace prevails. If we are wise enough to seek the latter situation, we will do all that we can to bring about space arms control and to foster peaceful cooperation for our benefit and that of all nations.

Our relations with the Soviets have deteriorated alarmingly in recent years. As various ties, such as the agreement on space, have been terminated, the incentives for the Soviets to be restrained and responsible in their international dealings have diminished. Isolating the Soviet Union will not make it better. Dealing with the Soviet Union in the full awareness that it is an adversary can help get both sides off the present collision course.

I have been a close observer of the Soviet Union for years. I led a Senate delegation there a year ago and came back convinced, more than ever, that, while maintaining strong defense, we must find productive ways to deal with them if we are to reduce tensions and spare mankind the terrible threat of nuclear war.

Cooperation in space offers an excellent and unique opportunity. Working together the two sides can engage in various scientific ventures which will provide concrete benefits to our societies and to other nations. Working on a people-to-people basis, we can discover and build upon those peaceful scientific aspirations we share. Each side has much to offer. We must be willing to choose cooperation.

Thank you, Mr. President.

The amendments were agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The reported amendments to the preamble were agreed to.

The preamble, as amended, was agreed to.

The title was amended so as to read "Joint resolution relating to cooperative East-West ventures in space."

The joint resolution, as amended, and the preamble, as amended, are as follows:

S.J. RES. 236

Whereas the United States and the Soviet Union could soon find themselves in an arms race in space, which is in the interest of no one;

Whereas the prospect of an arms race in space between the United States and the Soviet Union has aroused worldwide concern expressed publicly by the governments of many countries;

Whereas the 1972-1975 Apollo-Soyuz project involving the United States and the Soviet Union and culminating with a joint docking in space was successful, thus proving the practicability of a joint space effort;

Whereas, shortly after the completion of the Apollo-Soyuz project, and intended as a followup to it, the United States and the Soviet Union signed an agreement to examine the feasibility of a Shuttle-Salyut program and an international space platform program, but that initiative was allowed to lapse;

Whereas the United States signed a five-year space cooperation agreement with the Soviet Union in 1972, renewed it in 1977, then chose not to renew it in 1982;

Whereas the United States recently proposed to the Soviet Union that the two Nations conduct a joint simulated space rescue mission;

Whereas the Soviet Union has not yet responded to the substance of this proposal; and

Whereas the opportunities offered by space for prodigious achievements in virtually every field of human endeavor, leading ultimately to the colonization of space in the cause of advancing human civilization, would probably be lost irretrievably were space to be made into yet another East-West battleground: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President should—

(1) endeavor, at the earliest practicable date, to renew the 1972-1977 agreement between the United States and the Soviet Union on space cooperation for peaceful purposes;

(2) continue energetically to gain Soviet agreement to the recent United States proposal for a joint simulated space rescue mission;

(3) seek to initiate talks with the Government of the Soviet Union, and with other governments interested in space activities, to explore further opportunities for cooperative East-West ventures in space including cooperative ventures in such areas as space medicine and space biology, planetary science, manned and unmanned space exploration; and

(4) submit to the Congress at the earliest possible date, but not later than March 1, 1985, a report detailing the steps taken in carrying out paragraphs (1), (2), and (3).

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

JOHN J. PERSHING VETERANS' ADMINISTRATION MEDICAL CENTER

The bill (H.R. 5252) to redesignate the Veterans' Administration Medical Center located in Poplar Bluff, MO, as the "John J. Pershing Veterans' Administration Medical Center," was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

RELIEF OF MARSHA D. CHRISTOPHER

The bill (H.R. 723) for the relief of Marsha D. Christopher, was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

RECOGNITION OF BIG BROTHER AND BIG SISTER VOLUNTEERS

The joint resolution (H.J. Res. 594) designating the week beginning February 17, 1985, as a time to recognize volunteers who give their time to become Big brothers and Big Sisters to youths in need of adult companionship, was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

MANDELA FREEDOM RESOLUTION

The Senate proceeded to consider the resolution (S. Res. 386) entitled the "Mandela Freedom Resolution."

Mr. LEVIN. Mr. President, this resolution, which I introduced on May 3, 1984, presents an opportunity for the Senate to make a significant statement in support of the inalienable rights of the black majority in South Africa. Similar legislation claiming the bipartisan support of more than 180 cosponsors was approved in the House, under suspension of the rules, a few days ago—September 18.

Mr. President, this resolution expresses the sense of the Senate that the Government of South Africa immediately release Nelson and Winnie Mandela from their more than 20-year imprisonment and detention. They are national symbols of opposition to the brutal policy of apartheid.

I am very pleased to have as cosponsors of this resolution Senator KASSEBAUM, chairman of the Subcommittee on African Affairs, Senator PERCY, chairman of the Committee on Foreign Relations, Senator HATFIELD, chairman of the Appropriations Committee and a ranking member of the Appropriations Subcommittee on Foreign Operations; Senator BOSCHWITZ, Senator SARBANES; Senator LAUTENBERG; Senator TSONGAS; Senator DIXON; SENATOR RIEGLE; Senator KENNEDY; Senator CRANSTON, and Senator BUMPERS.

In recent years, especially since 1980, there has been international pressure for the release of Nelson Mandela from life imprisonment in South Africa. Mr. Mandela is seen by many black South Africans as one of the most respected symbols of resistance against the racial discrimination and segregation laws of apartheid.

Mr. Mandela was born in Umtata, Transkei, in 1918. He was educated in mission schools and was admitted to Fort Hare University, South Africa in 1938. After being expelled from Fort Hare for participating in a student strike in 1940, Mandela went to Johannesburg. There he was apprenticed with a firm of white attorneys and continued his education at the university of Witwatersrand. In 1951, Mandela established in Johannesburg the first firm of black attorneys in South Africa. In 1952, he was appointed national volunteer-in-chief to head the defiance campaign, which resulted in 8,500 people voluntarily challenging race laws to go to jail as a protest against discrimination.

Mandela was arrested in 1952 and released after a short imprisonment, then arrested again in 1956 and charged with planning to overthrow the South African Government. The Government based its charges on the African National Congress' acceptance of the freedom charter drafted the previous year. The trial lasted until 1961, when he and all other accused ANC members were acquitted.

In March 1960, the Pan Africanist Congress organized an antipass law protest in which the demonstrators were to use nonviolent methods. The South African police opened fire on the demonstrators, killed 67 blacks, including women and children, and wounding 186 others. In May 1961, the ANC, despite being banned in 1960, organized a nationwide 3-day strike to coincide with an inauguration celebration at which South Africa was to be declared a republic. The Government reacted to the strike with massive intimidation and the arrest of thousands of blacks, following up with more legislation to suppress dissent.

Nelson Mandela traveled abroad in January 1962 to attend a Pan-African conference in Addis Ababa, Ethiopia. During his trip he also visited several African countries and Britain. Mandela was able to evade the police until August 1962, when he was arrested and charged with inciting the 1961 strike and with leaving South Africa illegally. In November of that year, he was sentenced to five years imprisonment.

While serving his 5-year sentence, Mandela and eight other ANC members were tried on charges of sabotage and conspiracy to overthrow the South African Government in the Rivonia trial, which lasted from July 1963 to 1964. Mandela and all but one of the others were sentenced to life imprisonment. They were imprisoned at Robben Island near Cape Town.

Black Consciousness culminated in the 1976 Soweto school boycotts, demonstrations, and riots, in which 600 students were killed. The following year its leader, Steve Biko, died in detention, and numerous antiapartheid groups were banned.

In 1982, Mondela was moved to Pollsmoor Maximum Security Prison on the mainland near Cape Town.

Winnie Mandela, since 1962, has been either banned or imprisoned for violations of her banning orders, although she was never charged with or tried for any violation of a law.

As a banned person, she is prohibited from leaving her home after 6 p.m. weekdays and all during the weekend. She is not permitted to enter any public institution such as church or school, nor is she permitted to attend any social gathering involving more than two other adults at a time. Although Mrs. Mandela is a social worker by training, she is permitted no employment.

On several occasions, Mrs. Mandela has been charged with minor violation of her banning order—for having more than two people in her apartment with her at the same time and for travelling to see her husband in prison by train rather than plane, which she cannot afford—and consequently has spent time in solitary confinement in jail, detained without trial.

Mrs. Mandela has been offered permission by the Government to leave South Africa but has refused because it would entail abandoning her husband.

For the last 6 years Mrs. Mandela's stipulated place of banishment has been Brandfort, 200 miles from Johannesburg in Orange Free State, a white Afrikaaner farmland region. Here, Mrs. Mandela has established the first black community home-agricultural project, a neighborhood emergency and first-aid health care unit, and most recently a child and older youth care center, servicing 100 children and staffed by three teachers with a house manager/cook.

Mr. President, I urge my colleagues to join in support of the Mandela freedom resolution. Let us stand united and resolute for the principles we hold so dear to in the United States.

CHAMPIONS OF JUSTICE IN SOUTH AFRICA

Mr. LAUTENBERG. Mr. President, I join as a cosponsor of Senate Resolution 386, the Mandela Freedom Resolution, calling for the immediate release by the South African Government of Nelson and Winnie Mandela, leaders in the struggle against apartheid.

A dedicated patriot, Nelson Mandela has been imprisoned for 20 of his 66 years for opposing the oppressive white minority government. Mr. Mandela has been a critic of the Government ever since he was expelled from Fort Hare University in 1940 for being the ringleader of a student strike. Mr. Mandela studied law at the University of Witwatersrand and in 1952, he and Oliver Tambo established the first law firm of African attorneys in Fox Street, Johannesburg. Although Nelson Mandela has been imprisoned for the last 20 years, he is still a symbol of resistance to the political and racial oppression of apartheid.

Mandela's wife, Winnie, is also a highly respected leader in the anti-apartheid movement. Winnie Mandela's only offense has been the violation of her banning orders, which deprive her of some human rights: to be photographed or quoted in any South African publication, or to meet in her home with more than one person at a time. She has been constantly harassed, detained, and abused by the South African security police. Ms. Mandela is under house arrest and is only allowed to spend 30 minutes with her husband on the few occasions when she is allowed to visit him.

In November 1982, despite a severe illness, Winnie Mandela refused to be treated at the nearby hospital for blacks. Because she was refused admittance to the all-white hospital, her lawyers obtained permission for her to receive treatment at a private multiracial clinic in Johannesburg.

Mr. President, the Mandela's struggle for basic human rights and dignity is a struggle for freedom: freedom against the immoral and indefensible system of apartheid. The United States must not support a system of apartheid that denies the black South African majority civil, political, and economic rights. The violation of the Mandela's human rights is no less flagrant than the violation of the rights of the Sakharovs and Jewish dissidents in the Soviet Union. The Mandelas have fought for decades to end the cruel racist system of apartheid that binds all blacks to the whipping post of oppression. The United States was founded upon a struggle for liberty; it is this historic struggle that should prompt all Americans to demand an end to the system of apartheid.

I therefore urge my colleagues to support Resolution 386 that calls for the long overdue release of the Mandelas.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 386

Whereas the Republic of South Africa has excluded blacks and other nonwhites from participation in the government of their country by means of a system of racially discriminatory laws and practices known as the apartheid system;

Whereas the South African practice of apartheid is based on violence, exploitation, and deprivation of basic human and civil rights, is incompatible with the dignity of mankind, and contravenes the most fundamental human and political rights as set forth in the Charter of the United Nations and the Universal Declaration of Human Rights;

Whereas the Government of the United States, the United Nations, and virtually every country in the world condemns the practice of apartheid by the Government of South Africa;

Whereas in 1944, Nelson Mandela joined, and later led, the banned African National Congress, which is committed to eradicating the South African Government's official policy of racial apartheid and in its place erecting a society in which the rights of all South African citizens shall be the same, regardless of race, color, or sex;

Whereas in 1964, when he was already in jail under a five-year sentence for inciting strikes and leaving the country without a permit, Nelson Mandela was again brought to trial and sentenced to life imprisonment for seeking to overthrow the government with violence and has been incarcerated ever since that time;

Whereas now, after twenty years in prison, Nelson Mandela nevertheless remains the leading symbol of resistance to political oppression, race and color prejudice in South Africa and the most widely recognized leader of that country's black majority population;

Whereas Winnie Mandela, the wife of Nelson Mandela and one of the most prominent and highly respected leaders of the anti-apartheid movement in South Africa, was arrested twenty years ago and, despite the fact that she has never been convicted of any offense except violations of her banning orders, has been systematically banned, detained, harassed, and abused by South Africa's security police and has spent less than eleven months of the past twenty years in freedom;

Whereas Winnie Mandela, as a banned citizen of South Africa, is confined to a home designated by the State and far removed from her friends and family, is not permitted to meet with more than one person at a time, may not be quoted or write any material for publication, and is prohibited from having her name or photograph appear in print anywhere in South Africa; and

Whereas the anti-apartheid movement in South Africa exemplifies the loftiest ideals and aspirations of the American people and all feedom-loving peoples the world over: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the Government of the Republic of South Africa should immediately release and free Nelson Mandela from prison and should revoke and cancel Winnie Mandela's banning order;

(2) the President of the United States should use his good offices to secure the release and freedom of Nelson and Winnie Mandela; and

(3) the President of the Senate is requested to transmit a copy of this resolution to the President of the United States and to the Prime Minister of the Republic of South Africa.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

FEDERAL CHARTER FOR NATIONAL SOCIETY, DAUGHTERS OF THE AMERICAN COLONISTS

The bill (S. 3034) to grant a Federal charter to the National Society, Daughters of the American Colonists, was considered, ordered to a third reading, read the third time and passed; as follows:

S. 3034

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CHARTER

SECTION 1. National Society, Daughters of the American Colonists, organized and incorporated under the laws of the District of Columbia in 1921, is hereby recognized as such and is granted a charter.

POWERS

SEC. 2. National Society, Daughters of the American Colonists (hereinafter referred to as the "corporation") shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes for which the corporation is organized shall be those provided in its articles of incorporation and shall include a continuing commitment, on a national basis, to—

(1) conduct research with respect to the history and deeds of the American colonists, and record and publish the results of such research;

(2) publish the memoirs of American colonists;

(3) erect memorials to commemorate the history and deeds of the American colonists;

(4) promote respect and admiration for the institutions, laws, and flag of the United States;

(5) engage in mutual improvement and educational activities; and

(6) establish scholarships to assist needy and deserving students and to promote the improvement of educational institutions, engage in volunteer service and make contributions to veterans hospitals, and perform such other charitable activities including the national presidents' projects as may be provided by the articles of incorporation or bylaws of the society.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the States in which it is incorporated and those States in which it carries on its activi-

ties in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Eligibility for membership in the corporation and the rights and privileges of members shall, except as provided in this Act, be as provided in the constitution and bylaws of the corporation, and terms of membership and requirements for holding office within the corporation shall not be discriminatory on the basis of race, color, religion, or national origin.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The board of directors of the corporation and the responsibilities thereof shall be as provided in the articles of incorporation or bylaws of the corporation and in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The officers of the corporation, and the election of such officers shall be as is provided in the articles of incorporation or bylaws of the corporation and in conformity with the laws of the State or States wherein it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation shall inure to any member, officer, or director of the corporation or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support, or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

(f) The corporation shall retain and maintain its status as a corporation organized and incorporated under the laws of the State or States wherein it is incorporated.

EXCLUSIVE RIGHT TO NAME, EMBLEMS, SEALS, AND BADGES

SEC. 9. Subject to established or vested rights, the corporation shall have the sole and exclusive right to have and to use, in carrying out its purposes, the name National Society, Daughters of the American Colonists and any emblem, seal, or badge adopted or used by the corporation.

LIABILITY

SEC. 10. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 11. The corporation shall keep correct and complete books and records of account and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right to vote. All books and records of such corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 12. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(66) National Society, Daughters of the American Colonists".

ANNUAL REPORT

SEC. 13. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as is the report of the audit required by section 11 of this Act. The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 14. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 15. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 16. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1954. If the corporation fails to maintain such status, the charter granted hereby shall expire.

TERMINATION

SEC. 17. If the corporation shall fail to comply with any of the restrictions or provisions of this Act, the charter granted hereby shall expire.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

RUSSELL LAKES WATERFOWL MANAGEMENT AREA

The bill (H.R. 2823) to amend title I of the Reclamation Project Authorization Act of 1972 in order to provide for the establishment of the Russell Lakes Waterfowl Management Area as a replacement for the authorized Mishak National Wildlife Refuge, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

COMMEMORATIVE MEDAL FOR FAMILIES OF AMERICANS MISSING OR OTHERWISE UNACCOUNTED FOR IN SOUTHEAST ASIA

The bill (H.R. 6100) to clarify the intent of Congress with respect to the families eligible for a commemorative medal authorized for the families of Americans missing or otherwise unaccounted for in Southeast Asia, was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

NATIONAL MEDICAL TRANSCRIPTIONIST WEEK

The joint resolution (H.J. Res. 332) to designate the week beginning May 20, 1985, as "National Medical Transcriptionist Week," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint bill was passed.

Mr. BYRD. I move to lay that motion on the table.

LEO J. RYAN MEMORIAL FEDERAL ARCHIVES AND RECORDS CENTER

The bill (H.R. 4473) to designate the Federal Archives and Records Center in San Bruno, CA, as the "Leo J. Ryan Memorial Federal Archives and Records Center," was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

Mr. BAKER. Mr. President, that completes my list for the moment. I expect that we will have other matters that will be cleared during the day for action by unanimous consent. As our staffs try to work those things out, I will be prepared to meet with the minority leader, and to arrange to conduct further routine business.

Mr. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. Yes.

Mr. BYRD. I wish to inquire of the distinguished majority leader what action is contemplated on Calendar No. 952.

Mr. BAKER. Mr. President, that is the odometer bill. The minority leader mentioned this to me, I guess, on yesterday, as did the Senator from Nebraska. Since then, I have conducted an inquiry. I believe we have that cleared for action on this side. Let me

make one further check to make certain that I have not dropped a stick someplace. But the indication I have at the moment is that we can probably include that on the list of the next items which we will take up for action routinely.

Mr. BYRD. Very well.

Mr. President, I thank the majority leader.

I am sure Mr. EXON will be grateful if that can be done.

Mr. BAKER. I thank the minority leader.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, the time for morning business has expired, and I ask the Chair to lay before the Senate the pending business.

The PRESIDING OFFICER. Morning business is closed.

PUBLIC DEBT LIMIT INCREASE

The PRESIDING OFFICER. The clerk will report the pending business.

The bill clerk read as follows:

A joint resolution (H.J. Res. 654) increasing the statutory limit on the public debt.

The Senate resumed consideration of the joint resolution.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, we are on the debt ceiling; is that correct?

Mr. DANFORTH. The Senator is correct.

Mr. DOLE. Mr. President, the Senator from Idaho will have an opportunity to offer his amendment in a few moments. I know he feels strongly about it. But I would hope that after some period of debate we might dispose of the Symms amendment on the basis that we have worked out a pretty good compromise. It obviously does not satisfy everyone, but it does satisfy those who seem to represent the different groups around the country, with some few exceptions. I do not mean to suggest that everyone is satisfied.

Mr. President, I am now advised that the home builders, for example, out of 31 States contacted, have 30 States, including the State of Idaho, in support of the compromise. The one State that does not, as I understand, may be the State of Montana.

Mr. President, I ask unanimous consent to include in the RECORD at this point a telegram which was delivered to the Senator from Idaho, and I assume others, signed by Donald H. Treadwell, the president of the National Association of Realtors. In that telegram, he states:

The Jepsen amendment includes the essential elements of the compromise worked out with my full personal participation in meetings with Finance and Joint Committee staff and Treasury Department representatives. In my judgment it protects the legitimate needs of the buyers and sellers of real estate as well as eliminated abusive practices. Some provisions of the compromise are more desirable than a return to the law prior to the passage of the tax law of 1984. We urge continued support of the Jepsen amendment.

Mr. President, I ask that that telegram be printed in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

(Copy of wire sent today (10/10/84) to Senator Symms, with respect to the critical issue of imputed interest likely to be further considered in the Senate today)

The Jepsen amendment includes the essential elements of the compromise worked out with my full personal participation in meetings with Finance and Joint Committee staff and Treasury Department representatives. In my judgment it protects the legitimate needs of the buyers and sellers of real estate as well as eliminates abusive practices. Some provisions of the compromise are more desirable than a return to the law prior to the passage of the tax law of 1984. We urge continued support of the Jepsen amendment.

Sincerely,

DONALD H. TREADWELL,
Realtor, Southgate, Michigan, President, National Association of Realtors.

Mr. DOLE. Mr. President, yesterday there was some discussion of the forced compromise, whether it was the staff that represents the six associations that I have referred to from time to time, or whether they were properly representing their members.

Involved in the discussions were representatives of the American Land Development Association, the National Apartment Association, the National Association of Homebuilders, the National Association of Realtors, the National Association of Independent Business, the National Housing Council, and the National Small Business Association.

Mr. President, we have just placed into the RECORD a telegram signed by Mr. Treadwell, a realtor from Michigan, president of the National Association of Realtors. He was very helpful in fashioning this compromise.

I should add that John Koelemij, a homebuilder from Tallahassee, Florida, first vice president of the National Association of Homebuilders, this week also actively worked with us in working out this proposal.

Again, Mr. President, I want to make it clear that there is no doubt in my mind that those who were seated around the table there for 2 or 3 days representing these groups also reflected the views of their constituents in their different associations, just as we believe we reflect the views of our constituents. Sometimes we may not have them all on board, but generally we reflect the views of our constituents.

Mr. President, I really hope that what we might do, if there is any way we can do it, is to agree that this will be the last amendment and maybe at some appropriate time we can table the amendment and go to conference with the House.

Again, as I said last night and the day before, I am not certain whether the House is willing to do anything on imputed interest. If they are not willing to take the compromise, I am certain they are not willing to go for repeal. I am not certain about the administration, which supports the compromise. We have been advised by Treasury Secretary Don Regan that they now support the compromise, moving from the point of nonopposition. They have opposed repeal and have indicated such.

Mr. President, if we really want to do something before we adjourn today or tomorrow, then I believe the one viable option is the compromise which we adopted here last night. We can quarrel that it does not go far enough or that repeal is better.

Also, though I think it is not a factor, this was in the President's budget and it does close a lot of abuses. We have heard the President criticized by his opponent for loopholes. Here is the President trying to close some loopholes and pick up some $2.2 billion over the next 3 years.

If we repeal what we did just a few months ago, then we have reopened the loopholes. Many of the tax shelter people will continue the abuses and the American people are going to wonder why we do not do something in Congress to tighten up some of these programs.

Mr. President, I will have some examples I will refer to later on for anybody who is not convinced there are abuses out there. Even those in the business recognize there are abuses.

Mr. President, as long as the law is not changed, I do not fault anybody for taking advantage of the law. But we are talking about a couple of billion dollars over the next 3 years. If we adopt repeal, we add that to the deficit.

Mr. President, I happen to believe the deficit is a problem. It is going to be an even greater problem in the years to come. I do not think we should add to it.

Mr. President, that does not mean that next year, after the compromise has been adopted, we cannot come back and if we have made a mistake, if we have gone too far, or if we have not gone far enough, obviously the Congress will be in session and I assume these groups, even though they indicate they do not see any change during the next Congress, if they find some mistakes or if we made a mistake, or have not dealt in good faith, they ought to come back and suggest

to Senator SYMMS, myself, and any other Senator that we need to make corrections.

Mr. President, I would conclude my remarks at this point, before the Senator from Idaho offers his amendment, by saying that I believe we have done a pretty good job. I want to congratulate Senators on both sides of the aisle. The Senator from Montana [Mr. MELCHER] has been like a bulldog in his efforts to have this changed. We have accommodated most of his concerns. The Senator from Iowa [Mr. JEPSEN] has been trailing me around for about 2 weeks, trying to figure out how we can resolve what he considers to be a serious problem in his State. Many other Senators on both sides of the aisle have had the same diligence.

Senator DURENBERGER was one of the first to recognize some of the shortcomings in the law that was passed. When Senator DURENBERGER wrote a "Dear Colleague" letter and when Senator MELCHER wrote a "Dear Colleague" letter, saying we had some problems with this new law, what we did was put the two "Dear Colleague" letters side by side and started from the Durenberger and Melcher letters and tried to build something we thought we could sell to the Congress and still protect the American taxpayer from abusive tax shelters.

Mr. President, we believe we have done it. There may be some who think we have gone too far in the compromise. I do not share that view. I think it is a good result.

It is my view, Mr. President, that all of us who want to do something will do what we can to encourage our colleagues on the House side to help push for a compromise before we leave here late tonight or tomorrow.

Mr. President, I yield the floor.

Mr. BUMPERS. Mr. President, the imputed interest provisions of the Deficit Reduction Act of 1984 were a mistake, and they should be repealed. These provisions were part of the broader effort to close loopholes and end abuses of the tax laws, but, in this instance, the effort went too far.

In an era of high interest rates, many Americans are effectively forced to finance the sale of homes, land, farms, and businesses by accepting the buyer's note to pay. They are quite willing to accept an interest rate which is comparable to what they are receiving on their savings.

They are not in the business of lending money, and they should not be compared to people who are. The imputed interest provisions, however, do just that. They assume that the seller's main interest is in making money off the proceeds, just like a banker, but his main interest is in selling the property for a fair price. The imputed interest provisions should take that into consideration, but they do not.

I realize that there is potential for abuse, but we must take a realistic look at that possibility. It is possible for a seller to increase the selling price of his property and accept a lower interest rate in exchange. Consequently, he will pay capital gains rates on the higher sales price rather than ordinary income tax rates on the interest which was reduced. This is clearly a tax benefit for the seller, but consider the tax aspects of the buyer's side of the transaction. Because he pays a lower interest rate, his interest deductions will be lower. Thus, the abuse is largely self-correcting, with the only loss to the Treasury being in the differing tax brackets of the buyer and seller. On the other hand, we are unrealistically and unduly imposing upon both parties.

In my State there is a further possible complication, the State usury laws, which tie the allowable interest rate to the discount rate. The current State limit for commercial loans is 14 percent, so if the Treasury rate applicable under the new rules rise to 12.75 percent, only slightly above current rates, Arkansans would be forced to break State usury ceilings or suffer the tax consequences. The modest revenue increases that may be realized do not justify this interference with State law. We should repeal the new provisions and reestablish the old rule which has served us well.

Mr. CRANSTON. Mr. President, I rise in support of the amendment offered by the Senator from Idaho [Mr. SYMMS] to repeal the original issue discount and imputed interest rate provisions of the 1984 Tax Act.

A significant number of real estate transactions of all kinds in California involve financing by the seller. Interest rates today are beyond the means of most home buyers, and I think it is a mistake for the IRS to dictate what interest rate sellers and buyers must agree to in arm's-length dealings. Something is amiss when business deals must be structured for the maximum advantage of the tax collector. The income tax clearly is not the best way to tax business dealings—if we need a tax on business deals let's find one, but not concoct elaborate laws with which to trap the unwary.

Last night in the Senate I voted for the compromise worked out by Senator DOLE and representatives of the real estate industry because that compromise represents the best chance for action at this late time in the life of the 98th Congress.

I will, however, also vote for the proposal by Senator SYMMS to repeal the imputed interest rate provisions should the Senate have that opportunity. I hope we will.

AMENDMENT NO. 7091 TO AMENDMENT NO. 7072

Mr. SYMMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Idaho [Mr. SYMMS] proposes an amendment numbered 7091 to amendment No. 7072.

Mr. SYMMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard.

The bill clerk read as follows:

On page , line , insert the following:

In the amendment offered by the Senator from Massachusetts, strike on page 5, beginning with line 2, all through the end of the amendment as amended and insert in lieu thereof:

(b)(1) Notwithstanding any other provision of law, the head of each Agency, or his/her designated subordinates, of the Federal Government shall take such actions as may be necessary to ensure that such agency is prepared to carry out promptly any provisions of law enacted pursuant to this section that require action to be taken by such agency. Actions taken by an agency pursuant to this paragraph shall include the development of contingency plans for carrying out the programs, projects, and activities of such agency in the event that the amounts available for obligation and expenditure by such agency during fiscal year 1986 are reduced pursuant to this section.

(2) For purposes of this subsection, the term "agency" has the meaning given to such term in section 101 of title 31, United States Code.

SEC. . REPEAL CHANGES TO SECTION 483 BY TAX REFORM ACT OF 1984.

(a) IN GENERAL.—Section 1274 of the Internal Revenue Code of 1954 (relating to determination of issue price in the case of certain debt instruments issued for property) is hereby repealed.

(b) CONFORMING AMENDMENT.—Subsection (b) of section 41 of the Tax Reform Act of 1984 (relating to amendment of section 483) is hereby repealed and the Internal Revenue Code of 1954 shall be applied and administered as if such subsection (b) (and the amendment made by such subsection) had not been enacted.

(c) Paragraph (4) of section 1273(b) of such Code is amended to read as follows:

"(4) OTHER CASES.—Except in any case to which paragraph (1), (2), or (3) of this subsection applies, the issue price of a debt instrument which is issued for property shall be the stated redemption price at maturity.".

(d) EFFECTIVE DATE.—June 1, 1984.

Mr. SYMMS. Mr. President, shortly after the passage of the Deficit Reduction Act of 1984, I introduced S. 2930, legislation to repeal the imputed interest rate and OID [original issue discount] provisions that were incorporated in the so-called Deficit Reduction Act of 1984.

The original issue discount and imputed interest rules of the tax law govern the timing of interest payment inclusions in and deductions from income and effectively set a minimum interest rate to be used in the sale of property involving a debt instrument

or deferred payments. The Deficit Reduction Act of 1984 changed these rules because of concerns that these rules were ineffective in preventing perceived tax shelter abuses. However, the changes that were incorporated in last summer's bill were drastic and went far beyond their alleged original purpose of curbing tax abuses. These new rules will substantially change and most likely kill legitimate, economic, non-tax-motivated seller financed transactions not only in the real estate industry, but in every business sector in the country.

I would daresay that most of the Members of this body did not realize these provisions were being enacted last summer, and probably to this day do not understand the scope of the provisions. I would venture to say that most Members did not realize that they voted to limit the mortgage interest deduction in that bill.

Section 1275(b)(1) of the code says that where seller financing of personal property occurs—for example, a personal residence, a home—and if imputed interest arises, the buyer cannot deduct the imputed interest on the mortgage he will be deemed to be paying to his seller. The seller will be taxed on additional interest income, but the buyer's deduction is not just deferred; it will never be allowed. Until the 1984 act, the buyer could deduct imputed interest. This new rule thus disallows part of the deduction for home mortgage interest. This is only one example of all of the unknown factors that the enactment of the provision has on our economy.

Mr. President, the Deficit Reduction Act of 1984 was a bill that was essentially written by staff.

Most of the Members of this body could not explain what was in that bill if their life depended on it.

I do not say that with any criticism of my colleagues, Mr. President, but it was 1,300 pages and it looked like IRS regulations rather than legislation that might have been passed by this body.

While there may have been part of that bill that should have been enacted, I know for a fact that the imputed interest and OID rule provisions should not have been passed by the Congress.

The able chairman of the Senate Finance Committee has attempted to put together a compromise package in an effort to thwart the passage of the amendment to repeal these provisions. I would dare say that if this body votes to implement that compromise package, we would again be voting on a proposal about which we know nothing. The compromise is extremely complex. In fact, it is 19 pages long. There are serious questions surrounding the technicalities of the proposal. The compromise, in my opinion, simply will create new loopholes and force taxpayers to go through unbelievable contortions in order to possibly qualify for some perceived benefit. In short, Mr. President, we will again be voting to implement legislation which will have a tremendous impact on viable business transactions without knowing what we are doing.

In light of the fact that many Members of this body want to simplify the Code, I believe that on those grounds alone we should vote down this proposal.

If there are abuses in this area of the law, I believe the Senate Finance Committee should properly investigate those abuses next year in a responsible fashion.

As a member of that committee, I would gladly participate in any effort to review the perceived abuses and support legislation to curb those abuses. But, I would say to my colleagues that the compromise will simply create new abuses, add extreme complexity to the code, and, in my opinion, kill off business activity in the economy.

Mr. President, I might just also say that while the Washington lobbyists inside the beltway have signed off on this compromise my constituents are still supporting repeal. These D.C. lobbyists have sent the word out to all the State associations to call and wire their Senators that they are for this compromise because if they do not get the compromise, they will get nothing. What has happened? I just received a phone call in my office from Kent Burkhardt from the Idaho Association of Homebuilders. He called to say they want repeal, they do not want a 19-page complex compromise.

As far as I am concerned, the lobbyists who agreed to this compromise sold their members a bill of goods, and I would bet that if the compromise is enacted, they are not going to take the blame for its complexity and unworkability. They are going to blame the Congress and say, that is the best thing they could get.

I am saying to my colleagues that there is a simple thing that could be done, and it could be done early next year when this matter can be rationally reviewed. That is to pass three simple changes in the Tax Code. One would be to force all taxpayers in the transaction to go to a cash method of accounting for the transaction only; second, go from simple interest to compound interest; and third, increase the safe harbor imputed rate from the current 9 to 10 percent, to 10 to 11 percent, or even 11 to 12 percent. That would solve the problem of the alleged abuses.

I want to go ahead and talk a little bit about the compromise. I compliment the chairman. I know he worked long and hard to work out some kind of compromise. I suppose that is his job as chairman of the committee. But I believe that the inside-the-beltway lobbyists do a great disservice to the thousands of members of their associations around the United States that are begging for simplicity in the U.S. Tax Code.

We held hearings in the Finance Committee for 3, or 4, or 5 days this year on ways to simplify the Tax Code. We had the Senator from Oregon [Mr. HATFIELD], the Senator from Indiana [Mr. QUAYLE], Representative KEMP, Senator BRADLEY, and others talking about we have an overcomplicated Tax Code, we need to simplify it. We had expert witnesses testifying to that effect but here we go again, as the President would say, complicating the Tax Code with another round of intrusive, intervening set of complex rules which will only end up having all of the people in the small business community who do the books for the small businesses, that provide most of the jobs in this country, come to us when we go to the Rotary Club, or go to the Kiwanis Club, or the local chamber of commerce, and say "What in the world is going on in Washington? Why can't you simply say that you made a mistake in the summer of 1984, repeal it, and then go back on a more rational basis and address just this issue and fix it?"

Mr. President, this country has gotten along from 1964 through 1984 with the previous imputed interest rate and OID rules in the law. There may be some abuses, but we can address those minimal abuses next year in a rationale manner, without tormenting every single legitimate taxpayer in the country. This is one Senator who is not going to go along with the beltway compromise. I do not care if the local lobbyists in Washington have sold out for what is perceived to be a compromise. Those beltway bandits agreed to this compromise before seeing the legislative language, and as a consequence, were not really able to ascertain the consequences of their actions.

The Senate Finance Committee staff compromise does not solve the problems that the new original issue discount and imputed interest rules would create for the real estate industry if the rules go into effect in January.

A number of the problems that the compromise does not solve have been identified over the weekend. More problems are likely to be buried in this most complicated and opaque 19 pages of tax law.

It appears that this compromise was imposed on some segments of the real estate industry because of their concern that the new rules might go into effect without at least some improvement.

I have to say that is understandable, Mr. President. I would agree with the chairman of the Finance Committee that it would be undesirable to try to impose the rules that were in the summer of 1984 act. This is understandable. But Congress can and must do better than the staff compromise. At this point, the best solution is repeal of the new rules. This would enable Congress to start with a clean slate next year and devise more justifiable, equitable, and simple legislation.

As a matter of fact, I see the distinguished Senator from Minnesota [Mr. DURENBERGER] on the floor. He has a more simple solution to this problem than what is proposed and what has now been made an amendment to this debt increase bill by the Senate yesterday.

The following are a few of the problems that either are not solved by the Finance Committee staff compromise or created by it. I want all my colleagues to realize some of the problems with the compromise, so I am going to go ahead and read through some of these problems.

No. 1. Failure to remove the adverse impact on legitimate non-tax-motivated, seller financed transactions. The problem: The Senate Finance Committee staff compromise does not significantly reduce the effective prohibition against seller-financed transactions caused by the new rules in areas such as low-income housing, office buildings, and shopping centers, large farms, small businesses larger than $1 million, vacation homes that are rented, and so forth.

In addition, the staff compromise unjustifiably discriminates between different segments of the industry in amounts of relief provided by setting a test equal to 80 percent of the applicable Federal rate for transactions under $4 million and a test rate equal to 100 percent of the applicable Federal rate for other transactions. This discrimination will cause investment decisions to be based on tax-motivated rather than business-motivated reasons.

Point 2. Failure to deal equitably with assumptions and wraparounds. The problem: The compromise fails to recognize the importance to the economy of assumptions and wraparound mortgages in times of high interest rates.

You cannot view a sale of real property with an assumed or wraparound mortgage as the sale of two separable assets, a financial asset, the assumable mortgage, and a physical asset, the real estate, for the following reasons:

First, these assets are legally inseparable. You cannot sell the mortgage without selling the property—it is not a negotiable instrument;

Second, the assets are logically inseparable. The loan was only made at the rate it carries because it is secured by the property;

Third, the assets are functionally inseparable. The financing is an integral part of the value of the property. It is one of the bundle of assets of real property, which also includes the physical "bricks and mortar," the location of the property, and its stream of rental payments;

The availability of assumptions and wraparound mortgages at reasonable interest rates is important to the economy at times of high market rates of interest.

Unlike seller financing generally, assumptions and wraparounds do not involve the tailoring of payment terms for tax purposes because the terms are not arranged between the buyer and seller.

Sales occur in a free market when both buyer and seller are ready, willing, and able to deal. Other than in foreclosure situations, if buyers cannot afford to purchase a property using commercially available financing at prices that sellers are willing to accept, there is no sale, and there is no revenue to the Treasury from the transaction. This "lock in" effect is the reason that the Treasury analysis fails to account for revenue impact properly and predicts revenue increases from the new rules that simply cannot occur. If the seller is unable to get a price that is more advantgeous than holding the property, there is no sale.

The seller is in a different posture from most commercial lenders in that he does not have to go out into the current money market and borrow at high rates, he already had arranged the financing at a time when rates were lower. The seller is, therefore, not engaged in arbitrating the interest rates. The financing that he has on his property is one of his assets. It provides some measure of certainty that he can sell the property if interest rates go up. The seller, when he offers seller financing, is merely deciding that he would rather take his equity out over time rather than initially.

The assumption of a below market rate mortgage, or its use in a wraparound, is no different from a commercial lender loaning money at a rate below other lenders because he borrowed the money before rates increased or borrowed someplace where rates are lower. Such a transaction is not evidence of any improper setting of basis in the companion property transaction, and neither is the usual seller financing transaction.

The impact of increasing interest rates on commercial property varies and is not a 1-to-1 exchange of interest rates for basis. If the seller has short-term leases, or if the leases have sufficient passthroughs, the value of his income-producing property increases when interest rates increase. This is because it costs more to build a competing new building, and the rents charged in such a building must be higher to cover the increased debt cost. Therefore, the owner of the existing building can raise his rents and increase his profit and still be competitive. If the property owner has only long-term leases, he cannot benefit from increasing rates. His property then will be more difficult to sell without seller financing because potential buyers will have to consider higher interest costs with a fixed stream of rental payments.

If interest rates fall, and if the existing property owner has short-term leases and cannot refinance at lower rates without cost, the value of his property decreases. This is because his tenants will move out unless he reduces his rents, and this would reduce his profit as long as he is forced to pay higher interest payments than his competitors. This is a risk that the borrower under a long-term debt bears. By preventing him from benefiting from an increase in interest rates, by effectively prohibiting assumptions and wraparounds, the new rules remove a possibility of benefit in an increase interest rate situation, but retain the risk of loss in a declining interest rate situation.

In the wraparound situation, the seller generally lends his money at the market rate. In such cases, the part of the wraparound based on the underlying obligation should not be counted in complying with the new rules.

The application of the OID rules to assumptions creates special problems where variable rate mortgages are involved. In such situations, it is often impossible to determine whether the test rate will be met in the future. Existing long-term financing at lower rates provides this reduction in uncertainty. The new rules and the compromise effectively remove this benefit while leaving the risk of long-term financing. This is the risk that interest rates will fall and the property owner may be unable to repay his relatively high interest rate loan.

What I am saying is that despite the tax theorists who will tell you that everybody will mark down the value of their real estate or business so that it will be sold, the reality is that the compromise will probably slow down, if not entirely close, the market. It would certainly have a negative, detrimental effect on commercial activity in the market. So I doubt that the tax theorists at Treasury and the IRS and the respective staffs around Capitol Hill are going to raise $2 billion for the Treasury. In reality what happens is actions of this nature close the market and you have no revenue to the Treasury. That is really what we are talking about, Mr. President.

Another problem: failure to provide a real safe harbor. The problem: the compromise purports to establish objective tests for determining whether

transactions would be subject to imputed interest penalties for the new rules. By adding as a potentially abusive situation, the mere presence of deferred interest, the compromise would permit the Internal Revenue Service to recast a transaction even if the test rate is met for real estate above $4 million. This test permits 20 percent of the interest to be deferred if the test rate of 100 percent of the applicable Federal rate is met. Under the proposed staff compromise, transactions meeting this test would still have no "safe harbor." It is no wonder that segments of the industry with such transactions could not agree to a compromise which provides no certainty for them and which therefore would effectively prohibit such transactions.

This may be, Mr. President, the reason why the U.S. Chamber of Commerce has not signed on to this compromise.

Mr. DECONCINI. Will the Senator yield?

Mr. SYMMS. Without losing my right to the floor——

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. The Senator has a right to yield for a question.

Mr. SYMMS. I yield for a question without losing my right to the floor.

Mr. DECONCINI. I thank the Senator.

Before I put a question to the Senator from Idaho, I appreciate his efforts, because I think he is moving in the right direction. But the Senator just expressed an opinion, or a view—a fact, I hope—that the Chamber of Commerce has not come out in support of the compromise that was voted yesterday. Is that correct? I have not heard.

Mr. SYMMS. That is my understanding. I think it would probably be advisable if we could confirm that. It is my understanding that the Chamber of Commerce has not endorsed the compromise. Some people have endorsed the compromise——

Mr. DECONCINI. If the Senator will yield for another question, is it safe to say that in the Senator's opinion the business community really would like to repeal this whole thing, go back to the way it used to be; it worked very well for businesses, small farms; it was not abusive? Is that the sentiment of the Senator?

Mr. SYMMS. The Senator from Arizona is stating the case better than this Senator could state it. That is what I am trying to say.

In a general sense, if we get outside the beltway, get away from the Washington, DC lobbyists, who are paid to try to make it look like they have accomplished something for the thousands of members who pay their salaries, people would say, "For Heaven's sake, why did Congress change a law that has been in effect since 1964 which has worked reasonably well."

There may be some abuses that people can point to that I think could be fixed. As I suggested, there are some ways we can fix it very simply. It has worked for 20 years. Now, all of a sudden, we are changing it. We changed it last summer. Most Senators did not realize how dramatic this was going to be in regard to transactions involving real estate, small business, farmers, commercial property, housing, because seller financing is a very vital part of not only real estate but all business activity in a high interest market.

Now, all I am saying is let us repeal it and go back to where we were July 1, 1984, and put it on the agenda for the Finance Committee early in 1985.

Mr. DECONCINI. I thank the Senator from Idaho. I wish the Senator from Ohio would pay mind for just a minute.

I ask the Senator from Idaho to renew his unanimous-consent request that he might yield to me for 3 or 4 minutes without losing his right to the floor. I would like to make a statement in support of the Senator's amendment. I realize the Senator from Ohio is objecting, but if he will, I would ask the Senator from Idaho to again ask unanimous consent to yield to me for not more than 5 minutes without losing his right to the floor.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. SYMMS. I do not want to lose my rights. I ask unanimous consent I get the floor back in 5 minutes.

The PRESIDING OFFICER. Is there objection?

The Chair hears none and it is so ordered.

Mr. DECONCINI. Mr. President, just to clarify, the Senator from Idaho has not lost his right to the floor, although he has permitted me to make my statement.

I rise in support of the amendment of the Senator from Idaho. Just last week we were on different sides on an issue that we were really on the same side of, and today I find myself supporting wholeheartedly the Senator's effort to repeal the imputed interest rate provision.

It seems that every major tax bill we pass in the Senate contains at least one provision so offensive that within 6 months this Congress has to repeal it. You might have thought that this Congress would have learned its lesson following the withholding debacle of a couple of years ago. The imputed interest provision has many parallels to that situation. It is a case of this administration attacking the American middle class through the Tax Code. As my colleagues know, I am the original Senate proponent of a flat-rate tax, one that will be fair to all Americans. But until that day comes, I will continue to fight to prevent outrages such as this.

The most incredible part of this whole debacle is that the new imputed interest provisions could results in no net gain to the Treasury. Original estimates by Treasury indicated that approximately $2.2 billion would be brought into the U.S. coffers over the next 3 years. However, this is a static analysis and a study commissioned by the National Association of Realtors indicates that Treasury could lose $2 billion over that same period.

I have heard the old expression, Mr. President, that figures never lie, but liars figure, so I am willing to concede that the true figure probably lies somewhere between these two extremes. I prefer to support the position that the realtors have taken, that there will not be that kind of loss. If that is the case, that would make the impact on the Treasury nonexistent. In the meantime, we will decimate the housing industry and cause serious financial difficulty for millions of Americans.

I urge my colleagues to join the Senator from Idaho.

At this time, I thank the Senator from Montana [Mr. MELCHER] for his valiant fight in moving in the direction that he did yesterday and the last couple of days. This is an important issue. There is always a time for compromise, and I realize the importance of that; but there is also a time to stand up for what is fair and right, and the Senator from Idaho is right in his position, and I compliment him for it.

Mr. SYMMS. I thank the distinguished Senator from Arizona. I appreciate his comments and support, as well as the support I have received from the Senator from Montana and the Senator from Minnesota in this field. As a matter of fact, 52 Senators, Republicans and Democrats, have cosponsored the position that is in the amendment before the Senate at the present time.

Mr. President, I will continue with some of the points I want to make before I summarize, and I will ask some questions of the committee chairman.

FAILURE TO DEAL WITH OTHER SERIOUS PROBLEMS

The compromise completely fails to deal with other serious problems of implementation of the new rules. For example, how are variable rate debt instruments handled? In such situations the parties cannot know when the transaction is made what the interest rates will be. These instruments play an increasingly important role in real estate transactions. The failure of the new rules or the staff compromise to deal with this issue will be a major

impediment to their use unless and until regulations are issued, which may not be for many months or years.

Another example is the failure to deal with the common occurrence of loan prepayments. What will happen if the buyer prepays the loan several years after a sale where, because of a foreclosure situation, the buyer had to sell with financing below the test rate and interest consequently was imputed and the basis of the property changed? In such a case, the seller would likely have a long term capital loss on the sale that he could not offset against the substantial income he could be deemed to get upon prepayment because of the $3,000 per year limitation on such offsets. This outcome would be unjustifiable and unfair, and punishes the risk takers of our society.

Yesterday, in listening to the discussion about whether or not we should vote for the Jepsen-Dole compromise and the Melcher proposal—and this Senator voted for both, because I suppose anything is better than nothing—I heard Senators on the floor, in private conversation, state that they were supporting the compromise because they thought it was better than prior law. They thought that the imputed rate of 9 percent would be repealed, entirely, for farms. In fact, farms will be worse off under the Jepsen-Dole compromise because they will go from 9 percent simple interest to 9 percent compound interest, which will be compounded semiannually. They will be allowed to use the cash method of accounting, but they were allowed to use that method of accounting prior to the passage of the Deficit Reduction Act of 1984.

I want to go through a few questions and make a point or two. I see that the distinguished chairman of the Finance Committee is not on the floor, and I would not expect that he or any other Senator would necessarily be able to answer all these questions.

Mr. MELCHER. Mr. President, will the Senator yield, without losing his right to the floor?

Mr. SYMMS. I yield to the Senator from Montana for a question, without losing my right to the floor.

Mr. MELCHER. For a statement.

Mr. SYMMS. For a statement.

Mr. MELCHER. I thank the Senator.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, at least we have taken the first step to get into position to correct the bad provisions on imputed interest rates.

We cannot forget the history of how we got to where we are now. The bad provisions that were put into the law on imputed interest rates went into law in June, with the 1984 tax bill. The Senate agreed to that. In the technical amendments of that bill, some of the poor imputed interest rate provisions were blunted by the amendment of the chairman of the Finance Committee, Senator DOLE. As part of that event, my efforts on June 29 to further correct the ill-advised provisions were thwarted by a successful tabling motion by Chairman DOLE.

While I have no doubt that the vast majority of Congress wants corrections in the remaining bad sections on imputed interest before adjournment, three points must be observed before that can be obtained.

First, seller-financed property sales are a necessity for many types of properties and many different kinds of situations. These are property sales that cannot be made through commercial lending institutions because they cannot be made at today's high interest rate. Knowing that sellers finance part or all of the sales at a lower rate of interest. These sales are not made to gain tax breaks, but are made because the seller needs to sell and the buyer cannot buy the property unless the interest rates are lower. Since the conditions of sale and the circumstances vary greatly, any restrictions imposed with respect to imputed interest rates must be thoroughly understood and evaluated by experienced accountants and tax lawyers before we adopt the modifications into law.

Until we were able to force this issue onto the Senate floor by calling for the regular order yesterday, so that I could offer an amendment to the debt ceiling bill, we had been unable to review the final language that Chairman DOLE, through Senator JEPSEN, is offering as the solution. While it has been said by the Washington lobbyists representing the realtors that I had been given a copy of this language several days ago, I must point out that that is only partially true, since each new copy of Chairman DOLE's proposal has been modified from day to day; and this latest and last version provided yesterday had grown from the original 15 pages to 21 pages in just 7 days.

Now that we have it before us for thorough examination, I have asked accountants and tax lawyers who work on various types of these seller-financed property sales to examine this language and see what corrections may be needed. I recommend to my colleagues that they do likewise. For my part, at least two necessary corrections are immediately apparent.

First, in this proposal, assumable loans cannot be made part of the future seller-financed property sales, and I find that highly objectionable.

Second, the 19 pages or the 21 pages of new language to correct the bad provisions on imputed interest rates are complicated and will likely lead to many additional pages of Internal Revenue Service regulations drawn to this proposal with respect to our intention.

Additionally, we must hew to the goal of making the proper corrections now before adjournment because leaving the problem to continue beyond this Congress will permit bad provisions to go into effect on January 1, which will thwart seller-financed property sales causing enough disruption in property sales which will jeopardize economic recovery.

Additionally, the Treasury Department estimates of revenue losses are based on their estimates of seller-financed property sales that have occurred during the past several years.

If the new provisions on imputed interest enacted into the 1984 tax bill would go into effect on January 1, there would probably be very few property sales made where the seller financed the sale.

The types of sales that we are dealing with are those sales by a homeowner or a homebuilder, a farmer or a rancher, small business or developer where in order to make the property sale a rate of interest lower than commercial rate has to be offered to attract the buyer on the basis of seller financing at lower rates of interest.

Place yourself in the shoes of the buyer and tell me whether Congress and the Internal Revenue Service should impose the minimum interest rate that you must pay. Or place yourself in the shoes of the property seller and tell me, should Congress and the IRS impose an interest rate that will not find a buyer, and if it did find a buyer, it means that you would have to pay income taxes on interest you did not receive.

This is too important an issue to approach in a haphazard or careless manner. We need to do the job right, and this means checking with the people involved to arrive at fairness and equity.

For the purpose of simplicity, the amendment that is before us now offered by the junior Senator from Idaho, an amendment that I shall vote for, is an amendment that has the beauty of simplicity.

It repeals those provisions on imputed interest rates in the 1984 tax bill. It takes us back to where we were in June of this year before that tax bill was passed.

Sellers and buyers and their agents know what the ground rules are under those provisions for seller financing. That is a distinct advantage. There is not any doubt, their tax accountants and their tax lawyers understand perfectly what the law was at that time. The disadvantage of the new provisions has been who knows what all it means until tax accountants and lawyers work with it this coming year? That is the most telling argument for the amendment before us right now.

Everybody would know what the rules are and everybody could contin-

ue on that basis and we would not have any blockage of economic recovery, such as we will have if we leave intact some of the provisions enacted in the 1984 Tax Act which absolutely prohibit any opportunity for seller-financed property sales.

The amendment that we have accepted in lieu of the language of the compromise language that I offer is very complicated containing 21 pages of text and certainly invite a host of new regulations by the Internal Revenue Service, and until we are sure of what those would be, we are still pretty much in the dark on whether we corrected the problem.

There are many reasons why we should consider this amendment and vote for it.

First, it is simple. Repeal simply turns the clock back to the period before the signing of the 1984 Tax Act. Sellers, buyers and their agents know what the ground rules are for sellers financing. Other approaches, in particular the Dole compromise, are agonizingly complicated. The Dole legislation itself runs 21 pages, and will create many more pages of new regulations and redtape for buyers and sellers of property. The complexity of the proposal, including two tiers of floating interest rates will result in many taxpayer mistakes and will cause taxpayers to suffer uncalled for tax penalties when they thought they were acting in good faith. At its worst, the complexity of the Dole approach will be enough in itself to discourage sellers from providing seller financing and will result in fewer property sales and a downturn in the housing sector of the economy.

Second, the need for new imputed interest rates and original issue discount rules has never been shown. Since 1979 I have challenged the Internal Revenue Service to do a study and submit it to Congress providing evidence of tax abuse in seller financing. They have never done this. When you ask why we need higher imputed interest rates, the Treasury responds that there is the potential for tax abuse in seller financing because the seller might write a contract so as to reduce interest income and increase capital gains. Where's the proof that this is happening? Neither Treasury nor the IRS has provided any. The fact is that the overwhelming number of people use seller financing at below market interest rates to help sell the property, not avoid taxes.

Third, the purpose of imputed interest rate rules is to stop tax abuse, and the current laws do that. The current laws on imputed interest rates set a minimum interest rate for deed for contract type sales at 9 percent. If a contract is written with lower interest rates, the rate is imputed by the IRS at 10 percent. This sets a floor for interest rates and avoids interest free or very low-interest rate loans that might legitimately be considered tax abuse actions. Stopping such tax abuse ought to be our goal, not trying to dictate that sellers use only market rate financing and then go on to tell them what the market rate has to be. This is the worst kind of government intervention in the free market.

Fourth, the new imputed interest rate rules are unfair and bad tax policy. Here are some examples:

A. BUYERS WILL LOSE LEGITIMATE INTEREST DEDUCTIONS

Section 1275 of the new tax law provides for the first time that if imputed interest rates are applied to the seller in a seller-financed mortgage that the buyer will not be allowed to deduct, as interest paid, any more than is written in the contract. This amounts to nothing less than a partial elimination of the mortgage interest deduction. Deductions for interest paid on mortgages is a basic part of our tax laws. A major policy change such as reducing or eliminating the mortgage interest deduction ought to be fully studied and debated in Congress, not included in the fine print of the 1,300-page tax bill. Buyers will for the first time lose their right to deduct the full cost of interest paid on mortgages under the changes made in the 1984 Tax Act.

B. LOAN ASSUMPTIONS

A Treasury official was quoted in a September 15 Washington Post article as saying that, "Treasury interprets the 1984 Tax Act to give them authority to impose the new imputed interest rate rules and original discount rules to assumptions of mortgages on real property." First, the right for a seller and buyer of a piece of property to arrange for the assumption of an existing mortgage is a basic part of our housing economy and has been for many years. Second, there was no language in either the Senate tax bill or the House tax bill, to the best of my knowledge, that provided this authority. The only mention of loan assumptions was committee report language. I don't believe that Members of the Senate intended to make loan assumptions subject to rules that will dictate mandatory higher interest rates.

C. THE NEW LAW TAXES "PHANTOM" INCOME

Provisions in the new imputed interest rates rules unfairly tax some sellers for income that has not been received. The rules setting out the requirement for accrual accounting in the new law actually requires that some sellers, particularly builders of new homes, to pay taxes on interest income before it is received in the sale of principal residences. There is not mismatching of deductions and income between the buyer and the seller in this situation because the buyers of a principal residence cannot depreciate it or take investment tax credits. Nor can homebuilders qualify for capital gains treatment of their income under the Tax Code. Rather than remedying a tax inequity, the new law creates a tax inequity because the seller will be taxed on income that has not been received while the buyer will not be allowed a deduction at all for payments made to the seller.

Fifth, undiscovered problems. One of the major problems with the imputed interest rate provisions and the new original issue discount rules is that they are so complicated and far reaching that we still don't know what all of the negative impact on housing of these tax changes will be. Almost, every time a tax lawyer takes another look at this legislation, a new set of problems is found. These provisions should be repealed before they go into effect on January 1, 1985, and then they can be looked at very carefully next year. There is no good reason to let them go into effect until the Senate is satisfied that it understands the full impact of these changes.

Sixth, similarity to the problems with withholding taxes on interest and dividends. The problems created by these new imputed interest rate provisions could have been avoided if the Treasury had concentrated on authority to catch tax cheaters rather than push for a law that penalizes the overwhelming number of ordinary people who pay the taxes they owe in order to catch the few that may be cheating. This wouldn't sell when it came to withholding on interest and dividends and it shouldn't on imputed interest rates.

Seventh, good tax and economic policy, not merely raising revenue for Treasury should be the goal of the Senate. It's not difficult to raise a lot of new revenue. It was done in both the 1982 and 1984 tax bills. The Treasury and IRS have files full of proposals to raise revenues. But, the Senate should not go along with proposals that are clearly bad tax and economic policy just to meet some arbitrary target for new revenue. This just gets us bad tax laws that must sooner or later be repealed.

Mr. SYMMS. Mr. President, if the Senator will yield, I wish to pose some questions. The distinguished chairman of the Finance Committee is here now.

Mr. MELCHER. I yield.

Mr. SYMMS. Mr. President, I thank my colleague from Montana.

I think he makes some good points for simplicity. I am going to propose a few questions here and maybe some of them the chairman of the Finance Committee would care to answer. If he does not care to answer, I will ask the questions simply so my colleagues will recognize the complications that they are going to be asked to answer if we do not simply go back to June 1984 and then start over with this.

For example, does the $4 million exception count all debts included in the sale, so that the sale with $5 million total debt—and only $4 million seller financing—does not qualify? That is the kind of a question that is going to be asked. I would say how will that be treated? I pose that question to my colleagues.

Another question: what happens if the term of the seller financing is more than 12 years? What are we going to do? How are balloon payments going to be treated? Does this exemption apply to all investment property so that the seller of a duplex is expected to be as sophisticated as a seller of an apartment complex?

These are the kind of questions that I think are going to be posed. I know it is difficult to have answers for questions like that. But those surely as night follows day are the kind of questions that will come up as a result of passage of this legislation.

I see the distinguished chairman and I am not trying to cause any problems for the distinguished chairman here only to point out that the reality of this is that the Washington lobbyists, the so-called experts that signed off on this thing in the heat of the night the other day had not even read the 19 pages of the legislation when they agreed to the compromise. Everybody has to survive and everybody has to do what they have to do and I respect them for that. But I am just stating a fact here that every time we pass another tax law here in Washington, we make it more complicated for the very people who we represent.

I am sure that the Senator from Ohio or if not he, someone else is going to get up and talk about some abuses that take place in the current law that has been on the books since 1964.

All I would say to that is there may be a few abuses but I think that we have to recognize that 99.9 percent of the transactions in the United States that take place in the sale of property, equipment, commercial, farms, residence and so forth are not tax motivated. They are simply businessmen, farmers, et cetera who are trying to do business, trying to sell their home, trying to participate in our society. If we as Members of this body decide to stay with the compromise and not support repeal, I just wish us all luck in trying to explain to our constituents how this law is going to work.

The last law that passed as one Member of the Senate I will be happy to say I could not explain it, and I say that most Senators in here could not explain what happened last summer. I just think that is not unusual when you pass a 1,300-page piece of complicated tax legislation, I would like to pose another question. Generally loans made before October 15, 1984, can be assumed by the first buyer and subsequent buyers without any imputed interest to the buyer or seller. Only the buyer, not the seller, has imputed interest if he assumes loans made after October 15, including loans made under the exemptions for farms, homes, businesses, and commercial property. There is not imputed interest if the debt cannot be repaid without penalty, but most States give the buyers the right to prepay after 3 years.

The question is, why are future assumptions subject to imputed interest? Why would that be? Why is that the case? If the loans are made after October 15 cannot be assumed freely what are or will be the imputed interest rate rules to buyers and sellers? There is another problem, in order to qualify for both the 9-percent exemption and the real estate exemption both the seller and the buyer must report the transaction as cash basis taxpayers.

What if one of the parties is on an accrual method? Must he or she change to a cash method for all transactions and get IRS approval?

I would say that is a question the distinguished chairman may wish to address; maybe he does not.

What happens if one party does not report on the cash method? What is the effect on the part and what is the effect on the other party? These are the kinds of questions that need to be answered.

How does the seller know if his sale qualifies for exceptions? What does he do, call a lawyer, accountant, or the IRS in order to sell something? I mean, we are viewing this—and the tax theorists at the Treasury—God love them; I hope he does, because it makes it very difficult for the rest of us to, I can assure you—take the assumption that somehow everything that takes place in the United States is some kind of tax shelter or tax abuse. And then you hear all of these numbers about how much money this costs the Treasury. And I would say that if you close the market, the Treasury will not get anything. And 70–80 percent of the real estate and commercial property, farms, ranches, and residence sales taking place in my State today are totally or partially seller financed, yet we are coming in here and throwing in a myriad of new rules. If it is a 19-page or 21-page piece of legislation, it is going to be 500 pages of regulations. That is what we are going to throw at our taxpayers out there and the people who are trying to do business. They may not find out for 2 years hence what the tax liabilities are that they may have if they do business in the next year.

Another question: How can the seller ensure that a buyer will use the property in the "active conduct" of farming? Does "active conduct" of farming include cash rent by the buyers? But what if the buyer lies and says he is going to farm but he does not, does the seller then have imputed interest? What happens if the buyer quits farming a year or 2 after the purchase and decides it is not profitable to farm and so he stops farming? What does the IRS do, go back to the seller and say, "Now, you have to impute this interest; you can no longer have the exemption that is in this bill"?

Why is there a minimum of 10 percent ownership requirement and why does the seller only get part of the $2 million exception? If a seller owns two farms, can he sell both farms or can he sell one farm?

These, Mr. President, are questions that we are going to have to answer. That is why I appeal to my colleagues that they just accept the simple repeal and save themselves and their constituents all across this broad land a great many headaches.

Are there any restrictions on the sales related to parties at 9 percent? In the case of trades or businesses with sale prices under $1 million, corporations and partnerships can have up to 35 shareholders or partners. The seller must own at least 10 percent and sell his entire interest, including all other interest in substantially similar businesses. If there is more than one owner, the seller only gets his proportionate share of the $1 million. In effect, the seller must be getting out of business.

So, in other words, let us say somebody owns two grocery stores or two anythings that are in a similar business and he would like to get rid of one location so he decides to sell that. Then he is not qualified for the exemption. So we put him in a disadvantaged situation in order to sell his property. This is a real interference and a deletion of freedom, I might say, to those property owners that may, for whatever reason that might escape those of us in this august Chamber choose to dispose of some of their property. It may be totally unrelated to the market or to the profitability of the business. It may have something to do with the person's own personal decision of why they wanted to dispose of one site.

The compromise states that if they do not get clear of the business, they cannot participate in some of the exemptions. Now, because the seller's ownership must be readily established, can a sole proprietorship qualify for 9 percent seller financing? Does the exception apply only to the sale of ownership interest? If so, what are the imputed interest rules for the sale of assets, both personal and real property? If not, what are the rules for the sales of personal and real property?

Those are questions, Mr. President, that should be answered before this Congress acts on this issue and that

should have been answered last summer before we acted. But they were not, so now I am just asking this body to go back to June 1984 and use the same law that has been on the books for the last 20 years. Somehow we have gotten by for the last 20 years without changing this.

Let me give you another question. If the seller owns three factories or stores in different cities, can the seller only sell one of those three at 9 percent? According to the way I read it, they have to sell them all. They cannot sell one. That is a real interference with someone's personal ability and freedom to do business in a free enterprise system, if you are going to tell people what they can or cannot do and punish them under the tax laws.

What are "substantially similar" businesses? Does it depend on the product? Is it consumer goods versus industrial goods? What type of business, manufacturing versus wholesale versus retail?

Mr. President, it occurs to me, as I ask these questions, that the reason the lawyers from Washington, DC, lobbying firms sign into a piece of legislation like this is because it is going to make a lot of money for a lot of lawyers. We are going to have to have one for every 100 of us or more out here in our society to take care of all of us.

I read an interesting article on that subject one day. The article stated that in Japan for every 1,000 engineers they train, they train 100 lawyers. In the United States, for every 1,000 engineers we train, we train 10,000 lawyers. I think it ought to be pointed out that we are making this thing more complicated than necessary. It just seems to me that we ought to use a little common sense once in a while around Washington, DC, and ignore all of these lobbyists that run around this town and tell us to make a compromise and get some kind of a deal and simply clean this thing up and go back to where we were last year.

Mr. President, I have just two or three more questions I want to pose here for my colleagues on this subject. Any time the distinguished chairman or any other Senator wishes to answer these I will be happy to have them do so. But I will pose them for the RECORD and then my colleagues can look at the RECORD and know that at least if they choose to vote with this Senator, that they will have had some questions posed that will support their vote for repeal.

Why must the seller sell the entire interest? What if the seller owns 100 percent and wants to sell the controlling interest to his children or to someone else to keep this business at least in the hands of the people in whom he has confidence? Are there any rules that would affect sales to family members? The compromise states that only certain types of sales will be allowed at 80 percent of the T-bill rate. This applies only to sales of land and depreciable real estate, commercial, and investment property. The total amount of all debt financing, including seller financing, must be less than $4 million. The term of the note, including extensions and renewals, must be no more than two-thirds of the depreciable life, such as 12 years for buildings. The exception does not apply to sales between related corporations or individuals. Do these rules apply to both someone who owns a duplex and someone who owns an apartment complex? Another general rule under the compromise is that if the seller does not charge the interest rate of at least 110 percent of the comparable T-bill rate, the IRS will impute the interest at 120 percent of the comparable T-bill rate.

The exceptions to that rule are that sellers can charge 9 percent on sales of homes, farms, and businesses under certain conditions and limits. Sales of other real estate commercial investment property can carry a rate equal to 80 percent of the T-bill rate, currently about 10.5 percent.

The sales allowed at 9 percent are personal residences, with a sales price under $250,000, a home must have been the principal residence for 2 years before the sale. Vacation homes can be sold at 9 percent so long as this property was never depreciated. Note, a vacation home that is depreciated will not be eligible for the exemption. Now, Mr. President that adds another complication.

I might say that I can understand why the homebuilders and realtors in my State, in areas like Ketchum, ID, would want repeal, because much of the commercial activity that takes place in many areas where there are ski resorts and other types of recreation are vacation homes. There are many good people that earn an honest living, working hard in the business of simply buying and selling and building those properties, and yet a great many of those are seller financed and we are going to impose on them a great many rules and restrictions.

Now, another question that ought to be brought up: why is the exemption based on the sale price instead of the amount of seller financing? Can a vacation home be sold at 9 percent if it is depreciated under the rules of section 280(a); that is, only used by the owner 2 weeks a year? What if the vacation home qualifies for depreciation under section 280(a) but no depreciation is actually taken? If a vacation home cannot be sold at 9 percent, what imputed interest rates will apply?

The compromise states that with respect to farmers, with a sales price under $2 million, the farm must be used as a farm for 3 years before the sale, and the buyer must use it in the active conduct of farming. The seller must own at least 10 percent of the farm and must sell his entire interest. If there is more than one owner, the seller only gets his proportionate share of the $2 million exception. Why is there a 3-year test? What will determine whether the property has been used as a farm for the past 3 years, the land or the seller—can the seller have a cash-rented farm and still sell it at 9 percent? I say, Mr. President, what you are doing is inviting the Internal Revenue Service to have to send an agent out to check every single real estate or commercial business transaction that has taken place that might apply for this exemption.

In another circumstance, I would like to ask the chairman of the Finance Committee, Mr. President, what happens in the case of a major construction project, such as an office or apartment building. In these projects, financing is not done by simply going to the bank and taking out a loan. What happens is that investors, which oftentimes include a financial institution, will loan money for the construction project at a certain rate, but they also want a percentage of the profits. For example, a bank might lend money at a 12-percent rate, but they will want a certain portion of the income/rents from that building once it is built.

In a situation such as this, how is the income from rents treated? Is that supposed to be imputed? If it is, wouldn't that drastically increase the 12-percent rate to much higher levels?

Also, how is the 12-percent rate treated as for as the lender is concerned? Does the lender get to deduct the increased interest cost if that cost is borne by the developer? How is the income from the rents treated?

And then what happens in a situation where the owner of a building brings in a renter and says, "If you will bring your business into my building, I will give you 6 months rent-free to get you over there, because the building is laying vacant anyway." Under the OID rules, the owner of the building is going to have to pay taxes as though he was receiving income from rent even though he is not. I cannot understand how we can get ourselves in a situation like this.

No one is answering these questions, Mr. President. I think the reason the people are not answering these questions is that the answers will be ground out by little green-shaded bureaucrats down at the Treasury and the IRS harassing the very people that we are here supposedly helping.

Mr. President, I think I could go on and on. I may speak later to this issue. But I appeal to my colleagues. I am sure the distinguished chairman has some plans to either amend my amendment or table it.

But I ask my colleagues in closing my remarks to consider what the situation is here. We passed a law last summer. This Senator did not happen to vote for it. But the majority of the Senate did. Within that law was the portion that changed all the rules which deal with imputed interest and the original issue discount provisions of the code.

Prior to the law we had a great deal of lobbying around this town by the real estate and homebuilding industry. At the time when I was lobbied, I told them they should be more concerned about this issue than about the proposal to increase the depreciation on real property from 15 years to 20 years. I received very little response from anybody in the industry. When the people from my State came back here I told them that the Federal Government is moving toward something that Treasury has wanted to do for years, that is to tax everybody on the time value of money and make them pay up front, whether or not they actually make any money. They want to tax them. Anyway, the law was passed. Then all of a sudden the real estate industry, the homebuilders, and everyone recognized there was a real problem out there because of the massive importance of seller financing to financial transactions in every sector of our economy. So we have made this effort.

There are 52 sponsors of this legislation to repeal the provisions enacted last summer. There are over 300 in the House. The Congress is clearly saying they would like to repeal these provisions. We now have a situation where a staff-Washington industry lobbyist compromise was worked out. I compliment my colleagues who have tried to achieve some sort of compromise. I only think that the compromise is overly complicated. I say that after all the questions I have posed.

I suppose that the compromise is better than the current law as passed last July. But I think we can do better than that.

I compliment Senator DOLE for his efforts on this. I compliment Senator JEPSEN for his interest and efforts on it.

Mr. President, I ask a parliamentary inquiry. Have the yeas and nays been ordered on the amendment?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. SYMMS. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SYMMS. Mr. President, I yield the floor.

Mr. DURENBERGER addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. DOLE. Would the Senator yield for a moment?

Mr. DURENBERGER. Yes.

Mr. DOLE. I say at this time I do not want to impose on the Senator's time, but if the Senator from Idaho will give us the questions that have been proposed, we will attempt to provide answers. I think they are questions that should be answered. But I must say there were a lot of questions even under the old law that had to be resolved by accountants and others. I do not want to suggest the old law is very simple and some other new law is complicated. But if we can have a list of those 15 or 20 questions that have been given to the Senator from Idaho, we will be happy to try to provide some answers during the course of the day or tomorrow or sometime later on in the week.

Mr. DURENBERGER. Mr. President, I indicate to the chairman of the Finance Committee that I may have a little list to submit to him, too. They may be duplicative. I will be glad to send the list down.

Mr. President, I want to thank my colleague from Idaho for the generosity of his comments about the issue that lies before us today; that is not only the generosity toward the chairman of the Finance Committee, who has been working since June 29, having helped us create a problem and now working hard trying to help us resolve that problem, but also his generous comments toward a lot of the other people who have been involved in that process in one way or another.

Mr. President, I rise to speak in support of the repeal, not necessarily because I think it is a great idea to go back to pre-deficit reduction act law, but because I think the process of making law in the area of seller financing of real estate that I have observed between June 29 and today is just a lousy way to run a railroad and certainly an incredible way to do the public's business.

The chairman of the Finance Committee has talked earlier this morning about how we need to address this issue because we are facing tax loopholes. On Friday he talked about the tax-free, tax-sheltered millionaires out there in the business, the implication being that seller financing of real estate has somehow created a whole new class of millionaires in America. The reality is that just ain't so. I mean seller financing was in this country long before we found the Government involved, in one way or another, either through its tax policy or through a variety of agencies of government, in providing means by which property could be sold between sellers and buyers who would without Government arrange their own financing.

So the reality is we are making millionaires in this business in a couple of ways. One, over the last 15 years or so in particular we have been making them with inflation. You go back and look at Forbes or some of those magazines that write about who the millionaires are in America, and a fair number of them were not made by the sweat of their brow. They were made by inflation.

Of course, the second way we have been making millionaires is by the way we have been using the Tax Code in this country. That does get us into the chairman's remarks about loopholes.

I am going to take just a couple of minutes to share with my colleagues, except for those who may be smarter than we are and are at lunch today, a little bit about the impact that inflation has had and how we have responded to that inflation because I think it is an important rationale for not messing around with seller financing at a time in the history of our country when that is one of the very few means of financing transactions available to us.

Before the Depression, a lot of Americans were renters. Those who were not renters and could buy a home, they paid 50 percent down, and they paid the balance over 3 or 4 years. A lot of those arrangements were between buyers and sellers or maybe with the help of the hometown bank.

But when the Depression hit us, home mortgage foreclosures swept across this country and in a variety of ways the Government got involved. The Roosevelt administration created the Federal Housing Agency, and eventually the FHA created a 30-year mortgage.

Pretty soon, we had those houses you could buy with nothing down and payments stretched over 30 years. Everybody in the country could become a homeowner. The Federal Government made all of this possible by guaranteeing loans, and if there was a default none of the bankers ever lost their money because the Federal Government was always around to make it good.

In the early years, mortgage payments were almost entirely interest. To ease the burden and encourage more home ownership, the Government made mortgage interest deductible. It is not surprising that we have a lot of people on this floor talking about homeowners and the problems they are facing. Nobody could pass up a deal like America was offering for home ownership in this country.

It is a national policy in this country to get your name signed up for 30 years.

Mr. President, I am going to give you one family to show you how wonderful this has been for all of us. Ten years

ago the family bought a home with an FHA loan that cost $34,000 with 5 percent down. Their initial investment was negligible, and the payments were $400 a month, $4,800 a year, almost all of that being tax deductible. Their costs were really $3,600 a year.

Last year, with two-thirds of the mortgage left they sold this house for $125,000. They got a $91,000 capital gain in 10 years for an initial investment of next to nothing.

You subtract their annual cost of $3,600 from their annual gain of $9,100 and they were making $5,500 a year just being a homeowner.

Where did the $5,500 come from? It was not produced by the house. Once the house was built, it just sat there. Other than making a smart investment in the right suburb of the District of Columbia or some other city, the family really did not do anything to make $5,500.

Where did it come from? You know the answer to that. It was borrowed. In one national spiral of borrowing arranged by FHA and the Tax Code, this family now came out $55,000 ahead in just 10 years.

Mr. President, that is a true story and it has been repeated all over America many, many, many times. It has been replicated beyond housing in the area of business financing, commerical office buildings, you name it. That is how we made millionaires out of everybody in this country who has been smart enough to use this system we created.

We face a problem now as we try to come to grips with inflation. We used inflation to crank up the American dream and make it possible for everybody. Now we have decided to do war on inflation. So we have ourselves a big problem.

Logically, if you did war on inflation and you attacked all of these subsidies and loopholes and programs, the price of everything would come down.

Well, we cannot let the price of everything come down or there would not be any business for a lot of folks sitting in the gallery who represent people who buy and sell homes and other kinds of real estate investment. So we have to keep that part of inflation up.

But we do not do it for a lot of people that the Senator from Montana, the Senator from Idaho, the Senator from Kansas, and I represent.

There is a whole bunch of folks out there, who I will call the American farmer. In the 1970's, the American farmer shared a spot right at the top of this up escalator with the homeowner. We had massive exports early in the decade, encouraging every farmer to plant for the world market, young farmers convinced the only way to get ahead was to expand, plant hedgerow to hedgerow. We brought 50 million acres, about one-sixth of the total farm acreage in this country, into production in that 10-year period of time. Again we set off a spiral of inflation and borrowing.

There is a helpful statistical relationship between the value of farmland in my State of Minnesota, for example, and outstanding farm debt. Early in the 1970's, the value of the typical acre on the farm in Minnesota was about $200. At that time, total farm debt in the State was a little under $2 billion. By the end of the decade, the debt climbed to over $10 billion and the value of an acre climbed to $1,000.

When you look at the charts, debt and value climbed year by year, together, right up the ladder.

But there was a third factor that made this possible. That was the exports. Farm exports are an important part of national policy, one of the principal elements we have been using until recently, at least, to keep our trade balance in balance.

The oil embargo forced energy outlays up and part of the answer was to raise farm exports. When the Third World was crushed with the high price of oil, part of the policy was to lower the price of farm goods.

All of that peaked out in the end of this decade. We had wound this spiral up so tight we could not push it another notch for the farmer.

The Fed decided that tight money must be used as a discipline. Interest rates went up to 20 and 22 percent, and that took the value of the dollar up right along with it. While the rest of the economy staggered through with difficult adjustments, the farmer was being wiped out because to him high interest is a double whammy. Not only did it have an impact on the cost of his money, but it also destroyed his market. Hungry nations simply cannot afford U.S. wheat priced in U.S. dollars.

The value of agricultural land in Minnesota has dropped by a third to a half because there is no longer an expanding market for the commodities that land produced. In Minnesota alone, the loss in farm equity over the last 2 years is $7.448 billion, $7.5 billion lost in 2 years. That is $72,275 for the average 300-acre farm in my State. It is just a little more lost than the homeowner I was talking about made on his investment over the last 10 years.

The point, Mr. President, of these two examples is simply that our propensity to borrow and to do it in an economy that defends some and forgets others is having massive economic effects that are hidden from most of us most of the time.

What we are failing to do in the middle of this political campaign when we are debating aid, Social Security, deficits, and blaming everybody else for the problems, is we are just not facing up to the problems the deficits have created for all of us.

I say all of this, Mr. President, because I am going to appeal to you in just a minute to forget about all of this seller-financing business. It is important to the tax code. It is important to the chairman of the Finance Committee because he has invested a lot of time in it. It is important to the staff because they have put in a lot of time. It is important to the lobbyists up there because they have put in a lot of time. All kinds of folks have invested a lot of time in this issue and time is running out.

When I came to the floor, the rumors were that maybe we could get out by 1 o'clock. Would not that be a miracle, to get out at 1 o'clock instead of Thursday? All we have to do is take the Jepsen compromise and we can all get out and go do something else.

I do not intend to talk the rest of the day just so we can get past 1 o'clock, but I do intend to try to make a point to my colleagues that the options here are not just between STEVE SYMMS, who says let us go back to where we were before June 29 and then maybe in a more rational period of time we can do it right, and having to buy into the notion that in that period of time STEVE SYMMS is protecting a lot of millionaires, tax-sheltered, tax-free folks out there who somehow are ripping off this system through the system of seller financing.

If seller-financing is a loophole, it certainly was not very much talked about around here, it was not a prominent part of the revenue side of the President's budget. It may have been there, but I do not remember seeing it in his budget recommendations, how to close these loopholes.

Mr. President, we spent 6 or 8 weeks in the Finance Committee markup and I did not hear a lot of discussion in markup about closing this particular kind of a loophole. I will acknowledge that if it was in the President's budget, it came from Dave Stockman because Dave has his finger on every possible loophole or subsidy. I give him credit for that because I am not trying to defend this as one legitimate kind of subsidy.

Mr. President, I am just trying to make a point to my colleagues that maybe we are missing a point here about how we have set the rules for debate on this kind of an issue.

We have been through a Presidential debate, so-called, because all of us agree that it was not a debate. The rules of debate were not followed, but the folks on either side got together and they set the terms for something and they decided to call it a debate. We have the same problem here on making a choice between the Senator from Idaho and the Senator from Kansas. We have 100 different ver-

sions of what the terms of debate really are.

The way, as I understand it, the terms of the debate got set, the day we passed the enrolling legislation for the Deficit Reduction Act conference report. We did not talk about it in Finance Committee markup or maybe we talked about it on the day I was not there, but I do not recall it as a big loophole-closing deficit-downpayment reduction. But when we got together in this Chamber to vote on the work of the deficit reduction bill conference committee, we found that the Treasury was going to be successful in closing some of the so-called seller-financing loopholes. And at that meeting in this Chamber, and I presided over part of it, the terms of the debate were set.

Somebody stood up and said, hey, you are going to stop us from selling our homes. Somebody else got up and said, what are the farmers going to do about selling their farms? So the terms of the debate got set in terms of homes and farms, which is why I used the examples earlier in my comments today, and somebody else said what about my small business which I cannot sell at market rate. The issue was phrased in terms of business property rather than in terms of people. Nobody looked at it in terms of a person who may own a home, and a farm, or a business, or some combination of property.

As a result, the compromise, so-called, was drafted in those same kinds of terms, in terms of homes of one kind or another, in terms of farms of one kind or another, in terms of businesses of this size, that size, or some other size. But it was never really put in the context of individuals.

This piecemeal approach of carving out areas made the compromise so complex that it will require a battery of tax lawyers just to tell us days from now what it really means, and the people who want to sell property will have to seek counsel to make sure they do not run afoul of the new law.

Solutions developed in the manner that this compromise was—11th hour negotiations and hurried backroom drafting—often result in bad long-term policy. This compromise is bad tax policy as it in effect makes the Government a party to the sale of property. It is bad economic policy because it imputes a high rate of interest to contracts which is contra to letting the marketplace set the rates. It is bad economic policy because the high rates of interest imputed will tend to set a floor for interest rates making it difficult for rates to decline.

Another result of the way this compromise was drafted is that because of the way the carve-outs were done, different results happen for people who think they are situated similarly. Let me give you some examples of what I mean.

Two taxpayers own homes with a value under $250,000. One taxpayer is transferred and has to rent his home for 8 months before he can find a buyer. This taxpayer does not qualify for the 9-percent test rate while the other taxpayer does.

Two taxpayers own vacation homes valued under $250,000. One depreciates his under section 280A, the other does not. The taxpayer who uses section 280A can't get the 9-percent test rate.

Two farmers with farms valued at under $2 million. One farmer close to retirement lets his farm lie fallow for a year before he sells it. He does not get the 9-percent test rate.

Two farmers with farms valued at under $2 million. One sells to a buyer who does not farm the land. The other sells to another farmer. Only the latter qualifies for the 9-percent test rate.

Farmer who sells his farm to his son and leases it back until he retires will not qualify for the 9-percent test rate.

Businessman who has two stores dealing in the same line of goods can't sell only one of them and qualify for the 9-percent test rate—he must sell them both.

Why must the seller sell entire interest? What if seller owns 100 percent and wants to sell controlling interest to the children to keep it in the family?

Two taxpayers with small apartment complexes. One sells his with a $3.5 million note for 12 years. One sells his with a $3.5 million note for 13 years. The latter taxpayer does not qualify for the 80-percent test rate.

Two taxpayers with small apartment complexes. One sells with a $3.5 million note to a stranger. One sells with a $3.5 million note to his brother. The latter does not qualify for the 80-percent test rate.

I worked on this issue in an effort to make this area of the law simpler so that taxpayers would at least be treated the same if they were in essentially the same position.

However, my amendment costs about $50 million more than Senator JEPSEN and Senator DOLE'S compromise. But if this amendment costs more than the compromise, it is a small price to pay for simplicity and a clear safe harbor for those who need relief from the government intervention of imputed interest.

The Treasury Department and the Finance Committee chairman argue that the imputed interest and OID provisions are necessary to prevent tax abuse. This amendment retains prohibitions against what everybody agrees is the largest area for tax abuse—the mismatching of the seller reporting interest and the buyer deducting the interest payment.

What about the concerns of the people who have to live under this law? This amendment sets up a simple safe harbor exemption. It takes care of the farmer, the small businessman, the homeowner, and so forth, by providing that as long as the $1.5 million limit of seller financing is not exceeded in the taxable year, the transaction is subject to a 9-percent test rate.

I want to stress how simple this is.

It does not matter what kind of property is being sold.

It does not matter what the value of the property is. One only looks at the amount of seller financing.

This amendment just draws one line—below this line the test rate is capped at current law—9 percent. Above this line, the test rate is 80 percent of the applicable Federal rate.

One can argue that having such a simple but effective test will allow the big real estate syndications to have too much of a break.

Who are we kidding—this $1.5 million limit is designed to effectively protect the people who need below market seller financing in order just to sell their farms and small business. Without protection from imputed interest, these transactions will come to a halt as the interest rate climbs. Sure, because of simplicity, a small percentage of a big transaction can have a 9-percent rate, but just because an occasional big fish slips through the net does not mean you should throw it away.

My amendment did not get offered because the will of the Senate was to support the compromise. Last evening I ended up voting for the compromise—imputed interest is that bad.

However, I urge my colleagues to support the effort of Senator SYMMS. Then we can come back and maybe craft a better law, one that looks at people instead of property with the result being an easier law for the American people to deal with.

Mr. President, regardless of my view about the compromise, I compliment the able chairman of the Finance Committee and its staff for the hard work that they have done in trying to resolve this issue. In closing, I would like to indicate that if the repealer is successful and if people are still interested in improving on past law, my amendment that has been floating around for several days would do just that, and I suspect it might even be supported under certain circumstances by the Senator from Idaho.

AMENDMENT NO. 7092

(Purpose: To repeal the changes made to section 483 of the Internal Revenue Code of 1954 by the Tax Reform Act of 1984)

Mr. SYMMS. Mr. President, I thank the Senator for yielding. I send a perfecting amendment to my amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho [Mr. SYMMS] proposes an amendment numbered 7092.

Mr. SYMMS. I ask unanimous consent that further reading be dispensed with.

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard. The clerk will state the amendment.

The bill clerk read as follows:

At the appropriate place in the joint resolution, insert the following new section:

SEC. . REPEAL CHANGES TO SECTION 483 BY TAX REFORM ACT OF 1984.

(a) IN GENERAL.—Section 1274 of the Internal Revenue Code of 1954 (relating to determination of issue price in the case of certain debt instruments issued for property) is hereby repealed.

(b) CONFORMING AMENDMENT.—Subsection (b) of section 41 of the Tax Reform Act of 1984 (relating to amendment of section 483) is hereby repealed and the Internal Revenue Code of 1954 shall be applied and administered as if such subsection (b) (and the amendment made by such subsection) had not been enacted.

(c) Paragraph (4) of section 1273(b) of such Code is amended to read as follows:

"(4) OTHER CASES.—Except in any case to which paragraph (1), (2), or (3) of this subsection applies, the issue price of a debt instrument which is issued for property shall be the stated redemption price at maturity.".

(c) EFFECTIVE DATE.—The Internal Revenue Code of 1954 shall take effect as if included in the amendments made by section 41 of the Tax Reform Act of 1984.

Mr. SYMMS. Mr. President, I ask for the yeas and nays on my perfecting amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, the time is now more than 30 minutes past the time I announced earlier I planned to go into executive session to take up the Genocide Convention. I would like to do that at this moment.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I thank the Senator from Minnesota. As I indicated earlier and I see the minority leader is on the floor, I am prepared now to go forward on the Genocide Convention.

I ask unanimous consent that the Senate go into executive session for the purpose of the consideration of Calendar Order No. 37.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Reserving the right to object, Mr. President, and I shall not object. I think it is only fair to say that some of the needed legislation that must pass this year has to be attached to something. I do not want to burden the chairman of the Finance Committee with too many other matters. I think imputed interest rates do belong on this vehicle.

For instance, there is a sodbuster bill that we passed through committee and on the agriculture appropriations bill. It still has not been enacted into law. We would like some vehicle on which to attach that. I just wish to draw that to the attention of the majority leader, because before we are done, we do want an opportunity to pass that bill.

Mr. BAKER. Mr. President, will the Chair put the question?

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to the consideration of executive business.

INTERNATIONAL CONVENTION ON THE PREVENTION AND PUNISHMENT OF THE CRIME OF GENOCIDE

The PRESIDING OFFICER. The clerk will state the treaty by title.

The bill clerk read as follows:

Convention on the Prevention and Punishment of the Crime of Genocide.

The PRESIDING OFFICER. Under the rule, the treaty will now be considered as in the Committee of the Whole article by article. The clerk will state article I.

The bill clerk read as follows:

ARTICLE I

The Contracting Parties confirm that genocide, whether committed in time of peace or in time of war, is a crime under international law which they undertake to prevent and to punish.

The PRESIDING OFFICER. Are there amendments to article I?

Mr. BAKER. Mr. President, would the Chair recognize me for a moment?

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, perhaps it would be in order at this time to explain as best I understand it how the Senate will proceed now in executive session to consider this convention. The Byrd precedent has been utilized to take us into executive session for a specific purpose. That is to consider the Genocide Convention.

The Genocide Convention has been reported. Now, as in a Committee of the Whole, as I understand it, the Senate will proceed to consider each one of the articles separately, one at a time, and amendments to those articles may be offered. But if no amendments are offered to each article, the Chair will automatically report the next article, and so on, until the convention is completed. After that is done, there will be a resolution of ratification and that will be voted on.

At this point, we are in effect acting as a Committee of the Whole, and each article will be presented one at a time. But after that process is complete, then the resolution will be subject to amendment.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. After the reading of all articles, it is my understanding the convention would also be subject to amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. BOSCHWITZ. Prior to the consideration of the resolution.

The PRESIDING OFFICER. The Senator is correct.

Mr. SYMMS. Mr. President, may I make a parliamentary inquiry?

The PRESIDING OFFICER. The Senator from Idaho is recognized for a parliamentary inquiry.

Mr. SYMMS. Mr. President, if I understood the majority leader correctly, the rules of the Senate require us to proceed as though in a committee of the whole, reading and considering the convention article by article?

The PRESIDING OFFICER. The Senator is correct.

Mr. SYMMS. We will read article by article?

The PRESIDING OFFICER. The Senator is correct.

Mr. BOSCHWITZ. Mr. President, if I may proceed.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. The first article has been read, and there were no amendments, as I understand it, offered to the first article. There were no opening statements made, so we may get them later. But now the second article is before us, is that correct?

The PRESIDING OFFICER. The second article has not yet been read.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I know there are certain Senators who wish to be present, and they are not on the floor. Before we proceed with the reporting of the next article and while the first article is still pending, I think it would be well to have a quorum call so that we can let everyone know we are proceeding as in the committee of the whole and that we are on the first article; that those who may be listening on their speakers in their offices should know the convention is before the Senate; that we are in a committee of the whole; that the first article is pending.

Now, Mr. President, I will recommend, if the managers are agreeable, rather than suggesting the absence of a quorum in order to gain time to let Senators know of the status of this matter, we have opening statements, and then before the first article is disposed of we will check again to make sure all interested parties are present

and aware of the parliamentary situation.

If that is agreeable to the two managers, I am going to yield the floor, and they may proceed.

The PRESIDING OFFICER. Who seeks the floor?

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. PELL. Mr. President, today the Senate has an opportunity to do what it should have done 35 years ago—give its consent to the Genocide Convention. We can all agree, I hope, that genocide—the killing of an entire people—is the most horrible of all crimes. Unfortunately it is a crime we have seen too often in this century.

Since 1900 we have seen Hitler's effort to destroy the Jews of Europe; we have seen the massacre of the Armenians in the Ottoman Empire; and we have seen the "auto-genocide" practiced by Cambodia's homicidal leaders on its own population. Millions and millions of lives have been lost. These acts were, without a doubt, crimes against all humanity and, as such, a matter of the gravest concern for men and women everywhere.

This convention recognizes that genocide is a matter of international concern by making genocide a crime under international law. The convention imposes on the contracting parties an obligation to prevent and punish the crime of genocide.

In many ways the impact of the convention is symbolic since enforcement is left to the individual contracting parties. The convention seeks, in the words of the Foreign Relations Committee report, "to set a higher standard of international morality." As such the convention can contribute to a better and more humane world.

For 35 years various objections have been raised to the Genocide Convention. This opposition, however, has now almost entirely disappeared. Ratification is supported by an impressive array of Protestant, Catholic, and Jewish religious leaders, by the American Bar Association, and by a range of human rights organizations. President Reagan has strongly endorsed ratification, and in so doing joins his predecessors, Presidents Truman, Kennedy, Johnson, Nixon, Ford, and Carter. The convention has been reported favorably to the Senate five times by the Foreign Relations Committee, most recently on September 19, 1984, by an impressive 17-0 vote.

Senate advice and consent to this convention would fulfill a goal I have had over my 24 years in the Senate. It would also fulfill a dream of my father's, who as U.S. delegate to the 1943-44 U.N. War Crimes Commission, argued forcefully that genocide a crime against humanity, should be made a crime under international law. Incidentally, my father's position ran into strong opposition from the State Department, which argued that punishing genocide would be an ex post facto law, and for his persistence my father was fired.

Approval of this convention would be a fitting tribute, too to Rafael Lemkin, who coined the term "genocide." A distinguished international legal scholar, Rafael Lemkin had most of his family exterminated in the Nazi Holocaust. It was he who conceived the idea of this convention and worked so hard for its adoption.

For 35 years it has been a matter of acute embarrassment, at home and abroad, that the United States has not ratified the Genocide Convention.

I can recall at the time I served as a delegate to the General Assembly of the United Nations other delegates would come up to me and say, "Why haven't you ratified the Genocide Convention? What is holding you up?" And it was always very hard to give them an explanation.

Now the Senate has a historic opportunity to rectify this. I hope the Senate will move expeditiously to give its consent to the Genocide Convention.

As we move to consideration of this convention, I would like to salute the Senator from Wisconsin [Mr. PROXMIRE] who has been the Senate's leader on this issue and who, through his speeches each day, has prodded us to act on the convention.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, I thank my good friends, the distinguished senior Senator from Rhode Island. Senator PELL not only has worked very hard for this treaty himself, but his father did a great deal at the United Nations to secure its unanimous support many, many years ago.

Mr. President, at long last we are beginning the final push toward ratification of this important human rights treaty. I remain hopeful that we will still be able to complete final action on the convention today. From the very beginning of September, when the Reagan administration announced its support for the Genocide Convention, with only 1 month remaining in the Senate's schedule, we knew we were racing against the clock. We knew it would be an uphill fight to get sufficient floor time to give the Genocide Convention the careful examination it deserves.

But we come to the floor today in a stronger position than we have ever had. Consider the contrast with a decade ago.

In 1974, the American Bar Association was officially opposed to the Genocide Convention. At that time we had a telegram from six presidents of the ABA and reports from numerous sections of the bar endorsing the convention but still the unalterable fact was that the American Bar Association still was on record, from their decision in 1950, to oppose the convention.

Today, we come with the overwhelming endorsement of the American Bar Association's House of Delegates and, more importantly, the unceasing work of their legislative staff here in Washington as well as president after president of the Bar Association prodding the Senate to act.

The American Bar Association has concluded that their concerns of 1950 have not withstood the test of time. They have concluded the treaty is in America's national interest and that the treaty poses no threat—and I mean none—to the rights of all Americans under the Constitution.

Second, we come with the strong support of the most conservative President in a generation. That support goes a long way toward removing the Genocide Convention from any hint of being a partisan issue or of being a liberal versus conservative fight. The President has clearly determined that the Genocide Convention is in the national interest and that the treaty is completely constitutional.

But the strong support of the President and the continuing assistance of the majority leader in seeing that the Genocide Convention remained on the Senate schedule has produced an important byproduct. We now have had a crucial opportunity for my colleagues to focus on the Genocide Convention, to review and study the issues and to reach a final decision.

And it is now clear to the supporters, and to the Senate leadership, that we now have the votes to give the Senate's overwhelming advice and consent to the Genocide Convention and, if necessary, to invoke cloture on debate.

The only issue now is whether we will have sufficient time in the remaining hours of the 98th Congress to complete all action or whether the Genocide Convention will be the first order of business in the 99th Congress.

Mr. President, the floor managers of the Genocide Convention, and this Senator, are prepared to stay as long as necessary to achieve that goal. The issue involved here is crucial.

As Ambassador Jeane Kirkpatrick noted in a statement to the Foreign Relations Committee:

> I believe that the Senate's ratification of the Genocide Convention will enhance the standing of the United States in the United Nations and other international organizations. The Soviets and others hostile to the United States have long focused on the United States' failure to ratify the Genocide Convention as part of their anti-American propaganda. It is contrary to our national interest to provide fuel to this campaign by failing to reaffirm clearly and unequivocally

U.S. support for the important objectives of this Convention.

Mr. President, Ambassador Kirkpatrick is right. The time for United States action to protect its vital interests is long since overdue. Ratification of the Genocide Convention will be an important step in that direction. A step that the U.S. Senate should take today.

The PRESIDING OFFICER (Mr. PACKWOOD). The Senator from Rhode Island.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. MATHIAS. Mr. President, today the U.S. Senate has before it, for advice and consent, the first major human rights treaty drafted by the United Nations, the Genocide Convention. It is an important decision, and an historic opportunity for the Senate to reaffirm the vitality of America's commmitment to fundamental human rights.

It is hard to imagine any treaty receiving more thorough consideration than this one. In the 36 years since the United States signed the Genocide Convention, over 13 hearings have been held by the Senate Foreign Relations Committee, and the convention was reported favorably to the full Senate on five separate occasions.

Despite bipartisan White House support over three decades, the Genocide Convention fell victim to the broader post-World War II debate over such issues as the appropriate use of treaty-making power, and the authority of the Federal Government to legislate on subjects that were within the jurisdiction of individual States. But most of these issues have long since been resolved. On a number of occasions the Supreme Court has affirmed that it is appropriate to conclude treaties setting minimum standards of human rights. In addition, the Senate Foreign Relations Committee has proposed three understanding and one declaration to make clear that application of the treaty in the United States must be in accord with the Constitution.

In the controversay over ratification, it is often forgotten that the United States played a leading role in the genesis of the convention. The term "genocide" was coined by Raphael Lemkin, an adviser to the U.S. Prosecutor at the Nuremberg War Crimes Trials, and the treaty itself was drafted by a United Nations committee whose chairman was U.S. Delegate John Maktos. The American delegation led the fight for adoption in the U.N. General Assembly, and signed the treaty only 2 days after its unanimous approval.

The time has come to give tangible expression to the U.S. commitment. In multilateral negotiations dealing with human rights, our negotiators are often remined of the failure of the United States to ratify the convention. Favorable action by the Senate today will have strong positive implications for American foreign policy.

Over the years, there have been many claims about what the Genocide Convention does or does not do. In sorting these out, the best guide is the language of the treaty itself, which defines genocide as, "acts committed with intent to destroy, in whole or in part, a national, ethnical, racial, or religious group as such." The convention does not alter the rules of warfare, or the obligations of parties to the Geneva Conventions on the treatment of prisoners of war and protection of civilian persons in time of war. It does not apply to civil wars or voluntary population control measures. And it is not retroactive.

The Genocide Convention stands for a simple, indisputable principle: Genocide is a crime against humanity, and an offense under international law. United States approval would, in the words of Elie Wiesel, "help strengthen the moral principle of accountability for those governments that take, rather than protect, the lives of their citizens."

Mr. President, I urge my colleagues to advise and consent to ratification of the Genocide Convention. We will send a strong message to the world community that the United States is determined to advance and protect what the Declaration of Independence described as one of man's unalienable rights—the right to life.

The PRESIDING OFFICER. Who seeks recognition?

Mr. DOLE. Mr. President, as cochairman of the Helsinki Commission, I have a special interest in Senate ratification of the convention on the prevention and punishment of the crime of genocide for, like the Helsinki Commission, the Genocide Convention represents an eloquent statement of human aspirations, which the United States fully and proudly shares.

Concern about genocide is compatible, indeed integral, to our national interest. We have great principles to defend and a great example to give to the world. Yet, we can never be the prime defender nor the greatest of examples if we fail to ratify a treaty that we helped create. The rights of all remain a major focus of our foreign policy, especially when we are today beset by issues of how to stem the advance of the enemies of human rights. Let us set an example for the world to follow. Let us ratify the Genocide Convention now.

Genocide is real and to some historic hypothesis. Clearly, the Armenian genocide was real as were Hitler's death camps. Abstention and withdrawl from the ratification process would be unworthy of us. The fundamental right for an individual to live requires us to grapple with the complexity of this issue. We must be willing to make an effort, one that is patient and determined. Well, we have been patient and we are now determined to ratify this treaty. Now is the time to act.

Today, we must address ourselves to a very fundamental and real question. Could genocide exist today? Perhaps that question should be asked to the immigrants from Cambodia who fled a Communist slaughter. Perhaps we should ask the Miskito Indians of Nicaragua, who have been forcibly relocated from their traditional villages by the Sandinista regime; and in some cases killed when they refused to go. Perhaps we should ask the Afghan people who are playing unwelcome hosts to the Soviets for the fifth year. As a result of Soviet aggression, Afghans have been forced to seek refuge from their oppressors by escaping to Pakistan and Iran. While we have a moral imperative to combat these atrocities, how can we do so credibly when we are not even a signatory to the Genocide Convention.

While the debate over ratifying the Genocide Convention these last 35 years has been genuine and the concerns which have been expressed valid, I am convinced we have now addressed the concerns raised in this body. The controversy over ratification has centered on two very important issues: First would ratification of the Genocide Convention if any way compromise the U.S. Constitution; and second, would the convention give the International Court of Justice or any other international tribunal jurisdiction over the U.S. Government, Federal officials, or U.S. citizens. In regard to the first issue, the Constitution is the supreme law of the land. It cannot be overridden by any external agreement, this one or any other. In the event of a conflict, the Supreme Court, in its own words, "has regularly and uniformly recognized the supremacy of the Constitution over a treaty." Furthermore, the Genocide Convention itself insures there shall be no conflict between it and the Constitution. In article V, the convention provides that implementing legislation shall be enacted by contracting parties, "in accordance with their respective constitutions."

In response to the second question, the International Court of Justice under the Genocide Convention will have no jurisdiction over American citizens, whether acting as Government officials or in a private capacity.

The ICJ is not a criminal tribunal. Under the terms of the treaty, it would be authorized to hear cases concerning interpretation of the treaty, but it cannot try or punish individuals. The court does not have the power to enforce its judgments and must rely on the Security Council of the United Nations, where the United States has a veto, to provide sanctions.

Mr. President it is now time for the U.S. Senate to go on record—to show our moral conviction that the heinous act of genocide must be obliterated from the Earth. The national interest of this matter is as simple as it is compelling: The world must know that as a country we share the common ideals embraced by the other 96 signatories of the convention.

Thank you Mr. President.

Mr. THURMOND. Mr. President, I rise in strong opposition to Senate ratification of the so-called Genocide Treaty unless understandings of the nature of those advocated by Senator HELMS are adopted.

This issue has received extensive debate both in the Senate Foreign Relations Committee and before the full Senate on several occasions. In 1950, the Senate Foreign Relations Committee first held hearings on the "Convention on the Prevention and Punishment of Genocide." After carefully studying the document and its possible implications, the committee refused to report the treaty to the Senate.

Another series of hearings were held on this issue in the early 1970's. On March 6, 1973, the Foreign Relations Committee did favorably report the treaty to the full Senate. The Senate debated the merits of this measure for 1 full week in 1974 and by votes of 55 to 36 and 55 to 38, failed to invoke cloture and vote on the treaty itself. Again in 1976, the Foreign Relations Committee reported the Genocide Treaty to the full Senate. Again, it was not ratified. Once more in 1980, hearings were held on the Genocide Convention; however, the Foreign Relations Committee did not report the treaty at that time.

Mr. President, in my well-considered judgment, the U.S. Senate has shown great wisdom over the past 35 years in refusing to ratify this treaty. Little has changed over the years, and I remain firm in my belief that ratification of this treaty would result in an invasion of the sovereignty of the United States and a deterioration of the personal liberties of our citizens.

Mr. President, to give an indication of just how little has changed on this issue, I would like to read selected excerpts from a statement that I gave on the Genocide Treaty in 1974. I will pick up my 1974 statement with a review of the nine substantive articles contained in the Genocide Convention.

Briefly, the provisions of the Genocide Convention are as follows:

In article 1, the contracting parties affirm "that genocide, whether committed in time of peace or in time of war, is a crime under international law which they undertake to prevent or to punish."

Article 2 reads as follows:

In the present convention, genocide means any of the following acts committed with intent to destroy, in whole or in part, a national, ethnical, racial or religious group, as such:

(a) Killing members of the group;

(b) Causing serious bodily or mental harm to members of the group;

(c) Deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part;

(d) Imposing measures intended to prevent births within the group;

(e) Forcibly transferring children of the group to another group.

Article 3 states that:

The following acts are punishable:

(A) Genocide;

(B) Conspiracy to commit genocide;

(C) Direct and public incitement to commit genocide;

(D) Attempt to commit genocide;

(E) Complicity in genocide.

Article 4 specifies that persons committing genocide or any other acts enumerated in article 3 shall be punished, whether they are constitutionally responsible rulers, public officials, or private individuals.

Article 5 obligates the contracting parties to enact the necessary legislation to give effect to the provisions of the convention and to provide effective penalties "for persons guilty of genocide or of any of the other acts enumerated in article 3."

Article 6 provides that "persons charged with genocide or any of the other acts enumerated in article 3 shall be tried by a competent tribunal of the nation in the territory of which the act was committed or by such international penal tribunal as may have jurisdiction with respect to those contracting parties which shall have accepted its jurisdiction."

Article 7 provides that the parties to the treaty pledge themselves in genocide cases to grant extradition in accordance with their laws and treaties.

Article 8 provides that "any contracting party may call upon the competent organs of the United Nations to take such action under the charter of the United Nations as they consider appropriate for the prevention and suppression of acts of genocide or any of the other acts enumerated in article 3."

Article 9 provides that "disputes between the contracting parties relating to the interpretation, application, or fulfillment of the present convention—shall be submitted to the International Court of Justice at the request of any of the parties to the dispute."

This brings me to the considerations which ought to deter the Senate from ratifying the Genocide Convention. Time compels me to limit my statement to only the most substantial of them.

First, if the Senate should ratify the Genocide Convention, the United States would be obligated by it to prosecute and punish public officials and private citizens in our country for acts alien to the concept embodied in the term genocide.

The definition of genocide appears in article 2 which states that the term genocide embraces five specified acts committed with intent to destroy, in whole or in part, a national, ethnical, racial, or religious group, as such. The convention definition of genocide is inconsistent with the real meaning of the term, which is the systematic, planned annihilation of a racial, political, or cultural group. The word annihilation clearly contemplates the complete destruction or the complete wiping out of the designated group.

Yet, the convention definition covers the destruction, either in whole or in part, of members of a group embraced by it. This could mean that a public official or a private individual is to be subject to prosecution and punishment for genocide if he intentionally destroys a single member of one of the specified groups.

The Senate Foreign Relations Committee has recommended the Senate announce that it understands this article to mean "the intent to destroy a national, ethical, racial, or religious group by the acts specified—in such a manner as to affect a substantial part of the group concerned." While this does clear up some of the ambiguity, in my opinion it is still not clear enough. The phrase "substantial part" is obviously subject to interpretation.

Second, article 2, section 2 of the Constitution provides that the President shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur. Article 6 of the Constitution provides that "the Constitution and the laws of the United States, which shall be made in pursuance thereof, and all the treaties made or which shall be made under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding."

If the Senate should ratify the Genocide Convention, these constitutional provisions would automatically make the convention the law of the land, put all of its self-executing provisions into immediate effect as such, and impose upon the United States the obligation to take whatever steps are necessary to make its non-self-executing provisions effective. This means that the provisions of the Genocide

31-059 O-87-29 (Pt. 22)

Convention would immediately supersede all State laws and practices inconsistent with them, and could nullify provisions of acts of Congress and prior treaties of the United States inconsistent with them. Obviously ratification of the Genocide Convention would have a drastic impact on our system of government, particularly on the States.

Third, another drastic impact that ratification of the Genocide Convention would have upon our system of government is in the criminal field. If the Senate should ratify the Genocide Convention, the duty and the power to prosecute and punish criminal homicides, assaults and batteries, and kidnapings, covered by categories (A), (B), and (E) of article 2 of the convention would be forthwith transferred from the States which have always has such duty and power in respect to these crimes to the Federal Government. To make this transfer of jurisdiction workable, Congress would be required to enact new laws laying down rules of procedure to govern the trial of these newly created Federal and international crimes. Pending the passage of such laws, our country could experience utter confusion in the administration of criminal justice in respect to homicides, assaults and batteries, and kidnapings.

In the absence of ratification of the convention, demands have already been made that the United Nations investigate the action of the legislature of one State in respect to welfare benefits on the ground that the legislative action constituted genocide under article 2(c). Furthermore, questions have been raised whether birth control clinics, school busing, discrimination against minority groups, and the incidents at My Lai in Vietnam could also constitute genocide.

I strongly question whether it is desirable to ratify a convention which would necessitate such fundamental alterations in the way in which criminal justice has been administered in the United States ever since our country was founded.

A fourth objection to the convention is that many of its terms are shrouded in uncertainty. For example, if the convention is ratified, article 2(b) would impose upon the United States the duty to prevent and to prosecute and punish public officials and individuals who cause mental harm to members of any one of the four groups named in the convention. What mental harm means in this context is totally incomprehensible and what psychological acts or omissions are made punishable in this context are left in obscurity. The Foreign Relations Committee would construe this term to mean permanent impairment of mental faculties. In my opinion, this construction adds little clarity.

If the convention is ratified, article 2(c) would impose upon the United States the duty to prevent and to prosecute and punish anyone who deliberately inflicts "on the group conditions of life calculated to bring about its physical destruction in whole or in part." What this means, no mind can fathom. Does it mean that a State or county official who refuses to give to a member of one of the four groups, designated in the convention, the amount of welfare benefits deemed desirable is to be punished or prosecuted for genocide? Does it mean that the Court of International Justice shall have power under article 9 to adjudge that Congress or a State legislature which does not make available to members of one of the four groups what the court deems to be adequate welfare benefits has violated the convention?

Able lawyers have expressed the fear that article 6 imposes upon the Congress an implied commitment to support the creation of an international court for trials of American citizens for genocide. I find myself in complete harmony with their opposition to subjecting our citizens and other persons within our territorial jurisdiction to trial, conviction, and sentence for acts of genocide committed in the United States by an international penal tribunal where they might not be surrounded by the constitutional safeguards and legal rights accorded persons charged with a domestic crime.

A fifth objection is that the convention could make American soldiers fighting under the flag of their country in foreign lands triable and punishable in foreign courts—even in courts of our warring enemy—for killing and seriously wounding members of the military forces of our warring enemy.

This is made indisputable by article 1 which provides that genocide is punishable under the convention whether it is committed in time of peace or in time of war, and by the fact that it contains no provision exempting soldiers engaged in combat from the coverage of the provisions of the convention. When soldiers kill or seriously wound members of a detachment of the military forces of a hostile nation, they certainly do so with intent to destroy, in whole or in part, a national group as such. Hence, their acts in combat fall clearly within the purview of the convention. In such cases, they are triable and punishable under article 6 in the courts of the Nation in whose territory their acts are committed, or in such an international penal tribunal as may have jurisdiction with respect to those contracting parties which shall have accepted its jurisdiction. These things being true, American soldiers who killed or seriously wounded North Vietnamese soldiers, or members of the Vietcong, or South Vietnamese civilians in South Vietnam, would have been triable and punishable in courts in South Vietnam, and American aviators who bombed North Vietnam would have been triable and punishable in the courts of North Vietnam. No sophistry can erase this obvious interpretation of the Genocide Convention.

A final objection to the convention relates to article 9, which provides that disputes between the parties to the convention relating to the interpretation, application, or fulfillment of the convention shall be submitted to the International Court of Justice at the request of any of the parties to the dispute.

Under this article the International Court of Justice would be empowered to decree that the President of the United States, as Chief Executive Officer of the United States, had interpreted and applied the provisions or the convention incorrectly and by doing so impose upon the President of the United States its notions as to how the convention should be interpreted and enforced. The International Court would have the power to adjudge that legislation enacted by Congress to give effect to the provisions of the convention was insufficient to fulfill the obligations imposed upon it by the convention, and to adjudge that the Supreme Court of the United States and Federal courts inferior to it had interpreted and applied the provisions of the convention incorrectly and by doing so require these tribunals to apply its notions as to how such provisions should be interpreted and applied to future cases coming before them. This would constitute a drastic and dangerous invasion of the sovereignty of the United States of America.

In this short talk, I have attempted to briefly outline the major objections to the Genocide Convention. In my opinion, these objections mandate that the convention not be ratified. The existing laws of the United States and all the States are adequate to punish all of the physical acts of violence denounced by the Genocide Convention. The Genocide Convention is an unnecessary and dangerous treaty which could severely damage our system of law and government.

Mr. President, that was the body of a statement I gave on the Genocide Treaty in 1974. I would ask my colleagues to note that each one of the arguments I used in 1974 are applicable today. It is clear that the Genocide Convention remains controversial, vague and unneeded.

Mr. President, I would like to emphasize that my remarks were not designed to undermine the good intention of those who drafted the Genocide Treaty, or those who seek its ratification. We are all strongly opposed to acts of genocide, and abhor such atrocities as those committed in Nazi

Germany during World War II. However, it remains my view that the Senate should not ratify a convention which would have such a drastic impact upon the system of law which has successfully governed this Nation for over 200 years.

In closing, again I state, Mr. President, that I am opposed to the Senate ratification of this so-called Genocide Treaty unless the understanding or similar understandings as proposed by the distinguished Senator from North Carolina, Senator HELMS, are adopted.

Mr. President, I hold in my hand a column by George F. Will entitled "Striking a Pose Against Genocide." This is a splendid article and I ask unanimous consent that it be printed in the RECORD following my remarks.

I also ask unanimous consent that a column by another famous columnist, James J. Kilpatrick, be printed in the RECORD following my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

STRIKING A POSE AGAINST GENOCIDE

(By George F. Will)

Although Ronald Reagan has suddenly become the seventh president to endorse ratification of the U.N. treaty against genocide, a conservative senator from North Carolina—Jesse Helms, taking up where Sam Ervin of North Carolina left off in the 1970s—has put sand in the gears of the process. How, you ask, can anyone oppose a treaty opposing genocide? Easily, if you start by reading it. Perhaps Eisenhower did; in any case, he did not favor it.

The United Nations adopted it in 1984. President Truman favored ratification, but the Senate Foreign Relations Committee would not send it to the floor. Nixon was the next president to send it to the Senate, where Ervin tied the process in wholesome knots.

The treaty commits signatories to prevent and punish individuals responsible for genocide, which it defines as committing any of the following acts against a national, ethnic, racial or religious group: killing members of the group; causing severe bodily or mental harm to members; inflicting conditions designed to bring about the group's physical destruction in whole or in part; preventing births; taking children away from the group.

"In part"? "Mental harm"? Under this language any act of war can qualify as genocide.

The traditional conservative objection to the treaty is that it jeopardizes U.S. sovereignty, giving foreign powers a pretext for stigmatizing, in their courts or international tribunals, U.S. racial or foreign policies as genocidal. But a graver objection is that the treaty, far from being likely to be promiscuously invoked, will remain what it manifestly has been for more than three decades—a dead letter. Thus, ratification would be yet another instance of the bad habit of striking poses and considering them policies.

You say large deficits are bad things? Outlaw them. Amend the Constitution—verily, call a constitutional convention. You say genocide is a bad thing? Ban it. Take the genocidal to court.

The New York Times says, "Ratification would reaffirm and strengthen the world's capacity to act against mass murder." Oh? Something like genocide is being committed against religious minorities in Iran and elsewhere, and ethnic groups in Uganda and elsewhere. Would ratification make a particle of difference to U.S. policy—and if so, how, or why?

The Los Angeles Times says that ratification will put the United States "firmly on record on behalf of the rule of law." Wrong. Ratification will not disguise the fact that no one thinks of it other than as a gesture. How is the rule of law enhanced by an unenforceable tissue of miscast definitions—by a document that disregards the fact that internatonal law, such as it is, is an intramural code for the like-minded, useful among nations that share common values but not germane to dealing with totalitarians and other gangster regimes?

The Washington Post says the treaty "allows the United States to make a clear moral statement." But acts of dubious morality do not make moral statements. Presenting this treaty as even relevant to the ongoing tragedy of genocide is an evasion of moral choice. Ratification deepens the moral self-satisfaction of the safe, while doing nothing for those in jeopardy.

The treaty had been ratified by nearly 90 nations in the mid-'70s when genocide consumed Cambodia. The treaty was irrelevant. The way to have prevented genocide in Cambodia was to have won the war in Indochina.

Under the language of the treaty, the Soviet regime is today, and has been for 67 years, guilty regarding its treatment of various national, ethnic and religious groups. If the treaty is ratified, would the United States promptly try to bring the Soviet regime to the bar of justice? Of course not; it is like pulling teeth to get even this conservative administration to issue congressionally mandated reports on Soviet violations of arms control agreements.

No, the treaty would be just another pretty patch on the quilt of hypocrisy typified by the Helsinki process, in which we solemnly discuss the rights of trade unions and journalists in the Soviet bloc, where there are no trade unions or journalists. Under the genocide treaty the United States would solemnly commit itself to act against certain crimes; then by not acting, the United States would implicitly acquit the Soviet regime of the crimes.

After 44 months of allowing the treaty to gather dust, the administration, two months before an election, has dusted it off. No doubt some deep thinker is thinking about the Jewish vote. One can imagine what survivors of the Holocaust think of a treaty perfectly designed to restrain through its moral authority any regime that believes in both genocide and the rule of law.

[From the Washington Post, Sept. 19, 1984]

THE HELMS RESERVATIONS

(By James J. Kilpatrick)

Once again the International Convention on the Prevention and Punishment of the Crime of Genocide is back in the news. If the Senate will agree to the two sensible and prudent reservations sought by Sen. Jesse Helms the treaty should be ratified.

The Genocide Convention was approved unanimously by the U.N. General Assembly in December 1948. The following June, President Truman sent the treaty to the Senate with a recommendation that it be approved. The Senate balked then, as it has balked for the ensuing 35 years, on questions of "understanding." It is time to have these questions resolved.

As the term "genocide" generally is understood, the crime arouses revulsion almost beyond description. Hitler's slaughter of more than 6 million Jews provides the most appalling example of genocide in this century, but there have been other instances that have aroused the condemnation of the civilized world. In his recent statement to the Senate Foreign Relations Committee, Helms spoke of the "horror" of genocide. It was precisely the right word.

Given this unanimity of opinion on genocide itself, why has a treaty with so noble a purpose languished so long? The answer lies in part with the language of the convention, and in part with the language of our own Constitution.

The convention defines five acts committed with intent to destroy "in whole or in part" a national, ethnical, racial or religious group. These are 1) killing members of the group; 2) causing serious bodily "or mental" harm to members of the group; 3) deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part; 4) imposing measures intended to prevent births within the group; and 5) forcibly transferring children of the group to another group.

The convention commits the signatories to adopting legislation "in accordance with their respective Constitutions"—note the language—providing for the punishment of public officials or private individuals who commit any of the prohibited acts. Such persons would be tried in the country in which the acts were committed "or by such international tribunal as may have jurisdiction with respect to those contracting parties which shall have accepted its jurisdiction."

Under Article IX of the convention—and this is one of the serious sticking points—questions of interpretation and state responsibility "shall be submitted to the International Court of Justice at the request of any of the parties to the dispute."

A threshold problem is that our own Constitution, in defining the supreme law of our land, says that the supreme law includes treaties "made under the authority of the United States." This convention would be such a treaty. It would bind all state and federal judges. The first of the Helms reservations would make it clear that the treaty authorizes only legislation "which would be valid in the absence of the convention." Surely this is a reasonable proposal.

Helms' second reservation goes to Article IX. He wants a formal understanding that the United States will not accept the World Court's jurisdiction over any domestic matter "as determined by the United States." This language echoes the Connally Amendment of 1946, which the Senate prudently adopted as a condition of recognizing the World Court at that time. Again, Helms is on sound ground.

It is unlikely that the Genocide Convention, if ratified, ever would be invoked in the United States. To be sure, opponents have concocted horror stories. By tortuous interpretation, the treaty conceivably could be invoked against racial homicides, or against a bigoted Louis Farrakhan who causes "serious mental harm" to Jews, or against public officials who fail to protect American Indians and braceros who come in to pick lettuce. These are frivolous conjectures.

It is doubtful the Genocide Convention ever will amount to anything more than a symbol of man's revulsion at inhumanity to

man. So long as it is made clear we are not effectively amending our Constitution and not surrendering sovereignty over our domestic affairs to any world tribunal, the Senate would do well to advise and consent.

(Mr. COCHRAN assumed the chair.)

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, the Genocide Treaty after nearly 40 years of either gathering dust or being rejected by the Senate, has once again resurfaced. This treaty is before the Senate for consideration once again and I think it is rather amazing the rapid progress it has made this year in the Senate Foreign Relations Committee. Proponents of the ratification are arguing that after 2 score years it is past time that the Senate expedite the passage of the treaty.

Mr. President, I share the views of the Senator from South Carolina. I strongly disagree with the way this treaty is drafted, although I support the objections of the treaty to prohibit genocide. Without serious reservations and amendments I will not be in support of this treaty. In the past the Senate was far more liberal than it is today, and yet even then the treaty met with considerable opposition and lengthy debate, on both the floor and during the hearing process it inevitably failed to win the necessary margin of approval. The Foreign Relations Committee allowed for presentations from only two witnesses week before last. Both of them were from the administration and both favorable to the U.S. ratification of the Genocide Convention. I do not believe that it would be wise for the Senate to decide this issue based on such inadequate and onesided testimony. Any treaty is a serious undertaking and deserves serious treatment. The Senate was intended by the Founding Fathers to be a deliberative body.

I frankly think they would be appalled at the haste and cursory handling an issue of this consequence has received.

It has been 10 years since the treaty was last debated at length on the Senate floor. Only 28 Senators now in office heard that debate, and were witness to the arguments that were successfully advanced against it on the floor at that time. The apprehensions of treaty opponents were relevant to the debate then; they should be raised and heard again today.

What is the history of the convention? What was its purpose, its evolution, and what was its impact intended to be? Any study of the treaty is incomplete without a look at its formulation.

The Genocide Convention was never passed even under the shepherdship of the Truman administration.

Senator THURMOND mentioned earlier the article by the distinguished columnist, Mr. George Will, where he had made the point that it had been supported on and off by Presidents since Truman, and the only President who had not supported the Genocide Convention was President Eisenhower. He suggested that the reason President Eisenhower probably did not support it was because President Eisenhower read the convention.

Mr. BOSCHWITZ. Will the Senator yield for a question?

Mr. SYMMS. I yield.

Mr. BOSCHWITZ. Did the Senator say it was rejected?

Mr. SYMMS. No. They were never able to rally enough support to bring it to a vote on the Senate floor. They did not invoke cloture.

(At this point Mr. ANDREWS assumed the chair.)

Mr. BOSCHWITZ. Then the Senator is not suggesting that the treaty was rejected.

Mr. SYMMS. That is correct. I appreciate my colleague pointing that out. I meant to say it was 10 years ago that the treaty was debated at great length and there are 28 Members who are now in this body who heard that debate. At that time 10 years ago, when there was a much more liberal composition of the Senate than it has today, they failed to invoke cloture. We are now being asked to endorse this thing very quickly. I believe that it deserves more study and consideration. It may be that some of us who have reservations about it might remove some of those reservations if we had an opportunity to focus on it. But to bring it in now would be the kind of an issue that I think would much better be debated at great length in the Senate at a time when we are not being pressured for adjournment and we do not have a political campaign facing us.

After 20 years of dormancy under both Democratic and Republican Presidents, President Nixon forwarded the treaty to the Senate and asked for its consideration. According to Alfred Schweppe, then a spokesman for the American Bar Association, it was President Nixon's Secretary of State who urged ratification, believing the United States was being discredited in world opinion by not signing it, after we had supposedly displayed such leadership in its drafting. Mr. Schweppe is one of only a small number of Americans who thoroughly and tirelessly waded through the proceedings of the U.N. committees that eventually drew up the Genocide Convention. As he stated before the committee:

> Far from being an exercise in leadership by the United States, the cold record shows it to have been a pathetic case of followership—so pathetic as almost to drive one to tears • • • The United States delegation consistently caved on important matters of principle, and in order to get some kind of an agreement—any kind—abjectly acquiesced in a draft that is so faulty and confused that it does not prevent genocide where it regularly goes on (Czechoslovakia, Hungary, Poland, Africa, Asia) but, in a welter of confusion, creates new international crimes (the treaty becomes the supreme law of the land) that will make endless trouble for the United States.

What happened during these negotiations that so weakened the treaty? The United States initially insisted on including the term "political" as well as "national, ethnical, racial, and religious groups" in the group definition of potential victims of genocide. The Soviets do not view destruction of the political opposition as genocide. By eliminating that worrisome provision, they felt free to persecute dissidents or religious worshippers or any other "enemy of the state" without violating the treaty. The U.S. delegation also insisted, also unsuccessfully, that the words "complicity of government" be included in the definition of genocide. It was apparent in the case of Nazi Germany that Government complicity was what made genocide possible. Historically and logically, genocide is a cancer associated with totalitarian, autocratic, and imperialistic countries—like Nazi Germany, the U.S.S.R., and Red China.

As Bishop Dwyer, in a 1955 column from the Nevada Register commented:

> What does genocide mean? Surely our experience of it tells us that it is the political liquidation, enslavement, or brutalization of any particular race or racial group, on the basis of its alleged inferiority. But the convention, most amazingly, neglects to list political genocide in its catalog of contents. It is as though one were to draw up a charter of religious liberty and fail to mention the freedom to worship God.

Now, lest anyone misjudge my intentions, in no way do I mean to impugn the original objective and motivation of the Genocide Treaty. It was intended to express the world's outrage at the acts of Hitler's Germany to exterminate the Jewish population within its borders. But, like the infamous Kellogg-Briand Pact, which sought to outlaw war, it was an exercise in futility and self-delusion.

The strongest argument the treaty's proponents put forward is that we somehow are not able to argue effectively against genocide because we have not signed this treaty. Well, to those people I say that deeds are more important than words. The proponents completely overlook all of the truly valid arguments against signing it. Has the treaty helped prevent genocide? Absolutely not; the Communists conduct genocide today in Afghanistan, opposed only by the Afghans. Afghanistan, a signator to the treaty, is not even able to bring their case to the World Court because their government was replaced by the Soviet puppet government of Babrak Karmal. Not only has no case been tendered against Soviet actions in Af-

ghanistan; not one genocide case has been brought before the International Court of Justice to date.

Has world opinion been mobilized against the Soviets because of the Genocide Treaty? Again, absolutely not. The major forum for international discussion is the United Nations, which is rapidly anti-American and pro-Soviet. Communist abuses are typically ignored, and the United States is a common target of derision by the U.S.S.R., the bloc countries, and much of the "non-aligned" Third World countries.

Now, the United States, should it decide to become a signator to the Genocide Convention, will be accepting the jurisdiction of the World Court on genocide cases. In signing the U.N. Charter, we accepted the compulsory jurisdiction of the judicial entity of the United Nations which is the World Court. The World Court, which is about as busy as a Maytag repairman, most recently "tried" the United States on the issue of the mining of the harbors of Nicaragua. The World Court did not concern itself with the fact that the Sandinista government is aiding and supplying the guerrillas in El Salvador, that the Sandinista leadership has been caught red-handed smuggling drugs into the United States, or that Nicaragua is now host to a bevy of foreigners, North Koreans, Libyans, Bulgarians, Cubans, and Soviets, all bent on the destruction of the free world. The World Court did not seem to see any legitimacy in our treaties of mutual self-defense with Latin America which allow for the use of force to stop the spread of Marxist-Leninism and other aggressive powers from interfering in the Western Hemisphere, and that mining of harbors is a legitimate act of self-defense in response to a tangible threat. The World Court, despite the legitimacy of our actions, judged overwhelmingly against the United States on that issue. What delusion are we suffering if we believe the Court, which is a political, not a true judicial body, will be fair and equitable in other decisions when they have been so blatantly biased and prejudiced in this one?

Speaking of Nicaragua, it is curious that Daniel Ortega, the Communist junta leader of Nicaragua, in an interview at the United Nations this October 1, accused the United States of a "genocide" policy against his country. I think we can expect the flames to fan into fire if we actually sign the Genocide Treaty.

It is interesting to note that we sought the aid of the World Court in the Iranian hostage crisis. Eventually, our hostages were returned, but not because of the involvement of the World Court. The point is that lawless nations will never be either pressured or embarrassed by any findings of the Court. Lawful nations, however, like the United States, which would never take hostages, shoot down civilian airliners, confine political dissidents to mental institutions, or mandate coercive abortion programs, can be embarrassed at the U.N. and before the World Court by the very effective manipulation and disinformation of the Soviet Union and its allies.

I have also heard the argument that by signing the treaty, we will be building a body of international law, and that refusing to sign is damaging to our image. Nonsense. The only guilt we should feel is that we so completely failed in the original negotiations on the treaty. The Communist signators entered the treaty and then devised all means to circumvent the language of the convention. We have fallen into the same trap in the arms control process; the Soviets stonewall at the arms talks until the West grows anxious for a settlement, and the end result is that we sign an agreement with too many concessions. The Soviets have a great advantage over their Western counterparts: They do not have to contend with public opinion.

In the West, the treaty seems to have become more important to some of us than its content or its intended effect. If we sign this treaty, which has been emasculated by the left, are we not then just compounding our failures? In 1970, a Mrs. Rita Hauser, the U.S. Representative to the U.N. Human Rights Commission, testified before the Senate Foreign Relations Committee on the Genocide Treaty. She argued that the United States was left out of the debates at the United Nations because we had not yet ratified the Genocide Treaty. When we invoked the treaty, according to Mrs. Hauser, the response was always "Who are you to invoke a treaty that you are not a party to?"

This argument is laughable. If that is a sample of the talent of our debating team at the United Nations, I suggest the United States hire a new delegation. Mrs. Hauser seemed to readily lose sight of the fact that the United States has not committed genocide and most likely never will, and that the Communist countries have committed genocide and most probably will continue to. Mrs. Hauser did not seem to see any significance in the fact that while we have not signed the treaty, we have not been guilty of genocide, and that the perpetrators of genocide, nearly without exception, are signators to the convention.

What was the reaction of the non-Communist member nations of the United Nations to the Soviets and bloc countries exempting themselves from retribution under article IX of the treaty? Australia, Belgium, Brazil, Ceylon, China, Cuba, Ecuador, Greece, Norway, Vietnam, and the United Kingdom all objected to the reservations of the U.S.S.R. and the Soviet satellite nations. The Netherlands argued that the reservations were incompatible with the object and purpose of the convention. Their statement of objection to the exemptions read as follows:

> The Government of the Kingdom of the Netherlands therefore does not deem any state which has made or which will make such reservation a party to the Convention.

The Netherlands was not the only country to recognize that the Soviets and bloc countries had made a mockery of the treaty. I think my colleagues might be interested to know that my predecessor in this office, the late Senator Frank Church, who chaired numerous Genocide Treaty hearings back in the early 1970's, had this to say about it:

> To what degree are we merely interested in becoming a party to this Convention for purely symbolic reasons? I do not discount the importance of symbolic acts, but the Treaty is really pretty toothless. In fact, the Convention is about as toothless as one could be . . . Does a toothless tiger really frighten or deter?

Senator Church went on to add:

> I find it hard to conceive that any government even though it might be a signatory to this Convention, which actually engages in such a practice in the future, is either going to confess to the crime or is going to take any action to punish itself—that exceeds the bounds of realism.

Mr. President, we are a moral, law-abiding nation. Genocide is as removed from our nature as cannibalism or the old Hindu practice of suttee. We punish criminals in our society or at least, we try to, and we have punished mass murderers at times in our country. But the problem in some nations of the world is that it is the criminals who run the government, and so there is no justice in those countries.

Senator Church, to his credit, questioned the real value of the treaty in stopping genocide, or even deterring it. The real truth is that it is a token gesture, a Maginot line, a false facade behind which we hide, refusing to deal with reality. The reality today is that men, women, and children are being slaughtered around the world and no one at the U.N. has the moral courage to stand up to the nations responsible for the murders and take them to task. No one invokes the Genocide Treaty against the Soviet Union and demands their presence in the World Court. And I highly doubt that the United States, should it become a signator to the treaty, would show the fortitude to confront the ongoing atrocities being committed in the world under the terms of this convention.

The very same people who are pushing this treaty argue about the value of symbolism, and yet, they are the very same ones who oppose any reciprocal action because of the massacre

of 269 civilians aboard KAL 007, who oppose renaming the streets in front of the Soviet Embassies "Sakharov" avenue, who oppose direct aid to the Afghans, victims of the greatest genocide since the Chinese cultural revolution, because the Soviets might view it as provocative, and who, most recently, have opposed raising the issue of importing Soviet products made by slave labor or Soviet arms control violations, for fear of offending Russia.

Who are we kidding if we believe that signing the Genocide Treaty will give our U.N. delegation new ammunition in the U.N.? I do not think we would recognize ammunition if it blew up in our face! We are too busy wringing our hands and downplaying Soviet atrocities.

The major thrust of my argument is that, despite State Department rhetoric to the contrary, deeds are more important than words.

If we really wanted to put a stop to genocide, we have the capability to do so. The Afghan freedom fighters who have been before some of us in the Congress, have pleaded—I have had them say to me personally, "How much more blood do we have to shed before you will help us?" After 5 desperate years, there is only a trickle of money from the United States to the one country in the world that is battling the Red Army all by themselves. While efforts to allow these people to save their homes and villages, their culture, their religion, and their lives are defeated in the Congress, we considered giving lip service to genocide. They are defeated because we do not want to offend the Soviet Union. This is a terrible and bitter irony, and the worst part of it is that the great United States, the greatest economic power on Earth, has the capacity to do so much more.

We do not need to come in here and ratify some treaty to do something that will help those free people in the world who are fighting and trying to save their own lives, their own opportunities, have their own hopes and dreams, and expel the Soviets from within the borders of their own sovereign nation.

Let us never forget that the grisly atrocities of the Nazis, which inspired the creation of the Genocide Convention, were not stopped by any treaties to which Germany was a party. The Nazis only played for more time by Neville Chamberlain's appeasement policies, and they were stopped not by the pacifists or those who believed in negotiation and diplomacy, but by allied military superiority by foot soldiers, by brave men and women from the different allied countries who risked their lives to preserve freedom in Western Europe and to stamp out the Nazi tyranny.

That is what did it, Mr. President. It was not some treaty, some piece of paper. The real world was that it was soldiers, it was sacrifice, it was the war effort at home, the productive society here, the free enterprise, capitalist society in the United States, that provided the wherewithal for the United States and our allies to stamp out the Nazis.

It was not some treaty and it was not the appeasement policies of Neville Chamberlain. If we were really serious about stopping genocide, we would instruct our U.N. delegation to tell the General Assembly that the document as written is not worth the paper it is printed on, and that we are not going to be a party to any treaty that is such a sham and a charade. If we were truly serious about doing something about genocide, we would tell our diplomatic personnel to quit apologizing for the fact that the United States has not signed a worthless, ineffectual document and instead take the offensive and work toward helping the victims of genocide instead of squandering good time arguing about an emasculated treaty.

Let us not repeat the mistakes of the past. We have all expressed our disappointment at the failure of arms control talks. We became so anxious to reach an agreement that we lost sight of the content of the agreement. The signature became the most important goal, not the validity of the language, nor its effect. We have been blinded by the symbol of achievement and neglected the pursuit of the real achievement, the real objective.

I think another issue that should be raised in connection with the Genocide Treaty is the level of Jewish support for its passage. And I would not purport to come to the floor and claim to be an expert in this area. I have the highest respect for my dear colleague from Minnesota. He may not agree with what I am about to say, but my office has been contacted by an organization entitled "Jews for Morality," based in New York, with a membership of several thousand. This organization is strongly supportive of family values and is conservative on defense and foreign policy matters. Their spokesman pointed out the fact that the Daily World, which is the major Communist Party paper in the United States, has run articles for years with headlines like "Stop Israeli Genocide." He suggests that the impact of the Genocide Treaty could be, if the Senate chooses to ratify it, to inhibit pro-Israeli activities in the United States. In the United Nations, we have already witnessed the charges of the Third World and PLO-supportive groups, where anti-Semitism is disguised as anti-Zionism. As Secretary Shultz said in his opening address to the Holocaust Conference in mid-September, "There are things going on in the world today which, if not confronted squarely and defeated, can mushroom into wholesale threats to the foundation of our civilization."

I am simply saying, Mr. President, this treaty is going the wrong way to confront those threats. It simply gives a terrific propaganda tool to the anti-Israeli elements and to the Third World pawns of the Soviets.

It is interesting to note that it was the U.S. State Department advisers who were condemning Israel when they were confronting the Soviet surrogates, the Syrians, in northern Lebanon with great courage and great efficiency and effectiveness, I might add. It was the U.S. State Department advisers who were condemning them after years and years and years of an alliance with the United States and years and years and years of the U.S. taxpayers helping Israel maintain its strength so it could fend off it adversaries from its borders. When they finally started making some headway and accomplishment, it was the United States that came in and slowed them down and stopped them. If we are a signator to this treaty and ratification takes place, then you wait and see what will happen the next time the Israeli borders are threatened and they are forced to make defensive actions to protect their own freedom and liberty as they did in June 1982 and were not completely successful in accomplishing it because of criticisms they received from their own friends in the West. It is mind-boggling to me, as one Member of this body, that we could have been in that position, but we were.

Mr. President, I ask this question: Do we really want to give that tool to the groups who are already labeling orthodox Jewish groups as "Hitlerian" types and accusing Israel of genocidal intentions in the Middle East? I think this Senate does not want to do that.

According to an article in Human Events, there was no pressure either from U.N. members or the Jewish community to get the United States to ratify the treaty. The article stated that the President only got a smattering of applause when he announced before B'nai B'rith his support for its ratification. In addition, Jeane Kirkpatrick was quoted as having said she had not been pressed by her diplomatic colleagues on this issue, which flies in the face of State Department proponents who claim that failure to ratify has been an extreme embarrassment to the United States before the world community. I reiterate that deeds are more important than words, and that goes for the opinion of the world community as well.

Mr. President, I will propose an amendment to the Genocide Treaty at some appropriate point that I think is critically important, particularly in view of the interest it seems to have aroused in the United States, even in this Presidential campaign of 1984.

The amendment which I will propose at the proper time touches on an important issue which the treaty indirectly addresses. In article II of the treaty, which defines genocide, one provision reads: "Preventing births within groups * * *." Back in 1949, an article in the New England Journal of Medicine discussed the topic of "Medical Practices and Dictatorships." The content of the article, which I will submit to the RECORD, is appalling.

Mr. President, I ask unanimous consent that the article from the New England Journal of Medicine be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. SYMMS. Mr. President, the content of the article, as I said, has appalling information in it. Among the horrible medical crimes of the Nazis was the forced sterilization of women and men at Auschwitz. Since the Nazis' crimes were not limited to attempted genocide of Jews, the author of this article renamed the Nazi killings as "ktenology," the science of annihilation. The Nazis were not always discriminate killers. The term genocide implies discriminate killing. Today, there are well-founded reports from Red China that coercive abortion is commonplace; that female infanticide is a common practice, because of government population control programs.

Think of that. And they are signatory to this treaty we are talking about today.

Stephen Mosher, a firsthand witness to the Government abortion campaign there, wrote a book called "Broken Earth" on coercive abortion and infanticide in Red China. The Chinese forced abortion program, while seemingly indiscriminate, could be viewed as class genocide, since the program exempts the wives of Communist Party officials.

If we look closely at the wording of the treaty, I think we can make a case to argue that the authors of the Genocide Convention must have recognized that abortion is a form of genocide, since abortion, not to mention sterilization, prevents births. A similar argument could be made for infanticide.

Although I will state again my firm opposition to the ratification of this treaty, regardless of whether or not my amendment receives the approval of the Senate, I do believe that the practice of abortion is noticeably absent from the wording in the genocide definition under article II. Now, I would like to state some opinions and findings that support the inclusion of the term "abortion" in the definition of genocide as a crime against humanity.

In the Nuremburg International Military Tribunal for the trial of war criminals, the promotion of abortion among minority populations, especially the denial of the protection of the law to the unborn children of Russian and Polish women, was considered a crime against humanity.

The Federal Constitutional Court of the Federal Republic of Germany in 1975 ruled that the life which is developing itself in the womb of the mother is an independent legal value which enjoys the protection of the Constitution and the state's duty to protect human life before birth forbids not only direct state attacks, but also requires the state to protect this life from other persons.

Our own Declaration of Independence affirmed that all human beings are endowed by their Creator with certain inalienable rights among which is the right to life; and, as early as 1959, the American medical profession affirmed the independent and actual existence of the child before birth as a living being and condemned the practice of abortion at every period of gestation as the destruction of human life.

It seems inconsistent that our society makes so many efforts to protect human life before birth from the hazards of occupational sites, from dangerous drugs, from hazardous substances, such as excessive alcohol or cigarette smoking, and yet, we have failed to recognize the sanctity of the child in the womb. Even more compelling are the studies which now detail the reality of fetal pain in the abortion procedures. George Will wrote a particularly compelling editorial on pain and abortion. This is an element in the abortion debate that most pro-abortion advocates would rather avoid. There's an excellent book written by William Brennan called "Medical Holocausts" which parallels today's techniques for the destruction of human life—that is, the unborn, the Baby Doe case, and euthanasia with the situation which developed in Nazi Germany, where methodology triumphed over emotionality.

I urge that, at a minimum, this treaty be amended or defeated.

EXHIBIT 1

[From the New England Journal of Medicine, July 14, 1949]

MEDICAL SCIENCE UNDER DICTATORSHIP

(By Leo Alexander, M.D.)

BOSTON

Science under dictatorship becomes subordinated to the guiding philosophy of the dictatorship. Irrespective of other ideologic trappings, the guiding philosophic principle of recent dictatorships, including that of the Nazis, has been Hegelian in that what has been considered "rational utility" and corresponding doctrine and planning has replaced moral, ethical and religious values. Nazi propaganda was highly effective in perverting public opinion and public conscience, in a remarkably short time. In the medical profession this expressed itself in a rapid decline in standards of professional ethics. Medical science in Nazi Germany collaborated with this Hegelian trend particularly in the following enterprises: The mass extermination of the chronically sick in the interest of saving "useless" expenses to the community as a whole; the mass extermination of those considered socially disturbing or racially and ideologically unwanted; the individual, inconspicuous extermination of those considered disloyal within the ruling group; and the ruthless use of "human experimental material" for medico-military research.

This paper discusses the origins of these activities, as well as their consequences upon the body social, and the motivation of those participating in them.

PREPARATORY PROPAGANDA

Even before the Nazis took open charge in Germany, a propaganda barrage was directed against the traditional compassionate nineteenth-century attitudes toward the chronically ill, and for the adoption of a utilitarian, Hegelian point of view. Sterilization and euthanasia of persons with chronic mental illnesses was discussed at a meeting of Bavarian psychiatrists in 1931.[1] By 1936 extermination of the physically or socially unfit was so openly accepted that its practice was mentioned incidentally in an article published in an official German medical journal.[2]

Lay opinion was not neglected in this campaign. Adults were propagandized by motion pictures, one of which, entitled "I Accuse," deals entirely with euthanasia. This film depicts the life history of a woman suffering from multiple sclerosis; in it her husband, a doctor, finally kills her to the accompaniment of soft piano music rendered by a sympathetic colleague in an adjoining room. Acceptance of this ideology was implanted even in the children. A widely used high-school mathematics text, "Mathematics in the Service of National Political Education," [3] includes problems stated in distorted terms of the cost of caring for and rehabilitating the chronically sick and crippled. One of the problems asked, for instance, how many new housing units could be built and how many marriage-allowance loans could be given to newly wedded couples for the amount of money it cost the state to care for "the crippled, the criminal and the insane."

EUTHANASIA

The first direct order for euthanasia was issued by Hitler on September 1, 1939, and an organization was set up to execute the program. Dr. Karl Brandt headed the medical section, and Phillip Bouhler the administrative section. All state institutions were required to report on patients who had been ill five years or more and who were unable to work, by filling out questionnaires giving name, race, marital status, nationality, next of kin, whether regularly visited and by whom, who bore financial responsibility and so forth. The decision regarding which patients should be killed was made entirely on the basis of this brief information by expert consultants, most of whom were professors of psychiatry in the key universities. These consultants never saw the patients themselves. The thoroughness of their security can be appraised by the work of one expert, who between November 14 and December 1, 1940, evaluated 2109 questionnaires.

These questionnaires were collected by a "Realm's Work Committee of Institutions

Footnotes at end of article.

for Cure and Care." [4] A parallel organization devoted exclusively to the killing of children was known by the similarly euphemistic name of "Realm's Committee for Scientific Approach to Severe Illness Due to Heredity and Constitution." The "Charitable Transport Company for the Sick" transported patients to the killing centers, and the "Charitable Foundation for Institutional Care" was in charge of collecting the cost of the killings from the relatives, without, however, informing them what the charges were for; in the death certificates the cause of death was falsified.

What these activities meant to the population at large was well expressed by a few hardy souls who dared to protest. A member of the court of appeals, at Frankfurt-am-Main wrote in December, 1939:

"There is constant discussion of the question of the destruction of socially unfit life—in the places where there are mental institutions, in neighboring towns, sometimes over a large area, throughout the Rhineland, for example. The people have come to recognize the vehicles in which the patients are taken from their original institution to the intermediate institution and from there to the liquidation institution. I am told that when they see these buses even the children call out: 'They're taking some more people to be gassed.' From Limburg it is reported that every day from one to three buses with shades drawn pass through on the way from Weilmunster to Hadamar, delivering inmates to the liquidation institution there. According to the stories the arrivals are immediately stripped to the skin, dressed in paper shirts, and forthwith taken to a gas chamber, where they are liquidated with hydrocyanic acid gas and an added anesthetic. The bodies are reported to be moved to a combustion chamber by means of a conveyor belt, six bodies to a furnace. The resulting ashes are then distributed into six urns which are shipped to the families. The heavy smoke from the crematory building is said to be visible over Hadamar every day. There is talk, furthermore, that in some cases heads and other portions of the body are removed for anatomical examination. The people working at this liquidation job in the institutions are said to be assigned from other areas and are shunned completely by the populace. This personnel is described as frequenting the bars at night and drinking heavily. Quite apart from these overt incidents that exercise the imagination of the people, they are disquieted by the question of whether old folk who have worked hard all their lives and may merely have come into their dotage are also being liquidated. There is talk that the homes for the aged are to be cleaned out too. The people are said to be waiting for legislative regulation providing some orderly method that will insure especially that the aged feeble-minded are not included in the program."

Here one sees what "euthanasia" means in actual practice. According to the records, 275,000 people were put to death in these killing centers. Ghastly as this seems, it should be realized that this program was merely the entering wedge for exterminations of far greater scope in the political program for genocide of conquered nations and the racially unwanted. The methods used and personnel trained in the killing centers for the chronically sick became the nucleus of the much larger centers in the East, where the plan was to kill all Jews and Poles and to cut down the Russian population by 30,000,000.

The original program developed by Nazi hotheads included also the genocide of the English, with the provision that the English males were to be used as laborers in the vacated territories in the East, there to be worked to death, whereas the English females were to be brought into Germany to improve the qualities of the German race. (This was indeed a peculiar admission on the part of the German eugenists.)

In Germany the exterminations included the mentally defective, psychotics (particularly schizophrenics), epileptics and patients suffering from infirmities of old age and from various organic neurologic disorders such as infantile paralysis, Parkinsonism, multiple sclerosis and brain tumors. The technical arrangements, methods and training of the killer personnel were under the direction of a committee of physicians and other experts headed by Dr. Karl Brandt. The mass killings were first carried out with carbon monoxide gas, but later cyanide gas ("cyclon B") was found to be more effective. The idea of camouflaging the gas chambers as shower baths was developed by Brack, who testified before Judge Sebring that the patients walked in calmly, deposited their towels and stood with their little pieces of soap under the shower outlets, waiting for the water to start running. This statement was ample rebuttal of his claim that only the most severely regressed patients among the mentally sick and only the moribund ones among the physically sick were exterminated. In truth, all those unable to work and considered nonrehabilitable were killed.

All but their squeal was utilized. However, the program grew so big that even scientists who hoped to benefit from the treasure of material supplied by this totalitarian method were disappointed. A neuropathologist, Dr. Hallervorden, who had obtained 500 brains from the killing centers for the insane, gave me a vivid first-hand account.[5] The Charitable Transport Company for the Sick brought the brains in batches of 150 to 250 at a time. Hallervorden stated:

"There was wonderful material among those brains, beautiful mental defectives, malformations and early infantile diseases. I accepted those brains of course. Where they came from and how they came to me was really none of my business."

In addition to the material he wanted, all kinds of other cases were mixed in, such as patients suffering from various types of Parkinsonism, simple depressions, involutional depressions and brain tumors, and all kinds of other illnesses, including psychopathy that had been difficult to handle:

"These were selected from the various wards of the institutions according to an excessively simple and quick method. Most institutions did not have enough physicians, and what physicians there were either too busy or did not care, and they delegated the selection to the nurses and attendants. Whoever looked sick or was otherwise a problem was put on a list and was transported to the killing center. The worst thing about this business was that it produced a certain brutalization of the nursing personnel. They got to simply picking out those whom they did not like, and the doctors had so many patients that they did not even know them, and put their names on the list."

Of the patients thus killed, only the brains were sent to Dr. Hallervorden; they were killed in such large numbers that autopsies of the bodies were not feasible. That, in Dr. Hallervorden's opinion, greatly reduced the scientific value of the material. The brains, however, were always well fixed and suspended in formalin, exactly according to his instructions. He thinks that the cause of psychiatry was pemanently injured by these activities, and that psychiatrists have lost the respect of the German people forever. Dr. Hallervorden concluded: "Still, there were interesting cases in this material."

In general only previously hospitalized patients were exterminated for reasons of illness. An exception is a program carried out in a northwestern district of Poland, the "Warthegau," where a health survey of the entire population was made by an "S.S. X-Ray Battalion" headed by Professor Hohlfelder, radiologist of the University of Frankfurt-am-Main. Persons found to be infected with tuberculosis were carted off to special extermination centers.

It is rather significant that the German people were considered by their Nazi leaders more ready to accept the exterminations of the sick than those for political reasons. It was for that reason that the first exterminations of the latter group were carried out under the guise of sickness. So-called "psychiatric experts" were dispatched to survey the inmates of camps with the specific order to pick out members of racial minorities and political offenders from occupied territories and to dispatch them to killing centers with specially made diagnoses such as that of "inveterate German hater" applied to a number of prisoners who had been active in the Czech underground.

Certain classes of patients with mental diseases who were capable of performing labor, particularly members of the armed forces suffering from psychopathy or neurosis, were sent to concentration camps to be worked to death, or to be reassigned to punishment battalions and to be exterminated in the process of removal of mine fields.[6]

A large number of those marked for death for political or racial reasons were made available for "medical" experiments involving the use of involuntary human subjects. From 1942 on, such experiments carried out in concentration camps were openly presented at medical meetings. This program included "terminal human experiments," a term introduced by Dr. Rascher to denote an experiment so designed that its successful conclusion depended upon the test person's being put to death.

THE SCIENCE OF ANNIHILATION

A large part of this research was devoted to the science of destroying and preventing life, for which I have proposed the term "ktenology," the science of killing.7, 9 In the course of this ktenologic, research, methods of mass killing and mass sterilization were investigated and developed for use against non-German peoples or Germans who were considered useless.

Sterilization methods were widely investigated, but proved impractical in experiments conducted in concentration camps. A rapid method developed for sterilization of females, which could be accomplished in the course of a regular health examination, was the intra-uterine injection of various chemicals. Numerous mixtures were tried, some with iodopine and others containing barium; another was most likely silver nitrate with iodized oil, because the result could be ascertained by X-ray examination. The injections were extremely painful, and a number of women died in the course of the experiments. Professor Karl Clauberg reported that he had developed a method at the

Auschwitz concentration camp by which he could sterilize 1000 women in one day.

Another method of sterilization, or rather castration, was proposed by Viktor Brack especially for conquered populations. His idea was that x-ray machinery could be built into desks at which the people would have to sit, ostensibly to fill out a questionnaire requiring five minutes; they would be sterilized without being aware of it. This method failed because experiments carried out on 100 male prisoners brought out the fact that severe x-ray burns were produced on all subjects. In the course of this research, which was carried out by Dr. Horst Schuman, the testicles of the victims were removed for histologic examination two weeks later. I myself examined 4 castrated survivors of this ghastly experiment. Three had extensive necrosis of the skin near the genitalia, and the other an extensive necrosis of the urethra. Other experiments in sterilization used an extract of the plant *Caladium sequinum,* which had been shown in animal studies by Madaus and his co-workers [10 11] to cause selective necrosis of the germinal cells of the testicles as well as the ovary.

The development of methods for rapid and inconspicuous individual execution was the objective of another large part of the ktenolocic research. These methods were to be applied to members of the ruling group, including the SS itself, who were suspected of disloyalty. This, of course, is an essential requirement in a dictatorship, in which "cut-throat competition" becomes a grim reality, and any hint of faintheartedness or lack of enthusiasm for the methods of totalitarian rule is considered a threat to the entire group.

Poisons were the subject of many of these experiments. A research team at the Buchenwald concentration camp, consisting of Drs. Joachim Mrugowsky, Erwin Ding-Schuler and Waldemar Hoven, developed the most widely used means of individual execution under the guise of medical treatment—namely, the intravenous injection of phenol or gasoline. Several alkaloids were also investigated, among them aconitine, which was used by Dr. Hoven to kill several imprisoned former fellow SS men who were potential witnesses against the camp commander, Koch, then under investigation by the SS. At the Dachau concentration camp Dr. Rascher developed the standard cyanide capsules, which could be easily bitten through, either deliberately or accidentally, if mixed with certain foods, and which, ironically enough, later became the means with which Himmler and Goering killed themselves. In connection with these poison experiments there is an interesting incident of characteristic sociologic significance. When Dr. Hoven was under trial by the SS the investigating SS judge, Dr. Morgen, proved Hoven's guilt by feeding the poison found in Dr. Hoven's possession to a number of Russian prisoners of war; these men died with the same symptoms as the SS men murdered by Dr. Hoven. This worthy judge was rather proud of this efficient method of proving Dr. Hoven's guilt and appeared entirely unaware of the fact that in the process he had committed murder himself.

Poisons, however, proved too obvious or detectable to be used for the elimination of high-ranking Nazi party personnel who had come into disfavor, or of prominent prisoners whose deaths should appear to stem from natural causes. Phenol or gasoline, for instance, left a telltale odor with the corpse. For this reason a number of more subtle methods were devised. One of these was artificial production of septicemia. An intramuscular injection of 1 cc. of pus, containing numerous chains of streptococci, was the first step. The site of injection was usually the inside of the thigh, close to the adductor canal. When an abscess formed it was tapped, and 3 cc. of the creamy pus removed was injected intravenously into the patient's opposite arm. If the patient then died from septicemia, the autopsy proved that death was caused by the same organism that had caused the abscess. These experiments were carried out in many concentration camps. At the Dachau camp the subjects were almost exclusively Polish Catholic priests. However, since this method did not always cause death, sometimes resulting merely in a local abscess, it was considered inefficient, and research was continued with other means but along the same lines.

The final triumph of the part of ktenologic research aimed at finding a method of inconspicuous execution that would produce autopsy findings indicative of death from natural causes was the development of repeated intravenous injections of suspensions of live tubercle bacilli, which brought on acute military tuberculosis within a few weeks. This method was produced by Professor Dr. Heissmeyer, who was one of Dr. Gebhardt's associates at the SS hospital of Hohenlychen. As a means of further camouflage, so that the SS at large would not suspect the purpose of these experiments, the preliminary tests for the efficacy of this method were performed exclusively on children imprisoned in the Neuengamme concentration camp.

For use in "medical" executions of prisoners and of members of the SS and other branches of the German armed forces the use of simple lethal injections, particularly phenol injections, remained the instrument of choice. Whatever methods he used, the physician gradually became the unofficial executioner, for the sake of convenience, informality and relative secrecy. Even on German submarines it was the physician's duty to execute the troublemakers among the crew by lethal injections.

Medical science has for some time been an instrument of military power in that it preserved the health and fighting efficiency of troops. This essentially defensive purpose is not inconsistent with the ethical principles of medicine. In World War I the German empire had enlisted medical science as an instrument of aggressive military power by putting it to use in the development of gas warfare. It was left to the Nazi dictatorship to make medical science into an instrument of political power—a formidable, esential tool in the complete and effective manipulation of totalitarian control. This should be a warning to all civilized nations, and particularly to individuals who are blinded by the "efficiency" of a totalitarian rule, under whatever name.

This entire body of research as reported so far served the master crime to which the Nazi dictatorship was committed—namely, the genocide of non-German peoples and the elimination by killing, in groups or singly, or Germans who were considered useless or disloyal. In effecting the two parts of this program, Himmler demanded and received the co-operation of physicians and of German medical science. The result was a significant advance in the science of killing, or ktenology.

MEDICOMILITARY RESEARCH

Another chapter in Nazi scientific research was that aimed to aid the military forces. Many of these ideas originated with Himmler, who fancied himself a scientist.

When Himmler learned that the cause of death of most SS men on the battlefield was hemorrhage, he instructed Dr. Sigmund Rascher to search for a blood coagulant that might be given before the men went into action. Rasher tested this coagulant when it was developed by clocking the number of drops emanating from freshly cut amputation stumps of living and conscious prisoners at the crematorium of Dachau concentration camp and by shooting Russian prisoners of war through the spleen.

Live dissections were a feature of another experimental study designed to show the effects of explosive decompression.[12-14] A mobile decompression chamber was used. It was found that when subjects were made to descend from altitudes of 40,000 to 60,000 feet without oxygen, severe symptoms of cerebral dysfunction occurred—at first convulsions, then unconsciousness in which the body was hanging limp and later, after wakening, temporary blindness, paralysis or severe confusional twilight states. Rascher, who wanted to find out whether these symptoms were due to anoxic changes or to other causes, did what appeared to him the most simple thing: he placed the subjects of the experiment under water and dissected them while the heart was still beating, demonstrating air embolism in the blood vessels of the heart, liver, chest wall and brain.

Another part of Dr. Rascher's research, carried out in collaboration with Holzloehner and Finke, concerned shock from exposure to cold.[15] It was known that military personnel generally did not survive immersion in the North Sea for more than sixty to a hundred minutes. Rascher therefore attempted to duplicate these conditions at Dachau concentration camp and used about 300 prisoners in experiments on shock from exposure to cold; of these 80 or 90 were killed. (The figures do not include persons killed during mass experiments on exposure to cold outdoors.) In one report on this work Rascher asked permission to shift these experiments from Dachau to Auschwitz, a larger camp where they might cause less disturbance because the subjects shrieked from pain when their extremities froze white. The results, like so many of those obtained in the Nazi research program, are not dependable. In his report Rascher stated that it took from fifty-three to a hundred minutes to kill a human being by immersion in ice water—a time closely in agreement with the known survival period in the North Sea. Inspection of his own experimental records and statements made to me by his close associates showed that it actually took from eighty minutes to five or six hours to kill an undressed person in such a manner, whereas a man in full aviator's dress took six or seven hours to kill. Obviously, Rascher dressed up his findings to forestall criticism, although any scientific man should have known that during actual exposure many other factors, including greater convection of heat due to the motion of water, would affect the time of survival.

Another series of experiments gave results that might have been an important medical contribution if an important lead had not been ignored. The efficacy of various vaccines and drugs against typhus was tested at the Buchenwald and Natzweiler concentration camps. Prevaccinated persons and nonvaccinated controls were injected with live typhus rickettsias, and the death rates of

the two series compared. After a certain number of passages, the Matelska strain of typhus rickettsia proved to become avirulent for man. Instead of seizing upon this as a possibility to develop a live vaccine, the experimenters, including the chief consultant, Professor Gerhard Rose, who should have known better, were merely annoyed at the fact that the controls did not die either, discarded this strain and continued testing their relatively ineffective dead vaccines against a new virulent strain. This incident shows that the basic unconscious motivation and attitude has a great influence in determining the scientist's awareness of the phenomena that pass through his vision.

Sometimes human subjects were used for tests that were totally unnecessary, or whose results could have been predicted by simple chemical experiments. For example, 90 gypsies were given unaltered sea water and sea water whose taste was camouflaged as their sole source of fluid, apparently to test the well known fact that such hypertonic saline solutions given as the only source of supply of fluid will cause severe physical disturbance or death within six to twelve days. These persons were subjected to the tortures of the damned, with death resulting in at least 2 cases.

Heteroplastic transplantation experiments were carried out by Professor Dr. Karl Gebhardt at Himmler's suggestion. While limbs—shoulder, arm or leg—were amputated from live prisoners at Ravensbrueck concentration camp, wrapped in sterile moist dressings and sent by automobile to the SS hospital at Hohenlychen, where Professor Gebhardt busied himself with a futile attempt at heteroplastic transplantation. In the meantime the prisoners deprived of a limb were usually killed by lethal injection.

One would not be dealing with German science if one did not run into manifestations of the collector's spirit. By February, 1942, it was assumed in German scientific circles that the Jewish race was about to be completely exterminated, and alarm was expressed over the fact that only very few specimens of skulls and skeletons of Jews were at the disposal of science. It was therefore proposed that a collection of 150 body casts and skeletons of Jews be preserved for perusal by future students of anthropology. Dr. August Hirt, professor of anatomy at the University of Strassburg, declared himself interested in establishing such a collection at his anatomic institute. He suggested that captured Jewish officers of the Russian armed forces be included, as well as females from Auschwitz concentration camp; that they be brought alive to Natzweiler concentration camp near Strassburg; and that after "their subsequently induced death—care should be taken that the heads not be damaged [sic]" the bodies be turned over to him at the anatomic institute of the University of Strassburg. This was done. The entire collection of bodies and the correspondence pertaining to it fell into the hands of the United States Army.

One of the most revolting experiments was the testing of sulfonamides against gas gangrene by Professor Gebhardt and his collaborators, for which young women captured from the Polish Resistance Movement served as subjects. Necrosis was produced in a muscle of the leg by ligation and the wound was infected with various types of gas-gangrene bacilli; frequently, dirt, pieces of wood and glass splinters were added to the wound. Some of these victims died, and others sustained severe mutilating deformities of the leg.

MOTIVATION

An important feature of the experiments performed in concentration camps is the fact that they not only represented a ruthless and callous pursuit of legitimate scientific goals but also were motivated by rather sinister practical ulterior political and personal purposes, arising out of the requirements and problems of the administration of totalitarian rule.

Why did men like Professor Gebhardt lend themselves to such experiments? The reasons are fairly simple and practical, no surprise to anyone familiar with the evidence of fear, hostility, suspicion, rivalry and intrigue, the fratricidal struggle euphemistically termed the "self-selection of leaders," that went on within the ranks of the ruling Nazi party and the SS. The answer was fairly simple and logical. Dr. Gebhardt performed these experiments to clear himself of the suspicion that he had been contributing to the death of SS General Reinhard ("The Hangman") Heydrich, either negligently or deliberately, by failing to treat his wound infection with sulfonamides. After Heydrich died from gas gangrene, Himmler himself told Dr. Gebhardt that the only way in which he could prove that Heydrich's death was "fate determined" was by carrying out a "large-scale experiment" in prisoners, which would prove or disprove that people died from gas gangrene irrespective of whether they were treated with sulfonamides or not.

Dr. Sigmund Rascher did not become the notorious vivisectionist of Dachau concentration camp and the willing tool of Himmler's research interests until he had been forbidden to use the facilities of the Pathological Institute of the University of Munich because he was suspected of having Communist sympathies. Then he was ready to go all out and to do anything merely to regain acceptance by the Nazi party and the SS.

These cases illustrate a method consciously and methodically used in the SS, an age-old method used by criminal gangs everywhere: that of making suspects of disloyalty clear themselves by participation in a crime that would definitely and irrevocably tie them to the organization. In the SS this process of reinforcement of group cohesion was called "Blutkitt' (blood-cement), a term that Hitler himself is said to have obtained from a book on Genghis Khan in which this technic was emphasized.

The important lesson here is that this motivation, with which one is familiar in ordinary crimes, applies also to war crimes and to ideologically conditioned crimes against humanity—namely, that fear and cowardice, especially fear of punishment or of ostracism by the group, are often more important motives than simple ferocity or aggressiveness.

THE EARLY CHANGE IN MEDICAL ATTITUDES

Whatever proportions these crimes finally assumed, it became evident to all who investigated them that they had started from small beginnings. The beginnings at first were merely a subtle shift in emphasis in the basic attitude of the physicians. It started with the acceptance of the attitude, basic in the euthanasia movement, that there is such a thing as life not worthy to be lived. This attitude in its early stages concerned itself merely with the severely and chronically sick. Gradually the sphere of those to be included in this category was enlarged to encompass the socially unproductive, the ideologically unwanted, the racially unwanted and finally all non-Germans. But it is important to realize that the infinitely small wedged-in level from which this entire trend of mind received its impetus was the attitude toward the nonrehabilitable sick.

It is, therefore, this subtle shift in emphasis of the physicians' attitude that one must thoroughly investigate. It is a recent significant trend in medicine, including psychiatry, to regard prevention as more important than cure. Observation and recognition of early signs and symptoms have become the basis for prevention of further advance of disease.

In looking for these early signs one may well retrace the early steps of propaganda on the part of the Nazis in Germany as well as in the countries that they attempted to gain supporters by means of indoctrination, seduction and propaganda.

THE EXAMPLE OF SUCCESSFUL RESISTANCE BY THE PHYSICIANS OF THE NETHERLANDS

There is no doubt that in Germany itself the first and most effective step of propaganda within the medical profession was the propaganda barrage against the useless, incurably sick described above. Similar, even more subtle efforts were made in some of the occupied countries. It is to the everlasting honor of the medical profession of Holland that they recognized the earliest and most subtle phases of this attempt and rejected it. When Seiss-Inquart, Reich Commissar for the Occupied Netherlands Territories, wanted to draw the Dutch physicians into the orbit of the activities of the German medical profession, he did not tell them "You must send your chronic patients to death factories" or "You must give lethal injections at Government request in your offices," but he couched his order in most careful and superficially acceptable terms. One of the paragraphs in the order of the Reich Commissar of the Netherlands Territories concerning the Netherlands doctors of 19 December 1941 reads as follows: "It is the duty of the doctor, through advice and effort, conscientiously and to his best ability, to assist as helper the person entrusted to his care in the maintenance, improvement and re-establishment of his vitality, physical efficiency and health. The accomplishment of this duty is a public task." [16] The physicians of Holland rejected this order unanimously because they saw what it actually meant—namely, the concentration of their efforts on mere rehabilitation of the sick for useful labor, and abolition of medical secrecy. Although on the surface the new order appeared not too grossly unacceptable, the Dutch physicians decided that it is the first, although slight, step away from principle that is the most important one. The Dutch physicians declared that they would not obey this order. When Seiss-Inquart threatened them with revocation of their licenses, they returned their licenses, removed their shingles and, while seeing their own patients secretly, no longer wrote death or birth certificates. Seiss-Inquart retraced his steps and tried to cajole them—still to no effect. Then he arrested 100 Dutch physicians and sent them to concentration camps. The medical profession remained adamant and quietly took care of their widows and orphans, but would not give in. Thus it came about that not a single euthanasia or non-therapeutic sterilization was recommended or participated in by any Dutch physician. They had the foresight to resist before the first step was taken, and they acted unanimously and won out in the end. It is obvious that if the medical profession of a small nation under the conqueror's heel could resist so effectively the German

medical profession could likewise have resisted had they not taken the fatal first step. It is the first seemingly innocent step away from principle that frequently decides a career of crime. Corrosion begins in microscopic proportions.

THE SITUATION IN THE UNITED STATES

The question that this fact prompts is whether there are any danger signs that American physicians have also been infected with Hegelian, cold-blooded, utilitarian philosophy and whether early traces of it can be detected in their medical thinking that may make them vulnerable to departures of the type that occurred in Germany. Basic attitudes must be examined dispassionately. The original concept of medicine and nursing was not based on any rational or feasible likelihood that they could actually cure and restore but rather on an essentially maternal or religious idea. The Good Samaritan had no thought of nor did he actually care whether he could restore working capacity. He was merely motivated by the compassion in alleviating suffering. Bernal[17] states that prior to the advent of scientific medicine, the physician's main function was to give hope to the patient and to relieve his relatives of responsibility. Gradually, in all civilized countries, medicine has moved away from this position, strangely enough in direct proportion to man's actual ability to perform feats that would have been plain miracles in days of old. However, with this increased efficiency based on scientific development went a subtle change in attitude. Physicians have become dangerously close to being mere technicians of rehabilitation. This essentially Hegelian rational attitude has led them to make certain distinctions in the handling of acute and chronic diseases. The patient with the latter carries an obvious stigma as the one less likely to be fully rehabilitable for social usefulness. In an increasingly utilitarian society these patients are being looked down upon with increasing definiteness as unwanted ballast. A certain amount of rather open contempt for the people who cannot be rehabilitated with present knowledge has developed. This is probably due to a good deal of unconscious hostility, because these people for whom there seem to be no effective remedies have become a threat to newly acquired delusions of omnipotence.

Hospitals like to limit themselves to the care of patients who can be fully rehabilitated, and the patient whose full rehabilitation is unlikely finds himself, at least in the best and most advanced centers of healing, as a second-class patient faced with a reluctance on the part of both the visiting and the house staff to suggest and apply therapeutic procedures that are not likely to bring about immediately striking results in terms of recovery. I wish to emphasize that this point of view did not arise primarily within the medical profession, which has always been outstanding in a highly competitive economic society for giving freely and unstintingly of its time and efforts, but was imposed by the shortage of funds available, both private and public. From the attitude of easing patients with chronic diseases away from the doors of the best types of treatment facilities available to the actual dispatching of such patients to killing centers is a long but nevertheless logical step. Resources for the so-called incurable patients have recently become practically unavailable.

There has never in history been a shortage of money for the development and manufacture of weapons of war; there is and should be none now. The disproportion of monetary support for war and that available for healing and care is an anachronism in an era that has been described as the "enlightened age of the common man" by some observers. The comparable cost of jet planes and hospital beds is too obvious for any excuse to be found for a shortage of the latter. I trust that these remarks will not be misunderstood. I believe that armament, including jet planes, is vital for the security of the republic, but adequate maintenance of standards of health and alleviation of suffering are equally vital, both from a practical point of view and from that of morale. All who took part in induction-board examinations during the war realize that the maintenance and development of national health is of as vital importance as the maintenance and development of armament.

The trend of development in the facilities available for the chronically ill outlined above will not necessarily be altered by public or state medicine. With provision of public funds in any setting of public activity the question is bound to come up, "Is it worth while to spend a certain amount of effort to restore a certain type of patient?" This rationalistic point of view has insidiously crept into the motivation of medical effort, supplanting the old Hippocratic point of view. In emergency situations, military or otherwise, such grading of effort may be pardonable. But doctors must beware lest such attitudes creep into the civilian public administration of medicine entirely outside emergency situations, because once such considerations are at all admitted, the more often and the more definitely the question is going to be asked, "Is it worth while to do this or that for this type of patient?" Evidence of the existence of such an attitude stared at me from a report on the activities of a leading public hospital unit, which stated rather proudly that certain treatments were given only when they appeared promising: "Our facilities are such that a case load of 20 patients is regularly carried. . . in selecting cases for treatment careful consideration is given to the prognostic criteria, and in no instance have we instituted treatment merely to satisfy relatives or our own consciences." If only those whose treatment is worth while in terms of prognosis are to be treated, what about the other ones? The doubtful patients are the ones whose recovery appears unlikely, but frequently if treated energetically, they surprise the best prognosticators. And what shall be done during that long time lag after the disease has been called incurable and the time of death and autopsy? It is that period during which it is most difficult to find hospitals and other therapeutic organizations for the welfare and alleviation of suffering of the patient.

Under all forms of dictatorship the dictating bodies or individuals claim that all that is done is being done for the best of the people as a whole, and that for that reason they look at health merely in terms of utility, efficiency and productivity. It is natural in such a setting that eventually Hegel's principle tat "what is useful is good" wins our completely. The killing center is the *reductio ad absurdum* of all health planning based only on rational principles an economy and not on humane compassion and divine law. To be sure, American physicians are still far from the point of thinking of killing centers, but they have arrived at a danger point in thinking, at which likelihood of full rehabilitation is considered a factor that should determine the amount of time, effort and cost to be devoted to a particular type of patient on the part of the social body upon which this decision rests. At this point Americans should remember that the enormity of a euthanasia movement is present in their own midst. To the psychiatrist it is obvious that this represents the eruption of unconscious aggression on the part of certain administrators alluded to above, as well as on the part of relatives who have been understandably frustrated by the tragedy of illness in its close interaction upon their own lives. The hostility of a father erupting against his feebleminded son is understandable and should be considered from the psychiatric point of view, but it certainly should not influence social thinking. The development of effective analgesics and pain-relieving operations has taken even the last rationalization away from the supporters of euthanasia.

The case, therefore, that I should like to make is that American medicine must realize where it stands in its fundamental premises. There can be no doubt that in a subtle way the Hegelian premise of "what is useful is right" has infected society, including the medical portion. Physicians must return to the older premises, which were the emotional foundation and driving force of an amazingly successful quest to increase powers of healing and which are bound to carry them still farther if they are not held down to earth by the pernicious attitudes of an overdone practical realism.

What occurred in Germany may have been the inexorable historic progression that the Greek historians have described as the law of the fall of civilizations and that Toynbee[18] has convincingly confirmed—namely, that there is a logical sequence from Koros to Hybris to Ate, which means from surefeit to disdainful arrogance to disaster, the surfeit being increased scientific and practical accomplishments, which, however, brought about an inclination to throw away the old motivations and values by disdainful arrogant pride in practical efficiency. Moral and physical disaster is the inevitable consequence.

Fortunately, there are developments in this democratic society that counteract these trends. Notable among them are the societies of patients afflicted with various chronic diseases that have sprung up and are dedicating themselves to guidance and information for their fellow sufferers and for the support and stimulation of medical research. Among the earliest was the mental-hygiene movement, founded by a former patient with mental disease. Then came the National Foundation for Infantile Paralysis, the tuberculosis societies, the American Epilepsy League, the National Association to Control Epilepsy, the American Cancer Society, The American Heart Association, "Alcoholics Anonymous" and, most recently the National Multiple Sclerosis Society. All these societies, which are co-ordinated with special medical societies and which received inspiration and guidance from outstanding physicians, are having an extremely wholesome effect in introducing fresh motivating power into the ivory towers of academic medicine. It is indeed interesting and an assertion of democratic vitality that these societies are activated by and for people suffering from illnesses who, under certain dictatorships, would have been slated for euthanasia.

It is thus that these new societies have taken over one of the ancient functions of medicine—namely, to give hope to the pa-

tient and to relieve his relatives. These societies need the whole-hearted support of the medical profession. Unfortunately, this support is by no means yet unanimous. A distinguished physician, investigator and teacher at an outstanding university recently told me that he was opposed to these special societies and clinics because they had nothing to offer to the patient. It would be better to wait until someone made a discovery accidentally and then start clinics. It is my opinion, however, that one cannot wait for that. The stimulus supplied by these societies is necessary to give stimulus both to public demand and to academic medicine, which at times grows stale and unproductive even in its most outstanding centers, and whose existence did nothing to prevent the executioner from having logic on his side in Germany.

Another element of this free democratic society and enterprise that has been a stimulus to new developments is the pharmaceutical industry, which, with great vision, has invested considerable effort in the sponsorship of new research.

Dictatorships can be indeed defined as systems in which there is a prevalence of thinking in destructive rather than in ameliorative terms in dealing with social problems. The ease with which destruction of life is advocated for those considered either socially useless or socially disturbing instead of educational or ameliorative measures may be the first danger sign of loss of creative liberty in thinking, which is the hallmark of democratic society. All destructiveness ultimately leads to self-destruction; the fate of the SS and of Nazi Germany is an eloquent example. The destructive principle, once unleashed, is bound to engulf the whole personality and to occupy all its relationships. Destructive urges and destructive concepts arising therefrom cannot remain limited or focused upon one subject or several subjects alone, but must inevitably spread and be directed against one's entire surrounding world, including one's own group and ultimately the self. The ameliorative point of view maintained in relation to all others is the only real means of self-preservation.

A most important need in this country is for the development of active and alert hospital centers for the treatment of chronic illnesses. They must have active staffs similar to those of the hospitals for acute illnesses, and these hospitals must be fundamentally different from the custodial repositories for derelicts, of which there are too many in existence today. Only thus can one give the right answer to divine scrutiny: Yes, we are our brothers' keepers.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. EAST. I thank the Chair.

I should like to take a few minutes to indicate my concerns about this proposed treaty. I deeply respect the President's position on it, and at the outset of my remarks I concede that it is one of those issues about which fair and reasonable minds could differ. I would like briefly to outline my objections to the treaty. As it currently stands, I will have to vote in opposition to it.

I wish to point out that my predecessor, whose seat I now hold, Senator Ervin of North Carolina, when he was in the Senate, was a very strong opponent of this treaty, and so at least I feel, if nothing else, I am carrying on in a strong North Carolina tradition.

I shall quickly state my concerns with the treaty. Some of these points have already been made by others.

First of all, I think to overly legalize it is to miss the political implications. And that is exceedingly important in the intense political atmosphere in which this treaty, if ratified, will be released. It clearly gives sovereignty to the International Court of Justice over American citizenry.

The International Court of Justice that sits in the Hague is hostile to Western values, Western traditions, Western culture. It is loaded with anti-Western, anti-American, Third World nations. So the political implications therein are ominous as to how this treaty might be used against our own best self-interests politically and those of our allies.

Second, it is interesting to note in the treaty that the categories defined as genocidal include national, ethnical, religious, or racial groups but does not include political. Therefore, the Soviet Union and other countries would very cleverly argue through this loophole that it does not apply to their genocide in Afghanistan or in Cambodia.

It is interesting to note that 90 nations during the 1970's ratified this treaty calmly and without reflection while more than 2 million people in Cambodia were subject to genocide. Curious, is it not? Well, it was simply looked upon as political liquidation, not national, ethnic, racial, or religious.

Strange, is it not, that the word "political" is not in there, indicating that the Soviet Union and other Communist bloc countries would simply define their genocidal tendencies in Afghanistan or Cambodia as purely political, not national, ethnical, racial, or religious?

It is a gigantic loophole through which the Communist juggernaut will walk with impunity.

The very point I raise is that Israel ratified this treaty back in 1950, and with good reason, in response to the Holocaust. The great political cancer of the 20th century, along with the gulag, is the Holocaust.

I remind our friends, they and I among them supporters of Israel, that in the intense political climate of our time, of 1984, not 1948—this is the era of George Orwell now—the treaty would be used as a club against the State of Israel probably more than any other country in the world today, ironically. George Orwell wrote "1984" in 1948, the year treaty was produced. In the year of our Lord 1984, which George Orwell named his book about double-speak, it will be used against Israel probably more than any other country.

I had the pleasure of hearing Norman Podhoretz, the editor of Commonweal magazine, say that if you check the U.N. Assembly agenda in terms of the amount of time they spend condemning Israel versus the rest of the world's problems, it is appalling.

If we ratify this treaty, it gives it a dignity, and it will be an additional club by which the United Nations, the Soviet Union, and the Third World bloc, which is so vehemently, virulently anti-Israel, will use it further to club Israel or to say, "You are engaging in genocide against the PLO or this group or that."

So the great irony of the thing is that this treaty, which took place back at a time to stop holocausts—the horrible type that took place at Buchen-

wald, Dachau, and Auschwitz—would be used today to justify the gulags and would be used as a club against the very nations that it was originally designed to protect; namely, the people of Israel and the Jewish people in the world at large. That deep sensitivity to their concern I fully and totally share.

My fourth point refers to an article by George Will in the Washington Post of September 20, 1984, which the Senator from South Carolina [Mr. THURMOND] has already entered into the RECORD. I shall not proceed to clutter the RECORD with it further, but Mr. Will calls it purely posturing. He calls it a gesture. He says:

> No, the treaty would be just another pretty patch on the quilt of hypocrisy typified by the Helsinki process, in which we solemnly discuss the rights of trade unions and journalists in the Soviet bloc, where there are no trade, unions or journalists. Under the genocide treaty the United States would solemnly commit itself to act against certain crimes; then, by not acting, the United States would implicitly acquit the Soviet regime of the crimes.

It would give them a false sense of security. It is purely posturing. It is purely gesturing. But it would not really be used by the West; it would be used by the Soviet Union and the Third World. It would be used—once we, as leading nation in the free world, give it approval—as a club by which to beat our allies, such as Israel, and ourselves, in terms of certain kinds of conduct.

It is purely cosmetic. We ought not do things that are purely cosmetic, even though the label is good, and we should not do it in haste. Not all things done in the name of national defense necessarily help the national defense. Not all things done in the name of anticommunism are necessarily genuinely anti-Communist. Not all things done in the name of the civil rights movement genuinely help civil rights. Not all things done in the name of fighting genocide necessarily fight genocide.

We live in a period in which the media, as Solzhenitsyn said, is hasty and superficial. A minute or two, at most, at night, on the major networks, and the label sounds good. "You are opposed to genocide, are you not? Of course."

So those who speak out against it, I realize, take great political risks; but I submit that this treaty is not genuinely going to help fight genocide. Ironically, it may be turned against those who are genuinely fighting it. It is purely cosmetic. it will give a false sense of security.

I recommend that the Senate take two courses of action: either lay it aside until it can deal with it in a more dispassionate moment than in the closing days of this session or reject it. I do not think there is the time available to give it the careful and thoughtful and thorough examination it needs.

So, as it now stands, Mr. President, I must reluctantly say to my colleagues that I will vote against ratification, and I urge them to do likewise.

I yield the floor.

Mr. BOSCHWITZ. Mr. President, I thank the Senator from North Carolina and the Senator from Idaho for their remarks. I have heard a number of those arguments before and have talked to the Senator from Idaho about some of them.

I do know that there have been a dozen hearings over the years with respect to this. There were rather complete hearings in 1981. Senator THURMOND testified, as did the Liberty Lobby, the American Bar Association, and others.

There was rather limited testimony most recently because the only group that had not testified on the convention was the administration. So only administration witnesses were thought to be necessary this time around.

My friend from Idaho points out that no one seeks to impose the Genocide Convention. I point out to him that we will be unable, not being a signatory, to impose the Genocide Convention. If we indeed are the leaders of the free world and the countries that have conscience in these matters, it will be up to us to bring up the issue and, therefore, unless we ratify this convention we will continue to be unable to do so.

I also note my friend from Idaho made reference to a group entitled "Jews for Morality." I am not familiar with that group and, while I note their opposition to this treaty, their opposition really stands alone in the whole bevy of groups in the Jewish community who support it. Every major group in the Jewish community supports it. This group indeed may be an exception but I must tell the distinguished Senator from Idaho I would not classify them as a major group.

Mr. President, it is with a great deal of anticipation and a sense of history that I rise in the Senate and speak about the Genocide Convention as the Senate does indeed take up that Convention.

The anticipation comes from the fact that when the State Department on September 5 announced President Reagan's support for the Convention, the chances were greatly increased that at long last the Senate might finally give its advice and consent to the International Convention on the Prevention and Punishment of the Crime of Genocide.

The sense of history is not only because it has been so many years since the Genocide Convention was first considered by the Senate Foreign Relations Committee in 1950, but I also speak from a sense of personal history.

Most of my family were victims of the genocide in the Second World War. They were among the more than 6 million Jews who perished in the Nazi Holocaust against the Jewish people. It was only through the foresight of my father who decided to leave Germany in the very early days of Hitler's rise to power that we ourselves managed not to be among that number. I was a young boy then. Today, as a U.S. Senator, I stand here as the floor manager for the Convention. It is a poignant moment for me. It is another demonstration of the wonderful openness of our American democracy.

It would be highly meaningful, not only personally, but for this Senate to ratify the Genocide Convention now.

This session of Congress is in its final hours. We have had exhausting sessions but really we must take time to remember the dead and try to do what we can to help protect the living.

Saturday was Yom Kippur, the Day of Atonement, which to most Jews is the most holy day on the Jewish calendar, and a day of fasting as well. It also was a day that in synagogues throughout the world, prayers of remembrance were said for the victims of the genocide of the Second World War. Therefore, it would be all the more meaningful and symbolic if we Members of the Senate, gathered here in this Chamber of our democracy, can join today in approving the Genocide Convention.

We all realize, of course, that ratification will not prevent genocides in the future, or undo those of the past which affected not only Jews but also Armenians and Gypsies and Ukrainians and, more recently, the Cambodians.

It is important, however, that we underscore our oppositon and abhorrence of genocide, of murder on a mass scale intended to wipe out an entire people.

It is important that we try to strengthen the concept and rule of international law. I will not take the time of the Senate to go into detail on this or the history of the convention. The ground is very well covered by the speech of the chairman of our committee, Senator PERCY, who cannot be here today.

As Senator PERCY notes, "the significance of this convention is not merely symbolic, it forms part of a general network of treaties which declare certain actions to be international crimes, justifiying concerted action by all countries to bring the perpetrators to trial."

Mr. President, I know that there are Members who have understandings and reservations about the convention. I also understand that there has been a great deal of emotional reaction stirred up in certain quarters.

But I really believe that the expressed concerns that the convention will result in the United States being put on trial in the world court or our Constitution being overridden are not well founded. This treaty has been examined closely over the years by a succession of administrations. It is strongly supported by the American Bar Association.

It has been blocked on the other hand, for 35 years. Today, it is time that we finally act.

In the past few days, the Senate has been less than shining in the hours of wrangles over amendments to the continuing resolution. We have been bogged down in trivia and time-consuming maneuvers. The image of the Senate and Congress has been tarnished.

Approval of the Genocide Convention will not only redeem us, Mr. President, but show that we can rise to the occasion with a most meaningful convention that will also lift us in the eyes of the world. It is a good and it is a right thing to do. Therefore, I urge the Senate move expeditiously to provide its concept.

Mr. PROXMIRE. Mr. President, will the manager of the bill yield.

Mr. BOSCHWITZ. I yield.

Mr. PROXMIRE. Mr. President, I first wish to thank my good friend from Minnesota for a moving statement.

It is hard for anyone to realize what is at stake here. The Senator said that some of his family had been destroyed, that terrible heartbreaking tragedy that none of us can really understand unless we have had the kind of searing, traumatic, personal experience that the distinguished Senator from Minnesota has gone through, when you think that they were killed not because of any crime they committed or was even alleged against them. They were killed why? Because they were Jewish, because they were Jews, not because they had done anything that would violate the law.

They were killed not by a terrorist group or by some mindless drug addict. They were killed by the deliberate, planned program of a government of Adolf Hitler.

I wish to commend the distinguished Senator, and I think it is very fitting that he should be managing this bill because it is time that we realize that we are not talking about some vague theory or some treaty that will be put on the shelves and forgotten. This is a protest of the most tangible and real and genuine protest, the most effective protest that we can make against what Hitler did in Germany and against the genocides that have occurred since then.

So I thank my good friend from Minnesota for a statement which I hope Senators will consider and dwell on and understand because I say this goes far beyond any technical defense we can make of the treaty or any exposition that we could make of its details. As the Senator said, it has been examined by many, many experts and many administrations and found to be sound, and I thank the Senator.

Mr. BOSCHWITZ. I thank the senior Senator from Wisconsin. I yield the floor.

(By request of Mr. BOSCHWITZ, the following statement was ordered to be printed in the RECORD:)

● Mr. PERCY. Mr. President, this is a significant day in the history of the U.S. Senate. We now have a real opportunity to demonstrate in the clearest fashion that, indeed, the Senate is the greatest deliberative body in the world. We can do today what the Senate has failed to do for 35 years—advise and consent to ratification of the Genocide Convention.

The Genocide Convention or, as it is formally known, the International Convention on the Prevention and Punishment of the Crime of Genocide, was drafted in response to the Holocaust of World War II—the attempted wholesale extermination of an entire ethnic group—European Jewry. It was negotiated at the United Nations in 1947-48 and signed by the United States on December 11, 1948. The United States was a leading advocate of the treaty.

The word genocide was developed in 1944 by a noted international jurist, Raphael Lemkin. Lemkin was a Polish Jew who immigrated to the United States in 1941 and subsequently served as an adviser to Robert Jackson, the U.S. Prosecutor at the Nuremberg war crime trials. Forty-nine members of Raphael Lemkin's family were victims of Nazi genocide. He comprehended in the most personal way the enormous evil that sets genocide apart from other horrible crimes. It is murder on a mass scale intended to extinguish an entire people. It is a crime against civilization itself, a crime against humanity.

In 1949, President Truman submitted the Genocide Convention to the Senate for its consideration. The treaty was referred to the Foreign Relations Committee which in 1950 appointed a special subcommittee to review it. The subcommittee recommended that same year that the Genocide Convention be reported by the committee. However, no action was taken at that time.

Unfortunately, the Genocide Convention became caught up in the postwar debate about the treaty power and the authority of the Federal Government to make law by treaty, the so-called Bricker amendment debate. These questions have long since been resolved.

The treaty remained dormant in the Senate until the early 1970's when the Senate and President Nixon shared a renewed interest in it. At the same time, the American people and the Congress showed a growing interest in the relationship between the conduct of American foreign policy and concern for internationally recognized human rights. During that period, the Foreign Relations Committee held additional hearings on the Genocide Convention and examined in great detail every possible argument pro and con about the Genocide Convention. Throughout this period, a sizeable majority of the Foreign Relations Committee supported ratification of the Genocide Convention.

A very significant development in the long history of this treaty occurred in 1976 when the American Bar Association reversed its previous position and came out strongly in favor of the Genocide Convention. Backed by the ABA's support, the Foreign Relations Committee again urged the Senate to approve the Genocide Convention but no action was taken. In fact, the convention has been debated in the Senate at length only once, in 1974, when two attempts to break a filibuster mustered 55 votes, a majority of the Senate, but not enough for the Senate to proceed to a vote on the treaty.

The Senate acts on the convention at this time following President Reagan's decision, after careful review, to support ratification. He did so provided that the Senate approved as a part of the resolution of ratification the three understandings and one declaration recommended by the Foreign Relations Committee in its current report on the treaty. These are same understandings and declaration recommended by the committee in 1971, 1973, and 1976 and are intended to assure that the convention does not undercut the requirements and safeguards of our Constitution and Bill of Rights. I applaud the President's decision and believe that if we approve the Genocide Convention now, it will be an important and lasting accomplishment for the Senate and the Reagan administration.

In recent weeks, much has been written and said about the Genocide Convention. Some people acting out of sincere belief have argued that the Genocide Convention is unconstitutional, that it undermines the Bill of Rights, that it will place Americans in jeopardy by requiring their extradition to foreign countries to stand trial without due process of law. Certainly, if these allegations were true, it would be unthinkable that this Senator or the Senate as a whole would ever support such a treaty. But the allegations are not true. They are not backed up by one shred of evidence demonstrating that the Genocide Convention will subvert our American system of law and justice.

In this regard, I ask my colleagues to take into consideration the strong support of the American Bar Association for the Genocide Convention to which I have already made reference. We all know that the ABA is one of the most respected organizations in the United States and certainly is our preeminent legal association. The ABA has supported and continues to support the Genocide Convention with the understandings and declaration reported by the Foreign Relations Committee. I submit for the RECORD a copy of the testimony of the ABA representatives at the Foreign Relations Committee's 1981 hearing on the convention, to be printed in the RECORD at the conclusion of my remarks.

I urge my colleagues to read this testimony and the report of the Foreign Relations Committee on the Genocide Convention. The report and the ABA testimony rebut point by point the arguments that have been made against the Genocide Convention. I believe this is done so convincingly that it answers all the most frequently asked questions about the purpose and effect of the Genocide Convention.

It has been said that the Genocide Convention is of enormous symbolic value as a statement by the nations of the world that those who perpetuate genocide must not be allowed sanctuary anywhere. I agree with this. Yet, the significance of this convention is not merely symbolic. It forms part of a general network of treaties which declare certain actions to be international crimes, justifying concerted action by all countries to bring the perpetrators to trial. However new and untried this concept may have seemed to the Senate in 1949, there is nothing unusual about it today. During the summer of 1981, for example, the Senate approved by a vote of 98–0 two treaties which provide for just such international action, the first against those who take hostages for political purposes, and the second against those who divert nuclear materials for unauthorized use.

Another such treaty directed against those who seize diplomats for political purposes provided an important basis for our case against the Government of Iran, and added to the wide condemnation of the Khomeini government by the rest of the world for the holding of American hostages. If we can agree to condemn and seek to punish such violators of international law, why should we not agree to treat the perpetrators of genocide in the same manner?

Mr. President, ratification of the Genocide Convention by the United States may be a very small step in the scheme of things, but it does no credit to a great nation like the United States to hesitate in taking a small step forward for reasons which are not sustained by a serious consideration of American interests in the world. As the committee report notes:

Philosophical, moral, and constitutional questions have been raised [about the Convention] which go far beyond this modest step and probe man's relationship to his fellow man and the responsibilities of governments to protect the rights of their citizens. These questions appear inherent in the area of human rights treaties and legislation, and it is good that they are raised, because they serve to lift our sights to what is really at issue here, an attempt to curb the excesses of mankind. As our planet becomes more crowded, man's behavior towards his fellows must be governed by standards ever higher and more humane. This treaty seeks to set a higher standard of international morality and should be judged on that basis.

I urge the Senate to advise and consent to ratification of the Genocide Convention.

The testimony follows:

STATEMENT OF JOHN NORTON MOORE, VICE CHAIRMAN, DIVISION OF PUBLIC INTERNATIONAL LAW, SECTION OF INTERNATIONAL LAW

Mr. Chairman and Members of the Committee: My name is John Norton Moore, and I am honored to accept your invitation, on behalf of the American Bar Association President, to express the support of the 285,000-member ABA for immediate Senate advice and consent to ratification of the Convention on the Prevention and Punishment of the Crime of Genocide.

I appear today as the Divisional Vice Chairman for Public International Law of the ABA's Section of International Law. I am the Walter Brown Professor of Law at the University of Virginia and direct that university's Center for Law and National Security. Accompanying me are two distinguished international law scholars and recognized experts on the Genocide Convention.

The Honorable Thomas Buergenthal is Dean of the Washington College of Law of the American University, is a Judge on the Inter-American Court of Human Rights and serves as Chairman of the International Law Section's Committee on International Human Rights.

Mr. Bruno Bitker is a lawyer in Milwaukee, Wisconsin and is a member, and past chairman, of the Assocation's Standing Committee on World Order Under Law. Mr. Bitker is a leader, both within and without the Association, in the 32-year effort to ratify the Genocide Convention, and testified to that effect for the ABA before this Committee in 1977.

INTEREST OF THE AMERICAN BAR ASSOCIATION

Mr. Chairman, the ABA has concerned itself with this treaty for nearly as long as the Convention has been before the Senate. Some three months after the Convention was transmitted by President Truman to the Senate on June 16, 1949, for its advice and consent, the Association's House of Delegates resolved to oppose ratification of the treaty "as submitted" by the President. For over 20 years thereafter, various Association entities continued to study the constitutional issues raised by the Convention; a resolution in support of ratification was defeated in February 1970 by a 130–126 vote of our House of Delegates.

Subsequently, various ABA groups reviewed the understandings and declaration which were the basis for this Committee's approval of the Convention by voice early in 1973. These three understandings and a declaration fully resolved the constitutional concerns of the ABA. Consequently, in February 1976, the Association's House of Delegates by voice vote approved a resolution favoring ratification with the understandings and declaration recommended by this Committee.

Ratification of the Genocide Convention is now one of the legislative priorities of the ABA President, and as such is one of a handful of legislative goals of the highest importance to the Association. As Mr. Bitker told this Committee in 1977, "[C]ertainly nothing is more basic to the obligation the United States assumed when it ratified the U.N. Charter, than to outlaw mass murder of a national, ethnical, racial or religious group, as such, whether committed in time of peace or war . . . [United States'] failure to ratify borders on constituting a national disgrace." We urge this Committee, the Senate and our Government to end this period of national disgrace by promptly ratifying this Convention.

As lawyers, we think the legal profession has a unique role to play in this ratification process. In a May 1977 address to the 20th anniversary meeting of the Inter-American Bar Foundation, then—ABA President William B. Spann observed that the Association's Code of Professional Responsibility "makes it quite clear that a lawyer should not regard himself simply as a functionary of the legal system but as one who must defend and develop it." [1] There is no more basic human right for which the legal system was established to defend, than the right of a human to live.

There are countries throughout the world whose governmental recognition of this right could be questioned. Mass slaughter of hundreds of thousands of citizens from identifiable ethnic or religious groups has repulsed the world in recent years. These events were evidence that genocide is a crime against mankind and one threatening the peace and security of the world, that it can only be prevented and punished through enforcement of recognized international law, and that the United States should be the leading force in the world officially to condemn this crime. To state our opposition to genocide, but to refrain from actively seeking to prevent it, is merely to sanction its perpetuation.

In February 1976 the ABA's policy-making House of Delegates adopted the following resolution by voice vote:

Be It Resolved, That the American Bar Association favors the accession of the United States to the United Nations Convention on the Prevention and Punishment of the Crime of Genocide with the following Understandings and Declaration which have been approved by the Senate Committee on Foreign Relations: [2]

1. That the U.S. Government understands and construes the words "intent to destroy, in whole or in part, a national, ethnical, racial or religious group as such" appearing in article II to mean the intent to destroy a national, ethnical, racial or religious group by the acts specified in article II in such a

[2] International Convention on the Prevention and Punishment of the Crime of Genocide, Report on Executive O, 81st Cong., 1st sess. (Ex. Report No. 93-5; Mar. 6, 1973).

manner as to affect a substantial part of the group concerned.

2. That the U.S. Government understands and construes the words "mental harm" appearing in article II(b) of this Convention to mean permanent impairment of mental faculties.

3. That the U.S. Government understands and construes article VI of the Convention in accordance with the agreed language of the Report of the Legal Committees of the United Nations General Assembly that nothing in article VI shall affect the right of any state to bring to trial before its own tribunals of any of its nationals for acts committed outside the state.

4. That the U.S. Government declares that it will not deposit its instrument of ratification until after the implementing legislation referred to in article V has been enacted.

Be It Further Resolved, That the President of the American Bar Association or his designee is hereby authorized to present the views of the Association as herein expressed before the appropriate committees of the Congress and other agencies of the Government of the United States.

The American Bar Association, through adoption of this policy, agrees with the Departments of State and Justice that the Convention, along with the recommended understandings and declaration, pose no constitutional obstacles to ratification. Were this not the case, the first stated purpose of the ABA—". . . to uphold and defend the Constitution of the United States . . ."—would prohibit us from supporting ratification, much less supporting it as strongly as we do.

WHAT THE CONVENTION PROVIDES—OBLIGATIONS OF THE UNITED STATES

The Genocide Convention has established within the body of international law the intentional crime of mass destruction of people—of the whole or substantial part of a national, ethnical, racial or religious group. Applicable in peacetime and during war, genocidal acts include intentional killing, causing of serious bodily or mental harm (understood by the United States to mean "permanent impairment of mental faculties"), inflicting living conditions so adverse as to intend to cause the group's destruction, imposing measures intended to prevent births within the group—thus destroying the group, and forcibly transferring children of the group to another group. Punishable acts include the actual commission of genocide, as well as conspiracy in, or direct and public incitement of, or attempt to commit, genocide, or complicity in committing genocide.

Persons charged with any of these offenses, whether public officials or private citizens, shall be tried in the state where the offense was alleged to have occurred or before an international tribunal. No such international tribunal of competent jurisdiction exists; if one were established, the United States Congress would have to approve submitting to the new court's jurisdiction. One of the understandings approved by the Foreign Relations Committee, and endorsed by the ABA, would make clear that U.S. citizens could be tried in U.S. courts for genocidal acts committed abroad. Furthermore, while the Convention provides that contracting parties shall grant extradition requests "in accordance with their laws and treaties in force" (Article VII), the Convention itself is not an extradition treaty. Since no current extradition treaties to which the U.S. is a party cover the crime of genocide, the U.S. would not be obligated to extradite U.S. citizens to a foreign country. Any future extradition treaty which might include the crime of genocide would, of course, be subject to the advise and consent power of the Senate. Each country would establish its own penalties to be imposed for convictions of the enumerated crimes.

A contracting party to the Convention may request appropriate U.N. entities to take action to assist in preventing or suppressing genocide (Article VIII). Also, the contracting parties will submit to the International Court of Justice disputes concerning the "interpretation, application or fulfillment" of the terms of the Convention (Article IX). This provision does not fall under the Connally amendment, by which the U.S. determines which cases are within the domestic juridiction of the U.S., and thus outside the court's jurisdiction. However, provisions comparable to Article IX for resolution of disputes by the International Court of Justice are included in such treaties as the Japanese Peace Treaty and the Antarctic Treaty, to which the U.S. is a party.

Finally, the United States has declared that it will not deposit its instrument of ratification following Senate approval until after enactment by Congress of implementing legislation.[3] Thus, the Genocide Convention is not a self-executing treaty, but rather one requiring the usual legislative approval of both Houses of Congress and the President.

Over the lengthy period of congressional debate over the meaning and possible adverse effects of the Convention's provisions, a number of recurring questions have been raised. For the benefit of the Committee, we attach to this statement nine of the most frequently asked questions, and our responses. To summarize the attached responses, the ABA simply finds no responsible support for various constitutional questions raised against the Convention. To suggest that the protection against mass murder of a selected people is an improper subject of international concern, and thus without this nation's treaty power, is nonsense. Similarly, other legal issues concerning, for instance, the effect of voluntary birth control, the acts of soldiers in wartime and the "incitement" language of Article III all have long ago been resolved in the context of U.S. domestic law or international law.

The fact that these legal issues are without merit is perhaps best substantiated by the testimony before this Committee in 1970 by then-Assistant Attorney General William H. Rehnquist:

"In 1950 some of the questions concerning Federal jurisdiction and the treaty power were considered somewhat novel. However, developments in the intervening years—the extensive use of the treaty power and the growth of Federal criminal jurisdiction—have, it seems, illuminated both these areas to the point where I believe I can safely say that the questions before the Committee and the Senate are more matters of policy than questions of legal power. Other witnesses in support of this treaty have, I believe, made this clear."

[3] See Ex. Report No. 93-5 for the text of proposed implementing legislation, pp. 21-23, 93d Cong., 1st sess. (Mar. 6, 1973).

THE GENOCIDE CONVENTION SHOULD BE RATIFIED NOW

The United States should ratify the Genocide Convention immediately because such an act would be a timely expression of this nation's unalterable commitment to the rule of law in international affairs, because it would strengthen our hand in the current conduct of foreign relations with allies and adversaries alike, and because it would place us in the company of 89 other nations—where we should have been long ago—in expressing our collective national repugnance to mass acts of murder of unspeakable proportions.

As a member nation of the United Nations, and as a signatory to the Helsinki Accords, among other agreements, the United States has demonstrated its leadership in seeking to bring more order to the peaceful relations among nations. The essence of this commitment is our devotion to an ordered existence governed by universally accepted rules and procedures—the rule of law. Since our own freedoms are assured through adherence to the rule of law—a concept by no means universally accepted throughout the world—our sovereignty is that much more enhanced through our efforts to expand the primary of the rule of law in our relations with other nations. Ratification of the Genocide Convention furthers this cause.

It is clear to most observers that the Soviet Union and other nations with less regard for the type of freedoms we take for granted pose the most serious threat to our national interests. As Dean Buergenthal recently stated, the threat of the Soviet Union "is not only military or subversive, it is also ideological and it must therefore be confronted on the ideological level as well . . . A sound human rights policy provides the U.S. with an ideology that distinguishes us most clearly from the Soviet Union and seriously undercuts the ideological appeal of Communism."

However, our ideological hand is not strong in dealing with the Soviets when our criticism of their treatment of religious or ethnic groups prompts the question of why the United States has not ratified the Genocide Convention. In the terminology of legal equity, ratification of the Convention would bring us to the international negotiating table with "clean hands."

Finally, it is important to remember that this threaty is hardly a novel idea. It has been in force for some 30 years and is the law in the majority of the world. The United States was a leading participant in drafting the treaty and in advocating its importance. The crime of genocide surely is the most difficult for civilized people to comprehend, and the most shocking to the human conscience. The extent to which most of the rest of the world has signaled its horror of this crime by ratifying the Convention is both a measure of this country's humiliation at not being a signatory, and the strongest reason why ratification should wait no longer.

Mr. Chairman, we thank you for this opportunity to again urge ratification of this Convention, and will be pleased to respond to your questions.

QUESTIONS AND ANSWERS CONCERNING THE GENOCIDE CONVENTION

I. Doesn't the convention allow the United Nations to investigate United States domestic officials and thus subject our Government to irresponsible charges of genocide in the world forum?

Artice VIII which empowers a contracting party to call upon the competent organs of the United Nations "to take such action under the Charter . . . as they consider appropriate for the powers of the United Nations. Genocide, involving mass murder on a broad scale, would violate not only the human rights provisions of the UN Charter but would normally involve a threat to the peace and therefore would clearly be within the powers of the UN to discuss. It need also be noted that article 2(7) of the UN Charter contains a proscription against intervention in matters which are essentially within the domestic jurisdiction of any state. . . ."

The argument that ratification of the Convention would subject the United States to irresponsible charges of genocide is without foundation. Ratification would not alter the present situation to our disadvantage. Spurious propaganda charges alleging genocide can be made by our enemies whether or not the United States is a party to the Convention. If anything, ratification would improve our position to rebut spurious charges by subjecting our behavior to a precise legal definition of genocide. Further, our failure to ratify in fact weakens the effectiveness of our replies.

II. Isn't it true that the genocide convention would allow United States POW's to be charged with genocide by enemy nations?

An inference such as this overlooks the simple reality that such a charge may be made by the authorities of a state involved in conflict with the United States with or without the Genocide Convention. There is nothing in the Genocide Convention that would provide warrant for charges by an enemy nation that our POW's are guilty of genocide. The existence of the Genocide Convention, and more importantly the ratification or rejection of the Convention by the United States, would have little effect on the treatment of American POW's. This was clear in the cases of American POW's held by North Viet Nam (where neither state was party to the Convention). Their peril will not be increased by approval of the Convention while peril may be avoided for tens of millions by ratification of the Convention.

III. Wouldn't the convention change the constitutional structure of the United States in that the United States lacks the constitutional power to make treaties in the human rights field because treatment by a state of its own nationals is a domestic matter and not properly the subject of an international agreement?

In the past, the power of the United States under the Constitution to make treaties in the human rights field has been questioned on the grounds that the treatment by a state of its nationals is a matter of domestic jurisdiction. This was one of the points raised in opposition to the Genocide Convention by the American Bar Association. However, the special Committee of Lawyers of the President's Commission for the Observance of Human Rights Year 1968 concluded after a survey of the constitutional issues involved and of the past treaty making practice of the United States that, "Treaties which deal with the rights of individuals within their own countries as a matter of international concern may be a proper exercise of the treaty-making power of the United States. . . ."

The Supreme Court declared in *Geofroy* v. *Riggs*, 133 U.S. 258, 267 (1890), that the treaty-making power may be exercised on any matter "which is properly the subject of negotiation with a foreign country". The United States is a party to numerous international agreements relating to the activities of its own citizens within the United States because those treaties deal with matters appropriate for international negotiation. Examples include treaties on narcotics, public health and nature conservation, and the Supplementary Convention on Slavery.

In the words of the Special Committee of Lawyers, of which retired Supreme Court Justice Tom C. Clark was chairman: "It may seem almost anachronistic that this question continues to be raised." This concern needs to be determined objectively in the light of the current interests of the United States in an interdependent world and contemporary concepts of international law—not on the basis of notions that may have been appropriate in a different historical time. In today's world the massive destruction of a racial, religious or national group in one country has an immediate impact on members of this group in other countries, stimulates demand for intervention and adversely affects international relations. As said by the Senate Foreign Relations Committee: "on both moral and practical grounds, the commission of genocide, involving as it must mass action, cannot help but be of concern to the community of nations".

IV. Isn't it true that the Genocide Convention would alter the balance of authority between the State and Federal Government?

The Constitution, Article I, Section 8, specifically gives Congress the power to "define and punish . . . offenses against the law of Nations". The act of genocide is almost universally recognized in treaties, international custom, and the acts of international organizations as an offense against the law of nations. It is thus clearly within the power of Congress to outlaw the crime of genocide. Ratification of the Genocide Convention will add no powers to those the Federal Government already possesses.

V. Wouldn't birth control offered on a voluntary basis be subject to attack as genocide?

This fear has no foundation. None of the five acts in the Convention definition is genocide unless "committed with intent to destroy in whole or in part" one of the named groups as such. Thus, basic to any charge of genocide is the element of intent. To avoid any misconceptions the United States ratification would be accompanied by an understanding that the intent required by the Convention be the intent to destroy one of the named groups "in such a manner as to affect a substantial part of the group concerned".

VI. Couldn't the Convention result in the bringing of United States citizens to arrest and trial in foreign areas on charges of genocide?

The Convention does impose an obligation on the State in whose territory acts of genocide had been committed to try all persons charged with committing genocide within that State. However, it is clear from the Convention's negotiating history that the Convention does not bar another State from trying before its own tribunals its nationals who had committed such acts outside the State. This theory of concurrent jurisdiction—jurisdiction based on the site of the alleged offense and jurisdiction based on the nationality of the offender—has been thoroughly explored. The United States government, however, has made it clear to the other contracting parties that it intends to construe the Convention so as to permit it to try its own nationals for punishable genocidal acts whether committed at home or abroad. This is recorded in the United States understanding that the United States Government "understands and construes Article VI . . . that nothing in Article VI shall affect the right of any State to bring to trial before its own tribunals any of its nationals for acts committed outside the State".

VII. Doesn't the Convention open the possibility that United States citizens can be extradited and subject to trial for genocide before a foreign tribunal without constitutional protections and benefits?

Ratification of the Convention would merely permit the adding on of one or more crimes—genocide—to the many crimes for which American citizens may already be extradited under existing extradition treaties. The Convention is not itself an extradition treaty. Neither United States law nor any of the U.S. extradition treaties at present cover genocide. Under the Convention extradition would take place only in accordance with laws and treaties in force. In any case, the United States does not grant extradition unless a prima facie case is established against the accused and unless the accused will be afforded by the requesting state the due process required by our Constitution. Such a treaty could be negotiated in the future with or without the Genocide Convention but it would need to be brought before the Senate for approval.

VIII. Isn't it true that ratification of the Convention would subject United States citizens to trial before international penal tribunals?

No. It is unfortunate draftsmanship that Article VI of the Convention provides persons charged with genocide shall be tried "by such international tribunal as may have jurisdiction . . ." No such international tribunal presently exists and there is no negotiation to create one. If any such tribunal were established it would not have jurisdiction over United States nationals unless the United States agreed to such jurisdiction either in the form of the Senate's advise and consent to ratification of a treaty or by statute expressing its consent.

IX. Doesn't the provision in the Convention for settlement of disputes by the International Court of Justice unreasonably limit United States sovereignity?

The provision in the Convention is not a new one in the United States practice. The United States has become a party to many international agreements providing for reference to the International Court of Justice of disputes arising under such agreements, including the Japanese Peace Treaty, the Antarctic Treaty and the Statute of the International Atomic Energy Agency. This provision for the settlement of disputes over the interpretation of the Genocide Convention does not unreasonably limit our sovereignity.

A number of countries, notably the communist countries, have entered reservations to their ratifications stating that they do not accept compulsory reference to the International Court of Justice. The United States is thus placed in a position to invoke those countries reservations in its own behalf to defeat the court's jurisdiction in cases brought under the Convention by countries which have made such a reservation. Our interests are better served by having any charges of genocide against us considered in a less politically motivated forum like the International Court of Justice.●

Mr. LAUTENBERG. Mr. President, I rise in strong support of ratification of the Convention on the Prevention and Punishment of the Crime of Genocide. The time has come for the United States of America to take its rightful place among the family of nations that have already ratified this document. We must delay no longer.

I have had many opportunities to study first hand the heartrending evidence of the most far-reaching campaign of genocide in history, the despicable work of the Nazis before and during World War II. That one group of human beings can turn against another in an attempt to wipe them off the Earth is beyond comprehension, and yet it has happened, again and again.

Early in this century, the Turkish slaughter of the Armenian people was an early and unfortunate example of genocide. What was originally called the Ukrainian famine of 1932-33 is now known as a broad and orchestrated campaign of starvation, physical abuse, and internment, and called genocide by many. Today Cambodia is reported to be the site of genocide killings.

The litany goes on. The victims are many, the voices of outrage too few. The ratification of an international treaty outlawing the practice of genocide seems a small enough protest against the enormity of the crime. Still, this is a government of laws, and we write the moral bases of our society into law.

It is therefore imperative, that after a 35-year delay, the Senate should give its advice and consent to the signing of the Genocide Treaty. In the closing days of the 98th Congress the Senate should write itself a place in history by following the recommendation of the Foreign Relations Committee to ratify the convention.

President Truman transmitted the Genocide Convention to the Senate for its advice and consent on June 16, 1949. Hard on the heels of the end of World War II and the revelation to the world of the Nazi extermination camps, the United Nations declared genocide a crime under international law. This was followed by the drafting of the Convention of Prevention and Punishment of the Crime of Genocide.

Let us not lose sight of the background. The world was shocked by the evidence of lengths to which man can go when driven by irrational forces. One reaction was the swift passage of measures to outlaw and punish such genocidal actions against a whole people.

The convention would have made it possible to punish those responsible for the atrocities committed against the Armenian people in Turkey during the time of the First World War. Some 1.5 million people of Armenian ancestry were killed throughout the Ottoman Empire and more were driven from their homes during that time.

The convention would have made it possible to punish those responsible for the actions of the Soviet Government during the early 1930's which resulted in wholesale deaths and displacement of the Ukrainian people.

The convention would have made it possible to punish those responsible for the deportation of Jews from all over Europe to slave labor and death camps in Germany and Eastern Europe for the express purpose of wiping out the Jewish people.

The convention would make it possible to punish those responsible for the intentional uprooting and killing of millions of the Cambodian people by the Khmer Rouge forces.

Mr. President, no reasonable objection can be made to a treaty that labels genocide an international crime which must be prevented and punished.

I urge my colleagues to vote to ratify this convention, along with the understandings and declaration approved by the Committee on Foreign Relations. All other additions to the Genocide Convention should be rejected. The United States must join over 90 of her sister nations in denouncing genocide.

Mr. HEINZ. Mr. President, the U.S. Senate today has the opportunity to join over 96 other nations in the world community by ratifying the only recognized international covenant condemning the crime of genocide.

It has been 36 years since the International Convention on the Prevention and Punishment of Genocide was transmitted to the U.S. Senate by President Harry Truman. Regrettably, it has taken this Nation over 36 years to ratify this treaty and thereby codify what we know to be this Nation's exemplary demonstrated commitment against genocide.

Mr. President, it is now time that this Nation deny to the Soviet Union—the nation with the most abusive record with regard to human rights the world has ever known—the ability to question the sincerity of our efforts on behalf of the oppressed peoples of the world simply by citing our failure to ratify the Genocide Convention.

Although the tragedy of Adolf Hitler's heinous acts against Jews in World War II gave impetus to the formulation of this convention, it is clear that genocide cannot be isolate to any one particular time period ethnic or religious group. Mr. President, genocide occurs today; it is occurring even as we stand here debating the ratification of this treaty. There is nothing theoretical about this ratification exercise. The oppressed people of the world deserve to know that the United States of America stands with them.

By ratifying this convention, this body, this country, and its President rise to cry out, "never again" against the horror inflicted on Jews in World War II, against the suffering of Mesquito Indians, Ukranians, Poles, and Estonians—indeed on behalf of all peoples who have been persecuted by brutal totalitarian ideologies.

Mr. President, if this Nation does not assert its moral leadership against genocide, who will? It is time to step out of the background—to make it clear that this Nation will unequivocably lend its power and leadership to end once and for all the greatest crime against humanity—genocide.

RATIFY THE GENOCIDE CONVENTION NOW

Mr. KENNEDY. Mr. President, I am gratified that the Senate has at long last agreed to turn to consideration of the Genocide Convention. After 35 years, our action is long overdue, and I urge my colleagues to act promptly to ratify the convention.

On December 11, 1946, the U.N. General Assembly voted unanimously to declare genocide a crime under international law. Two years later, the General Assembly unanimously approved the text of the Convention on the Prevention and Punishment of the Crime of Genocide. These actions reflected the world's universal horror and revulsion at the Nazis' deliberate and systematic efforts to exterminate the Jewish people.

Over the years, the Senate Foreign Relations Committee has reviewed the convention on several occasions. On two previous occasions the committee has voted to report the convention favorably. This year the committee voted unanimously to report the convention with the recommendation that the Senate give its advice and consent. At long last, the administration has voiced its support for having the United States join the 95 nations which have already agreed to the convention.

There is simply no excuse for the Senate to delay even 1 day longer in joining with the rest of the world to condem this most horrible of crimes.

The arguments against ratification or for proposed additional reservations are entirely without merit and can only be viewed as an unconscionable attempt to prevent the Senate's action on this critical measure. Nothing in the convention can conceivably override any of the basic protections of the Constitution, for it is well settled that a treaty does not supersede constitutional provisions. The understandings and declarations recommended by the Foreign Relations Committee further underscore this point. The convention makes clear that it is up to the ratifying States to adopt their own implementing legislation, and the Congress will have full opportunity to debate and discuss any further legislation pursuant to this treaty.

Mr. President, we owe it to all the victims and survivors of the Holocaust,

and all the peoples of the world, to join in condemning the crime of genocide. Thirty-five years is already too long to wait. We should not delay another day.

Mr. GLENN. Mr. President, I rise to express my strong support for Senate advice and consent to ratification of the International Convention on the Prevention and Punishment of the Crime of Genocide. After 35 years, U.S. ratification is long overdue. It is important that we seize this historic opportunity to ratify this convention for reasons of principle and realism.

As is well known, the impetus for this treaty was the greatest human tragedy of the 20th century, the Holocaust. Over 6 million Jews, and other minority groups, were ruthlessly and systematically exterminated by the Nazi regime. Genocide is the most heinous of human crimes, how can we fail to commit ourselves to the proposition that the perpetrators of genocide must and will be brought to justice?

Ratification of the Genocide Treaty is of utmost importance as a reaffirmation of our commitment to fundamental human rights. In addition to championing the rights of individuals, we must uphold their dignity as members of ethnic, racial, and religious groups. We must act now to make the principles underlying the convention legally as well as morally binding on civilized states. As a nation we must give effect to the universal moral principles that we cherish.

The ratification of this treaty is modest contribution to the advance of international law. The cumulative effect of the Genocide Convention and other human rights covenants is to modify the international behavior of states, to make them more accountable for their actions. Our ratification of this treaty gives greater moral authority to our commitment to human rights: We are the world's greatest democracy, and our deeds speak louder than our words.

Our failure to ratify the Genocide Convention has opened us to the propagandistic assaults of our adversaries. With ratification we strengthen our role as a leader in advancing human rights bilaterally and in international forums.

In answer to opponents of the convention who charge that ratification of this treaty would undermine our national sovereignty, I say that the three understandings and one declaration to the instrument of ratification clarify any ambiguities of the text by precisely defining terms, and preserve this Nation's jurisdiction over its citizens.

The convention is not self-effecting, and no treaty can supersede the U.S. Constitution. Furthermore, our declaration of advice and consent makes clear that the United States will not deposit its instrument of ratification with the U.N Secretary General until the Congress passes the necessary legislation for implementing its provisions. Our declaration is entirely consistent with the intent of the convention to urge nations to adopt domestic legislation outlawing and punishing the crime of genocide.

It is evident that we are better off with this treaty than without it. Through ratification, we reassert our own moral principles and the rule of law, and we increase our prestige and moral authority in international forums while preserving our national sovereignty.

Ratification is a nonpartisan issue. Democratic and Republican Presidents have consistently supported ratification. Let us now commit ourselves to ratifying this treaty and passing the implementing legislation with all deliberate speed. Let us not fail the American people and the principles of human rights upon which this Nation was founded. Only a failure of will or of principle can prevent us from ratifying the Genocide Convention now. Above all, we must ratify the convention for the fundamental reason that it is the right thing to do.

Mr. DURENBERGER. Mr. President, I was pleased to hear of President Reagan's recent call for ratification of the Convention on the Prevention and Punishment of the Crime of Genocide. It is my fervent hope that the Senate will quickly follow through on the President's initiative, and will exercise its constitutional role in granting its advice and consent before the end of the current session.

Largely inspired by widespread international revulsion at the genocidal crimes inflicted upon millions of Jews, Gypsies, and political and religious dissidents by Nazi Germany, the convention affirms that genocide is a crime under international law. It defines specific aspects of the crime, committed with "intent to destroy * * * a national, ethnical, racial, or religious group," and delineates actions that would be subject to punishment. The treaty deals with issues of trial, extradition, and resolution of disputes. In addition, it requires that all these provisions be given effect in accordance with the respective constitutions of the contracting parties. I am therefore convinced that acceptance of the Genocide Convention is not in conflict with our Constitution.

The United States, which had played the leading role both in drafting the treaty and in lobbying for its acceptance, was correctly among the first to sign the document in 1948. Although it was transmitted to the Senate in 1949, the United States has not yet ratified the Genocide Convention. Every administration, save one, has encouraged its ratification by the Senate. No fewer than 93 countries have already ratified the treaty. This number includes nearly all of our closest allies as well as the Soviet Union and many of its satellites. In various international organizations, the representatives of the Soviet Union have repeatedly used America's nonratification of the treaty as proof that the United States favors the use of genocide against its own citizens. While this charge is patently false, our failure to ratify has undermined America's claim to the moral high ground. I strongly believe that it is high time to correct this awkward position and join with our allies in acceding to this treaty.

As President Reagan noted on September 6:

> Anyone who has contemplated the horor inflicted on Jews during World War II, the deaths of millions in Cambodia or the travail of the Miskito Indians in Nicaragua must understand that if free men and women remain silent in the face of oppression, we risk the destruction of entire peoples.

As Senator for Minnesota, I have met with many such witnesses of man's inhumanity to man: Falasha Jews from Ethiopia, Hmongs from Laos, Ba'hias from Iran—just to name a few. These victimized peoples should have the voice of the people of the United States on their side; their suffering should not be answered by silence on our part. Rather than remaining silent on this issue any longer, we need to reaffirm our opposition to the obscene crimes referred to by the President. Even more important, we must ensure that similar tragedies do not occur in the future. Ratification of the Genocide Convention is a vital step in this regard. I would therefore urge my colleagues in the Senate to vote for ratification of this important treaty.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I have a series of parliamentary inquiries.

The PRESIDING OFFICER. The Senator will propound the parliamentary inquiries.

Mr. HELMS. I thank the Chair.

Prior to doing so, as we enter upon the consideration of this very important treaty, I hope that we can clarify the procedure to be followed.

As I have said on many occasions, I support the concept of the U.N. Convention on Genocide, but I have some doubts, along with many others, as to the conflict which appears between the provisions of the convention and the provisions of the U.S. Constitution.

Therefore, I hope that the Senate will use this opportunity to proceed in a deliberate and cautious manner so that whatever flaws that may be in the convention can be corrected and harmonized with the U.S. Constitution.

Having said that, Mr. President, my first inquiry is whether the rules of the Senate require us to proceed as in

the Committee of the Whole, reading and considering the convention article by article?

The PRESIDING OFFICER. That is what the Senate is doing, the Chair advises the Senator from North Carolina.

Mr. HELMS. That is correct. I thank the Chair.

Mr. President, if the treaty must be considered article by article, then is it also true that amendments to an article must be offered at the time when the Senate is on the particular article referenced by the amendment?

The PRESIDING OFFICER. No. If amendments are not offered to an article while it is pending as in the Committee of the Whole, they can be offered to the entire treaty when it is before the Senate.

Mr. HELMS. I thank the Chair.

Mr. President, is my understanding correct that while the matter is in the Committee of the Whole no Resolution of Ratification can be offerd?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. Mr. President, may a Resolution of Ratification be proposed before consideration and report by the Committee of the Whole to the full Senate?

The PRESIDING OFFICER. No; it cannot.

Mr. HELMS. I thank the Chair.

Mr. President, may a Resolution of Ratification be proposed before consideration by the Senate of the action by the Committee of the Whole?

The PRESIDING OFFICER. No; it cannot.

Mr. HELMS. May a Resolution of Ratification be proposed before the consideration by the Senate of other amendments to the treaty?

The PRESIDING OFFICER. No; it cannot.

Mr. HELMS. Once again, I thank the Chair.

Mr. President, following the completion of the amendment process, is this treaty required to lay over 1 day before the Resolution of Ratification can be considered?

The PRESIDING OFFICER. The treaty does not have to lay over 1 day, but 1 day must elapse before the presentation of the Resolution of Ratification.

Mr. HELMS. I thank the Chair for the clarification.

Is that a calendar day, Mr. President?

The PRESIDING OFFICER. It is.

Mr. HELMS. I thank the Chair.

Now, if a cloture motion is filed and approved and the 100-hour post-cloture period elapses while the Committee of the Whole or the full Senate is still working on amendments, will a vote occur on the resolution of ratification even though the Resolution of Ratification has not yet been proposed?

The PRESIDING OFFICER. The cloture motion would include all facets of the treaty process, but it would not waive the 1-day rule.

Mr. HELMS. Is it correct, then, that the vote will not occur immediately on the Resolution of Ratification but, as the Chair just stated, as I understood him, the Resolution must lay over that 1 calendar day?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. I thank the Chair.

Now, if, at the time when the 100-hour period elapses, first- and second-degree amendments are pending, must those amendments be voted on before the treaty can lie over for 1 calendar day?

The PRESIDING OFFICER. Any amendment pending at the end of the 100 hours must be voted on.

Mr. HELMS. Now, let me see if I have this in my mind. I will try to summarize what I have understood the Chair to say.

First, consideration in the Committee of the Whole of the treaty article by article, that comes first, right?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. Then comes consideration of amendments in the Committee of the Whole as each article is considered?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. Next is consideration of further actions to the articles in the Committee of the Whole at the conclusion of the article-by-article consideration?

The PRESIDING OFFICER. That is not in the Committee of the Whole, the Chair would advise the Senator.

Mr. HELMS. Then it occurs when the treaty is before the Senate?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. I thank the Chair. Then comes the report of the Committee of the Whole to the Senate; is that correct?

The PRESIDING OFFICER. The report of the Committee of the Whole to the Senate comes at the conclusion of the article-by-article consideration.

Mr. HELMS. Right. And finally would come consideration by the Senate as such of the report of the Committee of the Whole, including any further amendments to the treaty, is that not right?

The PRESIDING OFFICER. Correct.

Mr. HELMS. The treaty must then lie over the 1 calendar day that the Chair has already stipulated?

The PRESIDING OFFICER. It is not the treaty that has to lie over.

Mr. HELMS. I beg the Chair's pardon?

The PRESIDING OFFICER. It is not the treaty that has to lie over but the resolution of ratification.

Mr. HELMS. Exactly; I stand corrected.

And then comes the consideration of there solution of ratification and consideration of amendments to the resolution of ratification, including reservations, understandings or declarations, and then the final vote on the resolution of ratification, as amended, if amended?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. Very well.

Mr. President, at what point will the preamble of the convention be before the Senate?

The PRESIDING OFFICER. That is before the Senate at this moment, the Chair would advise the Senator.

Mr. HELMS. From the beginning; very well.

Mr. President, since the U.N. Convention on Genocide is available in five languages and each text is equally authentic, are all five texts before the Senate for ratification?

The PRESIDING OFFICER. They are not.

Mr. HELMS. Just in English?

The PRESIDING OFFICER. Just in English.

Mr. HELMS. What happens if there are variances in the text of the five languages, which version is approved by the Senate? I assume the English language version before us.

The PRESIDING OFFICER. The Chair cannot interpret international law.

Mr. HELMS. What does that mean?

The PRESIDING OFFICER. Well, the Chair is not in a position to answer.

Mr. HELMS. I understand that, Mr. President, but I am getting to the point of what happens if there are variations in the five versions. I ask that question to make a point. It is not a rhetorical question.

The PRESIDING OFFICER. The action of the Senate goes to the verbiage of the treaty as expressed in English.

Mr. HELMS. I thank the Chair.

I seek recognition once more.

The PRESIDING OFFICER (Mr. QUAYLE). The Senator is recognized.

Mr. HELMS. I thank the Chair.

Mr. President, I think it should be emphasized at the outset that nobody, least of all the Senator from North Carolina, is trying to block approval of the U.N. Convention on Genocide by this Senate. At the very outset, I made clear, both in committee and in public statements, that there would be no inclination on the part of this Senator to delay consideration of this convention.

All of us can understand how the topic of this Genocide Convention is one that arouses a great deal of emotion. The very notion of genocide is one that arouses a deep compassion in

the hearts of all of us. I have talked with the distinguished Senator from Minnesota and anyone who has done that cannot help but be deeply touched by his personal experiences.

There may be some who find it difficult to understand how we could hesitate for even one moment in rushing to judgment in approval of a proposal that has such great humanitarian aims. I have discussed this with a distinguished former Member of this body, a constitutional scholar par excellence, the Honorable Sam J. Ervin, Jr. He said this is one of the things that makes it difficult when a matter of this kind comes before the Senate. But, he said, it is absolutely essential that the sovereignty of the United States Constitution be protected and preserved beyond any peradventure. That is what some of us are saying and doing here, trying to make certain that the sovereignty of our Constitution and the American people is not violated.

The fact is that the United States Senate has hesitated to ratify this treaty for some 35 years. That has been discussed earlier today. Moreover, the reasons that have made the Senate hesitate for 35 years are just as sound today as they were in 1949. And I think that it is obvious that the reasons have nothing to do with a lack of compassion for victims of genocide.

The reasons that have given the Senate pause are purely and simply concerns for the sovereign independence of the United States. And the question is whether, in our concern for the victims of genocide, we might unthinkingly, unwittingly commit this Nation to be a subordinate to an international structure that in the long run would threaten our freedom and independence.

Mr. President, I do not believe that there is a single expert who has studied the U.N. Convention on Genocide who really thinks that it will prevent or even punish genocide in the world. What it is is a noble gesture—a noble gesture.

Let me illustrate what I mean. When you press the State Department—and I have done this—as to whether this convention would have prevented this or that historical example of genocide, the answer from the State Department is always a reluctant "No." If you press them on Afghanistan, as I have, the State Department experts say no, the mass murder of the people of Afghanistan by the Soviet Union would probably not be covered by this convention. If you ask them about the mass murder of the Cambodians, you get the same answer. There are always, you see, Mr. President, legal explanations as to why the convention does not apply to specific, precise, and practical examples. Nevertheless, this convention does commit the United States to a certain kind of international law. It does have consequences which would impact upon the U.S. Constitution. A whole succession of some of the finest legal minds in the United States have raised doubts about the wisdom of the unique course of action to which we would be committed by this convention.

That is why I have said, both as a member of the Senate Foreign Relations Committee and here today on the floor, that these doubts are worthy of careful examination by the United States Senate. That is all this Senator is seeking—careful examination of the doubts which have been raised, and a discussion of some proposed ways to cure the problems which have been pointed out.

With all due respect to my colleagues on the Committee on Foreign Relations, I cannot concede that we have had an opportunity for the careful consideration of this convention. We are standing here on the floor on one of the last days of this session of Congress, and for the past 2 or 3 weeks every Senator in this body has been working literally night and day with problems of the greatest urgency and magnitude, and we have all been caught up with highly technical issues that have been before us for months on end in our committees. We have been in markups and conference committees, caucuses, cloakroom discussions, floor debates, and have gone on all night. And one-third of us are acutely aware there is a little election on November 6. Some of us have been busy with that as well.

But the point I am making, Mr. President, is the farthest thing from the minds of most Senators has been the ramifications and legal technicalities of the U.N. Convention on Genocide. It is probably the issue that is at the bottom of the list of priorities for many in this critical period, not that genocide is not a matter of concern to us—no—but that it does not have the kind of urgency that, say, the continuing resolution has. The U.S. Government is not going to shut down if the resolution of ratification of the convention is not approved today.

The fact is—this is the point, Mr. President—very few, if any, Senators have really had the time to study or even think about the issues and the implications involved. There are few on the Senate floor right now—very few Senators. I think that a very large number of Senators would like to be on the floor, but it is simply not possible because of the conference committees and all of the other activities going on as adjournment approaches.

So let the record be clear. Nobody wants to block consideration of the U.N. Convention on Genocide. It is the press of adjournment that is preventing the kind of consideration that I know the American people would like for us to give to this matter if they understood the implications of this treaty; that is all.

Let us look at the record for just a moment of the schedule under which the U.N. Convention on Genocide has come to this point for consideration. As has been mentioned here earlier, the U.N. Convention on Genocide was sent to the Senate the first time 35 years ago, and there are not many Senators here today who were in the Senate 35 years ago. Over the years, the Foreign Relations Committee has held, as I recall my notes, some 11 hearings on the convention.

The committee has produced volumes of testimony, numerous reports, and it would be interesting to find out for sure how many Senators in this body have had occasion to look into even one of these volumes of testimony in the past months. I would be willing to wager that not over three of four, if that many.

Mr. PELL. Will the Senator yield for a question?

Mr. HELMS. Yes, sir.

Mr. PELL. Will the Senator not agree with me that, regarding our consideration of treaties, that sometimes we vote en bloc on 9 or 10 of them at once, and that in all of those cases a great deal of action is taken on faith. I would like to think we read everything we should read. We do not.

This particular treaty has been before us for 35 years. It has been the subject of much thought and extensive debate. I have thought about it almost 40 years. In the 24 years I have been in this body, and in my 20 years on the Foreign Relations Committee, I have pressed as hard as I can for its ratification. I have not looked at every volume, no, nor has any Senator, nor has any Senator ever done so. But I think this has been given more consideration than almost anything else. Can the Senator honestly say that there is no Senator in this body wanting to stop this treaty to go though? I think there are several, and they are doing it now.

Mr. HELMS. I am sorry the Senator feels that way about it. But the fact remains that the other legislature and treaty matters to which the Senator refers do not involve the sovereignty of the U.S. Constitution. This does.

The Senator is entitled to take whatever position he wants in terms of accelerating consideration of this convention. But this Senator believes with Sam Ervin and many other constitutional scholars that we ought to take our time and be sure that every Senator has a full opportunity to understand the implications of it. But I thank the Senator for his comments.

Until 3 weeks ago, the last time the committee took action on the convention was in 1976. Of the 17 Senators on the committee, only 3 were members of the committee at that time—

the distinguished chairman, the distinguished ranking minority member, and the distinguished Senator from Delaware [Mr. BIDEN].

In the Senate as a whole, only 44 Members remain from that time.

So I do not think that we can presume any intimate familiarity with the U.N. Convention on Genocide, and its history of action in the Senate on the part of our colleagues.

In 1981, the Foreign Relations Committee held hearings on the convention without any markup. I regret to say that no attempt appears to have been made by the committee at the time to seek out the many available distinguished jurists and legal scholars who were prepared to examine the convention critically and objectively. A few scholars favored the convention. Although some Senators appeared in opposition to the convention, no scholars were invited, nor did they appear, who were capable of expert legal opinion. Let me emphasize; this is not to say that none was available or that none would have wished to appear in 1981. Such a great number of legal scholars have contacted me in the past few weeks to raise critical points about the convention that I am convinced that the committee could have sought out such opinions in 1981 but did not do so.

There is simply not enough time for these scholars to do the careful research in the past few days and weeks that a scholarly examination requires. As everyone knows, the convention was a dead letter in the Senate until just about 1 month ago. The administration was engaged in a review of the convention for 3½ years, yet it was on September 5 that the administration announced that it supported ratification.

To illustrate how surprising it was, I was given to understand that the majority leader in the Senate did not know about it until he read it in the paper the following morning. Regrettably, there was no consultation with the committee or with Senate leaders before this decision was announced. All of us were taken by surprise. There was no opportunity beforehand to get the administration's views informally on the critical issues raised or how the issues appeared to be resolved.

But in any case, Mr. President, 2 days after the President publicly stated that he supported ratification "consistent with the U.S. Constitution"—let me stress those words: The President publicly stated that he supported ratification "consistent with the U.S. Constitution"—the Foreign Relations Committee announced that administration witnesses would be heard on Wednesday, September 12. This announcement was made at 6 p.m. on Friday.

By that time, this Senator was on his way to North Carolina and I was not aware of the hearing until Monday morning, September 10. So for practical purposes, there were only 2 days' notice to prepare for the hearing and to seek consultation with the administration.

On September 12, the hearing conducted by the Foreign Relations Committee lasted for less than an hour and-a-half, followed immediately by the first markup in 8 years. As I think I mentioned earlier, Mr. President, only three members of the present Foreign Relations Committee were members of that committee 8 years ago.

So I raised a question, and I was immediately criticized in the news media for attempting to block approval of the resolution of ratification of the convention, when all I was doing was trying to exercise normal committee prerogatives to put over the markup for 1 week, an entirely reasonable request. Any Senator who is vaguely aware of the implications of this convention would be obliged to do precisely what was done.

Apparently, after 2 days' notice and 90 minutes of testimony by administration witnesses, the committee gave the appearance of wanting to rubberstamp its approval in 5 minutes.

The fact is that in the 2 days notice we did have, I attempted to draft two understandings which would preserve the essence of the convention and yet attempt to resolve the classic difficulties that has been raised.

Let me candidly admit, Mr. President, in the haste to get something done that would be helpful, the first drafts of these two proposals were not perfect.

Mr. BOSCHWITZ. Will the Senator yield for a question?

Mr. HELMS. I would prefer to finish my statement. But, to my friend from Minnesota, of course I will yield.

Mr. BOSCHWITZ. Did I understand the Senator from North Carolina to say we only had 9 minutes of hearings?

Mr. HELMS. Ninety minutes, I advise the distinguished Senator.

Mr. BOSCHWITZ. I misunderstood the Senator.

Mr. HELMS. It must be my southern accent.

No, my proposals, drafted as we could draft them, were not perfect because there was no time to consult the administration, there was no time to get the administration's view of what the President meant when he said he supported ratification "consistent with the U.S. Constitution."

In my judgment, this is a major qualification and I wanted to know how to implement what the President meant. But first I had to know what he meant.

Then came the week between September 12 and September 17. We spent that week—"we" being my staff and I—engaged in countless hours of discussion with administration representatives, the State Department, and the Department of Justice. Many suggestions were made and my proposals were drafted and redrafted over and over again. Frankly, Mr. President, the more these proposals were redrafted, the more problems emerged with the U.S. Constitution.

I wish my colleagues could have had the opportunity to study the text carefully and to study the legal issues which have been raised by experts in the past. There are many Senators in this body who are far more expert than the Senator from North Carolina in the field of law. I am not a lawyer, and most of the time I am proud of it. But in this case I am sure that there are Senators who have more expertise than I do and who would have had many suggestions for improving the proposals advanced by the Senator from North Carolina.

But despite all of the hard work that we put in between September 12 and September 17, there was simply not time to come up with the perfected text before the committee met again.

On September 17, I think it is fair to say that the committee did not appear to be in much of a mood to scrutinize this convention carefully.

There was a great deal of rhetoric. Everybody came down hard against genocide. I yield to nobody in that, I hate genocide as much as anybody. But the fact remains that the Foreign Relations Committee really did not examine the convention and its potentially dangerous implications. The committee record does not show that any attempt was made to look at the text of the convention at all, much less a line-by-line scrutiny.

I say this not meaning any criticism of my colleagues, but I simply point out to the Senate that the Senate does not have the benefit of such an article-by-article, line-by-line analysis of the convention by the committee. That is why, Mr. President, I think Senators are within their rights to object to any waiving of the requirements of the rule for an article-by-article examination of the convention by the committee as a whole because if the Foreign Relations Committee itself had made such an examination perhaps other Senators would have had no objection to waiving their rights under the rule. But the committee of jurisdiction did not so examine the convention.

Let me say again, Mr. President, I do not know of any Senator who is attempting to block approval of the U.N. Convention on Genocide, but there are several Senators who hope that the convention could be approved in such a way that the sovereignty and independence of the United States are not in any way compromised through in-

advertence. No Senator wants to compromise the sovereignty of the Constitution. Let us get that nailed down at the outset. But I hope Senators are prepared to act with such zeal to preserve and protect the sovereignty of the Constitution and the people of this country. This will require some careful discussion and debate or, Mr. President, we will not be fulfilling our responsibilities to the American people.

The last time I checked, that was our duty. I believe that it will require somewhat more discussion than we can give it in the time available in the closing hours of a session.

Maybe not. Maybe we can agree to accept some understanding, reservation, or whatever. That remains to be seen. But as we begin this discussion today, I hope that we will bear in mind that the foremost responsibility of every one of the 100 Senators is to preserve and protect the sovereignty of the U.S. Constitution and the American people.

Mr. President, I thank the Chair. I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, the Senate now has before it a historic opportunity to correct an ugly blemish on its otherwise exemplary record in contemporary international affairs.

To do so, we should act decisively to give our advice and consent to the International Convention on the Prevention and Punishment of the Crime of Genocide. To do so is to renew our commitment to international law and justice. To do so is to serve the national interest. To do so is to acknowledge the most minimal standards of an acceptable international moral order.

The real impetus for an international prohibition against genocide was born in the gas chambers and crematoria of the Nazi Holocaust. The world recoiled upon learning that primitive hatreds combined with modern technology could come close to eradicating whole peoples from the face of the Earth.

History honors America's role in stopping Hitler and in welcoming to our shores so many of those who escaped his terrible design. But what will history say of the fact that, almost four decades later, the United States, virtually alone of the major nations of the world, has failed to join an international condemnation of genocide and a legal prohibition of future Holocausts?

Our late Supreme Court Chief Justice, Earl Warren, put it well: "We as a Nation, should have been the first to ratify the Genocide Convention . . . instead we may well be among the last." Nineteen years have passed since Chief Justice Warren issued that warning. Still we hesitate. And in that hesitation we renege on a debt we owe to both the victims of earlier genocides and the brave Americans who fought and died to prevent their recurrence.

Our refusal to act has been all the more glaring in light of the legislative history of the Genocide Convention.

No nation has acted more forcefully or constructively to build the international legal order that governs the world today. The United States has taken a back seat to no country in insisting that the precepts of law, not resort to violence, be the arbiter of relations among the nations of the world.

Americans helped write the Genocide Convention. President Truman asked the Senate to approve it 35 years ago. Presidents Kennedy, Johnson, Nixon, and Carter renewed his request. Earlier this year, President Reagan endorsed it as well. Five times, the Foreign Relations Committee has looked into the matter. Each time, without exception, it has recommended affirmative action to the full Senate. Last month, our committee once again made that recommendation—this time without a single negative vote.

The time for ratification is long past due.

Even with the advantage of hindsight, Mr. President, it is difficult to understand why we have waited so long.

Certainly, there is nothing esoteric or threatening about this convention. It boils down really to two direct and simple principles. First, the United States would declare that it recognizes genocide as a crime under international law. What can be the objection to that? We have undertaken solemn treaty obligations condemning the destruction of species of animals. What conceivable reason can there be to balk at prohibiting the extermination of entire races or nations of humankind?

Second, the United States would obligate itself to provide for the punishment of those who perpetrate genocide under its domestic jurisdiction. This Nation owes its very birth to a belief that each person was entitled to life, liberty, and the pursuit of happiness. The Constitution which governs us is rooted in the values of human dignity and individual liberty. Can we be true to that heritage and demur from punishing those who would destroy not a single life, but, in fact, the lives of whole multitudes? I think not.

The arguments that are raised against the Genocide Convention, Mr. President, are not new. They were raised and answered 30 years ago. They have been reiterated and rebutted ever since. Reading the record on the issue is frustrating—it is like listening to a dialog in which at least one of the parties is deaf. On the whole, however, it is now clear that this country and its citizens have nothing to fear, our reputation and our diplomacy have much to gain if we complete the long-overdue ratification of this treaty.

Let me very briefly suggest what is wrong with the main arguments against the convention. Those objections fall into two general, and contradictory, categories.

The first set of arguments maintains that the United States would subject itself to a variety of harassing, propagandistic prosecutions if we endorsed the Genocide Convention. American citizens and the American Government, we are told, would be hauled before kangaroo courts and victimized by ideological hanging judges on trumped-up charges.

Several points could be made here, Mr. President, but only one thing really needs to be said. The fact is that those things can happen now, or could happen in the future, whether or not we are a party to the convention. After all, by any rational standard, the Genocide Convention is already international law. Ninety-six nations are already its signatories. On every continent, these nations have already bound themselves to its enforcement. We hardly create an opportunity for those acting in bad faith to abuse its provisions by joining the rest of the world in condemning genocide. In fact, by refusing even to acknowledge that genocide is a crime, we inevitably supply ammunition to those who wish to brand us as an international outlaw.

A second set of arguments against the convention argues the opposite case. In fact, we heard some of those arguments only a few short seconds ago by the distinguished Senator from North Carolina. Instead of holding that the convention has the power to work great mischief, his position and that of those who have some difficulty with the convention, is that the treaty is virtually impotent.

The advocates for this position say the treaty cannot be enforced effectively. They point, as we have heard this afternoon, to the fact that the Soviet Union is a signatory, while operating its gulags and waging devastating warfare on the people of Afghanistan. They use the example that Cambodia initialed its agreement while its bulldozers were still pushing mountains of human skulls into mass graves.

Those facts are incontrovertible, Mr. President, but they are equally irrelevant to the debate as to whether we should ratify this convention.

The enforcement of international law is slow, unreliable, and imperfect.

But does an inability to make standards work perfectly and in every case mean that we should not try to establish standards at all? Is not the very fact that virtually all the nations of the world—even the Cambodias and

Vietnams—feel the need to record their allegiance to the Genocide Convention of itself proof of the compelling power of its wisdom?

The simple fact is that the first step to an international legal order has to be agreement on certain fundamental, universal obligations. The shortcomings of international enforcement procedures are a reason to devote ourselves to a search for their improvement—not an excuse for abandoning the field. And let us never torture the moral hypocrisy of Cambodia and the Soviet Union into a rationalization for moral indifference by this country.

Finally, Mr. President, it is said that the value of the Genocide Convention is, at best, merely symbolic.

But symbols are not meaningless. Symbols reflect basic values and important commitments. That is certainly true of the International Convention on the Prevention and Punishment of the Crime of Genocide.

It symbolizes a commitment to significance of human life, to a just world order, and to the rule of law. It is an embarrassment that this Nation which has so long epitomized these values should have delayed so long in renewing our dedication to them. I hope we will wait no longer.

Mr. President, it is particularly significant, if the Chamber will indulge me for just a moment, for me to be standing here on this day, the 10th of October of 1984, talking about the Genocide Convention. It was only some 34 years ago, in 1950, that my father, than a private practicing attorney in the State of Connecticut, testified before a subcommittee of the Foreign Relations Committee on behalf of the Genocide Convention.

Mr. President, I ask unanimous consent that the testimony of Thomas Dodd of Hartford, CT, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF THOMAS DODD, MEMBER, SPECIAL COMMITTEE ON PEACE AND LAW THROUGH UNITED NATIONS OF THE AMERICAN BAR ASSOCIATION

Mr. DODD. My name is Thomas Dodd of Hartford, Conn.

I appear primarily as a private citizen, but I am also a member of the American Bar Association special committee on peace and law through United Nations, which was heard here this afternoon through Messrs. Rix, Finch, and Schweppe.

I would like to tell you, sir, that I am a new member of the committee, having been appointed in October. So that I did not participate in the deliberations of the committee or in its recommendation to the bar association, and I have had no opportunity to do so since my appointment to the committee.

I am also, as you will recall, one who served with Justice Jackson as his executive trial counsel at the first major Nuremberg trial, so I have a triple interest in this proposed convention—in my private capacity as a citizen; now a member of the bar association on peace and law, and also as one who had something to do with the proceedings in the first and so-called major trial at Nuremberg. I will not take but a few minutes, because I realize the hour is late and that much has been covered with respect to what I might say, but I would like to point out a few things that occurred to me while I was listening.

Senator MCMAHON. I might add you had a very distinguished record in the Nuremberg trial.

Mr. DODD. Thank you, sir. Because we have mentioned the Nuremberg trial, let me say this: It is a little out of place from what I had planned so far as my presentation is concerned.

At Nuremberg, we laid down the doctrine that individuals are responsible for some offenses, such as aggressive warfare. You will recall that there was some hue and cry raised in some places about the application of that doctrine. It always seemed to me that it is the people who make up the government, individual people, and I think the only way that we can effectively do anything in the field of international law is to hold individuals responsibile, and as I read this proposal, I note that article 4, I believe it is, specifically refers to persons committing genocide or any of the other acts enumerated in article 3 shall be punished, whether they are constitutional rulers, public officials, or private individuals. It doesn't seem to me that there is too much to ask that we move along and implement, so to speak, the Nuremberg doctrine with respect to this Genocide Convention.

CONVENTION ELIMINATES UNCERTAINTY

Parenthetically, let me say it intrigues me a little bit, some of the people who heaved at us at Nuremberg the charge that we were guilty of prosecution on an ex facto basis are some of the same people who are now in opposition to the ratification of this convention. At least, it occurs to me that they ought to be consistent. I don't concede that there was anything ex post facto in the proceedings at Nuremberg, but assuming for the sake of this side of the thing that there is something to what they have claimed against us. I should suppose that they would be among the foremost in suggesting that now, in time of peace, we join with the other good-intentioned people of the world in trying to establish a firm basis in law for the prevention of this kind of thing.

Now it has been suggested here, Senator, and I want to emphasize it again, that at Nuremberg, it was not possible for us to punish the defendants for many of the terrible things they did to people in peacetime, things that were clearly genocidal in character. That is one of the reasons why I am interested in seeing this convention adopted.

WILLING TO SETTLE FOR WHAT WE HAVE

Now I don't suppose that this is perfect; most of the things that fall from the hand of man are not. We are entering into a new field. It fascinates me that the members of the committee upon which I am privileged to serve offer as one of their objections that it does not go far enough, and I am inclined to agree. I wish it included political and economic groups, but I know we can't have everything at once in the nature of international cooperation. I am willing to settle for the good things that we can get, in the hope that later on we will be able to enlarge this field and perhaps get political and economic groups included. But I can't understand opposition, if you are for this thing, opposition that it doesn't go far enough.

MIGHT HAVE DETERRED HITLER

You have been asked what good would this have been against Hitler. I am one of those who believe, after living 18 months over there among the Hitler regime, that had this Genocide Convention been in existence in the early days of the Hitler regime, what happened might not have happened. For one thing, the Nazi state would have stood condemned. Its ministers and ambassadors would not stand in the same position as those of other nations not in violation of a genocidal convention, and great numbers of people inside Germany would have taken heart and might have been more vigorous in their resistance to the regime itself.

You have been asked what can we do about the Russians, who are perhaps and probably doing this same sort of thing behind the iron curtain now. Well, at least we will have the moral influence of the covenant of the convention. Russia in its plan, as I see it, wishes to influence people all over the world. If people all over the world see Russia as a nation which does not subscribe to or adhere to the Genocide Convention, she will be severely affected in her efforts to influence people everywhere, and the forces of good thinking and of right conduct in the world will be immeasurably strengthened.

I am not going to dwell upon the constitutional difficulties. I am one of those who believe with the Solicitor General that there are no insurmountable constitutional difficulties. These kinks can be worked out. I think, furthermore, that the good advice that you and your committee, the Senate, will get from capable constitutional lawyers will help to work that out.

MENTAL HARM

I would like to take just 1 minute to tell you that on this question of mental harm, I know what that means, having heard it from the mouths of people who knew what it meant subjectively. It was an established mechanism of the Nazi state, and it is practiced in other places as well, that the destruction, the disintegration of the human mind was a planned thing. It was one of the worst things that was done probably to individuals by the Nazis, and it is not too difficult for people who want to learn about it to read the records at Nuremberg, and they will have a very clear concept, when they have done so, as to what happens to people under a planned program of destroying their minds. There are all kinds of ways of doing it, and there are many, indeed.

I think we need to adopt this and ratify this convention, because the world needs that moral support. I can't imagine the United States refusing to do so, in a world that looks to us for moral leadership, and we will give hope to people everywhere in the world if we do ratify it, and I, as an individual, urgently suggest to your committee that it favorably view this ratification proposal.

Mr. DODD. Mr. President, furthermore, in 1965, Thomas Dodd, who in 1958 had become Senator Dodd from Connecticut, gave a speech in this city, endorsing once again the rationale for a genocide convention. I quote, if I may, from his remarks almost 20 years ago. He said:

What is the Genocide Convention about? In my opinion, there could be no simpler or

more fundamental moral issue written into a covenant between the nations of the world.

Essentially, the convention establishes that genocide is a crime under international law; and it defines genocide as the destruction of a racial ethnic or religious or national group, or part of that group, committed with the specific intent to destroy this group, in whole or in part. It includes the actual killing of members of the group, or causing them serious bodily or mental harm, or deliberately inflicting conditions of life on them calculated to bring about their physical destruction, or forcefully transferring children of the group to another group. It states that these acts are punishable, as well as conspiracy to commit genocide, to direct or publicly incite to commit genocide, or complicity in genocide.

Under article 5 of the Genocide Convention, the contracting parties undertake to enact, in accordance with their respective constitutions, legislation which would give effect to the provisions of the convention and which would establish penalties for persons guilty of acts of genocide.

It seems to me that nothing could be clearer than this.

For me the Genocide Convention has a special personal meaning because as executive trial counsel at Nuremberg I had spread before me, in nightmarish detail, the whole incredible story of Nazi barbarism, of its fiendish persecution of the Jewish people, and of the gas chamber and crematoria that snuffed out the lives of more than 5 million Jews and of millions of Ukrainians, Poles, and other Europeans.

The convicted Nazis were charged with crimes against humanity. The word "genocide" had not yet come into common usage at that time. But to a very large degree this is what the Nuremberg trial was about. For the first time there was spread on the record of an international tribunal the details of massive crimes involving millions of victims—crimes perpetrated not against individuals but against entire peoples and ethnic groups.

While I was at Nuremberg I learned about other acts of genocide that were not made part of the trial record.

I learned of the mass deportations of the Volga Germans and the Kalmuks and the Chechens and other Soviet minority people during the war years.

I learned the true facts about the massacre in the Katyn Forest of 10,000 Polish officers who had been prisoners of the Soviets.

I learned of the mass deportations of scores of thousands of intellectuals and community leaders from Lithuania, Latvia, and Estonia in the period following the Soviet occupation.

I learned, in short, that Communist totalitarianism, like Nazi totalitarianism, uses genocide as an instrument of policy, and that the death of nazism did not necessarily mean that we had put an end to the problem of genocide.

Mr. President, I ask unanimous consent that the full text of Senator Thomas J. Dodd's remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SPEECH OF HON. THOMAS J. DODD, OF CONNECTICUT, IN THE SENATE OF THE UNITED STATES, THURSDAY, MARCH 25, 1965

Mr. DODD. Mr. President, on March 11 it was my privilege to address a conference convened in Washington by the ad hoc Committee on the Human Rights and Genocide Conventions, a citizens' organization representing virtually every sector of the American community and embracing organizations that can claim to speak for some 100 million Americans.

The Genocide Convention has been languishing in the Foreign Relations Committee now for almost 16 years. Three other U.N. conventions dealing with the abolition of all forms of slavery, the abolition of forced labor, and the political rights of women, have been there almost as long.

I believe that our failure to ratify these conventions projects a most unfortunate image of the United States to the rest of the world. I also believe that much of the opposition to the ratification of these conventions is based upon misunderstanding and misconceptions.

I ask unanimous consent to insert into the Record at the conclusion of my remarks the text of my statement before the conference of the ad hoc Committee on the Human Rights and Genocide Conventions. I hope that my statement will help to throw some additional light on these sadly misunderstood measures. And, I hope too that support can be found to bring them to a vote before this session concludes.

There being no objection, the statement was ordered to be printed in the Record, as follows:

THE NEED TO RATIFY THE GENOCIDE CONVENTION AND OTHER U.N. CONVENTIONS ON HUMAN RIGHTS

(Remarks of Senator Thomas J. Dodd before the conference of the ad hoc Committee on the Human Rights and Genocide Conventions, Statler Hilton Hotel, Washington, D.C., Thursday, Mar. 11, 1965)

Mr. Bingham, reverend clergy, distinguished guests, I have accepted your invitation to address this conference out of a sense of duty because I believe there is no more important item of unfinished business on the calendar of the Senate than the ratification of the Genocide Convention.

It is now 17 long years since the Genocide Convention, with strong American backing, was approved by the U.N. General Assembly. And it is 15 years—almost 16 years—since it went to the Senate for ratification in June 1949.

The convention has been ratified by 67 nations to date, including all the members of the Communist bloc in the U.N. But for some strange reason, the great United States of America, which has done more to extend the frontiers of freedom than any other nation, has not ratified the convention.

In June of 1949, President Truman submitted the Genocide Convention to the Senate with his own enthusiastic endorsement.

In January of 1950, a special Genocide Subcommittee of the Senate Foreign Relations Committee, under the chairmanship of a great Connecticut Senator, Brien McMahon, conducted public hearings. It was my privilege to testify in favor of ratifying the convention before this committee. I say it was my privilege not only because of the great importance I attach to the convention but because of the exceptionally distinguished body of citizens, representing more than 50 national organizations, who took the witness stand with me to urge ratification.

In its report to the full Foreign Relations Committee, the McMahon subcommittee strongly recommended ratification of the convention. But despite extensive hearings, despite the declared approval of all the major religious, ethnic, civic, and veterans organizations, the covenant still languishes in the Foreign Relations Committee without affirmative action.

Fifteen years, sixteen years, is a long time to wait for the ratification of any treaty or convention. The long lapse of time, has, I am afraid, blurred our memories and obscured the issues and dulled our conscience. There have been times in our history when the Government has needed prodding, and other times when Congress has needed prodding or intervention from citizens and citizens' organizations. I believe that this national conference, representing as it does every sector of the American community and embracing organizations which can claim to speak for 100 million Americans, constitutes a citizens' intervention in the highest American tradition.

Those of you who have initiated this conference and those of you who have come here to participate in its deliberation will, in my opinion, merit the thanks of coming generations of Americans. This conference, from what I have already seen of it, will unquestionably serve to bring the issue of genocide to life again. And you will, I hope, be able to clear away the intellectual cobwebs that have obscured the issue and encourage the Senate to take the long overdue action of ratification.

What is the Genocide Convention about? In my opinion, there could be no simpler or more fundamental moral issue written into a covenant between the nations of the world.

Essentially, the convention establishes that genocide is a crime under international law; and it defines genocide as the destruction of a racial ethnic or religious or national group, or part of that group, committed with the specific intent to destroy this group, in whole or in part. It includes the actual killing of members of the group, or causing them serious bodily or mental harm, or deliberately inflicting conditions of life on them calculated to bring about their physcial destruction, or forcefully transferring children of the group to another group. It states that these acts are punishable, as well as conspiracy to commit genocide, to direct or publicly incite to commit genocide, or complicity in genocide.

Under article 5 of the Genocide Convention, the contracting parties undertake to enact, in accordance with their respective constitutions, legislation which would give effect to the provisions of the convention and which would establish penalties for persons guilty of acts of genocide.

It seems to me that nothing could be clearer than this.

For me the Genocide Convention has a special personal meaning because as executive trial counsel at Nuremberg I had spread before me, in nightmarish detail, the whole incredible story of Nazi barabarism, of its fiendish persecution of the Jewish people, and of the gas chamber and crematoria that snuffed out the lives of more than 5 million Jews and of millions of Ukrainians, Poles, and other Europeans.

The convicted Nazis were charged with crimes against humanity. The word "geno-

cide" had not yet come into common usage at that time. But to a very large degree this is what the Nuremberg trial was about. For the first time there was spread on the record of an international tribunal the details of massive crimes involving millions of victims—crimes perpetrated not against individuals but against entire peoples and ethnic groups.

While I was at Nuremberg I learned about other acts of genocide that were not made part of the trial record.

I learned of the mass deportations of the Volga Germans and the Kalmuks and the Chechens and other Soviet minority people during the war years.

I learned the true facts about the massacre in the Katyn Forest of 10,000 Polish officers who had been prisoners of the Soviets.

I learned of the mass deportations of scores of thousands of intellectuals and community leaders from Lithuania, Latvia, and Estonia in the period following the Soviet occupation.

I learned, in short, that Communist totalitarianism, like Nazi totalitarianism, uses genocide as an instrument of policy, and that the death of nazism did not necessarily mean that we had put an end to the problem of genocide.

Although 67 nations have ratified the Genocide Conversation it has, by and large, remained ineffective, inoperative, and without the necessary authority because the United States has thus far refused to add its ratification.

The years that have elapsed have witnessed situations where genocide has unquestionably been perpetrated and other situations where there was strong prima facie evidence of genocide.

In the case of Hungary the massacre of 25,000 Hungarian freedom fighters by the Red army, the subsequent mass execution and imprisonment of scores of thousands of Hungarian intellectuals, brought the charge from many quarters that the Soviets were guilty of genocide.

One year later the Chinese Communists crushed the Tibetan revolution with such ruthless measures that the International Commission of Jurists, in its report on the question of Tibet, made the unequivocal statement that Red China had been guilty of the crime of genocide.

In recent years we have witnessed in the Soviet Union a systematic campaign against the Jewish minority and the Jewish religion. While there have been no mass killings of Jews, it is clear that the objective of this campaign is the early and total obliteration of Jewish religion and of Yiddish culture. Is this genocide within the meaning of convention? This is a matter that might have to be decided by some property constituted authority. But certainly the allegation of genocide in the case merits the most careful consideration.

In each of these instances the conscience of America has been shocked. We have cried out in protest. Our leaders and our spokesmen have decried the mass killings, and in some cases, they have used the term "genocide" in referring to the crimes perpetrated by the Communists in these countries.

But the impact of our protest is weakened and our ability to intervene effectively remains seriously restricted so long as we ourselves have not ratified the Genocide Convention, which makes such acts international crime.

What is more, feel that our entire moral position, and our claim to leadership in the fight for freedom and justice and human decency, is prejudiced by our failure to ratify the Genocide Convention and the three other United Nations conventions dealing respectively with the abolition of all forms of slavery, the abolition of forced labor, and the political rights of women.

What an irony it is that this Nation, which abolished slavery almost 100 years ago, which does not practice genocide at any level of government, which long ago put an end to forced and indentured labor, and whose women enjoy the broadest political rights, should abstain from ratifying these four basic United Nations documents dealing with the rights of man, while the Communist nations, which are guilty on every score, have ratified all of these conventions or most of them.

What a false image of the United States our persistent failure to ratify these conventions projects to the world.

Needless to say, the Communists are clever enough to make use of our failure for the purpose of challenging our commitment to freedom and blackening our reputation. Among the newly emerging nations of the world, regrettably, the most widely believed facts about the United States are frequently those purveyed by radio Moscow or Peiping.

For example, in January of 1964, there was a debate in the UN subcommission on the prevention of discrimination and the protection of minorities. The Soviet member strongly opposed the establishment of international machinery for reporting upon and encouraging the elimination of racial and ethnic discrimination. At every point he was on the defensive. Finally, he decided to go over to the offensive.

The Soviet spokesman suggested that it was rather hypocritical of the American delegate to charge the Soviet Union with resisting the establishment of implementation machinery when "the United States had not ratified the Convention on the Prevention and Punishment of the Crime of Genocide or the Convention on Slavery."

The American delegate had to reply in embarrassment that he could only "regret of course that my country has not ratified the Convention on Genocide."

I am certain that as this exchange was reported over radio Moscow and radio Peiping, primitive peoples around the world were led to believe that the United States was opposed to ratification because it practices slavery and practices genocide.

It is time—high time—that we put an end to this invidious situation.

In the words of our martyred President, John F. Kennedy, "The United States cannot afford to renounce responsibility for support of the very fundamentals which distinguish our concept of government from all forms of tyranny."

There is only one way out of this dilemma. The Senate of the United States must at the earliest opportunity act to ratify the Genocide Convention and the Conventions on Slavery, Forced Labor, and the Political Rights of Women.

I know that some Senators have expressed the opinion that these measures will fail of ratification because we cannot get two-thirds of the Members of the Senate to vote for them. With this point of view I strongly disagree.

This conference has demonstrated in the most dramatic possible manner that the American people, in their overwhelming majority, favor the ratification of the four U.N. conventions dealing with the rights of man. I am confident that, given the necessary leadership, and given a patient exposition of the facts to the Members of the Senate, the Senate will not only ratify these measures, but will do so by a very substantial majority.

And I want to pledge to you that during the months to come I shall make this one of my chief objectives both within the Foreign Relations Committee and within the Senate itself.

There is one final proposal I would like to make. Looking forward to the time when the Genocide Convention has been ratified, I think we must start thinking in terms of practical measures to make it effective.

As the convention now reads, each nation ratifying the convention undertakes to enact legislation to implement the convention, and it also provides that any person charged with commission of an act of genocide should be tried by a court of the state in whose territory the act was committed.

These articles of the convention, in my opinion, constitute the most effective answer to those who charge that ratification of the convention would result in a surrender of our sovereignty to some unnamed and nonexistent international tribunal. But the articles leave something to be desired because it is questionable whether any Communist states can be trusted to prosecute their own nationals for the crime of genocide. And it is also questionable whether any state, Communist or democratic, will, in our lifetime, voluntarily agree to submit matters of such significance to the judgment of an international tribunal. I believe this is so despite the fact that no democratic state has practiced genocide or will practice it.

How then can we give effect to the Genocide Convention?

There is an approach to this problem which would involve no surrender of national jurisdiction, but which would be more effective as a deterrent to genocide than the present provisions of the treaty.

The United Nations has been at its best when it has been a matter of setting up an investigative committee to establish the facts in countries like Greece, or Hungary, or South Africa, or Borneo, or Vietnam. Invariably, these communities have reported objectively and fearlessly.

When the Genocide Convention is ratified, I would like to propose that serious thought be given to establishing a continuing investigative mechanism within the United Nations, under which serious allegations of genocide would lead to the appointment of special committees with the instruction to investigate and report back.

The member nations of the U.N. would be obligated to cooperate with such committees in any investigations conducted on their territory. The committees would have no juridical power, nor would the U.N. itself. But the mere power of investigation—the power to seek out the facts and bring them to public light—would, in my opinion, operate as a powerful deterrent to genocidal crimes and to other violations of human rights.

If the U.N. could be endowed with this responsibility by the consent of its member nations, it would give the world organization new meaning and a new lease on life.

I submit these thoughts for your consideration because I am confident that the Genocide Convention will be ratified, and the time is, therefore, arriving when we must begin to think of next steps.

I wish you godspeed in your deliberations.

Mr. DODD. Mr. President, it is clear on those remarks and in the volumes of testimony that have been collected over the past 35 years, that the Senator from North Carolina is not entirely wrong. Certainly the horrors of a Cambodia, of a Vietnam, of an Afghanistan, the atrocities that have been committed throughout the world during the past 35 years, would not necessarily have been stopped had a Genocide Convention been ratified by the United States. But certainly we must underestimate the moral force of our voice and our example as a beacon of hope and light to millions of people throughout the globe, who see this Nation as the symbol of freedom and responsibility and dignity. That force cannot be pushed aside by suggesting merely that this particular treaty would not be worth the paper it was written on because these acts may occur. That is the weakest argument of all for deciding not to ratify this convention. We only have a few short hours left, I presume, before we will adjourn sine die. But, after 35 years, after the work of people on both sides of the aisle, after hundreds and hundreds of witnesses from Europe, including some who were victims of the Nazi Holocaust, after the testimony of people from every quarter of this globe about the importance of this country's ratifying this convention, I hope we would not waste the time it takes to review that material once again now that we have had the opportunity to weigh it. I hope that after numerous sessions of the Senate have debated it; that we will see this Congress adjourn and have to begin this process all over again next year.

I would like to take particular final note, Mr. President of the presence of one of our colleagues who has stood alone on this floor countless days, months upon months, years upon years, every single day to remind the people of this country and the world of the importance of this convention. I speak of our distinguished colleague from Wisconsin [Mr. PROXMIRE], who virtually single-handed over the past many years has tried to raise the level of education about the Genocide Convention. He has demonstrated its importance not only to this country but to people around the globe who look to this Nation as a bulwark against genocide and the horrors it inflicts on so many millions. I know I speak on behalf of the millions of people who hope that this treaty might be ratified by the Senate when I thank the Senator for his contribution over the years. It really is a singular mark of heroism and dedication that he has waged this battle as long and diligently as he has, and I regret that the battle continues in this body to achieve ratification.

Mr. President, I intend to be here on the floor and to engage in debate, answer questions, if I can, along with others who have worked on this treaty so that we might be able to ratify it before we leave.

I also commend the President. President Reagan and I have not always agreed on issues over the past 3½ years, and I was certainly suspicious, like others, because it took 3½ years to decide that it deserved ratification. But I happen to believe their intentions are honest, that there are many people who do not understand this convention around the country and have been frightened by false information about what this convention would do, that it could destroy our sovereignty or damage our Constitution. The President does not believe that. His administration does not believe it. He certainly does not need my stamp of approval as a conservative. Yet, like the other administrations that have preceded his, he has determined that this convention does not threaten our Constitution; that, in fact, it would strengthen the very principles which underlie our Constitution.

So I hope that, in a sense of bipartisanship, in the closing hours of this session, even though the election is only a few weeks away, we can join President Reagan and his administration and ratify this Genocide Convention. It would be one of the most important things this Congress could achieve.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. DODD. I yield.

Mr. PROXMIRE. I thank my good friend from Connecticut for his remarks. I also want to commend the Senator for pointing out that we have gone into great, meticulous detail on this treaty.

The opponents have said that is was kind of rushed through, but the distinguished Senator from Connecticut has put that to rest.

I have just had a chance to look at the summary: 12 days of hearings on this treaty over the years, 87 witnesses, 200 submissions, 1,500 pages. If it is not unique, that is about as exhaustive treatment as I can recall for any treaty that had come before the Senate.

This is not something on which there is great division. There are a few Members of the Senate opposed to it. But on September 19 of this year, the Senate Committee on Foreign Relations voted 17 to 0 to report the Convention on the Prevention and Punishment of the Crime of Genocide, and it has been recommended by President Reagan.

The committee also unanimously approved a resolution urging the Senate to act on the Genocide Convention prior to adjournment. I believe that resolution was offered by the Senator from Connecticut.

My colleague on the committee, the distinguished senior Senator from North Carolina, for whom I have great respect, has made a very interesting and effective statement on the floor, and he has appended a statement of some length to the committee report on the treaty. While the senior Senator from North Carolina did not vote against either of these measures, he raised a number of issues regarding the convention.

I have had a chance to discuss the objections of the Senator from North Carolina with the American Bar Association people, and I have put an analysis together to respond to the principal objections raised by the Senator from North Carolina. I ask unanimous consent to have the analysis printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

RESPONSES TO SENATOR HELMS' CONCERNS

On September 19, 1984, the Senate Committee on Foreign Relations voted 17-0 to report the Convention on the Prevention and Punishment of the Crime of Genocide favorably to the Senate subject to the three understandings and one declaration recommended by President Reagan. The committee also unanimously approved a resolution urging the Senate to act on the Genocide Convention prior to adjournment. While my colleague on the committee, the distinguished senior Senator from North Carolina did not vote against either of these measures, he raised a number of questions regarding the convention. The following analysis attempts to respond to the principal objections raised by Senator Helms.

First, Senator Helms suggested that, "While we have used multilateral treaties in the past . . ., the subjects were . . . truly international in scope . . . Genocide . . . can be perpetrated wholly within the borders of the offending nation, with no impact upon any other nation whatsoever.

The implication that genocide is an internal matter, and therefore not a proper subject for an international treaty, is incorrect on two counts. First, the occurrence of a situation completely within one country does not preclude its being dealt with under international law. As stated in the Restatement (Second) of Foreign Relations Law of the United States, "usually, matters of international concern have both international and domestic effects, and the existence of the latter does not remove a matter from international concern." § 117, Comment b. The Supreme Court has repeatedly held that the treaty power extends to all proper subjects of negotiation with foreign governments. *Geofroy* v. *Riggs*, 133 U.S. 258 (1890); *Santovincenzo* v. *Egan*, 284 U.S. 30 (1931). Quite correctly, the fact that communist persecution of various minorities is often "perpetrated wholly within the borders of the offending nation" has not prevented the American government from condemning these abuses and correctly so—and engaging in negotiations to deal with them. From both a legal and political perspective, it would be truly unfortunate were the United States to relinquish that role, leaving millions to languish without hope.

Second, genocide is quite plainly an international matter. According to the Restatement of Foreign Relations Law, it is a violation of customary international law if a

state "practices or encourages genocide, fails to make genocide a crime or to punish persons guilty of it, or otherwise condones genocide." This customary law is equally binding upon nations which have not ratified the Genocide Convention.

There is little question that genocide, whether committed in Nazi Germany, communist Cambodia or Khomeini's Iran, is an international matter. The United States Congress confirmed this fact in 1978 legislation which passed the Senate by an overwhelming majority. In an amendment to Public Law 95-435 (22 U.S.C.A. § 2151) cosponsored by Senators Helms, Thurmond and others, this statute recognizes genocide as an "international crime," and states the U.S. policy of disassociating from any foreign government engaged therein.

Second, Senator Helms said that, "The Convention on Genocide stands alone in creating an international criminal statute. It sets a precedent that is totally unparalleled."

In actuality, the Genocide Convention contains nothing in this regard that is unique or unprecedented. A number of treaties which have previously been ratified by the United States include the same obligations of criminalization and punishment of certain acts found in this convention. These other treaties have dealt with offenses involving slavery, narcotic drugs, certain acts of terrorism and a variety of other abuses of international law. Again, in each of these cases, the crime may be perpetrated wholly within the borders of a country, but is still covered by the treaty. In this regard, it is helpful to note the language found in the Senate Foreign Relations Committee report on the International Convention Against the Taking of Hostages, the ratification of which was supported by Senator Helms: "States who become parties not only agree to make such offenses criminal under their domestic laws but also to either prosecute or extradite persons reasonably accused of such crimes." The obligations under the Genocide Convention are no more and no less. Ratification of each of these treaties is both good law and good policy, fully consistent with U.S. accession to previous treaties.

Third, Senator Helms cited John Foster Dulles to the effect that, "Treaties make international law and also they make domestic law . . . Congressional laws are invalid if they do not conform to the Constitution, whereas treaty laws can over-ride the Constitution."

It must first be recognized that treaties such as the Genocide Convention make international law and domestic law, but they absolutely cannot override the Constitution. However, the treaty's provision will have no domestic legal effect whatsoever upon the contracting parties until they "enact, in accordance with their respective Constitutions, the necessary legislation to give effect to the provisions of the present Convention." Article V. This procedure is in keeping with the longstanding American principle that a treaty cannot legislate criminal law within the United States, as the criminal jurisdiction of Federal courts must be expressly mandated by Congress. *United States* v. *Hudson and Goodwin*, 7 Cr. (11 U.S.) 32 (1812); *United States* v. *Coolidge*, 1 Wheat. (14 U.S.) 415 (1816).

Therefore, the treaty will not become binding in the United States until appropriate amendments to the U.S. Code are considered by the Judiciary Committees of Congress, passed by the full Congress and signed by the President. To emphasize this point, the Senate Foreign Relations Committee has recommended a declaration to the effect that the President shall not deposit the U.S. instrument of ratification until this implementing legislation has been enacted.

The suggestion that treaties can override the Constitution is simply inaccurate. In the event of any conflict, the Supreme Court, in its own words, "has regularly and uniformly recognized the supremacy of the Constitution over a treaty." *Reid v. Covert*, 354 U.S. 1, 16-18 (1957). In testifying on the Genocide Convention, then Assistant Attorney General William Rehnquist stated definitively that "there are no constitutional obstacles to U.S. ratification of the treaty." He affirmed that the rights of American citizens would be fully protected under the Convention "because the Constitution is superior to a treaty no matter how interpreted." Hearings before a Subcommittee of the Senate Committee on Foreign Relations, 91st Cong., 2d Sess. 157, 160 (1970). In testimony before the Foreign Relations Committee last month, a Justice Department official noted that no case ever has held a treaty superior to the Constitution.

In addition, the Genocide Convention itself renders such a conflict impossible. The Convention explicitly provides that the implementing legislation—without which the treaty is unenforceable—shall be enacted by the contracting parties "in accordance with their respective Constitutions."

Fourth, Senator Helms has alleged that, "There is great leeway in the extradition process, but the accused's rights might be compromised by domestic political pressures or international policy questions unrelated to the allegations."

Fortunately, American law regarding extradition does not permit the accused's rights to be considered as cavalierly as Senator Helms suggests. American citizens have been, and will continue to be, protected by our law.

Some agreements (e.g. the 1929 Convention for the Suppression of Counterfeiting Currency) provide that offenses dealt with by those conventions shall be deemed to be automatically included in the various extradition treaties concluded by the contracting parties. In contrast, the Genocide Convention rejects this board-ranging approach; Article VII provides for extradition by the contracting parties only "in accordance with their laws and treaties in force." The United States currently has no extradition treaties in force which make reference to the crime of genocide, and U.S. law prohibits extradition of American citizens unless provided for in such treaties. *Factor* v. *Laubenheimer*, 290 U.S. 276, 287 (1933).

It would be the prerogative of the United States to negotiate or amend extradition treaties to specifically include genocide as an extraditable offense. Each such treaty would be separately subject to the ratification process, thus allowing the Senate to determine those countries to which extradition will be permitted for genocide. Of course, to assure the vigorous enforcement of the law, I would urge ratification of such treaties.

Fifth, Senator Helms stated that, "Ultimately, the sovereignty issue becomes mired in the ambiguities of Article IX."

Article IX of the Genocide Convention is quite straightforward. In providing that disputes regarding the interpretation, application of fulfillment of the convention may be submitted to the International Court of Justice, the Genocide Convention simply includes the very same procedure included in many treaties which the United States has previously ratified, a number of which have been supported by Senator Helms. This treaty provides nothing novel or unique in referring dispute resolution to the ICJ.

The Connally and Vandenberg reservations would in no way be affected by ratification of the Genocide Convention. Senators Connally and Vandenberg proposed their amendments to modify a 1946 Senate resolution concerning optional jurisdiction of the International Court of Justice under Article 36(2) of the Court's statute. Article 36(2) deals with the extension of the Court's jurisdiction, for example, to interpretation of treaties that do not otherwise provide for referral to the Court.

The Genocide Convention falls under Article 36(1) of the Court's statute, which deals with the compulsory jurisdiction of the Court in instances "provided for . . . in treaties and conventions in force." The United States has ratified a number of treaties which, like the Genocide Convention, provide for dispute settlement through the International Court. See e.g. Supplemental Statute on Slavery, 18 U.S.T. 3201 (1956); Antarctic Treaty, 12 U.S.T. 794 (1959); Statute of the International Atomic Energy Agency, 8 U.S.T. 1093 (1956). However, it must be understood that the International Court will have no jurisdiction to try cases of alleged genocide.

Sixth, Senator Helms has said that, "Not a single case [has] been brought under the Convention."

If Senator Helms is here referring to cases brought before the International Court of Justice, then he is completely accurate in noting that no case has yet been brought. If this is an objection to ratification of the Genocide Convention, however, one would be left to conclude that many treaties which Senator Helms and others have supported should not have been ratified. The Senate has previously given its advice and consent, without reservation, to some eighty multilateral and bilateral treaties which also provide for the International Court of Justice resolving disputes under the treaties pursuant to the court's jurisdiction under Article 36(1) of its statute. Virtually none of these treaties has ever given rise to a dispute; certainly in no case has this provision ever resulted in spurious or politically-motivated charges being brought against the United States.

On the other hand, if Senator Helms is here referring to cases brought under the judicial system of a state party to the convention, at least one case has in fact been brought under the Genocide Convention. Following its ratification of the treaty in 1950, the State of Israel enacted a domestic criminal statute to implement the convention's provisions, as provided for in Article V. This Israeli statute provided the basis for that country's 1965 prosecution of Adloph Eichmann.

Mr. DODD. Mr. President, I thank the Senator from Wisconsin for citing, once again, the voluminous evidence that has been accumulated over the past 35 years on the Genocide Convention and the testimony that has been given by countless scholars on this issue.

I should point out that only a very small minority of so-called constitutional experts subscribe to the argu-

ments that this convention would damage our sovereignty.

It is also worthwhile to point out that seven Presidents of the United States, seven Chief Executive Officers, four Democrats and three Republicans—the Eisenhower administration was the only exception not to take a position on the Genocide Convention—Truman, Kennedy, Carter, Johnson, Nixon, Ford, and Reagan—have said this is something America ought to stand for. That evidence alone ought to be compelling.

Those administrations cover the full political spectrum, running from conservative to moderate to liberal. Yet, all have one thing in common—they all support and endorse the ratification of the Genocide Convention.

So at last, here we are once again denying the collective wisdom of seven administrations and, as the Senator from Wisconsin pointed out, denying the collective wisdom of countless witnesses, countless scholars, and countless concerned individuals who understand the importance of trying to at least reduce the threat of genocide occurring again, and again we are dragging our feet. I think that is incredible and inexcusable.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter from the president of the American Bar Association to the majority leader, dated October 10, 1984.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN BAR ASSOCIATION,
Washington, DC, October 10, 1984.

Hon. HOWARD H. BAKER, Jr.,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR MR. MAJORITY LEADER: I was pleased to learn that you have scheduled the International Genocide Convention for consideration by the full Senate. I commend your leadership in bringing this important international criminal law treaty to the floor, as I commend President Reagan for his strong endorsement and Senator Percy for his leadership in having this treaty approved by the Foreign Relations Committee without a single dissent. On behalf of the 310,000-member American Bar Association, I reiterate the unequivocal support of the legal profession for prompt Senate advice and consent to ratification of this fundamental international document.

It would be a signal achievement of your leadership, if, after the thirty-five years this treaty has been pending before the Senate, the 98th Congress finally put the United States firmly in the position of condemning the most heinous form of international terrorism—genocide. Such action would underscore the fact that the United States stands first in line against those nations who would persecute their own people under a regime of lawlessness instead of protecting their own citizens, as does the United States, under the rule of law.

As President Reagan said to the Annual Meeting of B'nai B'rith last month, "anyone who has contemplated the horror inflicted on Jews during World War II, the deaths of millions in Cambodia, or the travail of the Misquito Indians in Nicaragua must understand that if free men and women remain silent in the face of oppression, we risk the destruction of entire peoples." The time now has come to ratify this document so that, as the President noted, it can be used "to expand human freedom and fight human rights abuses around the world."

Over the long history of Senate consideration of this treaty allegations have been made that its ratification would somehow undermine the sovereignty of the U.S. Constitution and would jeopardize the rights of U.S. citizens. As the President of the largest organization of lawyers in the world—an organization that for many years opposed this treaty on those very grounds, but which in 1976 resolved to its satisfaction all questions raised against the treaty—I must reject those assertions. The sovereignty of the U.S. Constitution simply cannot be overcome by a treaty. There has never been a decision by the Supreme Court holding that a treaty is superior to the Constitution. The top lawyers of the Departments of Justice, State and Defense over the decades have reiterated this fact, which is best exemplified by the 1970 testimony of then Assistant Attorney General William Rehnquist that there are no constitutional or legal impediments to ratification of the Genocide Convention.

Since this treaty cannot change any of the basic protections afforded U.S. citizens by the Constitution it then follows that nothing in the treaty could jeopardize the due process rights of U.S. citizens contrary to the provisions of the Constitution. Under the terms of the treaty (Articles IV, V, VI and VII) and of the third understanding recommended by President Reagan and the Senate Foreign Relations Committee, the authority of the United States to try persons in the United States alleged to have committed genocide—whether those crimes were alleged to have been commited in the United States or elsewhere—remains secure. This treaty does not provide for extradition of United States citizens and no existing treaty could authorize such extradition. However, as with numerous other treaties to which the United States is a party (including those outlawing international terrorism, aircraft sabatoge and other crimes) the United States most certainly will wish to negotiate such extradition treaties in the future to assure the strong enforcement of our law against persons in other nations alleged to have committed genocide in the United States.

I urge you and all of your colleagues to respond to the President's call for ratification of the Genocide Convention and promptly to give your advice and consent to ratification.

Sincerely,

JOHN C. SHEPHERD.

Mr. BOSCHWITZ. Mr. President, I point out to my colleagues some of the principal sentences in this letter.

It states that the 31,000-member American Bar Association reiterates unequivocal support for this treaty.

The president, Mr. John C. Shepherd, goes on to say that the sovereignty of the U.S. Constitution simply cannot be overcome by a treaty, and the rights of American citizens will not be jeopardized by this treaty.

I direct the attention of my colleagues to the entire letter.

Mr. President, the first article has been read. Is it now proper that we proceed to the second article?

The PRESIDING OFFICER. Are there any amendments to the first article?

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, a parliamentary inquiry. Are amendments now in order to article 1?

The PRESIDING OFFICER. Amendments are in order to article 1.

AMENDMENT NO. 7093

Mr. SYMMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

Add at the end of article I of the treaty the following new section:

"Nuclear war poses the greatest threat of genocide yet imagined in the world, and therefore the President will submit forthwith and on an annual basis thereafter to the Congress of the United States and to appropriate Representatives of the parties signatory to this treaty, a detailed and comprehensive report of all violations of nuclear arms control agreements to which the United States is a party; provided further that for purposes of the first report required hereunder, the President shall submit before the 98th Congress adjourns *sine die* the report prepared by the General Advisory Committee on Arms Control and Disarmament entitled: "A Quarter Century of Soviet Compliance Practices Under Arms Control Commitments 1958–1983(u).""

Mr. SYMMS. Mr. President, I offer this amendment because I believe it is very important that the much-discussed "GAC Report" on Soviet SALT violations is needed by the Senate and by the American people. Not only that, the "GAC Report" on Soviet SALT violations is needed by the Senate and by the American people in order for us to have a proper understanding of the arms control issue, and it is an important issue in the 1984 political campaigns.

I am reliably informed that the National Security Council staff has given President Reagan the "GAC Report" for his signature. President Reagan has the "GAC Report" on his desk today and could sign it and send it to Congress at any time.

I believe that even given that possibility, this amendment is necessary, in the context of the Genocide Treaty, because the treaty attempts to prevent genocide by nuclear war or any other way, but Soviet violations of the SALT

treaties might cause an increase in the risk of nuclear war.

I think this is something that should be clearly understood by all parties here in the Senate before any action is taken on this, and I say that the "GAC Report" might prove that the Soviet SALT violations have increased the risk of nuclear war and therefore the risk of genocide. The "GAC Report" can expose Soviet SALT violations as enhancing the risk of genocide.

I believe the Senate should support this amendment for this reason.

This amendment requests President Reagan to submit the "GAC Report" to Congress. It has the same thrust as an amendment passed by the Senate unanimously in June, and it also passed the other body unanimously in June, and the "GAC Report" amendment, therefore, should be noncontroversial and should be adopted unanimously.

Mr. SYMMS. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate?

Mr. PELL. Mr. President, I just had an opportunity to glance at this amendment with a proposed new section, and I would like to make two points.

First and most important, this amendment would require that the treaty would have to be negotiated with the 96 nations that have already signed it.

Second, the subject matter of the amendment is very extraneous to the subject matter of the treaty. Further, it would involve foreign governments in a requirement that the President of the United States report to the Congress of the United States. This would be a very unfortunate precedent.

So for both these reasons, I am compelled to oppose this amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I also rise to oppose this amendment. An amendment, of course, to the treaty itself as opposed to the resolution of ratification would, in effect, void the treaty. But this amendment really appears to me not to be germane to have in an international treaty to have the President of the United States submit an annual report to Congress.

So my question to the Chair is whether or not this amendment is indeed germane.

Mr. SYMMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The Chair is about to rule.

In response to the Senator from Minnesota, the Chair states that there is no germaneness requirement on treaties.

Mr. SYMMS. Mr. President, I raise the question of germaneness and ask for the yeas and nays.

The PRESIDING OFFICER. There is no question of germaneness. The Chair has so stated.

Mr. BOSCHWITZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

Mr. BAKER. Madam President, an amendment has been offered by the distinguished Senator from Idaho, Senator SYMMS, which proposes at the end of article I of the treaty to add a new section, which is at the desk. I have a parliamentary inquiry. The parliamentary inquiry is this: If this amendment were adopted by the Senate, does this constitute a modification of the treaty itself, which would require renegotiation with the other signatory countries?

The PRESIDING OFFICER. Yes, the majority leader is correct, it would require renegotiation.

Mr. BAKER. Is the reason for that that it modifies the treaty itself and thus would require resubmission to the signatory countries?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Madam President, I thank the Chair.

I inquire of the Senator from Idaho if he intends to ask for a vote on this amendment. I hope that this amendment would not be pressed at this time. It is the hope of the leadership on this side that we can reach the place on this treaty where we can get to the resolution of ratification and then ultimately get to such things as questions of understandings and reservations and amendments. But this would in effect kill the treaty, I think, in that, according to the opinion of the Chair, it would require the resubmission of this treaty to all of the nations who have previously signed it.

Could I inquire of the Senator if he intends to press this point at this time or if he might be in a position to withdraw the amendment.

Mr. SYMMS. If the majority leader will yield, Madam President, I ask unanimous consent that the yeas and nays that have been ordered on this amendment be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. I withdraw the amendment. However, I reserve the right to reoffer this amendment at a later time, and to try to appeal the ruling of the Chair.

Mr. BAKER. I thank the Senator from Idaho. I thank all Senators.

Mr. HELMS. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Madam President, I asking unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Madam President, I am involved in a conference committee that is going on and do not have time to speak at length on this matter. When this matter was before the Senate previously I voted for cloture on the genocide matter. I felt that it should be brought before the Senate and resolved. I express my admiration for the majority leader in bringing it before the Senate now.

I also think that the fact that a matter that has stayed unresolved before this body for so many years demonstrates there are basic misunderstandings concerning the impact of this treaty on our Nation. And I do want the record to show that I believe matters have been raised which require voting by the Senate on specific understandings of the Senate as acts to ratify this convention. It is important for us to take the time to resolve those matters, and to vote to demonstrate to the country that we have in fact entered into understandings which eliminate a great portion of the misunderstanding that has delayed this Genocide Treaty for so many years.

I would be happy to answer any questions anyone might have. I want to state so there is no question about it—I am sure my good friend is here, and he knows that there is no misunderstanding—the fact is that I seek to succeed the Senator from Tennessee in terms of the leadership of this Senate, and should that be my fate, I intend to see to it that the Senate addresses this issue early next year, and take the time to pursue these understandings, and get them to the point where the Senate will in fact adopt understandings which attempt to eliminate the basic cause of the delay

in ratifying this convention for so many years.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Madam President, I say to my good friend from Alaska that we indeed have over the years held an extraordinary number of hearings, I believe a dozen, one of them relatively recently, and one in 1981 at some length. There have been 1,500 pages of testimony. All aspects of this treaty and understandings have been examined in some detail. While we can probably serve some purpose by reexamining them and reconsidering them, this treaty, as you know, has been delayed and delayed. And really it is quite appropriate that we go forward with it now. It is my hope that during the course of the afternoon we will reach those understandings and examine whether or not they are new, and whether or not they present some new element that the Senate has not previously considered. In the event they do, perhaps that would be a cause for laying this convention aside. I do not believe they do. I believe that all aspects of the treaty have been previously considered, and a number of times. I hope we can move forward.

Madam President, may I ask if at this time we could proceed to article 2?

The PRESIDING OFFICER. Are there any amendments to article 1? If not, the clerk will report article 2.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Madam President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Madam President, in view of the observations we have had from our beloved and departing majority leader and the majority whip, it is evident what will be the outcome of today's discussion. The Senator from New York would only wish to state that this has been the outcome of all too many discussions, of all too many issues of comparable importance in this Congress. We have found within the week that we do not have the wherewithal to restate the provisions of the Civil Rights Act of 1964, a matter proposed by and supported by every President from the 1960's to 1980, and find today that we do not have the wherewithal to proceed to consider a convention which originates as much as any one thing with the initiatives of the United States and its support at the United Nations, which the President has urged upon us, and if the legitimate question is asked what has been its effect; a legitimate answer has been where has been our support.

What can be done on behalf of observance of an international standard put in treaty form not solely, but largely, an American initiative which the United States then did not adhere to; and not on a different level, one could ask what was the effectiveness of the League of Nations which the United States helped form and then declined in this body to join.

We will be back. And most particular, the Senator from Wisconsin will be back. A week ago, I had the occasion to put into the CONGRESSIONAL RECORD the first of 6,000 speeches which the Senator from Wisconsin gave on this subject. An equivalent act of endurance, of determination, of steadiness, of fixity, of moral purpose will not be found. An equivalent may be found. A greater certainly will not be found in the annals of this body. If I feel that the stature of this Chamber is somehow diminished by what we are doing now, may I say in that context the stature of the Senator from Wisconsin is all the more enhanced.

There are times when men and women stand alone. He is one such, and has stood alone in this Chamber for 6,000 consecutive speeches until at long last a response came forward only to find councils of fear, councils of unfamiliarity with the large world, councils of insularity, blocking him.

Again, they will not surmount him. He will prevail. We will yet honor those who drafted this treaty. We will yet consent to its ratification. We may one day, in that situation, speak in the councils of the world for its observance.

Let no one suggest that if the treaty has not had the effect anticipated for it, that that fact is not directly connected with the fact that the United States of America has not chosen to stand with the rest of the nations of the world in the condemnation of the international crime of genocide.

Madam President, I await the first speech of the Senator from Wisconsin, which I anticipate shall be on the 3d day of January 1985. I shall be here.

Mr. PROXMIRE. Madam President, I want to thank my good friend from New York. As a former U.N. Ambassador, he is an outstanding expert on foreign relations. He understands how important this treaty is in so many, many ways. I cannot tell him how much I appreciate those undeserved but very, very welcome words.

Mr. DODD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objective, it is so ordered.

Mr. HATCH. Madam President, this distinguished body has been considering ratification of the Genocide Convention. I would like to join my colleagues in condemning the crime of genocide. I abhor the mass killing and destruction of any people on Earth. No one, with any degree of compassion and love for his fellow human beings, could possibly support genocide for any reason. Human life is sacred and every person on Earth—no matter what nationality, creed or tongue—is important and equal in the sight of God.

It is tragic that millions of people born into the Jewish faith were put to death in concentration camps under the ruthless hands of the Nazis—one of the most hideous commissions of genocide in our lifetimes.

It is also tragic that another nation—the Soviet Union—has periodically practiced genocide on its own people for over 60 years and continues to promote genocide on various groups outside their country through the support of revolutionaries and terrorists around the world.

It is also regrettable that a few countries today practice genocide on factions in their countries.

Madam President, I would like to encourage my colleagues in the Senate to carefully study each of the first nine articles of the Genocide Convention before they cast a vote in favor or against the treaty. The American people expect this body to carefully examine any treaty before it is ratified to ensure that it accords with the provisions of the Constitution and the concept of Republican government.

In the words of George Washington: "It is important* * * that the habits of thinking in a free country should inspire caution in those entrusted with its administration, to confine themselves within their respective Constitutional spheres.* * *"

Madam President, I would like to clarify two points which have become obscured in the current debate over the Genocide Convention.

First, the convention does not outlaw genocide by governments. Naturally, all Americans abhor the crime of genocide; however, as genocide is defined in the convention, it does not apply to mass killings and destructions of peoples by totalitarian governments. Article IV limits the application of the convention to "persons" committing genocide.

The original U.N. declaration on genocide, dated December 11, 1946, denounced the crime whether "committed on religious, racial, political, or any other grounds." When the decla-

ration was being converted into the convention, the Communist nations demanded that the term "political" be omitted from the listed categories and the United States capitulated. The omission of political groups effectively prevents the Communist nations, or any other nation, from ever being charged with genocide; consequently, the convention does nothing to aid tens of thousands of people behind the iron curtain and other thousands around the world who are considered enemies of a state.

Second, the convention allows the United Nations to write domestic law through international treaties. I am convinced that individuals who are seeking Senate ratification of the Genocide Convention do not understand the legal effect of such action on domestic law within the United States. Unlike many other nations, our Constitution mandates that treaties become "the supreme law of the land." In other words, a treaty nullifies all provisions of Congress, the States, and becomes binding domestic law.

Thomas Jefferson wrote in his manual of parliamentary practice that:

> By the general power to make treaties, the Constitution must have intended to comprehend only those objects which are usually regulated by treaty, and cannot be otherwise regulated.

In the course of hearings in 1953 on a proposed constitutional amendment to limit the power of treaties as domestic law, Secretary of State John Foster Dulles stated before a Senate Judiciary subcommittee:

> I do not believe that treaties should, or lawfully can, be used as a device to circumvent the constitutional procedures established in relation to what are essentially matters of domestic concern. (The United States) should favor methods of persuasion, education and example rather than formal undertakings . . .

In 1955, the U.S. Department of State in an official policy statement reaffirmed Dulles' declaration:

> Treaties are not to be used as a device . . . to try to circumvent the constitutional procedures established in relation to what are essentially matters of domestic concern.

These views accord with Mr. Charles Evans Hughes, who said, while President of the American Society of International Law, that:

> There (is) a limitation upon the treaty-making power that is intended for the purpose of having treaties made relating to foreign affairs and not make law for the people of the United States in its internal concerns.

In light of these statements should the treaty-making power be used to enact domestic legislation in the United States? I think not. It would do violence to our constitutional system of government. Government by treaty is just as abhorrent as government by the judiciary.

As a principle of constitutional law, the United States should not enter into or ratify any treaty or executive agreement governing rights in the domestic area. These issues should remain the exclusive jurisdiction of domestic legislation. There is no country in the world today to whom the United States needs to apologize with regard to our Nation's protection of individual rights.

If proponents of the convention are concerned about making genocide a crime within the United States, it can be done without the assistance of a treaty. State legislatures are capable of enacting domestic legislation in this area. In fact, this seems the wisest course of action.

THE GENOCIDE TREATY'S IMPACT ON AMERICA AND THE CONSTITUTION

Madam President, article 62, paragraph 2, of the Charter of the United Nations states that the Economic and Social Council is empowered, however, not required to:

> Make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

Acting upon this recommendatory power, a Commission on Human Rights, a subdivision of the Economic and Social Council, published at Geneva on December 27, 1947, the International Covenant of Human Rights and International Declaration on Human Rights. The covenant, when ratified by member nations, was to have the effect of international law. An international court for enforcement was to be created in the future.

The declaration, while not legally binding as international law, was a consensus of the Commission members concerning the political, economic, and social rights to be granted to individuals on earth. Although the Declaration did not carry the force of law, Mrs. Eleanor Roosevelt, chairman of the Commission on Human Rights, stated that the Declaration is considered an "authoritative interpretation" of the intent of U.N. Charter provisions.

The drafts of the covenant and declaration were submitted to member nations for comments and suggestions. In May and June 1948, after collection of the suggested revisions, the U.N. Commission on Human Rights drafted a revised version of the Declaration and published it in the United Nations Bulletin on July 1, 1948.

It was this Commission that took upon itself the task of drafting a bill of rights for the United States and other member nations. Stripped of all rhetoric, the covenant and declaration are mere proposals for the advancement of worldwide socialism.

It is important to note that the United Nations is an organization of sovereign states pledged to the promotion of peace. It is not a world government and according to article 2, section 7, of the Charter, the U.N. is prohibited from interfering "in matters which are essentially within the domestic jurisdiction of any state."

While there are statements in the Charter which discuss the "realization of human rights and fundamental freedoms for all," the fact remains that the United Nation is an organization of states. It functions on an international level with governments confronting governments.

A bill of rights exists for the sole purpose of outlining the rights of individuals. It defines the relations between individuals and the state or government, and is basically an internal or national document.

The members of the U.N. Commission on Human Rights and others were seeking to increase the power of the United Nation and the World Court when they drafted the covenant.

In order to enforce the provisions of the covenant and declaration or any international bill of rights, the United Nations would have to interfere continually in the internal affairs of the member nations. And that is exactly what the covenant and declaration would do, and exactly what the Genocide Treaty is designed to do.

The Genocide Treaty, a companion treaty to the International Covenant on Human Rights, seeks to make genocide an international crime subject to international jurisdiction.

Many proponents of the United Nation have been working unceasingly to create a body of treaty law at the international level which would require adherence of member states and increase the power of the World Court. In the process our national sovereignty was to be diluted and provisions of the U.S. Constitution were to be subordinated.

Senator Sam J. Ervin was aware of the movement to increase the power of the United Nations, and in testimony before a Subcommittee of the Committee on Foreign Relations on May 22, 1970, commented:

> During the 1940's some activists connected with the United Nations engaged in a strenuous effort to establish, by treaties, laws to supercede domestic laws of nations throughout the earth. The Genocide Convention represents one of these efforts. It originated in a resolution of the United Nations condemning genocide as a crime whether "committed on religious, racial, political, or any other grounds." When reduced to its final form it excluded genocide committed on "political grounds" because some of the parties to it did not wish to surrender even nominally their right to exterminate political groups hostile to their rulers. Under its provisions, individuals as well as persons exercising governmental power would be subject to trial and punishment for offenses which have always been regarded as matters falling within the domestic jurisdiction of the various nations."

The Genocide Convention was adopted by the General Assembly of

the United Nation on December 10, 1948 and submitted by President Harry S. Truman to the Senate for its consideration on June 16, 1949. The Senate Foreign Relations Committee appointed a subcommittee which conducted hearings in January and February 1950. The subcommittee reported to the full committee that the United States should not ratify the convention unless the Senate adopted four understandings and one declaration. The full committee refused to send the convention to the Senate floor. Since the report of the subcommittee was made, the Senate has refused to ratify the convention.

Three months after the convention was transmitted to the Senate, the House of Delegates of the American Bar Association met on September 8, 1949 to consider some resolutions recommended by the Section of International and Comparative Law on the Genocide Convention. It also pondered a report dealing with the convention prepared by the Special Committee on Peace and Law through the United Nations. After studying the recommendations made by the section and the report of the special committee, the House of Delegates adopted the following resolutions:

Be it Resolved, That it is the sense of the American Bar Association that the conscience of America like that of the civilized world revolts against genocide (mass killing and destruction of peoples); that such acts are contrary to the moral law and are abhorrent to all who have a proper and decent regard for the dignity of human beings, regardless of the national, ethnical, racial, religious or political groups to which they belong; that genocide as thus understood should have the constant opposition of the Government of the United States and of all of its people.

Be it Further Resolved, That the suppression and punishment of genocide under an international convention to which it is proposed the United States shall be a party involves important constitutional questions; that the proposed convention raises important fundamental questions but does not resolves them in a manner consistent with our form of government.

Therefore, be it resolved, that the Convention on Genocide now before the United States Senate be not approved as submitted.

The American Bar Association's Special Committee on Peace and Law through the United Nations contained the main arguments against the Genocide Convention. It consisted of 10 of the most influential lawyers in America—Carl B. Rix, chairman, Deane C. Davis, George A. Finch, Harold R. McKinnon, Frederick M. Miller, Nathan L. Miller, Orie L. Phillips, Author G. Powell, Alfred J. Schweppe, and Frank E. Holman, president, ex officio, ABA.

The committee report began with these words:

At a time in the history of the world when economic conditions, resulting largely from two devastating wars, are forcing nations to demand sacrifices of their individual freedoms to conform to Socialist states or alien ideologies, the same peoples are being asked to adjust themselves to revolutionary changes in their relations with their own people and the people of other nations. It does not seem to be enough that they should be led by example and teaching to new ways of conduct. Under international codes of conduct called treaties they are to accept the changes by law. Government by treaties is the new concept.

Wherever possible, trials before international courts for violations are demanded and, failing that, great bodies of domestic laws creating new rights and crimes are to be provided and enforced by the states. All this is under the claim that individual acts and conduct menace the peace and security of the world.

Peoples who do not know the meaning of freedoms are to be metamorphosed into judges of the freedoms of others. A common pattern is to be set for billions of people of different languages, religions, standards of living, culture, education, and mental and physical capacity. A few people, with beliefs utterly foreign to each other, meet, debate, and by majority vote seek to determine how the people of the world shall live on a common pattern. To bring some people to a higher standard, those far above those standards, under the guise of precarious sacrifice to the common good, are to accept the mediocrity of the average. Are the people of the United States ready for such sweeping changes? (Hearings, p. 159.)

The members of the committee realized that a highly motivated, emotionally charged group of international social reformers were attempting to thrust upon the United States and other nations a body of treaty law "with no consititutional basis at all."

Realizing that a treaty becomes the "supreme law of the land," and supercedes State laws and constitutions, the committee declared:

The effect in this country of a ratified treaty of human rights and, in a limited degree, the Genocide Treaty, in a field which has been almost exclusive in the States, is so-far reaching in its consequences that the word "revolutionary" is not fully descriptive. (Hearings, p. 162.)

The committee then included a statement made by George A. Finch, vice president of the American Society of International Law and fellow committee member, detailing that human rights are already secured in the United States.

We already have in this country a highly developed system for the protection of human rights, sanctified by constitutional provisions and applied and interpreted by our courts—provisions that are based upon the principle that the individual is himself sovereign and possesses inherent human rights without having to ask for them from anyone. In our attempts to reach an international level, we are meeting with different concepts where, for example, rights are granted by governments or where governments are undertaking to guarantee certain so-called rights. We are bound to have a head-on collision between these different concepts and approaches in an attempt to reach an international agreement.

The concern of our lawyers is with the situation in this country if and when the proposed international agreements, reached as the result of necessary compromise, become the law of the land by enactment in treaty form. No person in this room can deny that now, except where resident aliens are involved, the subject of human rights is a matter completely within the domestic jurisdiction of the United States Government and the States of the Union. Nor can anyone deny that the minute we make a treaty on the subject we transform the subject matter into one of international concern. Thereafter we would not only have the right to tell other contracting parties what we think of their actions in the matters covered by the treaty, and invoke any prescribed sanctions, but the other contracting parties would have a corresponding right to make similar protests and demands upon us.

Some of the crimes that are described in the Genocide Convention and in the Draft Convention on Human Rights may be ordinary common-law crimes as well as international crimes under those documents. Is the United States Government to place itself in the position where it will be obliged to enter into diplomatic explanations to foreign nations or some international agency in regard to the interpretation and application of the Constitution of the United States whenever an American citizen or his alien friends or fellow travelers may feel in a position to complain that his treatment in the courts of his own country is a denial of human rights?

If these proposals to protect human rights and to prevent genocide had been framed so as not to bring up internal constitutional questions, no one would have heard from the American Bar Association on this subject; but the proposals have not been framed that way. They have been framed, and I think purposely framed, so as to take American domestic questions out of the sole jurisdiction of American courts and place them under some form of international appellate jurisdiction.

A convention or covenant which can be interpreted to apply to individuals committing ordinary common-law crimes and which may be invoked to raise discussion to an international level every time such a crime is committed by an individual, would cause more friction between peoples and governments than the evil itself now does and would tend to promote war rather than to preserve peace between nations. (Hearings, pp. 173-174.)

The Special Committee report served as the vanguard publication outlining the reasons for opposing the Genocide Treaty for over two decades.

After laying dormant for 20 years under Eisenhower, Kennedy, and Johnson, President Richard Nixon resurrected the convention and sent it to the Senate for ratification. Hearings were held in April and May 1970 by the Senate Foreign Relations Committee.

On May 22, 1970, Senator Sam Ervin, a noted constitutional lawyer, outlined six basic objections to the Genocide Convention:

First. If the Senate should ratify the Genocide Convention, the U.S. would be obligated by it to prosecute and punish public officials and private citizens of our country for acts alien to the concept embodied in the term genocide. . . .

The convention definition of genocide is inconsistent with the real meaning of the

term, which is the systematic, planned annihilation of a racial, political, or cultural group. The word annihilation clearly contemplates the complete destruction or the complete wiping out of the designated group.

Yet, the convention definition covers the destruction either in whole or in part of members of a group embraced by it. This means that a public official or private individual is to be subject to prosecution and punishment for genocide if he intentionally destroys a single member of one of the specified group.

Second. . . . If the Senate should ratify the Genocide Convention, . . . constitutional provisions would automatically make the Convention the law of the land, put all of its self-executing provisions into immediate effect as such, and impose upon the U.S. the obligation to take whatever steps are necessary to make its nonexecuting provisions effective. This means that the provisions of the Genocide Convention would immediately supersede all State laws and practices inconsistent with them, and would nullify all provisions of all acts of Congress and prior treaties of the U.S. inconsistent with them.

Third. One of the most drastic impacts the ratification of the Genocide Convention would have upon our system of Government is in the criminal field. If the Senate should ratify the Genocide Convention, the duty and the power to prosecute and punish criminal homicides, assaults and batteries, and kidnappings, covered by categories (a), (b) and (e) of article II of the convention would be forthwith transferred from the states which have always had such duty and power in respect to these crimes to the Federal Government. To make this transfer of jurisdiction workable, Congress would be required to enact new laws laying down rules of procedure to govern the trial of these newly created Federal and international crimes. . . .

Fourth. If the Senate should ratify the Genocide Convention, it would place obligations upon the U.S. to prosecute and punish as genocides acts whose nature the convention fails to disclose and to take steps whose nature the convention fails to reveal.

If the convention is ratified, article II(b) would impose upon the U.S. the duty to prevent and to prosecute and punish public officials and individuals who cause "mental harm to members" of any one of the four groups named in the convention. What mental harm means in this context is totally incomprehensible, and what psychological acts or omissions are made punishable in this context are left in obscurity.

Fifth. If the Senate should ratify the Genocide Convention, it would make American soldiers fighting under the flag of their country in foreign lands triable and punishable in foreign courts—even in courts of our warring enemy—for killing and seriously wounding members of the military forces of our warring enemy.

This is made indisputable by article I which provides that genocide is punishable under the convention whether it is committed in time of peace or in time of war, and by the fact that it contains no provision exempting soldiers engaged in combat from the coverage of the provisions of the convention. . . .

Sixth. If the Senate should ratify the Genocide Convention, article I would impose upon the President, as the Chief Executive of the U.S., the duty to enforce both the provisions of the convention and any acts of Congress implementing them as the supreme law of the land." (Hearings, May 22, 1970.)

Senator Ervin's penetrating analysis of the far-reaching effects of the Genocide Treaty played a key role in preventing the ratification of the convention in 1970.

On March 6, 1973, the Senate Foreign Relations Committee approved the convention with three understandings and one declaration. It was debated on the Senate floor for 1 week in February and by votes of 55–36 and 55–38, they failed to invoke cloture and vote on the convention.

The Senate Foreign Relations Committee, without hearings, recommended the adoption of the convention again on April 13, 1976, but the Senate failed to take any action. On May 23, 1977, President Jimmy Carter recommended that the Senate ratify the convention. Hearings were held on May 24–26, 1977, but the convention never reached the Senate floor. A public hearing was held on December 3, 1981, but the convention was not reported out of committee.

On September 6, 1984, President Ronald Reagan announced that the administration will "vigorously support, consistent with the U.S. Constitution, ratification of the Genocide Convention."

Senator CHARLES PERCY scheduled a hearing on September 12. During that hearing, Senator HELMS introduced two understandings that were designed to uphold the President's desires to support the convention, "consistent with the U.S. Constitution." The State Department refused to support the HELMS' understandings, negating in the process, some feel, the President's desire to support the convention "consistent with the U.S. Constitution."

The convention was sent to the Senate floor for ratification on September 19, by a unanimous vote of the Foreign Relations Committee.

For 35 years, legal scholars in America have discussed the fundamental constitutional questions surrounding the Genocide Treaty and recommended that it not be ratified.

In light of the continued debate over the treaty I would like to encourage my distinguished colleagues to consider five basic constitutional questions before they cast their votes for or against the convention:

First, should the treaty-making power be used as the basis for enactment of domestic legislation in the United States?

Second, would the convention alter the balance of authority between the States and the Federal Government by making genocide a Federal crime?

Third, does the convention violate specific amendments to the Constitution?

Fourth, does ratification of the convention limit our national sovereignty?

Fifth, does the convention mandate changes in the independence of the American legal system?

Madam President, I believe that the treaty-making power should not be used for enactment of domestic legislation. It should be limited to matters of relations between foreign nations.

I believe ratification of the convention would improperly limit our national sovereignty by requiring that disputes over the treaty be submitted to the World Court.

And I believe that the convention would potentially alter the independence of the American legal system by transferring jurisdiction over such crimes as homocide to the Federal Government and allowing the World Court to meddle in domestic matters of the States.

For these reasons I am unable to support the treaty as it now stands.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

Mr. BAKER. Mr. President, could I have the attention of the Senate? Could we have order?

The PRESIDING OFFICER. The Senate will be in order. The majority leader may proceed.

Mr. BAKER. Mr. President, I am happy to report that the Senate appears to be on the verge of doing something that I think will be an appropriate action, given the circumstances surrounding the debate on the Genocide Convention, and something the Senate occasionally does very well, and that is to take responsible action in order to provide for the disposition of the matters at hand and to preserve the positions of Senators as they may wish to express them.

It seems clear to me, Mr. President, that it is unlikely, in the remaining hours of this session, that we can conclude the debate on the convention, on the resolution of ratification, and on amendments that may be offered, including understandings, reservations, and the like. It seems clear to me, Mr. President, that it is not the desire of the Senate to create the impression that the Genocide Convention and the principles embodied in it are not fully supported by this body.

Mr. President, I am happy to say that Senator DODD came to me a little while ago, and then in conference with Senator HELMS and with the minority leader and others, there has resulted a resolution which I am going to introduce in a moment, but I would like to

ead now, and then I want to pro-ound a unanimous consent request, s well.

Resolved, That the Senate hereby ex-resses its support for the principles em-odied in the Convention on the Prevention nd Punishment of the Crime of Genocide, igned on behalf of the United States on De-ember 11, 1948 (Executive O, Eighty-first Congress, first session), and declares its in-ention to act expeditiously thereon in the irst session of the 99th Congress.

Mr. President, I think this is infi-nitely preferable to letting this matter, this important matter, disinte-grate into a filibuster and an inconclu-ive result, and almost surely that is where we are headed now in these final hours of this session of the Con-gress.

Therefore, Mr. President, I wish to propound this unanimous-consent re-quest.

UNANIMOUS-CONSENT AGREEMENT

Mr. President, I ask unanimous con-sent that the pending convention be temporarily laid aside and that it may be in order for me to offer a Senate resolution which I now send to the desk.

I further ask unanimous consent that the Senate now proceed to the consideration of that resolution ex-pressing the sense of the Senate in support of the principles contained in the convention against genocide and that the debate on the resolution be limited to 30 minutes, to be equally di-vided and controlled in the usual form, provided that no amendments, no mo-tions, other than a motion to table the motion to reconsider, and no points of order be in order during the consider-ation of the resolution.

I further ask unanimous consent that no debate be in order on any motion to reconsider.

Mr. President, before the Chair puts the request, may I attempt to explain.

The effect of the Senate granting this unanimous-consent request would be to place this resolution before the Senate. I anticipate that there would be a rollcall vote on that resolution, at a time to be agreed upon by the lead-ership on both sides. I anticipate, if the resolution is adopted, that the leadership on this side would ask that the Genocide Convention be returned to the Executive Calendar and it would not recur during this session of the Congress.

Mr. President, it would give us an opportunity, however, for Members to express their support for the princi-ples involved, provide an assurance that the matter is not dead and will be dealt with by the Senate and the Con-gress in a future session, and I believe is the best possible result that could be obtained under the circumstances which exist at this moment.

Mr. President, I see the distin-guished Senator from Connecticut, who has contributed so skillfully to this proposal. If he wishes me to yield to him, I would like to do that at this time.

Mr. DODD. I thank the majority leader for yielding.

I want to express my gratitude to him, as well as to Senators PELL, PROX-MIRE, HELMS, and BOSCHWITZ for their efforts in coming to a compromise on this language. And while I certainly, along with my colleagues on this side, at least many of them, would have preferred that we ratified the Geno-cide Convention Treaty, I realize that is not something we are going to be able to do, unfortunately. I had hoped we would. But I believe that if we are able to achieve passage of this resolu-tion we will have taken a significant step forward in a long, four-decade effort to ratify this treaty.

There are others who have certain reservations and concerns about what is presently included in that treaty. I respect those concerns. Hopefully we will have an opportunity to debate those issues and to try and resolve them at the earliest possible conven-ience of this body on the reconvening of the 99th Congress.

I again wish to thank the majority leader and the minority leader for their leadership and guidance on this matter. Hopefully this resolution will be overwhelmingly adopted by this body. I thank the majority leader.

Mr. BAKER. I thank the Senator from Connecticut.

I yield now to the ranking minority member of the Foreign Relations com-mittee.

Mr. PELL. Mr. President, I join in congratulating the Senator from Con-necticut on the skillful way, as the ma-jority leader used the phrase appropri-ately, that he figured a way out of this imbroglio in which we find ourselves.

As the majority leader so clearly stated, we were obviously on course for a filibuster. In this closing day or days of the session, a filibuster would affec-tively block consideration of the treaty. I think that this is a good com-promise, the best that could be achieved, and I am very glad that we will be taking the convention in the new Congress.

Mr. BAKER. I thank the Senator. I yield now to the Senator from North Carolina.

Mr. HELMS. Mr. President, I would pose perhaps a rhetorical question to my friend from Tennessee. There is nothing implicit or explicit in this re-solution which would shortcut the hearing process of consideration of the treaty next year. That is not intended, is it?

Mr. BAKER. No, Mr. President, it is not.

Mr. HELMS. So what we are saying is, in effect, that we are deferring until next year full Senate consideration of the Genocide Convention.

Mr. BAKER. Yes, Mr. President, the resolution is a statement of support by the Senate for the principles embodied in this convention itself but action on that convention according to the con-stitutional form is deferred until next year.

Mr. HELMS. That was my under-standing when I worked with the dis-tinguished Senator from Connecticut. And assuming that all of us will be back, which may be a far-reaching as-sumption, I look forward to discussing the intricacies of the implications of the treaty with him and with other Senators. I thank him for allowing me to work with him. I thank the majori-ty leader.

Mr. BAKER. I thank the Senator from North Carolina.

The PRESIDING OFFICER. Is there objection to the unanimous con-sent of the majority leader? Without objection, it is so ordered.

SENATE RESOLUTION 478—EXPRESSING SUPPORT FOR PRINCIPLES CONTAINED IN THE CONVENTION AGAINST GENOCIDE

The PRESIDING OFFICER. The resolution will be stated.

The bill clerk read as follows:

Resolved, That the Senate hereby expresses its support for the principles embodied in the Convention on the Prevention and Punishment of the Crime of Genocide, signed on behalf of the United States on December 11, 1948 (Executive O, Eighty-first Congress, first session), and declares its intention to act expeditiously thereon in the first session of the 99th Congress.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the resolution.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I ask unanimous consent that no call for regular order will serve to displace this matter except the call for regular order by the majority or minority leader.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, if I could inquire of the minority leader and managers on both sides, there is 30 minutes of debate. We can do that now, or we can save it until later, as Senators may prefer. If Senators wish to save it until later, it would be the intention of the leadership on this side to temporarily lay aside this measure to ask that the Genocide Convention be returned to the calendar, and to go on to other matters.

Mr. PROXMIRE. Mr. President, will the majority leader yield?

Mr. BAKER. Yes.

Mr. PROXMIRE. This Senator would greatly prefer to act now on this

as far as the debate is concerned. If the leader feels there is any reason to postpone the vote until later time for the convenience of Members, I think that would be OK. I hope we can proceed to debate it now. Those of us who are most interested in this resolution and have worked with the various people who have put it together are present and ready to talk.

Mr. BAKER. Mr. President, I thank the Senator. I have no problem with that. There are two things I would like to do first. I ask unanimous consent now that the Genocide Convention now pending before the Senate be returned to the Executive Calendar.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, may I make a parliamentary inquiry? Is the resolution that the Senate now has before it considered in executive session?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. I thank the Chair.

Will the minority leader mind before we start the debate if I took up a bill which I think will take 30 seconds?

Mr. BYRD. We have no problem. May I ask the distinguished majority leader? Would you like to get the yeas and nays ordered on the resolution first?

Mr. BAKER. Yes.

Mr. President, I ask for the yeas and nays on the resolution.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, will the distinguished majority leader yield in response to his question? Unless someone sees differently on this side of the aisle, I think probably it would be just as well served to proceed at some point with the debate and have everything out of the way except the vote.

Mr. BAKER. I have no problem with that. Mr. President, after the debate is concluded, it would be the intention of the leadership to ask that the matter be temporarily set aside, and the vote will occur later. I will not now make that request. That will be my intention.

LEGISLATIVE SESSION

Mr. BAKER. I ask unanimous consent that the pending measure be temporarily laid aside, that the Senate resume legislative session for not to exceed 2 minutes, and that the Senate then proceed to the consideration of H.R. 4230. I further ask unanimous consent that no amendments be in order, except an amendment in the nature of a substitute to be offered by the distinguished Senator from Utah, Mr. GARN; that no points of order be in order, and that no motion be in order except a motion to reconsider, and that no debate be in order on the motion to reconsider.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

EXTENSION FOR EXPORT ADMINISTRATION ACT OF 1979

Mr. BAKER. Mr. President, I ask the Chair lay before the Senate Calendar Order No. 499.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 4230) to extend the authorities under the Export Administration Act of 1979.

The Senate proceeded to the consideration of the bill.

AMENDMENT NO. 7094

Mr. BAKER. Mr. President, on behalf of the distinguished Senator from Utah [Mr. GARN], I send an amendment to the desk in the nature of a substitute.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. GARN, proposes an amendment numbered 7094.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed under amendments submitted in routine morning business.)

Mr. GARN. Mr. President, I would note for the benefit of my colleagues that the amendment which I propose here today has many of the very same provisions found in H.R. 3231, previously passed by the other body, and S. 979, which passed the Senate on March 1. The remaining provisions are the result of discussions between the House and the Senate in the conference committee which has met 14 times since April 12.

I believe that this amendment represents a fair and equitable offer to the House, and I am confident that, after due consideration, the House will accept it. This amendment includes only provisions which have been agreed to by both bodies during the conference. Therefore, I see no reason why the House should have procedural problems with acting on this bill.

Mr. President, it is my fervent hope that the House will act expeditiously on this bill and that a new Export Administration Act can therefore by enacted during 1984. Otherwise, I fear that the President will be forced to act under emergency authorities pursuant to the International Economic Emergency Powers Act for the foreseeable future, with all the uncertainty and difficulties that entails.

Below I offer a statement of purpose for this bill, which should be taken as a substitute for a conference report, since time precludes the writing of such a report.

SECTION 4—GENERAL PROVISIONS

The bill repeals the authority of the Secretary to offer qualified general licenses and authorizes the Secretary to offer distribution, comprehensive operations, project, and service supply licenses, except that distribution and comprehensive operations licenses may not be offered for exports to prescribed countries.

In agreeing to the executive branch's request to repeal the authority of the Secretary to offer qualified general licenses, it is not intended that the Secretary rescind such licenses currently in effect; nor is it necessarily intended that qualified general licenses not be available in the future. The Secretary retains authority to create by regulation such types of licenses as may assist in the effective and efficient implementation of the act, and it is left to the Secretary's discretion the possibility of continuing to offer the qualified general license or to create new types of licenses which the Secretary finds appropriate to protect national security and reduce the burden of individual validated licenses on U.S. exporters and on U.S. Government agencies.

The bill endorses the distribution license is as a means of reducing the burden on exporters engaging in trade not prejudicial to the national security, and of reducing the license processing burden on administering authorities. The factors described in the provision to be considered when relevant in individual applications for a license are not to be determinative in creating categories or general criteria for denial of applications or for withdrawal of such a license. This does not limit the authority of the Secretary to determine which items on the control list are eligible for export under a distribution licenses.

NATIONAL SECURITY CONTROLS

The bill eliminates U.S. licensing requirements for exports to Cocom allies with respect to relatively low-technology items that require only notification for export under Cocom multilateral controls. The bill preserves U.S. licensing requirements for all other shipments of controlled items to such cooperating countries but with a modification in the licensing process, effective February 1, 1985, to provide greater speed and predictability for export license applicants. The application process for individual validated licenses for exports to such countries as under current law would be amended to require that if the Secretary did not inform the applicant within 15 working days after receipt of an application of the disposition of the application,

or that more time was necessary to consider it, a license automatically would become valid and shipment could be made pursuant to that license. If the Secretary notified the applicant that more time was necessary to consider the application, an additional 15-working-day period would be available for the Secretary to take action. At the end of this second 15-working-day period, however, absent action by the Secretary to deny, a license automatically would become effective.

It is intended that notification by the Department of Commerce to an export license applicant that the Department has received an export license application shall contain a reference number that shall be identical to the number of the subsequent license to export, and that when a license becomes effective either by Government action or by the expiration of the specified periods the applicant may refer to that number—such as a Shipper's Export Declaration—with respect to that export. In the event that an export license applicant is notified that a second period for review is required, thirty days after the date of the Department's receipt of the application, the license shall become valid, and the exporter shall have authority to export the goods or technology specified in the application unless, before the expiration of the 30-day period, the Department informs the applicant that authority to export is denied.

U.S. exporters gain certainty that they may ship their products to cooperating countries after no later than 15 or, if necessary, 30 working days of submitting an application, unless the application is denied. Export authority obtained in this manner will constitute an individual validated export license in all respects. General and multiple licensing procedures remain unaffected.

This same treatment of license applications would be extended to govern exports to cooperating non-Cocom countries described in section 5(k), as amended.

REVIEW OF CONTROL LIST

The bill amends section 5(c) of the act to restate the procedures for reviewing the control list and to require such review annually. This provision would enter into effect on October 1, 1985.

We recognize that current Cocom practice provides for a triennial review of the multilateral Cocom control list, but it is intended that, to the degree possible, the annual review of U.S. national security controls include a review and updating of at least one-third of the Cocom list.

REPORTING OF AGREEMENTS TO EXPORT TECHNICAL DATA

The bill amends section 5(j) of the act to expand the category of agreements to export technical data which must be reported to the Secretary of Commerce, while retaining the exemption for colleges, universities, and other educational institutions from the reporting requirements.

In retaining the exemption in current law for colleges, universities, and other educational institutions for the requirement to report agreements which involve technical cooperation, we note and emphasize that educational institutions remain subject to the same controls and license requirements for technology transfers as all other exporters. Prior reporting of technical cooperation agreements, however, is a mechanism for possible prior restraint of scientific discourse. The courts have generally recognized and upheld a freer standard for such discourse in the academic setting than for commercial speech. (See, for example, *Trane Co.* v. *Baldrige*, 552 Fed. Supp. 1378 Aff'd 728 F. 2d 915.)

On that basis, it is appropriate to require prior reporting of commercial agreements with foreign government agencies while placing no such requirement on colleges, universities, and other educational institutions, which must nevertheless obtain appropriate licenses before exporting any controlled technology, technical data, or goods. It is the intention that U.S. Government agencies should require, as part of U.S. Government research contracts with colleages, universities, and other educational institutions, reporting to the Commerce Department of such institutions' agreements with any agency of the Government of a controlled country that might involve transfer of technology or technical data, to the extent that any U.S. Government agency might wish to be informed of such agreements.

AGREEMENTS WITH NON-COCOM COUNTRIES

The bill amends section 5(k) of the act to require negotiations on controls with countries which are not members of Cocom and to provide that countries which enter into agreements on export restrictions comparable in practice to those of Cocom are to be treated like Cocom countries for purposes of export controls.

SECTION 6—FOREIGN POLICY CONTROLS

Although section 6 of the bill makes a number of changes in the foreign policy provisions of current law, one in particular is worthy of some comment. With respect to the issue of "contract sanctity," the bill gives the President authority to impose foreign policy controls retroactively, that is, to break contracts already in existence, in those circumstances where the President determines and certifies to Congress that: First, a breach of the peace poses a serious and direct threat to the strategic interest of the United States, second, the prohibition or curtailment of such contracts or agreements will be instrumental in remedying the situation posing the direct threat, and third, the controls shall continue only so long as such direct threat persists. This language represents a small change from the original Senate position, which gave the President no flexibility in this area.

Let me say, however, that it is our intent that this language be narrowly construed, and there should be no question that this amendment significantly limits the President's authority compared to current law. The term "breach of the peace" refers to an actual act of aggression that poses a serious and direct threat to our strategic interests. "Strategic interests" are not peripheral or transitory. They are related directly to our survival as a nation and should not be otherwise interpreted by the executive branch.

Further, the language of the amendment requires a clear and direct relationship between the breaking of any contracts and the remedying of the situation causing the direct threat to our strategic interests. The President must be able to certify, under this language, that such breaking or curtailment is necessary to achieve the remedy and will achieve such remedy. Finally, the language makes clear that the controls shall continue in effect only so long as the direct threat persists.

I would also point out, Mr. President, that this limitation relates to the President's authority to break contracts through the imposition of foreign policy controls, that is, to impose them retroactively. It is not intended to limit his authority to impose such controls prospectively and thereby to affect contracts which do not exist as of the time of imposition of the controls. Those decisions are addressed elsewhere in this bill, and in that regard, the bill contains some modifications of the original Senate bill providing for certain determinations by the President prior to the imposition of prospective controls. This bill also reflects in large part the original Senate position with respect to the role foreign availability plays in the licensing of goods pursuant to foreign policy controls.

SECTION 7—SHORT SUPPLY CONTROLS

PETITIONS FOR MONITORING OR CONTROLS

The bill amends section 7(c) of the act to require the Secretary of Commerce to make and publish certain determinations on private petitions as well as on self-initiated motions before imposing monitoring or controls or both on exports of metallic materials capable of being recycled.

The amendment made by the bill requires that each petition filed requesting the imposition of monitoring, controls, or both, on metallic materials capable of being recycled shall indicate that each of the criteria in section 7(c)(3)(A) is satisfied. The amendment requires the Secretary to make and

publish certain determinations, including findings of fact in support of the determinations, before deciding whether to impose monitoring, controls, or both on exports of such material, including whether there has been a significant increase, in relation to a specific period of time, in exports of such material in relation to domestic supply and demand, and whether exports of such material are as important as any other cause of the domestic price increase or shortage relative to demand.

The provision continues to permit the Secretary to deny complete consideration to any new petition filed within 6 months after consideration of the prior petition has been completed. The bill also allows the Secretary to impose monitoring, controls, or both, on a temporary basis after a petition is filed if the Secretary considers such action to be necessary to carry out the policy set forth in section 3(2)(C) of the act, but before the Secretary makes a determination under section 7(c)(3) only if failure to take such temporary action would result in irreparable harm to the entity filing the petition, or to the national economy or segment thereof, including a domestic industry. This provision requires that if the Secretary determines, on his initiative, to monitor, control, or both, the export of such material, the Secretary shall publish the reasons for such determination in accordance with section 7(c)(3) (A) and (B).

Existing law requires that increased domestic prices or domestic shortage results from increased exports. This language is vague and may lead some to believe that exports have to be the sole of primary cause of an increase in domestic prices or a domestic shortage. The amendment adopted by the conferees would clarify this standard and require that exports of the material must be as important as any other cause of the increased domestic prices or shortage relative to demand found pursuant to clause (ii). Under this standard, increased exports need not be the sole or principal cause of the price rise or domestic shortage in order for exports of the material to be controlled or monitored. If exports are an important cause of the domestic price increase or domestic shortage relative to demand and other causes are not more important than exports, monitoring or controls may be imposed. No mathematical weighing of the factors that contribute to price increase or shortage relative to demand is possible or desirable.

CRUDE OIL STUDY

The bill requires a Presidential study on the export of crude oil.

The President would be required to submit to the Congress 9 months after enactment of the act a comprehensive review of the issues and related data concerning possible changes in the existing incentives to produce crude oil from the North Slope of Alaska, including changes in Federal and State taxation, pipeline tariffs, and Federal leasing policies, and possible changes in the existing distribution of crude oil from the North Slope of Alaska, including changes in export restrictions which would permit exports at free market levels and at levels of 50,000, 100,000, 200,000, and 500,000 barrels per day.

The study would also examine the advisability of maintaining existing controls. It is intended that the study include, but not be limited to, a review of the issues and related data on the effect of such changes on the energy and national security of the United States and its allies; the role of such changes in U.S. foreign policymaking, including international energy policymaking; the impact of such changes on employment levels in the maritime industry, the oil industry, and other industries; the impact of such changes on the refiners and consumers; the impact of such changes on the revenues and expenditures of the Federal Government and government of Alaska; and the effect of such changes on incentives for oil and gas exploration and development in the United States; and the effect of such changes on the overall U.S. trade deficit, and the U.S. trade deficit with respect to particular countries, including the effect of such changes on the trade barriers of other countries. The bill requires the President to develop, after consulting with appropriate State and Federal officials and other persons, finding, options and recommendations regarding the production and distribution of Alaskan North Slope crude oil, and to transmit the report to the Congress containing the results of the review under subsection (a)(1), the findings, options, and recommendations developed under subsection (a)(2).

In agreement to require the President to review the issues and related data concerning possible changes in existing incentives to produce crude oil from the North Slope of Alaska, it is expected that the President, in the preparation of the review, seek the advice of such other agencies and departments as the President deems advisable, and should consult with representatives of the maritime industry, the oil industry, consumer groups, environmental groups, foreign governments, and all other industries, groups, or individuals likely to be affected by any change in existing law. It is also intended that the report produced as a result of the review addess each of the criteria set forth in subsection (a)(1) and provide a detailed description of each of the factors considered with respect to each of those criteria.

SHORT SUPPLY CONTRACT SANCTITY—UNPROCESSED RED CEDAR

The bill provides for sanctity of contracts from export controls imposed under section 7 for any agricultural commodity; including fats, oils, and animal hides; any forest product; and any fisher product; and retaining the validated license requirement for exports under subsection (i).

The intention is that this provision shall not affect the prohibition contained in section 7(i) of the act, which took effect on September 30, 1982, on exports of all unprocessed western red cedar logs harvested from Federal or State lands for which contracts were entered into on or after October 1, 1979. The provision permits the exports of unprocessed western red cedar logs under harvesting contract on State lands before October 1, 1979, to continue, less any amount that has been exported under the phaseout mandated in section 7(i)(1)(A) through (C) of the act, and less any amount exported under section 101(o) of the Public Law 96-536 and any other provision of law. We do not intend this section to affect controls mandated by other statutes on exports of unprocessed western red cedar logs harvested from Federal lands.

We believe that the requirements of this provision may be met through alternatives to the present validated license requirement for each export shipment of unprocessed red cedar logs under pre-October 1, 1979, harvesting contract on State lands and for exports of unprocessed red cedar logs harvested from private lands, including the granting of a single, validated license to an exporter for multiple shipments of unprocessed red cedar logs.

EXPORT OF HORSES

The bill removes section 7(j) of the Export Administration Act, and places the provision in the act of March 3, 1981. The effect is to continue the prohibition on the export by sea of any consignment of horses unless the Secretary of Commerce, in consultation with the Secretary of Agriculture, determines that no horse in that consignment is being exported for purposes of slaughter, in its entirety.

The bill makes an amendment to section 12 of the act that would provide that officers of the Customs Service are authorized to conduct border searches in connection with suspected exports of goods or technology. This amendment is in addition to, and not in limitation of, the authority that Customs officers already have. Although two United States circuit courts of appeals have specifically held the customs officers may conduct border searches is not clear in the remaining circuits. See *United States* v. *Ajlouny*, 629 F.2d 830 (2nd Cir. 1980); *United States* v. *Swarovski*, 557 F.2d

40 (2nd Cir. 1977), 592 F.2d 131 (2nd Cir. 1979); *United States* v. *Duncan*, 693 F.2d 971 (9th Cir. 1982); *United States* v. *Stanley*, 545 F.2d 661 (9th Cir. 1976). One effect of the amendment is to make it clear that searches of exports under this act may be conducted on the same basis as searches governing imports.

The language as provided for by the bill contains specific authority for warrantless arrests in connection with the enforcement of this act. This authority is in addition to any other arrest authority presently given to customs officers. Although customs officers currently make warrantless arrests for export violations, as well as for violations of other laws delegated to Customs for enforcement, *United States* v. *Swarovwki*, 557 F.2d 40 (2nd Cir. 1977) held that such arrests were to be determined by the standards set forth in the various State laws since Congress had not given customs officers specific Federal arrest authority in this area. The purpose of this amendment is to create uniformity in the law of export arests. Having to depend on 50 different State laws creates inefficiency and confusion in this area of great concern to national security.

SECTION 18—AUTHORIZATION OF APPROPRIATIONS

The bill requires an annual authorization of appropriations to the Commerce Department to carry out the act, and authorizes appropriations of $24,600,000 for fiscal year 1985, of which $8,712,000 shall be available only for enforcement, $1,851,000 shall be available only for foreign availability assessments, and $14,037,000 shall be available for all other activities, and authorizes appropriations of $28 million for fiscal year 1986, of which $10 million shall be available only for enforcement, $2 million shall be available only for foreign availability assessments, and $16 million shall be available for all other activities.

The processing of export license applications and responses to inquiries from customs personnel at ports as to license requirements for particular shipments would be speeded by increasing the number of engineers and other highly trained personnel in the Commerce Department's Office of Export Administration [OEA]. Present civil service rating applicable to OEA personnel have resulted in compensation levels which are not comparable to opportunities in the private sector. We expect the executive branch to reevaluate, and upgrade where appropriate, civil service ratings applicable to such positions.

IMPORT CONTROL SANCTION

The bill includes authority to impose national security import controls as an amendment to the Trade Expansion Act of 1962 since such authority belongs more appropriately in trade law containing other provisions authorizing import restrictions for national security reasons. This import control authority, under rules of the House of Representatives, would be solely within the jurisdiction of the committee on Ways and Means. The chairman of the Subcommittee on Trade has assured myself and others in the Senate that he will not seek repeal of the authority before there has been a fair opportunity to assess actual experience in its operation, although the subcommittee may wish to hold oversight hearings at such time as import controls are actually imposed.

NUCLEAR PROVISIONS

PROHIBITION ON NUCLEAR EXPORTS AND RETRANSFERS

The bill provides an amendment to the Atomic Energy Act of 1954, requiring that the Secretary of Commerce shall not issue any license under the Export Administration Act of 1979 for the export to a non-nuclear-weapon state for use in a nuclear production or utilization facility any item or related technical data which, as determined under section 309(c) of the Nuclear Non-Proliferation Act of 1978, could be of significance for nuclear explosive purposes, or which, in the Secretary's judgment, is likely to be diverted for use in such facility; that the Nuclear Regulatory Commission shall not issue any license for the export to a non-nuclear-weapon state of a component part, item or substance which the Commission has determined, under section 109b. of the act, to be especially relevant because of its significance for nuclear explosive purposes; and that the Secretary of Energy shall not approve the retransfer to any non-nuclear-weapon state of any such component, item or substance, and shall not, under section 57b. of the act, authorize any person to engage, directly or indirectly, in the production of any special nuclear material in the non-nuclear-weapon state unless the country maintains IAEA safeguards on all its peaceful nuclear activities, and such export, retransfer or production is under the terms of an agreement for cooperation arranged pursuant to section 123 of the act, or the country has entered into nuclear cooperation with the United States pursuant to an agreement for peaceful nuclear cooperation arranged through the IAEA.

The provision defines a "non-nuclear-weapon state" within the terms of the Treaty on the Non-Proliferation of Nuclear Weapons, and the requirement of an agreement for cooperation shall apply only to a country which is not a party to the Treaty on the Non-Proliferation of Nuclear Weapons or the Treaty for the Prohibition of Nuclear Weapons in Latin America, as well as to any country which the President determines is in a region of particular volatility or sensitivity.

This provision shall not preclude: First, an export, retransfer, or activity generally licensed or generally authorized by the Nuclear Regulatory Commission, the Department of Commerce or the Department of Energy; second, assistance to develop or apply IAEA safeguards or U.S. safeguards, as set forth in an agreement for cooperation; third, assistance for IAEA programs generally available to its member states; fourth, assistance for reducing the use of highly enriched uranium in research or test reactors; fifth, technical programs for the purpose of reducing proliferation risks, such as those intended to extend the life of uramium fuel or to which section 223 of the Nuclear Waste Policy Act of 1982 applies; sixth, assistance necessary for humanitarian reasons to protect the public health and safety; or seventh, activities involving radiation protection and health physics; decontamination; waste management; and other assistance for the safe operation of a facility which is under IAEA safeguards or U.S. safeguards. The provision set forth in sections 132 (c) and (d) of the Atomic Energy Act—section 401 of this bill—shall apply only in instances where the Secretary of State, in concurring with the Secretary of Energy pursuant to section 57b. of the Atomic Energy Act, determines that approval of such activity would further U.S. nonproliferation objectives with regard to the recipient country. The provision further requires the Department of Energy to notify the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate of all authorizations issued pursuant to sections 132 (c) and (d).

The restrictions set forth in section 132(a)(1)(D) with respect to any authorization described in that subsection shall apply to any contract executed under that authorization after October 1, 1984.

The provision allows for a Presidential waiver. It is intended that the President may seek a single waiver for a group of exports, retransfers, or activities only in the case where the approval of an individual license, retransfer, or authorization will involve more than a single shipment.

With regard to the exemptions enumerated in subsections (c) and (d), we expect the executive branch to interpret these exceptions as not to permit routine transfers otherwise restricted by subsection (a)(1)(D).

The exemption contained in subsections (c) and (d) is intended to permit assistance related to the safe operation of an operating nuclear facility which is subject to international safeguards or U.S. safeguards. We intend that the executive branch should have the flexibility to approve nonsensitive activities relating to the safe operation

of such facilities in countries not accepting safeguards on all their nuclear activities when a determination has been made by the Secretary of State that such approvals will advance U.S. nonproliferation objectives.

Some activities relating to safe reactor operations may include assistance for the maintenance of such nuclear facilities. Assistance for the maintenance of nuclear facilities shall be limited to safeguarded reactors supplied by the United States pursuant to section 103 of the Atomic Energy Act of 1954, in furtherance of U.S. nonproliferation policy and responsibilities incumbent upon the United States as the original supplier of such facilities. This assistance shall include that which ensures that these facilities can be operated in accord with the same standards of safety and protection of public health required of a reactor in the United States.

It is intended that none of the activities listed in subsections (c) and (d) should involve or be for the purpose of assisting the design, construction, fabrication, operation, or maintenance of a uranium enrichment or nuclear fuel reprocessing facility or a facility for the production of heavy water.

Finally it is intended that nothing in this provision shall affect followup work performed under existing contracts or revoke existing authorizations under which such contracts have been signed.

Mr. President, there is one last point that I would like to raise. Several months ago, on March 1 of this year to be exact, the Senate passed S. 979, many of the provisions of which are contained in this legislation before us today. One provision, however, that was in S. 979 but that is not in this bill today would have clarified the intent of the Congress regarding the role of the Department of Defense in reviewing export license applications in the area of the West-West trade.

There were two reasons, principally, for this provision. Our intelligence reports and enforcement activities had indicated that most of our sensitive goods and technology that were being diverted to the Soviet bloc were first exported not directly to the Soviet bloc countries but rather to one of the countries in the Western World. From there the items were then shipped on to the Soviet Union. So in many cases our West-West trade has become identical to East-West trade.

Second, Mr. President, this situation would indicate a need for the Defense Department, our national security tasked agency of Government, to participate in the process of reviewing export license applications, thereby assisting the Commerce Department, our export promotion agency, in assuring that the export would not jeopardize our national security. The problem, however, was that the Commerce Department was resisting efforts by the Defense Department to be involved in this license review.

Section 10(g) of current law authorizes the Department of Defense to review export license applications to countries to which exports are controlled for national security purposes. Unfortunately, the Commerce Department has interpreted this provision of law as authorizing the Defense Department only to review East-West license applications. Mr. President, it is my belief that it was not the intent of the Congress when it first adopted the 10(g) provision of current law to allow it to be used by Commerce to prevent the Defense Department from fulfilling its import license review responsibilities for certain West-West exports.

For this reason the Banking Committee and subsequently the Senate adopted an amendment to 10(g) clarifying the law, reemphasizing that the Defense Department does have a legitimate role in reviewing West-West export license applications.

Mr. President, as I stated, this amendment is not in the legislation before us today. The reason why it is not here is because it is no longer necessary. As the legislation passed last spring was going forward President Reagan decided the issue and specifically authorized the Defense Department to review West-West export licenses. It is now clear that the President has decided that 10(g) as in current law fully authorizes the Defense Department to review West-West export license applications, and the President has given specific instructions as to how he would like that authority to be carried out at the present time.

I am satisfied with the President's decision and that he will continue to provide for a role for the Defense Department in reviewing West-West license applications. It should be noted that the action by the Senate on S. 979 may have had an important role in the President's decision by raising the issue to his attention. Section 10(g) of current law provides full authority for the President's decision. The policy, therefore, enunciated by the President to implement provisions of 10(g) in current law, allowing Defense Department review of licenses in the West-West arena, is consistent with this legislation.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Utah [Mr. GARN].

The amendment, No. 7094, was agreed to.

Mr. PROXMIRE. Mr. President last week I made a speech criticizing House and Senate conferees on the Export Administration Act for refusing to restore adequate congressional authority over agreements negotiated by the President to export nuclear technology. One reason for the refusal by conferees to act was an explicit threat by the administration to veto any bill with the so-called Proxmire nuclear amendment in it. What was my amendment and why did the Senate pass it 74 to 16 last March? To understand that we must look at section 123 of the Nuclear Non-Proliferation Act [NNPA], 42 U.S.C. 2153, which sets forth the terms, duration, nature, scope, and other requirements of proposed agreements for cooperation on nuclear matters with other countries.

In particular we must look at section 123(d) of the Non-Proliferation Act which provided that the President must submit proposed agreements for cooperation to the Congress and such agreements would not become effective if during a 60-day period Congress adopted a concurrent resolution stating Congress did not favor the agreement. That approval authority was invalidated by the Supreme Court's June 1983 Chadha decision. Last March I offered an amendment that tried to cure the Chadha problem by requiring that both Houses of Congress approve nuclear cooperation agreements before they become effective. It passed the Senate by a vote of 74 to 16 and I promised to get expedited procedures attached to the process in conference so that the President was guaranteed an up or down vote on such agreements in each body.

After heavy lobbying by Westinghouse, calls to conferees by the Secretary of State, and threat by the administration to veto any bill that had my amendment on it, the Export Administration Act conferees chose to cure the Chadha problem by amending section 123(d) of the Non-Proliferation Act to provide that if the President waived any of the nine criteria for nuclear agreements set forth in section 123(a) of the act he needed to obtain a joint resolution of approval from Congress before the agreement could become effective. If the President does not waive any criteria of section 123(a) the proposed agreement will go into effect within 60 days unless Congress adopts a joint resolution of disapproval. Expedited procedures are included for either congressional course of action.

DEFECT OF CONFERENCE SOLUTION

One obvious defect of the conference solution is that an agreement is deemed within the nine criteria of section 123(a) of the NNPA unless the President states that he is exempting the agreement from one or more of the nine criteria. In the past concerned Congressmen and Senators have not always agreed with the President's view that an agreement was within the nine criteria. In fact there is now a suit pending in the U.S. District Court in the District of Columbia

which Senator CRANSTON, Congressen BARNES and WOLPE and others are allenging the President's view on at issue with regard to recent agreeents completed with Norway and veden. We in Congress should have a ance to argue that issue with the esident before such agreements come effective. We should not be mited to seeking to have the courts validate them after they are in fect. This is particularly true now at the Congress will adopt different ocedures for approving nuclear greements depending on whether ey are consistent with the nine nonroliferation criteria in section 123(a) the Non-Proliferation Act. Another efect of the solution adopted by the nferees is that there is no guarantee at either House will conduct hearngs to adequately examine proposed greements on nuclear cooperation.

I am a realist and know that because f the administration's opposition and hreat to veto the bill I could not get ny nuclear amendment. Yet I believe he solution adopted by conferees was ot just weak. It was useless. It made o significant change in current law. I ave therefore labored and used whatver leverage I have as a conferee to mprove the provision previously dopted by conferees. We have chieved a small, modest improvement n present law. The bill before the Senate contains that additional lanuage amending section 123 of the Non-Proliferation Act. Let me explain hat new language and its purpose.

Section 123(a) presently requires among other things that the Director of the Arms Control and Disarmament Agency must prepare a nuclear proliferation assessment statement regarding any proposed agreement. My proposal would amend section 123(a) to require that any such assessment include a statement "regarding the consistency of the text of the agreement for cooperation with all the requirements of this act."

This provision is intended to ensure that the Director specifically addresses each of the nine nonproliferation criteria in section 123(a) and analyzes why any proposed agreement is or is not consistent with each of these criteria. It also requires the Director to state whether any other requirements of the act are or are not being waived in the proposed agreement.

An amendment to section 123(b) provides that the President submit the text of a proposed agreement along with the text of the nuclear proliferation assessment to the Committees on Foreign Affairs and Foreign Relations of the House and Senate respectively for their informal views prior to formally submitting an executive agreement for congressional action pursuant to section 123(d) as amended by the conference.

This provision will help ensure that Congress will be able to provide its views to the President regarding the wisdom of any agreement and whether any of the nine criteria of section 123(a) or other requirements of the Non-Proliferation Act are or should be waived before the agreement is formally submitted for congressional review and action. This is an extremely important provision for it gives Congress a voice in determining whether an agreement for nuclear cooperation submitted by the President will require an act of Congress before becoming effective.

For example if during the 30-day period of informal review either the House Foreign Affairs Committee or the Senate Foreign Relations Committee indicates that in its judgment the proposed agreement is outside the parameters of the nine section 123(a) nonproliferation criteria, it is expected that the President, if he submits the agreement formally, will certify that it is outside such criteria. This, of course, will require that Congress pass a joint resolution of approval before such an agreement becomes effective. During the 30-day period of informal review the respective committees could, of course, hold hearings to assist their members in advising the President on that critical point.

The additional language also amends section 123(d) of the conference adopted substitute to provide that during the 60-day period proposed agreements for nuclear cooperation are formally before the Congress, that the Committees on Foreign Affairs and Relations of the House and Senate will hold hearings on them and report to their respective bodies on whether such agreements should be approved. This is to ensure that Members of each body are given the opportunity to cast an informed vote on such agreements. It will not entail changing the two-track approval system previously adopted by conferees but adds hearings to that process and a committee recommendation of approval or disapproval.

As noted this compromise entails making minor amendments to sections 123 (a), (b), and (d) of the Nuclear Non-Proliferation Act. Again, let me state that I would have preferred by original amendment because I am absolutely convinced Congress must have a role in reviewing and approving agreements made by the President on nuclear cooperation. However, I have settled for something less because I realize it is the best I can get in view of the adminstration's opposition and heavy lobbying by the nuclear industry. It does provide Congress with a chance to call the President to task if he concludes any agreements that can spread nuclear technology in an unsafe manner. If enough of us are convinced by hearings and public debate on agreements that they don't make sense, we can prevent them from going into effect. Therefore, I urge my colleagues to support this compromise.

Mr. DIXON. I am disturbed by the recent modifications which I understand have been made to the contract sanctity provision contained in the Export Administration Act reauthorization bill. It is my understanding that the Senate provision which prevailed the conference committee on S. 979 legislation would be at least somewhat altered by the added language in the bill which is now before this Chamber. Last year the Senate went strongly on record in support of U.S. farmers and manufacturers who export their products. S. 979 was designed to send a strong signal to the world trading community that potential customers could once again rely on U.S. exporters to stand by their contract commitments. I would ask the Senator from Pennsylvania, Senator HEINZ, if, indeed, the legislation which is now before this body contains a qualification to the Senate contract sanctity language which we adopted in 1983.

Mr. HEINZ. My answer to the Senator from Illinois is that this legislation does contain a proviso regarding the contract sanctity safeguard. As the Senator is no doubt aware I have fought hard within the conference committee to preserve the Senate's contract sanctity language. Unfortunately, the conference committee process on this legislation has broken down. The legislation which Senator GARN has brought before this Chamber today is an attempt to preserve the hard work that Members of this Chamber have devoted to reauthorization of the Export Administration Act. In order to craft legislation which has some chance of passage in the House of Representatives, and which may be acceptable to the administration, I have reluctantly accepted this modification of the contract sanctity provision.

Mr. DIXON. I appreciate the effort which is being made to advance the Export Administration Act legislation. However, inclusion of an exception to the contract sanctity rule for instances in which there is a breach of peace could undo the safeguard which we have attempted to provide our exporting companies and U.S. farmers. I would like to know if there is a definition of "breach of the peace" within the legislation. If not, then it is my belief that without such elaboration on this operative phrase the objectives of the contract sanctity provision itself could be seriously undermined. I would ask that the Senator from Pennsylvania please explain, for my benefit, what is meant by the term "breach of the peace."

Mr. HEINZ. The Senator from Illinois raises a valid point. The reputation of U.S. farmers and manufacturers has, indeed, been maligned in overseas markets because of past, overzealous applications of foreign policy export controls. It is certainly not the wish of this Senator that this situation continue. And for that reason, I can assure Senator DIXON that the term "breach of the peace" was intended to be construed only in its most narrow sense. It is not the intent of the sponsors of this legislation that "breach of peace" be interpreted to include anything beyond an actual act of aggression by one country against another. It is similarly our intent that activities including, but not limited to terrorism and gross human rights violations, not be included within the scope of this provision. Those items just referred to—as reprehensible as they are—are presently covered under other sections of this act and elsewhere in U.S. law. It not my intention that they be included within the provision which the Senator from Illinois has referenced.

Mr. DIXON. I thank the Senator from Pennsylvania for his clarification. I am pleased that it was not the Senator's intention to extend the definition or implication of the term "breach of peace" to extend beyond an actual act of aggression by one country against another.

Mr. HEINZ. Mr. President, I just want to say that I endorse the comments of my chairman, the Senator from Utah, with respect to this bill, and I want to add only a few brief words of my own on some sections of the bill of particular interest to me.

One such part is title III, relating to South Africa. Mr. President, there are few issues in this bill that have been more complex and difficult to resolve than the provisions relating to South Africa. The Senate had no language on this subject in its original bill and thus approached the conference with no background on the issue, no position mandated by a Senate vote, and no committee jurisdiction over the substance, since these matters in the Senate are covered by the Foreign Relations Committee.

Despite those difficulties, we fashioned an agreement with the House conferees 2 weeks ago which included, in essence, voluntary principles of behavior for American corporations in South Africa modeled on the so-called Sullivan principles accompanied by mandatory corporate reporting on the progress made in implementing those principles, and a prohibition on American bank loans to the South African Government.

I agreed to those provisions, Mr. President, because I support them on their merit and because I believe they met the standard I have maintained from the beginning of the debate on these provisions—that anything agreed to must be capable of passing the Congress and being signed by the President. I have no interest in rhetorical exercises that accomplish nothing. If the Congress can act in a way that will demonstrate our Government's opposition to apartheid and at the same time create a framework for actions that will help ultimately to eliminate apartheid, then I am for doing that, and I believe the agreement we had reached would have had that effect.

What has since become apparent, Mr. President, is that the agreement we reached, particularly the bank loan prohibition, cannot pass the Congress and cannot be signed by the President. I regret that because I believe it is a good provision, but we have to face the facts. The time and energy of too many people over too long a period of time has been invested in this bill to allow it to fail at the last minute. Important though the South African question may be, this legislation also contains our entire program of national security export controls, foreign policy export control authority, our antiboycott cooperation law, restrictions on the export of Alaskan oil, and basic authority for the President to control exports for short supply reasons. I do not believe we should sacrifice all these important elements as part of a political exercise that will not ultimately produce a bill, despite my best efforts and those of Congressman SOLARZ, who has been straightforward, and persistently creative in his determination to find a way out of this difficult situation.

Although I am against shifting from the strong policy position the bank loan prohibition represents, at this point I have reluctantly concluded that the only way out that will lead to a bill is a compromise which, among other things, replaces the bank loan provision with a provision giving the President discretionary authority to restrict new investment on the part of companies doing business in South Africa determined not to be making a good faith effort to implement the principles I mentioned.

I will support this compromise, but I want to make it clear that I continue to support the previous agreement entered into by the conferees on its merits, and I regret the turn of events that has forced us to abandon part of it.

On another matter, I also want to comment on the so-called contract sanctity provision in the bill. Once again, in an effort to reach a bill that can be passed by the Congress and signed by the President, we have compromised. This compromise was particularly painful for me because this provision has long been the one I regarded as most important, and because the conferees had previously resolved this matter in the Senate's favor.

This latter point is significant, and I hope the President will keep it in mind if he contemplates imposing foreign policy controls in the future. Our experience with these controls, particularly with the grain embargo and the natural gas pipeline controls, has been distinctly unhappy—we have antagonized our allies, lost significant market share for our manufacturers and farmers, and cast serious and permanent doubt on our credibility as reliable suppliers. Concern on this matter was so great that the conferees on the Export Administration Act had agreed to a provision that precluded the President from breaking contracts with foreign policy controls under any circumstances. Our compromise opens a tiny crack in that wall, and I want to make clear for the record that the crack is indeed tiny. My strong view, and that of the majority of the conferees, is that this crack should never be used. If it is used, then it should be done keeping in mind the parameters outlined by Senator GARN in his comments on this bill, specifically that it must be used in cases involving a serious and direct threat to our strategic interests. These are obviously not minor events; nor are they hypothetical events. The provision is limited to actual and overt acts of aggression that pose such a direct and serious threat. Further, there must be a clear linkage between the controls that would break contracts and the remedy to the direct threat. In other words, if such controls would not solve the problem, they are not to be imposed. As Senator GARN pointed out, of course, this provision relates to the imposition of controls retroactively, affecting existing contracts. Constraints on the President's authority to impose controls prospectively are dealt with elsewhere in the bill.

Finally, let me say this has been a long, frustrating, and enervating process that has produced a result each of us who has been involved has reason to be unhappy about. That, unfortunately, is the nature of compromise and of the legislative process. We have produced a bill that cuts a piece out of each of the conferees' hearts, mine as much as anyone else's, but I continue to believe that it is the best product obtainable under present circumstances and that it is superior to any product we could obtain were we to begin again next year. Therefore, I will support this bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read a third time, the question is, Shall it pass?

So the bill (H.R. 4230), as amended, was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION—SENATE RESOLUTION 478—EXPRESSING SUPPORT FOR PRINCIPLES CONTAINED IN THE CONVENTION AGAINST GENOCIDE

Mr. BAKER. Mr. President, the Senate has before it the Senate resolution just introduced with respect to the Genocide Convention. Is the correct?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. The control of time is in the usual form.

The PRESIDING OFFICER. The leader is correct.

Mr. BAKER. Mr. President, I reserve the time on this side.

Mr. PROXMIRE. Mr. President, will the minority manager yield?

Mr. PELL. I yield such time as the Senator may desire.

Mr. PROXMIRE. I thank the distinguished Senator from Rhode Island.

Mr. President, I will take only a minute or two on this. I want to thank the distinguished majority leader for offering this resolution. I feel very strongly that there is overwhelming support for the Genocide Convention in this body. We have talked to a number of Senators. There is no question it is going to pass some day. We have waited 35 years, session after session after session after session, for this to pass. Usually, it is brought up toward the end of the session. The leadership has been very accommodating about it. But they feel it is the kind of thing that is going to be filibustered, delay the Senate, and so forth. So what we have gotten today out of this resolution—the distinguished Senator from Connecticut deserves the great credit for this in my view—is by far the most important part which is the commitment made certainly by the authors, including Senators BAKER, DODD, PROXMIRE, PELL, BOSCHWITZ, and HELMS who declare their intention to act expeditiously thereon in the First Session of the 99th Congress.

There is no question in my mind that if we can get the Genocide Convention on the floor of the Senate promptly at the beginning of a session, and certainly the beginning of a Congress, there is no reason in the world why we cannot enact it. The sentiment is there. I am convinced there are at least 80 Senators who will vote for it. We may have to invoke cloture. But the important action is to get this before the Senate, and get a commitment to do so.

Mr. President, I want to especially call attention to the fact that we have had at least 17 Congresses that have met and adjourned since President Truman first sent this to the Senate, and asked for action on it—17. None of them have acted on it. Now I think this resolution is exactly the kind of commitment that we needed in the past, did not have, and now I am sure that in 1985 we will finally ratify the Genocide Convention. I thank my good friend from Rhode Island.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. PELL. Mr. President, I think this is an excellent solution to a very difficult problem. As I mentioned earlier, this imbroglio could have kept us involved for a long, long time. We were clearly facing a filibuster of indefinite duration. We can make up own minds who would have filibustered and why and when. But the filibuster seemed inevitable, and this is the best course. When it comes to genocide, we must remember that is not a onetime crime, nor a onetime occurrence. Throughout history there have been instances of genocide. And in this century alone, we have seen not only the heinous murder of 6 million Jews by the Nazis, but we have had other examples of genocide. At the beginning of the century we witnessed the Turkish massacre of the Armenians—with some 1½ million deaths, more recently we saw between 1 and 3 million Cambodians murdered by that country's rulers. There are many, many instances of genocide in the world that have occurred, are occurring now and hopefully will not occur in the future.

Approving this convention would be a signal to the world that we join 96 other nation's in condemning and punishing the unspeakable crime of genocide.

I think that there will only be meaning to our words, meaning to our abhorrence, when we ratify the convention. I think what this resolution does is look down the road a bit to when we ratify, which I hope will occur in the early coming days of Congress.

Mr. CRANSTON. If the Senator will yield, how does this resolution assure that this will be passed in the next session of Congress?

Mr. PELL. It does not assure passage. It merely states that the convention will be considered. But by being considered early in the Congress, one hopes that we would be able to surmount a possible filibuster.

Mr. CRANSTON. We had assurances from members of the committee who raised questions in the committee that they were not going to block the measure on the floor. But here the Genocide Treaty is being blocked. I have grave regrets about this course of action and grave doubts that we will not run into innumerable blocks in the Senate next time. We will start earlier and have time to deal with the filibuster. Maybe it is more likely that we will get it through. But in the past, measures brought up early in session have not always prevailed. There are people who are very astute on the parliamentary tactics who work well in this body who have been able to block action. I regret that those who are really not supportive of the Genocide Treaty, who have opposed it, who have blocked it for months and for years, will now, in effect, get off the hook by this action and where they stand on genocide will not be clear.

Mr. PELL. I think that the record of the debate that we have just had and a reading of the proceedings of the Foreign Relations Committee will show where the enthusiastic support for the Genocide Convention is and where there is the greatest reluctance. I would agree with the Senator that it would be very good if we could get the assurance of the convention going through. We do not have that. As of now, we know of one thing, that with a full-scale filibuster it certainly will not go through. Maybe this is a half loaf or a quarter loaf, but at least it is one further step down the road.

Mr. CRANSTON. My thought would be that it would be better to let those who would filibuster demonstrate where they stand on the issue and let the constitutents, with Presidential elections being held, people all across the country know who really supports this effort of putting America on record against genocide and who does not. It seems to me this resolution would have no impact on our efforts next year to get this convention to the floor and have it voted upon. The action now does not pave the way, really, for action then. The majority in the Foreign Relations Committee, and I believe the leaders on both sides of the aisle in this body, Democrats and Republicans, will see to it that the treaty comes to the floor early next year regardless of the vote on this particular resolution now before us.

Mr. PELL. I would hope, too, that it would come up very early in the coming year and that we would stay with it until it passes.

Mr. DODD. Will the Senator yield?

Mr. PELL. I yield.

Mr. DODD. First of all, on the last thought raised, we may have another 4 or 5 hours in this session and that

will be the end of it. Almost four decades of trying to deal with this treaty is a long time. Certainly, there is no doubt about who opposes the convention as presently drafted.

Mr. CRANSTON. Who does oppose it as presently drafted?

Mr. DODD. There are any number of people, as drafted. Certainly, in our committee there was one member who did not vote in favor of it but voted "present" as I recall, the senior Senator from North Carolina withholding his vote in the committee. We would have reported it out unanimously except for that one "present" vote.

I assume the junior Senator from Idaho has a number of amendments pending, and I presume would have preferred those amendments adopted. He can speak for himself. People have publicly gone on record taking that position.

But the major point here is that this has been a four-decade trip for this convention. This will be the first time in four decades that at least on the principles embodied in the Genocide Convention the U.S. Senate will express its opinion. That is not ratification. I know that. Everyone in this Chamber knows that. But it certainly is yet another step in this long journey this convention has been traveling.

I consider it something worthwhile doing.

The present administration endorses it and hopes for ratification. My hope would be that now with the commitment in this resolution, if it is approved by this body, that we will have gone on record as bringing this up as early as possible in the next Congress and go through that debate. It will be a lengthy debate. There is no question about that. Hopefully, we can conclude that debate with the ratification of this treaty.

Mr. BAKER. Will the Senator yield?

Mr. PELL. I yield the floor.

Mr. BAKER. Mr. President, I yield control of the time on this side to the distinguished Senator from Idaho. I know of no request for time on this side, but I am going to have to leave the floor and I yield control of the time to the Senator from Idaho.

Mr. President, I have discussed this with the minority leader.

I ask unanimous consent that when the debate is concluded on this matter, the matter be temporarily laid aside and the Senate return to legislative session; that no call for regular order will serve to bring this back except a call for regular order by the majority and minority leaders.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, the effect of that will be to say that the rollcall vote which has been ordered on this measure will not occur immediately after debate but, as a practical matter, will be set when mutually convenient. I will consult with the minority leader on that subject.

After debate has ended, I anticipate that a quorum call will be put in. I will return to the floor and we will see what we will do at that point.

Mr. CRANSTON. Is there a time limit for the consideration of the resolution?

Mr. BAKER. Yes. Thirty minutes equally divided. I am sure the Senator from Idaho will be willing to share his time if that side runs out.

Mr. METZENBAUM. Will the majority leader yield for a question?

Mr. BAKER. Yes.

Mr. METZENBAUM. Do I understand that the majority leader will be putting in a quorum call after this is over so that those of us who are interested in matters coming up can return to the floor?

Mr. BAKER. Yes, that is correct.

Mr. METZENBAUM. I thank the majority leader.

Mr. PELL. I yield to the Senator from California.

Mr. CRANSTON. I would just like to point out that the resolution now pending has the Senate declaring its intention to act expeditiously on the Genocide Convention in the next Congress. Acting expeditiously means proceeding to move and act on a matter without delaying amendments and without filibuster. I do not see why this Senate could not act expeditiously on the treaty now and dispose of it, were it not for the basic opposition by the Senators indicated by the Senator from Connecticut; namely, the one Senator on the Foreign Relations Committee who could not vote for the measure when it was before that committee, and, I gather, the Senator from Idaho who has been offering amendments to that treaty. Amendments are, of course, a way to prevent action upon it, if they are sustained.

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I yield myself a couple of minutes.

I would only say to my colleague who brings this up, the Senator from California, that I think there was sincere concern by many Senators who have not had the opportunity to carefully go through this treaty, and, as I said in my remarks earlier this afternoon, this treaty was debated quite fully 10 years ago. There are only 28 Senators left in this Chamber who were here 28 years ago. Many Senators have not had the opportunity to go through it carefully article by article.

I do not think there has been a major effort here to filibuster or delay this treaty.

But that is not why I took the floor at this time, Mr. President. I wanted to announce to my colleagues that a very interesting thing just happened in my office with my press secretary as a result of an amendment that the Senator from Idaho offered earlier this afternoon which dealt with the "GAC Report", which I later withdrew, as the distinguished Presiding Officer remembers.

It was not voted on and there was no action taken to dispose of the amendment. But it is interesting to note that the Soviet news agency, TASS, called my office this afternoon because they heard there had been a GAC Report released, that Senator SYMMS had that report, and they wanted to know if they could have a copy of it. My press secretary told him, "Yes, we have a copy of it."

In fact, we do not have a copy of it, but he told the TASS news agency that.

Mr. President, the caller said, "Well, can we have it?"

My press secretary said, "Yes, if you will bring us Mr. Andrei Sakharov, we will give you a copy of the report," and TASS immediately hung the telephone up and rudely ended the conversation.

Mr. President, I just announce to any of my colleagues who are seeking time—how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 13 minutes remaining.

Mr. SYMMS. If there are any Senators who seek time, I will yield.

Mr. PELL. Mr. President, I suggest the absence of a quorum with the time to be equally divided.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for a quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. How much time do I have remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 4 minutes and 26 seconds.

Mr. PELL. I thank the Chair. I yield at this point to the Senator from California [Mr. WILSON].

Mr. WILSON. Mr. President, I thank my distinguished friend from Rhode Island. I shall take only a few moments of time.

Reference has been made this afternoon to supporting the administration through ratification of the Genocide Convention.

I simply wish to insert in the RECORD remarks made by the President of the United States recently at what I believe was a September 6 appearance in Washington before the B'nai B'rith International Convention.

In a speech embracing a number of topics, the President addressed the

subject of the Genocide Convention, stating:

Anyone who has contemplated the horror inflicted on Jews during World War II, the deaths of millions in Cambodia or the travail of the Miskito Indians in Nicaragua must understand that if free men and women remain silent in the face of oppression, we risk the destruction of entire peoples. (Applause.) I know that B'nai B'rith has been among the most concerned of the groups advocating American support for the Genocide Convention. With a cautious view, in part due to the human rights abuses performed by some nations that have already ratified the documents, our administration has conducted a long exhaustive study of the Convention. And yesterday, as a result of that review, we announced that we will vigorously support, consistent with the United States Constitution, the ratification of the Genocide Convention. (Applause.) And I want you to know that we intend to use the Convention in our efforts to expand human freedom and fight human rights abuses around the world. (Applause.) Like you, I say in a forthright voice, "Never again!" (Applause.)

Mr. SYMMS. Mr. President, I wish to compliment my colleagues who worked out resolution of this issue this afternoon so that we shall not be in a position of trying to rush through something that, as other Senators on the floor—Senator HELMS and Senator THURMOND and others—have pointed out, has constitutional risks involved with respect to a treaty of this importance. I think it is only worthy of mention, though, and I compliment my colleagues who worked out this resolution—I think there is no Senator who is not adamantly opposed to genocide in this body. We all are adamantly opposed to genocide. I think the question I pointed out in my remarks with respect to this is that it will take more than a piece of paper to really stop some of the heinous acts that take place in this world today, particularly in those countries where dictators and tyrants are in command of the country and there is not freedom on the part of the people, such as in the Soviet Union and Communist China.

I point out, and I think it should be noted in the RECORD, that the language of this resolution declares the Senate's intention to act expeditiously thereon in the 1st Session of the 99th Congress. It should be underscored that even with that language, no Congress can truly bind the next Congress except for a constitutional amendment or the ratification of a treaty. It would be this Senator's interpretation that if, in fact, the Senate is going to address the Genocide Convention in the 99th Congress, then it would be done in a very careful, proper, procedural manner where full hearings could be held and the Senate could be engaged in this important debate and some of these questions about constitutionality and sovereignty would be answered. I think we should understand, with regard to this resolution, which I assume will enjoy a lot of support if not unanimous support in the Senate—I imagine it would—it should also be noted for the RECORD that no Congress can really dictate to the next Congress what action should be taken.

We are not saying that we want this thing brought up on the 4th of January with no hearing, no careful analysis, but to go through the normal committee procedures and the normal amendment process to the treaty until all of these questions can be answered to the satisfaction of the Senate. I think that is our responsibility under the Constitution and I think that is why this treaty has taken so long to come before this body, because there are questions that are not yet answered. Constitutional scholars such as Senator Sam Ervin and others have pointed out many of the pitfalls that lie within the articles of the Genocide Convention.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 9 minutes remaining.

Mr. SYMMS. I ask unanimous consent that when I suggest the absence of a quorum, the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, a parliamentary inquiry. How much time does the Senator from Idaho have remaining?

The PRESIDING OFFICER. The Senator has 9 minutes.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally against both sides.

The PRESIDING OFFICER. Without ojection, it is so ordered. The clerk will call the roll. The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. NICKLES). Without objection, it is so ordered.

Mr. SYMMS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. SYMMS. I yield 8 minutes to the distinguished junior Senator from North Carolina [Mr. EAST].

The PRESIDING OFFICER. The Senator form North Carolina.

Mr. EAST. I appreciate the generosity of the manager of the time on this side.

Mr. President, I welcome the opportunity to speak briefly on this matter. Earlier this afternoon, I spoke in opposition to the Genocide Treaty as it currently stands, and I will not reiterate my concerns about it. That is already established in the RECORD.

What does concern me a little with the resolution is that it says that the Senate hereby expresses its support for the principles embodied in the treaty. I am a little troubled that that is simply a subtle way of saying that we do, in fact, support the treaty as it currently has been presented, and we look forward to expeditiously acting in the next Congress on the matter.

I have no objection to Congress acting expeditiously, if by that we mean that we follow the normal committee procedures in reference thereto, in hearings, discussions, and so forth. That is a vague term.

I am a little concerned that if one votes for the resolution, the implication might well be that you think the treaty in its current form is good. I have indicated already in my discussion that I do not think it is in the best interests of the United States. I do not think it is in the best interests of the State of Israel. I think it will be used as a club by the Soviet Union and its Third World allies to intimidate the United States in various categories, as well as the State of Israel, and that there needs to be a lot of retooling and a lot of changing in this treaty.

I noted at that time, earlier this afternoon, that I currently hold the seat held by the former Senator from North Carolina, Sam Ervin, who was very much opposed to the principles embodied in the convention—not that he was endorsing genocide, and certainly I am not. But his concern was that there were many defects of a principal nature in the treaty.

So the anguish that I face—and I simply am trying to make it a part of the RECORD—is that if I vote for this resolution, it might very well be interpreted that I have no quarrel with the treaty and that I look forward in the next session of Congress, since the hour is late in this one, of moving expeditiously to its ratification, which would not be the position that the junior Senator from North Carolina takes.

If the resolution means that the junior Senator from North Carolina thinks genocide is a bad thing—yes, I do. I think it is a horrible thing. But I do not think this treaty, with the current language in it, is an effective instrument for combating the very evil it purports to combat.

Therein lieth my dilemma. It is not the end I quarrel with; it is the means to the end.

So I find deep agony in this resolution. It is one of these very difficult decisions we frequently encounter around here. Language is cheap; words are measly and what one votes for here I am not quite sure. Is one voting to say he thinks the treaty as it currently stands is well done and the only thing we lack is time pending the next session, or is he simply saying I think genocide is a bad idea and I hope that in the next session of Congress perhaps we might come up with a treaty that we could submit to the international community that would be intelligently and prudently addressed dealing with this problem in terms of the context of the current international situation?

If we mean the latter, I vote for it; if we mean the former, then I would be negative on it. Hence, I agonize over how to vote on it. I reserve the right conceivably here to vote against it.

But I want the record to show, since time is running out, that the reason I would be voting against it is not because I am for genocide—for Heaven's sake, I do not know of anyone who is for genocide in the Senate—it is because I object to this particular treaty and certain, I guess, principles or provisions that it has in it.

So therein lieth my dilemma, my problem, my agony, my soul-searching.

And I do not know if the proponents of this measure who are not currently on the floor—I am not quite sure who they are——

Mr. PELL. I am one.

Mr. EAST. I know Senator PELL is one. Perhaps the distinguished Senator from Rhode Island could elaborate for me briefly on that concern that I had.

Mr. PELL. Mr. President, I will be delighted to do so.

My understanding of acting expeditiously means that the Genocide Convention would, I hope, be the first item on the agenda of the Foreign Relations Committee when we return; if not, the first item, then one considered very shortly thereafter; and that it would be given the highest priority for action within the committee. This is my understanding of it.

My understanding of a vote for this resolution means that one is supporting expeditious action, ideally almost immediate action, by the Foreign Relations Committee.

Mr. EAST. Let me ask the Senator. When the resolution says, "Resolved, the Senate hereby expresses its support for the principles embodied in the Convention on the Prevention and Punishment of the Crime of Genocide, signed on behalf of the United States on December 11, 1948," is the implication there that the proponents and endorsers of this resolution, of which the Senator is one, that we support the document in its current form? Would that be the Senator's intention?—that is what we are going on record as indicating?

Mr. PELL. That is my intent. I think all of us can interpret it differently one way or another.

Mr. EAST. I am sorry. I cannot hear the Senator very well.

Mr. PELL. All of us can interpret a particular resolution as we wish. When I vote for the resolution, I understand the vote to mean I intend to do all I can to act expeditiously on the treaty in its present form.

Mr. EAST. In its present form. So if one votes for the resolution, the Senator from Rhode Island is saying, as I would see it at least, that is, the Senator from Rhode Island, he is voting for the treaty in its current form and he would hope that the Senate would act expeditiously on it in its current form immediately in January?

Mr. PELL. That would be my hope.

The PRESIDING OFFICER. The Senator should be advised that all time for discussion on this measure has expired.

Mr. EAST. I thank the Chair, and I thank the Senator from Rhode Island.

Mr. PELL. I ask unanimous consent that we have another 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAST. There is objection?

The PRESIDING OFFICER. There is no objection.

Mr. EAST. There is no objection.

As I was suggesting, if I might, since we have been allotted a little additional time, and I have heard from the Senator from Rhode Island, I wonder if the majority leader, since he is a cosponsor, might entertain a question for me, and I ask unanimous consent for an additional 2 minutes by which he might respond to my inquiry.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAST. I say to the majority leader the thing that concerns me with the resolution, and the Senator from Rhode Island was gracious in saying what his sentiment was on it. I had spoken earlier in opposition to the treaty in its current form, and my concern with the resolution was that it says the Senate hereby expresses its support for the principles embodied in the Convention on the Prevention and Punishment of the Crime of Genocide, signed on behalf of the United States on December 11, 1948.

Now, the Senator from Rhode Island—and if I am in error I am sure he will correct me—interprets that to mean that one would support the treaty in its current form and that we would then proceed to act expeditiously as possible, come January, to see that it is ratified.

As I say, I am opposed to genocide as a principle, but I am deeply troubled with the principles of this treaty, that is, if what I would be voting for is the proposition this treaty is just fine and I look forward in January to moving expeditiously to its ratification, I would have to vote against the resolution; if, on the other hand, when it says support for the principles embodied, it simply means the junior Senator from North Carolina is against genocide and would look forward to examining any proposed treaty, including this one, to deal with that matter and to deal with it in a full expeditious way, I would have no objection to the treaty.

I have gotten the position of the Senator from Rhode Island. He says he interprets it to mean the treaty in its current form.

Would that be the position of the majority leader, who is a cosponsor?

Mr. BAKER. Mr. President, if I may reply, of course, the resolution speaks for itself and it is up to the Senate to decide what interpretation to place upon it. But I will add my interpretation to it.

Mr. EAST. Yes.

Mr. BAKER. I participated in the negotiations that led to the introduction of this resolution, and indeed, I have cosponsored it and the unanimous consent agreement that was entered into that provided for an orderly way to consider this matter and dispose of it.

It is my understanding, based on those negotiations and the face of the resolution itself, which is now pending, that the Senate in voting for this resolution and adopting it would be expressing its support simply for what it said. That is the principle embodied. It is not vouching for every word of the treaty itself. The Senate is certainly not precluding the possibility of amendments, or reservations, or understandings, but rather simply expressing support for the principles embodied in the Convention on the Prevention and Punishment of the Crime of Genocide.

Mr. President, I think that perhaps contributes nothing in a definitive way, but that is my interpretation, and I am happy to give it to the Senator from North Carolina.

Mr. EAST. So I would say from the discussion the response of the Senator from Rhode Island and that of the majority leader are somewhat different, so it will depend upon what interpretation an individual Senator would wish to put upon it.

Mr. BAKER. Yes, Mr. President.

Mr. EAST. Is that what the majority leader is suggesting?

Mr. BAKER. That is always so in the Senate. No Member can presume to speak for another on the matter of interpreting the words, and only the Senate itself can act.

But it is clearly the meaning of this resolution that we would vote to support the principles embodied in the convention, but I think just as clearly that does not suggest that amendments or reservations or understandings might not be offered when the convention is presented to the Senate in a constitutional form and that would be in the next session of Congress.

Mr. EAST. So the majority leader is not necessarily saying that in voting for it you are voting for every crossed "t" and dotted "i" of the current treaty?

Mr. BAKER. Yes; that is correct.

Mr. EAST. You are not doing that; you are simply voting for the idea that we would move ahead on this particular instrument and it could be subject to modification, alteration, and change as the Senate might work its will.

Mr. BAKER. Yes, Mr. President, but before I go any further afield, let me say that I believe the resolution on the face of it expresses the clear intention of this sponsor, and that is that a vote for and the adoption of this resolution would place the Member who voted for it, and the Senate, on record as supporting the principles embodied in the convention. But I do not believe that it forever precludes Senators or the Senate from acting to modify or change particular sections of it. I think it is an expression of the sense of the Senate that it supports the principles involved.

I believe that is a worthwhile purpose. I previously congratulated the Senator from Connecticut, who was the principal sponsor, and the Senator's colleague from North Carolina who was a major participant in the negotiations.

Mr. EAST. I will make one concluding statement then. If the junior Senator from North Carolina ends up voting "no" on this resolution—and I may—I would like for the record to show clearly please that I am not endorsing genocide. What I am saying is that the current treaty, as it stands, I find unacceptable for reasons I gave in a speech earlier on the Senate floor.

So I simply wanted to have the opportunity, which I appreciate—and I will no longer impose my time upon the Senate—for the record to show that if I do ultimately vote against this resolution, it is not because I support genocide, it is because I am uncomfortable with the current treaty proposed, the crossed "t" and dotted "i."

The distinguished Senator from Rhode Island indicates, as he sees it, and I sense a somewhat different interpretation from the majority leader, that we are indicating our support for this treaty as it stands with its current provisions. And if that is what we are voting for, I would want to vote in the negative. But the majority leader has made the point I think as clearly as can be done and it will have to be a decision I will have to make. And I appreciate the indulgence of the Senator from Rhode Island and the majority leader and the Chair and I shall be happy to yield the floor.

The PRESIDING OFFICER. Time for debate has expired.

Mr. MATHIAS. Mr. President, I ask unanimous consent for 5 addtional minutes. I would be happy with 3 additional minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, the Senator from North Carolina is not the only Senator in this Chamber who has reservations about this compromise resolution: I have very serious reservations about it because I would rather vote on the convention.

Thirty-six years is time enough to consider it. Babies who were born on the night that this convention was signed by the United States of America are now entering middle age. Now if that is not time enough to think about it, I do not know how much time you want.

I have serious reservations about this compromise. If it had not been for the words of the majority leader in which he just explained that he felt a vote in favor of the resolution was a vote in favor of the convention, I would have to say to you that I think it is a mealymouthed copout. The majority leader says that, in his interpretation, to vote for this resolution is to put yourself on record in favor of the Genocide Convention. And on that narrow ground there may be a crumb of comfort which would induce us to vote for it. But without that kind of a firm enunciation of support by the majority leader and by the distinguished Senator from Rhode Island, I would say it is a mealymouthed copout and one that is not worthy of the U.S. Senate.

Gerald Kraft, president of the B'nai B'rith, said that "The Genocide Convention is a statement of conscience." We do not need 36 years to think about a statement of conscience. He went on to say, "It will serve as a symbol that humanity will never again tolerate religious or racial persecution. Morality requires its ratification."

If you want to show that you are really against genocide, you will vote for the Genocide Convention. That is really what it comes down to.

We have waited 36 years to call the roll. Mr. President, we ought to call the roll today. I regret that this decision is being delayed for another year.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now resume legislative session.

The clerk will report the pending business.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, let me say that what I hope we can do now is arrange to do some other business, a conference report, perhaps. While we try to clear that on both sides—we are in legislative session, are we not?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. What is the pending business?

The PRESIDING OFFICER. The pending business is the debt limit bill.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

Mr. MATHIAS. Will the Senator withhold?

Mr. BAKER. Mr. President, I do withhold the request. Does the Senator wish me to provide a time for morning business?

Mr. MATHIAS. That would be great.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business for not to exceed 15 minutes in which Senators may speak under the same terms and conditions.

May I say before the Chair acts that I hope it will not be 15 minutes because we need to get on with a few other matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

JENNINGS RANDOLPH

Mr. MATHIAS. Mr. President, JENNINGS RANDOLPH and I have a great many things in common in addition to membership in the Senate. We each have sons born in Maryland. We each have strong family ties with West Virginia. We each love the mountains where the Potomac River rises near the Fairfax Stone. We each support with special emphasis the cause of the handicapped and the disabled.

The list could go on, but it is already long enough to illustrate why I have felt so close to the senior Senator from West Virginia. We speak the same language and we understand each others point of view.

JENNINGS RANDOLPH'S record as a great builder stands in stone and concrete and steel all over the United States. His record as a defender of the environment is apparent in streams that flow clear and air that is fresh and clean. His record as a humanitarian is written in the faces of the children, particularly the retarded and the handicapped, who have attained their full recognition for the first time in programs that he sponsored.

JENNINGS RANDOLPH'S service in the Congress has spanned a remarkable period in American history from the administration of Franklin D. Roosevelt to that of Ronald Reagan. He is a part of the history of that vital era. But he has also always kept his warmth and affection as a friend, and it is as a friend that we shall miss him most in the Senate.

Mrs. Mathias and I extend our best wishes to Senator RANDOLPH for health and happiness in the years to come. We hope he will enjoy the pleasure of his family's company more than has been possible as a Member of the Senate and that he will reflect with satisfaction on the unusual achievements of a distinguished career.

BERNARD VERNIER-PALLIEZ

Mr. MATHIAS. Mr. President, friendships should age like fine wine. They should grow in depth, clarity, mellowness, and bouquet. The transition from the grape to the decanter is, however, a difficult journey that demands the highest degree of skill, knowledge, judgment, and patience. Long friendships demand no less.

France and the United States have been not only friends, but allies also, for nearly all of the span of the history of the American republic. Such amity is evidence that skill, knowledge, judgment, and patience have, in fact, been generously applied to Franco-American friendship. The Ambassador of France, Bernard Vernier-Palliez is a distinguished exponent of this principle, and an example of its practice.

Ambassador Vernier-Palliez has had an unusual opportunity to prove the value of this human investment in the highest degree of politics, the relations between nations. The election of a Socialist government in France brought Bernard Vernier-Palliez to Washington as Ambassador to the most conservative administration in recent history. The portents were not favorable. The world economy was deteriorating with adverse effects to both France and the United States, but unfortunately, also creating an adversarial economic climate between them. The United States embarked on a course of government deregulation and France embarked on a program of nationalization. Stresses and strains were visible in the Atlantic alliance.

Yet at the end of 4 years the friendship between France and the United States is firmer than ever. We have developed a common policy on defense and consonant views on approaches to problems created by the Soviet Union. We cooperated in the multinational peace force in Lebanon and shared grievous losses for our efforts, but maintained a common front. Not least, we celebrated the 200th anniversaries of the victory at Yorktown and the Treaty of Paris.

Certainly one of the essential factors in converting a dismal outlook into the present positive position of the two countries is the diligence, competence, and engaging personality of Ambassador Vernier-Palliez. He has worked hard at the job. When most diplomats left Wasington in August to spend a month at home, he took the opportunity to extend his knowledge of America, traveling coast to coast. In Washington he was in his chancery on week-ends and evenings when he was needed. He left no stone unturned that could reveal a chance to improve communication between Washington and Paris.

Bernard Vernier-Palliez did, of course, come to his embassy with formidable advantages. During his years at Renault, and particularly when he led that company, he was in frequent contact with American business, so that he was no stranger here. Still earlier when he was a member of the resistance during World War II, he acquired the resourcefulness and persistence that have been so valuable in his job here.

There is a story about Bernard Vernier-Palliez that has an unusual twist. His chief in the resistance was summoned by General de Gaulle to take over the Renault industries when they were sequestered at the end of World War II. His record in the resistance was so outstanding that his chief asked him to come along to Renault to get things running. Vernier-Palliez replied that he could not because he was going to study international relations and become a diplomat. His chief prevailed on him to come for 6 months and one there, he stayed for 36 years becoming the chief executive officer of the company. At that point, fate in the person of President Mitterrand intervened and appointed him Ambassador of France to the United States. His youthful ambition was realized after all. Whether it was the twist of fate or the twist of chance, Bernard Vernier-Palliez's friends in Washington are glad that it happened that way.

As Ambassador Vernier-Palliez completes his tour of duty and prepares to depart from Washington, Mrs. Mathias joins me in extending a farewell to him and Mrs. Vernier-Palliez together with our best wishes for their health and happiness in the years ahead.

SENATOR JENNINGS RANDOLPH

Mr. GORTON. Mr. President, Saturday last my wife and I found ourselves in Elkins, WV, campaigning for a young man who hopes to succeed the senior Senator from West Virginia in this body. During the course of that parade my wife and I spotted my friend, the senior Senator from West Virginia, waved to him and called him by name. Senator RANDOLPH stopped the car in which he was riding, stood up and made a speech to those who were along the side of the street there at Elkins, WV, about our friendship, using many flattering words which I would not dare repeat in this Chamber.

Mr. President, that was typical, I believe, of the kind of man and the kind of Senator, Senator RANDOLPH is and has been for many, many decades in this body and the House of Representatives.

I regard it as a great honor that I have been permitted to serve in the U.S. Senate during the last 4 years of his distinguished career. I regard it as an even greater honor that I can call myself his friend, primarily because he is a friend to every Member in this body. For 2 years we served on the Committee on Environment and Public Works which I suspect is his great love in this body; for 4 years we have shared most of our Wednesday mornings together in the Senate prayer breakfast. During the course of that period of time I have learned an immese amount about the history of West Virginia, the history of this body, the U.S. Senate. I gained many insights into the men and the women who have served here. And all of this has been imparted with a gentleness and kindness, a forbearance and a consideration which is matched by few other Members of this body I suspect during its entire 200 year history.

I feel, and I believe that every Member of this body feels, that he or she is a better person by reason of association with the senior Senator from West Virginia. He epitomizes the ability to disgree on the policy issue without ever losing the maximum degree of personal consideration and personal support. He has been a wonderful and an outstanding Member of this body. He has been a friend I am certain to every person who has served in this body with him. I have been honored by this presence. I wish him God speed and a long and continued successful career. And I can say from the bottom of my heart that I will miss him.

Mr. RANDOLPH. Will my colleague yield?

Mr. GORTON. I am delighted to yield.

Mr. RANDOLPH. Mr. President, I was delighted to welcome my good friend Senator GORTON, and his wife

Sally to the Mountain State Forest Festival. Approximately 80,000 to 90,000 other men, and women, and children witnessed the parade. It is held each year in the area of West Virginia which is almost unmatched in beauty, grandeur in many other parts of the country even considering the beauties certainly of his State of Washington. I was surprised when I met them in my hometown.

I do constantly appreciate more than I can express tonight the privilege of working with him in the Committee on Environment and Public Works and for our associations in other groups here on Capitol Hill.

The poet said, "Parting is such sweet sorrow," and when I do depart this Hill on January 2 from the position of being a Senator from West Virginia, there will be a sorrow in a sense in leaving important work to which we have dedicated ourselves. We have been chosen by the people of our States to represent them in Congress.

It is the friends that I shall miss most of all, including the constructive senior Senator from Washington, who I think of so very often as an able person who works with other persons within the committee where we share a responsiblity. I emphasize I am very, very grateful for his generous words: I recall his visit to Elkins and the friendliness with which the people of West Virginia met him.

I hope you will return often. We will not try to match Washington against West Virginia as a State or vice Versa. But I will always remember, yes, I shall never forget, the opportunity, in fact the privilege, of standing by your side as a Member of this body.

Mr. GORTON. Mr. President, I thank the senior Senator from West Virginia for his thoughtful and considerate remarks.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

SENATOR JENNINGS RANDOLPH

Mr. WILSON. Mr. President, earlier in the 98th Congress the senior Senator from West Virginia drew gasps not only from the gallery but from many of his colleagues when he reminded us that he had been present as a Member of the House when social security was first voted upon. That caused many of us to reflect upon the lengthy and distinguished career of the senior Senator from West Virginia, and indeed the people of West Virginia have conferred upon him the ultimate accolade of roughly half of a century of public service in both Houses of the Congress, returning him time and again. The people of West Virginia are celebrated, Mr. President, for their courtesy and their hospitality. In a sense it seems they should be celebrated as well for their good judgment of the senior Senator from West Virginia—the people who have sent him here time and again.,

I think I can say on behalf of many of our colleagues that we are grateful to them for having conferred upon us the privilege of serving with him and having known this distinguished and amiable man whose courtesy is in the tradition of his great State and his great people; whose kindliness has won him friends on both sides of the aisle.

It is our regret that he cannot serve his Nation and the people of West Virginia and warm the hearts of another half century of his colleagues.

Mr. RANDOLPH. Mr. President, the words of my colleague from California are very, very much appreciated. He served ably in the Senate. I understand well his useful career in San Diego before he came here.

I again thank my fellow Senator for his comment.

TRIBUTE TO SENATOR TSONGAS

Mr. PRESSLER. Mr. President, before the 98th Congress adjourns, I wish to take special note of the retirement of Senator PAUL TSONGAS.

PAUL and I came to Congress together and served in the House of Representatives before being elected to this distinguished body. I think the world of PAUL and his wife, Nicola. He and I have served together on the Senate Foreign Relations Committee, where we both have worked hard to keep weapons out of outer space.

I have known him for 10 years and I am sorry to see that he is leaving the Senate. My years of friendship and work with him make it clear that the Senate is losing a person of great integrity. I admire his integrity and his effectiveness in this body.

I spent 4 years as a student in the State of Massachusetts, and I know many people there will receive him back warmly. I look forward to a continuing, long and close association with him and wish him the best of health for many years to come.

SENATOR JENNINGS RANDOLPH

Mr. JEPSEN. Mr. President, the retirement of JENNINGS RANDOLPH from the U.S. Senate marks the end of an era. The history he has seen unfold over the years is amazing. Indeed, he has played a key role in making history himself.

I often find myself listening in amazement when he talks about the days of Franklin Delano Roosevelt and the New Deal. To think that there is a Member still serving who was a Member of Congress during that time is testimony to his stature and the respect he has earned among his colleagues and the people of West Virginia.

The Senate will lose more than just a fine Senator when JENNINGS RANDOLPH retires, Mr. President. The Senate will lose the institutional memory of one who has served here so long. I will never forget the first time I heard him castigate the Senate for the disorderly way in which we vote. I could always anticipate his demand for order during a vote whenever I had the honor of presiding over the Senate.

I think I speak for all my colleagues when I say that we will miss you, JENNINGS RANDOLPH, but know that our thoughts and best wishes go with you in whatever you do. The question on everyone's minds as we anticipate your departure is: What are you going to do for the next 50 years?

SENATOR JOHN TOWER

Mr. JEPSEN. Mr. President, for the past 6 years it has been my pleasure to serve on the Senate Armed Services with my distinguished colleague from Texas, JOHN TOWER. Before arriving in the Senate I had heard a great deal about him but had never had the chance to work with him.

Whether it was in the late hours of a hard-fought conference committee meeting on the defense budget, or sitting through endless hours of testimony on military affairs, the chairman always came across as the iron man. His leadership on the Armed Services Committee was nothing short of admirable. When you consider the diverse philosophical and political opinions of those who serve on the committee, it is a wonder that we were able to get any business done.

But JOHN TOWER is a man who has built a career on getting things done. When he first ran for the Senate from Texas, people said he couldn't win. After all, they reasoned, he was running for the seat of Lyndon Johnson and there was no way he could win. Besides, it had been years since a Republican had represented the great State of Texas in the U.S. Senate. But he did.

When he ran for reelection, people said he couldn't win. But he did, Mr. President. He won because he believed in what he was doing and he stood up for what he believed in. You may not always agree with JOHN TOWER, but you have to respect his tenacity and grit.

I will miss the iron man of the Senate. I have learned a great deal from him over the years and I hope the lessons stay with me as long as the fond memories I will always carry with me.

SALVADORAN REFUGEES

Mr. JEPSEN. Mr. President, on May 22, 1984, I joined Senator DECONCINI

and others as a cosponsor of S. 2131, a bill to extend voluntary departure status to Salvadoran refugees, pending a complete investigation into the conditions of Salvadoran refugees and the circumstances of their return to El Salvador.

Serious questions have been raised about the conditions for refugees in El Salvador and in other Central American countries. It is estimated that 40,000 civilians have been killed since the outbreak of fighting in 1980. A recent U.S./AID study estimates that as many as 1 million Salvadorans are now displaced within their own country. The Salvadoran Government relief agency, CONADES, is now serving only some 300,000 of these internal refugees.

The election of Jose Napoleon Duarte to the Presidency of El Salvador has given us all hope that human rights abuses and random killing of civilians will be brought under control.

For those refugees who move to the neighboring countries of Honduras and Mexico, there remains a great deal of uncertainty as to their safety in the refugee camps as there is ever present friction between the Salvadoran refugees and the people of the host countries.

It is not unexpected that people faced with this situation would seek security in the United States. The Salvadoran population in the United States is estimated to be between 200,000 and 300,000. Here in the United States they live in constant fear of apprehension and deportation back to El Salvador. Although the Congress has expressed its sense that Salvadorans should not be deported back to the dangerous conditions which face them upon return, and that the President has signed the resolution into law, the administration has not seen fit to grant a status known as extended voluntary departure to Salvadorans now in the United States.

Extended voluntary departure status is a discretionary status usually granted on a group basis to people who temporarily cannot return home for fear of a life-threatening situation. Unlike political asylum, extended voluntary departure status is usually granted for 6-month intervals and is lifted when it becomes reasonably safe to return. Currently Ethiopians, Afghans, and Poles benefit from EVD status. Nicaraguans were given EVD for a time during the upheaval accompanying the overthrow of the Somoza regime and takeover by the Sandinistas. Altogether, EVD has been granted about 15 times since 1960.

Because of the uncertainties and fears about what awaits the some 100 Salvadorans who are deported each week by the Immigration and Naturalization Service, the Salvadoran refugees who are in the United States are frequently sheltered, fed, and employed by law-abiding citizens and church congregations who are torn between potentially disobeying the law, on the one hand, and casting out these refugees from extreme civil strife, on the other. It is because I am all too familiar with this dilemma as I read my constituent mail that I have cosponsored S. 2131, a bill to temporarily suspend the deportation of Salvadorans until questions about their status in Central America can be resolved. I am not an advocate of civil disobedience. I want to see the Salvadoran refugee problem in the United States addressed responsibly, in a humanitarian manner, and within the confines of the law.

SENATOR HOWARD BAKER

Mr. SYMMS. Mr. President, I would like to express my respect and appreciation for the distinguished majority leader, the Senator from Tennessee, my friend HOWARD BAKER.

It is often difficult for those of us who are not weighed down with the burdens of leadership to understand and appreciate the skills and judgment necessary to forge compromise from conflict. Nevertheless, we hold in esteem those who exercise that skill and apply that judgment with expertise. Of those who excel at this task of leadership, none do it better than HOWARD BAKER.

Perhaps his long years in the wilderness of the minority trained him in the use of patience and the art of conciliation. Perhaps these attributes flow naturally from his character. Whatever their source, they have given him the ability to rationally, calmly, and equitably mediate the most devisive disputes which have arisen in these chambers.

And I would have to say, Mr. President, there have been times when this Senator has been the cause of some consternation for our distinguished majority leader.

As a freshman Senator, I have learned much from Senator BAKER. Though I have not always agreed with him on matters of policy, I have never doubted his sincere commitment, nor ever questioned the fairness and integrity with which he has discharged his responsibilities.

Unlike many of my colleagues who have been in this distinguished body for many years, I have never known a Senate without the leadership of the Senior Senator from Tennessee. I know that his absence when we convene the 99th Congress will leave a void which will be hard to fill. I appreciate the privilege I have had to work with the distinguished Senator from tennesee and I wish him well.

I yield the floor.

Mr. BAKER. Will the Senator yield to me?

Mr. SYMMS. I yield to the Senator.

Mr. BAKER. Mr. President, I have tried hard not to be present when these sermons are preached. But at this time I wandered on the floor in order to try to take care of other business in the middle of a generous presentation by the Senator from Idaho. It would be unseemly indeed for me not to acknowledge those remarks and to tell him that I am grateful and that I will respond with more expressions of gratitude at a later time. But for the moment I thank him very much.

BOB CASE

Mr. JEPSEN. Mr. President, the lead editorial in today's Waterloo, IA, Courier, said it best. It summed it up in a way best fitting to the man it eulogized:

"He was a journalist's journalist."

The death today of Iowa political reporter Bob Case has left a void in Iowa and the Nation's journalistic circles.

Bob Case was a journalist, a public servant and friend.

Bob Case was a conservative and proud of it.

But his philosophical inclinations did not surface in his reporting. He was fair and he was objective, regardless of one's political persuasion and philosophical bent.

To me, Mr. President, that is the highest compliment one can pay to a newspaperman. Bob Case deserved it. Bob Case earned it.

He was the best, and he will be missed.

He will be missed by his colleagues on the Waterloo Courier and his journalistic profession. He will be missed because he was an honest journalist. Members of both political parties admired, respected, and trusted him.

With his passing today, we have all lost a friend.

Mr. President, I ask unanimous consent that an editorial, entitled "in tribute to Bob Case" be inserted in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

IN TRIBUTE TO BOB CASE

The word was inevitable. The waiting was difficult. Our beloved colleague Bob Case, 60, the veteran political reporter for this newspaper, had suffered a massive heart attack Monday. He passed away early today.

The death of "the dean of Iowa statehouse reporters" touches every journalist who knew him deeply. No reporter was more respected.

Messages of sympathy poured in from throughout the country—from national political leaders and from the top names in this industry.

In the Courier newsroom, there is the empty chair and the unopened mail on the desk. And the realization that things will never be quite the same without him.

When the message was first received Monday, it was not known how severely Bob had been stricken. Yet, you could sense that

a collective prayer was being offered in the newsroom for his well-being, even as his colleagues worked to get the newspaper out.

Bob would have understood that sense-of-caring, combined with the work ethic. He was a journalist's journalist. He was a no-nonsense worker. He was deeply admired by his colleagues for his wit, his integrity, and his dedication to reporting.

Even though he is gone, Bob will always be very near. You can see it in the eyes throughout the office—and there have been many blurried eyes this week. Reporters stop their work for a moment, their thoughts focusing on Bob in action. His presence, is still deeply felt in the newsroom everywhere. But it just won't be the same.

Bob was a prodigious reporter. When he became ill while serving on a political reporting panel Monday morning at NU High in Cedar Falls he fretted that this couldn't be happening—"I've got too many things to do."

Those stories will never be written, although as could be expected, Bob left reams of copy on political races that have yet to be printed.

Bob Case compiled an amazing journalistic record in his past nine years at the Courier.

When President Reagan came to Waterloo last summer, Bob got the exclusive interview on Air Force One. And during his career, he also interviewed two other presidents: Gerald Ford and Jimmy Carter.

He started his career in journalism at the Cedar Falls Record and then the Waterloo Courier after graduating from Drake University in 1949.

Then his passion for politics was realized as a chief administrative aide to Third District Congressman H.R. Gross, a job he held for 20 years.

He even tried his hand at elective office, unsucessfully running against Chuck Grassley in the Republican primary for the Third District Congressional seat.

But when Bob rejoined the Courier in 1975, this time as a political reporter, it was like coming home.

There is a truism in journalism that it is almost impossible for legislative aides to get back into this field because their reputation for objectivity is damaged.

But Bob within one year established his credibility as a fair, objective reporter. Letters of praise came in from both Democratic and Republican legislators—although some Republicans wondered privately if he wasn't bending over backwards too far to be fair.

Former State Sen. Bill Hansen used to shake his head at the way Bob worked tirelessy covering the Iowa Legislature for the Waterloo Courier. Bob's typewriter could be heard pecking away at night, sometimes as late as 1 or 2 o'clock.

Bob earned the reputation as one of the best political reporters in Iowa, if not the best. That is an assessment which would not make even his fiercest competitor jealous. He was the E.F. Hutton of Iowa politics. Even politicians who regularly complained about a carping press would be very attentive in what Bob Case wrote—and they would seek him out for his advice on major issues.

When reporters from around the nation came to Iowa for the caucuses or to test the political mood, it was a given that they would contact Bob Case for his insight. You lacked an important perspective on the Iowa political scene if you did not read Bob's Wednesday and Sunday columns in the Courier.

Now, he is gone. But not many of the people working in the newsroom accept that.

He is here. His influence will never go away. He works among us. His dedication, his skill, his honesty, his love of his profession, his shining example will always be before us.

SENATOR HOWARD BAKER

Mr. JEPSEN. Mr. President, as we wind down to the last few moments of the 98th Congress, we are bringing to a close what I think will go down in history as one of the finest careers of any majority leader to ever serve in that position in the U.S. Senate.

HOWARD BAKER has been what all majority leaders should be, stern when he has to, compromising when he must, and always considerate of the needs and desires of his 99 colleagues in the Senate. I am sure there were many mornings, particularly in the past few weeks, when he has wondered why he ever sought the position of majority leader.

But HOWARD BAKER has set a standard for the position that will guide the actions of future majority leaders, I am sure. It has been my pleasure to have had the opportunity to serve with a man like HOWARD BAKER and I only regret that the Senate will not have the benefit of his wit and wisdom in the future. But anyone who knows the distinguished majority leader knows that he is not going to retire to a law practice in Tennessee. Indeed, I have a strong feeling he might just be stopping in to visit Iowa a few times over the next couple of years.

HOWARD, Iowa is beautiful in the winter, particularly around February. I think I speak for a great many Iowans when I say that our State always looks forward to your visits and we look forward to seeing you again.

Mr. BAKER. Mr. President, the Senator from Iowa has done something to me that I have escaped so far. So far I have managed to not be on the floor when such generous remarks were made. This time it was necessary for me to be present and conduct a matter of business, and I listened. I have to confess to the Senator from Iowa that even though my innate modesty forbade me to listen before, having breached that wall I have resolved the determination not to hear such kind remarks, and when I did on this occasion I liked it.

I express my appreciation to the Senator from Iowa. But I warn him that such things as his remarks are habit forming—sort of like smoking cigarettes: It is OK if you do not inhale, and indeed, I have not inhaled.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. JEPSEN. I yield.

Mr. SYMMS. I thank the Senator for yielding.

The Senator from Iowa probably understates the case, but I say to the majority leader that I was with former President Ford one night when he was the speaker at a banquet. I will tell the Senators what he said after the great introductions were made. He said that he was reminded of a prayer.

He said: "If I were getting up to say a prayer now, I would say, Lord, thank all those people who said so many nice things about me; and, Lord, please forgive me for liking it so much." [Laughter.]

Mr. BAKER. The story is most apt and appropriate, Mr. President. I thank the Senator from Idaho.

RELIEF FOR THE DISABLED

Mr. HELMS. Mr. President, I was pleased to learn yesterday that President Reagan had signed into law legislation that will provide meaningful relief to nearly 3 million disabled citizens and their families who, since 1980, have faced possible loss of their benefits under the Social Security system.

I congratulate the distinguished chairman of the Finance Committee [Mr. DOLE] for his able leadership in this important effort. His skill in fashioning a bipartisan agreement on this reform bill clearly illustrates his commitment to all disabled Americans.

The new law offers disabled citizens assurances that their benefits will not be arbitrarily reduced or cut off. It provides the Social Security Administration, State agencies and the courts with clear standards for reviewing disability cases. Henceforth, the burden of proof will be on the Federal Government to show a definite improvement in medical condition before any benefits can be changed. And that is the way it should be, Mr. President.

The provisions of the new law expand upon a proposal I introduced in February 1983, which outlined a similar standard for reviewing disability cases. My bill would have prohibited any reduction in disability benefits, absent a showing by the Federal Government of improved medical conditions, or a mistake or fraud in the original determination of disability. In addition, it would have guaranteed a full hearing before an administrative law judge prior to any reduction in benefits.

Again, Mr. President, I congratulate Senator DOLE, as well as other Senators who took part in the development of this significant legislation. The disabled population of our Nation can now look forward to fair and sensible administration of the disability program. I thank the Chair.

SENATOR JOHN TOWER

Mr. SYMMS. Mr. President, with the end of this session of Congress we observe the close of a remarkable senatorial career. I would like to pay tribute at this time to a colleague who is witnessing his last session of Congress from the floor of this Chamber.

In his over two decades of service to the great State of Texas, Senator JOHN TOWER has distinguished himself not only in the eyes of his fellow Texans, but of his colleagues in the Senate and the people of the United States as well.

His steadfast support for the values and strength of this Nation will not be forgotten by those who cherish those values and know the vital necessity of that strength. Senator TOWER's leadership as chairman of the Armed Services Committee has been instrumental in the revitalization of this Nation, both spiritually and militarily. His knowledge and eloquence have distinguished him as one of the most effective and respected legislators in this body.

I feel privileged to have served for 4 years with the benefit of Senator TOWER's leadership and insight. I have fought beside him on many issues during that time. Though we did not win all of the battles we fought, I am sure that without his presence, we would have achieved much less.

Despite my sense of loss at the retirement of the distinguished senior Senator from Texas, I know that he will continue to be very active on behalf of interests that are near and dear to his heart and his State and Nation. I am sure I am joined by my colleagues when I wish Senator TOWER the best of luck as he leaves this Chamber.

UNIFORMED SERVICES FORMER SPOUSES PROTECTION ACT

Mr. MURKOWSKI. Mr. President, the recently approved fiscal year 1985 Defense Authorization Act conference report contains an important amendment to the Uniformed Services Former Spouses Protection Act of 1983.

Congress passed this act last year to authorize medical, exchange, and commissary benefits for a limited group of long-term former spouses. Under this act, benefits are currently authorized for an unremarried former spouse whose marriage covered at least 20 years of military service. This coverage is not retroactive and applies only to divorces finalized on or after February 1, 1983.

While this act was passed with good intentions, it discriminates against those who were divorced prior to February 1983 and those who may have been married 25 or 30 years but whose spouse may have been on active duty only 15 to 19 of those years.

An amendment offered by Senator TRIBLE, of Virginia, which I was proud to cosponsor, should remove the excessive restrictions which penalize former spouses who contributed to a military career and who are left unprotected by current provisions. This amendment removes the February 1983 effective date of the act so that all former spouses who have 20 years of marriage during which time the member served in the military for 20 years may receive medical, exchange, and commissary benefits, regardless of the date of divorce.

In addition, spouses who have 15 years of overlap between the length of marriage and years of service will be eligible for military medical coverage. All former spouses not meeting the 20/20/15 criteria will be provided the option of converting their military medical care coverage to a private health insurance plan.

The Congress has made significant efforts in the past to compensate servicemen and women for their sacrifices in order to attract and retain the qualified personnel vital to our national security. It has only been recently that Congress has appreciated the fact that the military spouse endures many of the same hardships of military personnel. In fact, they often forgo their own autonomy and careers in support of the Armed Forces.

I believe that the revised eligibility requirements remove the excessive restrictions which penalize former spouses who contributed to a military career and who are left unprotected by the current provisions of the Uniformed Services Former Spouses Protection Act.

These changes are overdue and well-deserved. I am proud to have been a cosponsor of this amendment.

OCS REVENUE SHARING CONFERENCE REPORT

Mr. MURKOWSKI. Mr. President, I rise in support of the conference report, although I do so somewhat reluctantly. I was an original cosponsor of S. 800, the Senate's version of OCS revenue sharing legislation, and I believe that OCS revenue sharing is clearly warranted and badly needed. However, I had hoped that we could have secured administration's support for the concept of OCS revenue sharing before reaching this point.

I am convinced, having watched some of the interactions between Interior Secretary William Clark and OMB Director David Stockman, that the administration's current opposition to the concept of OCS revenue sharing can be reversed. However, I fear the desire on the part of several of my colleagues to force the administration's hand at this time may have the effect of galvanizing the administration's opposition to OCS revenue sharing, thus endangering the prospects for the bill's eventual passage.

Despite my belief we might have been able to pass this bill next year with the administration's support, I realize that conference reports are privileged motions and Members are within their rights to press the leadership to call them up. That being the case, it seems clear enough that the Senate is going to work its will and adopt this measure at this time.

Regardless of my fears with respect to the advisability of bringing this measure before the President now, I am strongly supportive of what the bill is attempting to do. OCS revenue sharing makes sense. It's equitable. It may even have the effect of increasing, not decreasing, OCS revenues as OMB has stated.

From the standpoint of equity, the case for OCS revenue sharing is compelling. Federal OCS activity is the only Federal resource development program which does not provide compensation to States impacted by the development activity. The Mineral Leasing Act, the Taylor Grazing Act, and the Payment-in-Lieu-of-Taxes Program, all share a percentage of Federal receipts with the effected inland States. Coastal States, however, which bear almost all the burdens of OCS activities, receive no direct compensation even though the Nation as a whole shares in the benefits of increased oil and gas supplies and greater independence from expensive, unreliable sources of energy. If we are going to be equitable to the coastal States, we need OCS revenue sharing.

But my colleagues from inland States should not regard OCS revenue sharing merely as a boon to coastal States. The fact is, most of the Nation's newly discovered oil is expected to come from the Nation's OCS. The development of that oil is going to take planning and preparation on the part of the industry and government at the Federal, State, and local level. Over the past several years we have seen opposition to Federal OCS lease sales from some of the coastal States and local governments who must become partners in the OCS planning process. This opposition has taken the form of litigation and delay which has decreased Federal revenues and slowed our drive toward greater energy independence.

There is little doubt in my mind that much of this opposition has arisen due to fears over who might pay for the new infrastructure, schools, and roads, which will be needed in many coastal communities if oil is found off their shores. The measure before the Senate today will help to turn uncompensated risks into balanced opportunities, thus allowing the coastal States and local governments to share in the partnership role Congress intended

when it passed the OCS Lands Act and the Coastal Zone Management Act. To the extent that this State-Federal partnership is strengthened, OCS leasing will proceed smoothly and more expeditiously, thus enabling us to strive toward a greater degree of energy independence. That, of course, will benefit everyone, whether they reside in an inland State or a coastal State.

U.S. FISHING INDUSTRY LEGISLATION

Mr. STEVENS. Mr. President, two amendments of great importance to the U.S. fishing industry have been sent to the desk.

One of these amendments will establish a National Fisheries Marketing Council. This Council will assist the U.S. fishing industry in developing a coordinated program of research, education, and promotion to expand markets for fisheries products.

The concept of a national fisheries marketing council has been studied by this Congress for nearly 2 years. My bill to establish such a council, S. 2160, has undergone two sets of Senate hearings and has been extensively reviewed by groups representing virtually the entire seafood processing and harvesting industry. S. 2160 was reported to the Senate from the Commerce Committee by unanimous consent. I have worked long and hard with my colleagues from New England and other regions of the country to address the concerns of their fishing industry constituents. The final product of our labor is, I believe, compromise legislation that will provide economic benefits to the entire U.S. seafood industry. This legislation will also provide our country with public health benefits as well.

The fisheries marketing and promotion council established by this legislation will address a longstanding problem in the U.S. seafood industry. Our seafood industry has been described by marketing authorities and industry experts as "undermarketed." A fragmented and poorly organized seafood industry has been unable to mount an effective program to educate consumers in the United States, and in other countries, of the benefits of seafood consumption. The national fisheries marketing council established by this amendment will enable the fishing industry to develop a coordinated program of education and promotion that will influence consumer tastes and preferences on a national and international scale.

Encouraging the consumption of fish products in our country will benefit public health. Current research results indicate that an American diet high in fish and fish oils may reduce the incidence of cardiovascular disease. Increased acceptance of fish products by American consumers could, therefore, help to check the spiraling cost of health care.

The U.S. fishing and processing industry needs this legislation. The potential world market for U.S. fish products is vast, an economic stimulus that increased demand for our fish products would provide to the economies of our coastal regions is great. Some of those coastal regions are currently suffering economic hardships as a result of imbalance in the supply and demand of seafood products. Establishment of a fisheries marketing council will help the industry to solve this problem.

I also bring to my colleagues' attention a second amendment of special importance to the fishing industry of the North Pacific region. This amendment would expand the role of the International North Pacific Fisheries Commission in coordinating research and management activities among nations with fishing interests in the North Pacific region.

Since the International North Pacific Fisheries Commission was established 31 years ago, significant changes have occurred in patterns of fishing and jurisdictional boundaries in the North Pacific. New fisheries have developed, and many additional nations have become involved in regional harvesting activities. A great need has developed for one body to coordinate the fisheries research and management activities of all nations engaged in fishing for all North Pacific fish stocks. Last year, during their annual meeting, the U.S. section of the INPFC unanimously recommended that Congress provide expanded authority for scientific symposia. This amendment would give the International North Pacific Fisheries Commission the authority to hold international symposia and conferences, and to provide other forums for the exchange of scientific information. This expanded authority is needed to ensure the protection and wise management of fish stocks in the North Pacific.

Mr. President, passage of these two amendments is of great importance to the continued development of our country's fishing industry.

Mr. President, I also ask unanimous consent that the statement of Elmer E. Rasmuson, Chairman of the INPEC at last years meeting, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

COMMENTS BY MR. ELMER E. RASMUSON

Fellow Commissioners, distinguished guests, ladies and gentlemen:

This meeting marks the fifteenth which I have attended as a member of the International North Pacific Fisheries Commission. It is also my last, as I have asked to be retired. Therefore, I believe it appropriate to comment on the development of the INPFC during this period, as I have observed it, including some view of the opportunities in the future, not only for this Commission but in the general field of international fishery management.

When the concept of extended jurisdiction over fisheries was being adopted in the '70s by most maritime nations, a serious question arose as to whether the INPFC continued to have a significant mission to perform or should it be allowed quietly to fold up and disband. The matter was seriously considered by each of the national sections and fortunately the unanimous decision was to continue it, albeit in modified purpose as stated in the amended Convention of April 25, 1978.

The essential declaration by the three signatory nations is ". . . that the Convention has served to promote and coordinate scientific studies relating to the fishery resources of the North Pacific Ocean and its adjacent seas, and has aided in the conservation of these fishery resources."

It is this reliance on scientific data as the foundation of management decisions that is the core of the INPFC. It was not always so. The "abstention line" is unique to this Convention as a management tool. If it had not been regarded as "provisional" there would have been no need for additional scientific study. We would have had simply a legal boundary line for fishing salmon and halibut and little need for an active Commission.

It was a wise decision not to create a scientific staff attached to the Commission itself but rather to rely on the research work of scientists from the three nations. Thereby the Commission has the benefit of independent review and analysis by scientists of various interested countries.

It is well that the primary concern of fishery scientists is for the stocks and their biological survival in a complex environment. The social and economic concerns come afterwards. We thus start our management discussions from a basis of substantial concensus. Human and national interests have a proper place in management decision but it is fortunate that we have a beginning point of unity with a high degree of constancy.

The INPFC occupies a unique position as the only scheduled point of reference for scientists of the three nations in considering research findings in the North Pacific. Since more than the three treaty nations harvest in the North Pacific, it is appropriate and indeed logical that each fishing nation should be obliged to develop and furnish some information for the betterment of the fishing management.

This can be done as a condition for receiving a fishing permit within the jurisdiction of the appropriate nation. But this is not a proper substitute for the exchange of findings and judgments of scientists assembled at a common meeting time and place. Actually the INPFC is needed more than ever under extended jurisdiction. Each nation uses its own scientists in making management decisions that effect not only its own nationals but those of other countries. It is only under the INPFC that scientists of other nations can freely present and explain their findings.

This argues for more symposia with more nations involved. Such procedure would permit a smooth transition, when deemed desirable, into this international organization with broader membership contemplated under the provisions of Article III (1) b and Article IV of the Convention. With respect to the enormous field of non-anadro-

mous species of the North Pacific, only the INPFC has the authority and responsibility to do the job.

Indeed a major problem facing the Contracting Parties and the Commission today is that of how to deal with other species and with other fishing nations in the Convention area. For example, the fisheries for squid and other pelagic species by nonmembers of the INPFC create need and responsibility for research, conservation and management. In addition to the directed fisheries, there will always be concern for the impact on anadromous and other species of concern to the Commission.

Probably as a consequence of reliance on scientific research, with new problems requiring new solutions, the original legalistic approach with emphasis on a few species and concentration on technical violations has given way to a spirit of cooperation in pursuit of a common goal. We must always bear in mind that the Convention is an agreement and covenant between friends. Sensitivity, understanding, patience, tolerance, mutual respect and esteem are indispensable to continuances of a successful relationship.

In this vein, I wish to express special appreciation to the Japanese section for their cooperation in responding in recent years to the positions of the other sections by various domestic measures. The Commission is interested in results, not methodology. This is further proof that fisheries may be managed in cooperation by sovereign nations.

This spirit of flexible cooperation is demonstrated in the evolution of our meetings. They have become shorter in time but more productive in results. Much of this credit is due to the increased use of our working lunches. This permits a clear identification of any nation's concerns, followed by informal meetings where the issues may be thoroughly discussed. Final decision comes after checking back with advisers, industry representatives and, in some cases, our governments. The success of these meetings flows from the attitude of each section in being sincerely motivated to resolve issues, not evade them.

Throughout my tenure of office I have been impressed with the admirable cooperation and dedicated service from our Secretariat. Each nation has been represented in the choice of Executive Director. Never have I observed any national bias but rather a submerging of origin in the joint tasks at hand. This complete confidence in our Secretariat and in recognition of the development of the team concept, are evidenced by the general invitation to the Executive Director for his presence at the working lunches.

By our actions, we may conclude a strong endorsement of the Commission's approach to its fishery problems. This involves clearly stipulated responsibilities and agreed long-term objectives, programs and procedures. This has been happily facilitated by long-term continuity of members, scientists and advisers which stimulates understanding, friendship and mutual confidence along with a knowledge of limitations and the stability of an international treaty.

The support and success of the INPFC are in sharp contrast to the disappointing results of some attempts at bilateral accords. These frequently are ad hoc in mission and negotiated in a confrontation atmosphere by constantly changing officials. I urge that the Commission members stress to their respective governments the benefits of using the INPFC personnel and concepts even in bilateral negotiations.

This longevity in service confers great personal benefits to us all. We gain knowledge and experience useful in other forums. Above all we develop friendships which are a personal treasure.

Many of you know that Roy Jackson, a former Executive Director of the INPFC, is engaged in developing an interpretive history of the INPFC. Thank you for your assistance. Our governments, fishing industries, Commission members, scientists and advisers have great investments in the INPFC. It is only prudent to maintain and expand this cumulative wisdom and experience for future fishery management. May the future build on our work as we have on the past. Life is truly a relay race in which each runner passes on the baton to his successor.

And now it is time to say "Goodbye," but only in an official sense. I won't try to thank you by name because you are all my friends. I will never lose my interest in fishery matters because fishery people, once "hooked" stay that way the rest of their lives.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

ENROLLED JOINT RESOLUTION SIGNED

Under the authority of the order of October 9, 1984, the Secretary of the Senate, on October 10, 1984, during the recess of the Senate, received a message from the House of Representatives announcing that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 663. Joint resolution making further continuing appropriations for fiscal year 1985.

MESSAGES FROM THE HOUSE

At 5:38 p.m. a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the following bill:

H.R. 3942. An act to facilitate commercial space launches, and for other purposes

The message also announced that the House agrees to the amendments of the Senate to the following bills:

H.R. 2300. An act to provide retirement equity for former spouses of civil service retirees, and for other purposes; and

H.R. 5760. An act to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, Arizona.

The message further announced that the House disagrees to the amendment of the Senate to the bill (H.R. 6027) to clarify the application of the Clayton Act to the official conduct of local governments, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. RODINO, Mr. BROOKS, Mr. EDWARDS of California, Mr. SEIBERLING, Mr. HUGHES, Mr. SYNAR, Mr. CROCKETT, Mr. SCHUMER, Mr. FEIGHAN, Mr. FISH, Mr. MOORHEAD, Mr. HYDE, Mr. SAWYER, and Mr. LUNGREN as managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendment of the Senate to the bill (H.R. 5504) to apportion funds for construction of the National System of Interstate and Defense Highways for fiscal years 1985 and 1986, to revise authorizations for mass transportation, to expand and improve the Relocation Assistance Program, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ANDERSON, Mr. ROE, Mr. BREAUX, Mr. MINETA, Mr. LEVITAS, Mr. OBERSTAR, Mr. SNYDER, Mr. HAMMERSCHMIDT, Mr. SHUSTER, and Mr. STANGELAND as managers of the conference on the part of the House.

The message further announced that the House has passed the following bills, without amendment:

S. 2583. An act to authorize U.S. participation in the Office International de la Vigne et Vin (the International Office of the Vine and Wine); and

S. 2947. An act to designate the lock and dam on the Warrior River in Hale County, Alabama, as the "Armistead I. Selden Lock and Dam".

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 11. Concurrent resolution expressing the sense of the Congress concerning the obligations of the Government of the Soviet Union under international law with respect to human rights.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:
